FOUR IN 40 FORUM

What is the outlook for SA’s water dependant ecosystems?

Presented by the Water Research Centre and the Department of Environment, Water & Natural Resources

Tuesday 26th August, 2014

1:15 pm - 2:15 pm

Flinders Street Baptist Church Hall
65 Flinders St.

Presentations

- Projected changes to South Australian streamflow due to climate change, Seth Westra, School of Civil, Environmental & Mining Engineering University of Adelaide
- Projected changes to the surface water resources of Kangaroo Island associated with climate change. Alex Osti, DEWNR
- Predicting the risk of climate change to groundwater dependent ecosystems – a case study in the South East of SA, Claire Harding, DEWNR
- Linear vs non-linear responses in groundwater-dependent ecosystems - considering the dynamics of change, David Deane, School of Earth & Environmental Sciences, University of Adelaide:

ALL MANAGERS AND RESEARCHERS WELCOME TO ATTEND AND JOIN IN THE DISCUSSION

Tea and coffee available

Please register by the 25th August, 2014

Four in 40 forums are a collaboration between the Water Research Centre, the University of Adelaide and the Department for Environment, Water & Natural Resources, where 4 speakers each speak for 10 minutes on their research and its complications, followed by time for discussion.
