Pathways to completion of a higher degree by research for a full-time candidate

### Doctorate (max 4 years)

- **0 months**
  - Start Candidature

- **0-1 month**
  - Complete Local and Online Induction

- **6 months**
  - CCSP and Research Proposal

- **12 months**
  - Major Review

- **Year 2+3**
  - Annual Review due 31 October

- **3-3.5 years**
  - Thesis Submission

- **Max 4 years**
  - Completion

### Masters (max 2 years)

- **0 months**
  - Start Candidature

- **0-1 month**
  - Complete Local and Online Induction

- **6 months**
  - CCSP and Research Proposal

- **12 months**
  - Major Review

- **Year 2**
  - Annual Review due 31 October

- **1.5-2 years**
  - Thesis Submission

- **Max 2 years**
  - Completion
2016 marks the second decade in the history of the Research Student Handbook and it will also mark a year of considerable change. As many of you will know, the Federal Government has announced a new innovations agenda which will challenge universities to ensure that they work closely with industry to develop and commercialise their research outputs. In addition, universities will be asked to do all they can to ensure that doctoral and masters graduates are career ready and will be ready to contribute to the national innovation agenda. You will hear much more of this early in the New Year through the AGC newsletter which will be promoting new courses and training opportunities.

In addition to responding to the Government initiative, the University will begin to introduce new requirements to meet higher expectations in regard to compliance and reporting. This will first impact Research Students via the requirement to acquire an ORCID number as a unique researcher identifier and to also lodge a data management plan. You can read more of this in the following pages.

The other big change is of course that I shall be taking over the role of Dean of Graduate Studies following the retirement of Professor Richard Russell who served in that role for eleven years. Many of you I know worked with Richard to resolve problems and I can assure you that my door, like his, will be always open.

This Research Student Handbook fulfils a number of very specific roles:

Firstly, it records a set of procedures that are used to interpret and implement the appropriate degree rules. This is important as it ensures all students and staff are treated equally.

Secondly, the handbook explains to students how the University addresses issues of Commonwealth regulations in as much as they impact on student wellbeing and activity.

Thirdly, the handbook provides guidance to students on how to solve problems which may arise during candidature and outlines the resources available to assist students.

In broad terms, practices relating to research training and research supervision at the University of Adelaide follow the guidelines set down by Universities Australia and the Committee of the Deans and Directors of Graduate Studies (DDOGS).

As a research student, you will have the opportunity to contribute to the character of our University through the research you undertake, the networks you form (both within and external to the institution) and by the feedback you provide to us, during your candidature and on completion, about your student experience. It is my sincere hope that you will take these responsibilities seriously and assist us to further promote the reputation of our University as an exciting and challenging research environment.

For your convenience, where new information has been introduced since 2015 and where the Handbook has been updated for 2016, the relevant sections of the Handbook are labelled with ‘new’ and ‘updated’ respectively.

Writing and producing a handbook of this type requires a great deal of planning and work. Therefore, I would like to acknowledge the work of Ms Donna Gould, Deputy Director of the Adelaide Graduate Centre, who has been responsible for revising this eleventh edition.

Once again, we would welcome any feedback that could improve future editions.

Professor John Williams

</table>
Glossary of terms
AOF refers to the Australian Qualifications Framework. The AOF establishes the quality of Australian qualifications. The AOF is the national policy for regulated qualifications in the Australian education and training system. It incorporates the quality assured qualifications from each education and training sector into a single comprehensive national qualifications framework: www.aof.edu.au/

AHEGS refers to the Australian Higher Education Graduation Statement. The AHEGS describes higher education qualifications in an easily understandable way, by including descriptions of the nature, level, context and status of the studies undertaken. Candidate means a person enrolled for a higher degree by research at the University of Adelaide. The terms ‘candidate’ and ‘student’ are used interchangeably in this document.

REDC refers to the Research Education Development Committee established by the Academic Board.

Co-supervisor refers to a member of the supervisory panel who is a University staff member or titleholder and who is not the principal supervisor.

Domestic applicant/candidate refers to an applicant/candidate who is an Australian or New Zealand citizen, or who holds permanent residency status in Australia.

DIBP refers to the Department of Immigration and Border Protection. DI refers to the Department of Industry ESOS refers to the Commonwealth Education Services for Overseas Students Act 2000 which provides consumer protection to international students and requires the University to advise DIBP if students breach their visa conditions.

External supervisor refers to a member of the supervisory panel who is not a staff member or titleholder of the University and who is not the principal supervisor (includes visitors).

Graduate Centre refers to the Adelaide Graduate Centre, the area responsible for the management and administration of research education at the University. The terms Graduate Centre and Adelaide Graduate Centre are used interchangeably in this document.

Head of school refers to the person who has overall responsibility, including the responsibility to certify theses for examination for higher degree by research students within the ‘School’.

Half-time candidature refers to a halftime (0.5 FTE) study load.

Higher degree by research refers to any master’s or doctoral degree (PhD/professional doctorate) that comprises a minimum of two-thirds of its assessable content by research.

International applicant/candidate refers to an applicant/candidate who is not a citizen of Australia or New Zealand and who does not hold permanent residency status in Australia.

Milestone refers to any task, course or review of progress, which candidates are required to complete during their candidature.

Master by research refers to a master degree that comprises a minimum of two-thirds of its assessable content by research.

Panel refers to the candidate’s supervisory panel: a panel comprises the principal supervisor and one or more co-supervisors.

Parchment means the certificate of qualification awarded by the University following the conferment of a degree. The terms ‘parchment’ and ‘testamur’ are used interchangeably in this document.

PhD refers to the 100% research degree of Doctor of Philosophy.

Postgraduate coordinator refers to the person who, under the direction of the head of school, will oversee the work of all the higher degree by research students in the school.

Principal supervisor refers to a member of the supervisory panel who is a University staff member or titleholder and who has been appointed by the head of school to have the primary responsibility for the supervision of a candidate.

Professional doctorate refers to a doctoral degree that comprises a minimum of two-thirds of its assessable content by research and which is specifically aimed at practitioners in the field.

Provisional candidate refers to a person who is enrolled in a higher degree by research and is within his/her first 12 months of a higher degree by research or half-time equivalent, and who has not yet satisfactorily completed the major review of progress.

Remote candidate refers to a student who undertakes his/her degree primarily in an external mode of study.

The Research Training Scheme (RTS) is the program under which the Department of Industry provides block grants, on a calendar-year basis, to support research training for domestic students undertaking doctorate and master’s degrees by research. Students supported under the RTS are exempt from payment of student contribution amounts and tuition fees for a maximum of four years for a doctorate or two years for a master’s by research or half-time equivalent.

Review of progress refers to any programmed review of progress undertaken by a candidate, including the major review, annual review, minor review and such other reviews that may be instigated by the head of school or the University.

School refers to the academic organisation unit in which higher degree by research students are enrolled: this may be a school or discipline, depending on the structure of the faculty concerned.

Student means a person enrolled for a higher degree by research at the University of Adelaide. The terms ‘student’ and ‘candidature’ are used interchangeably in this document.

Testamur means the certificate of qualification awarded by the University following the conferment of a degree. The terms ‘testamur’ and ‘parchment’ are used interchangeably in this document.

Thesis means such materials and activities as are presented by a candidate for examination.

Timely completion refers to a completion arising from a thesis submission that occurred within 4 years (1,460 FTE days) from the commencement of candidature in the case of a doctorate and 2 years (730 FTE days) in the case of a Master by Research.
Some policies and procedures differ for domestic and international students, for doctoral and master by research students and for scholarship and non-scholarship holders; however, the majority of information is applicable to all research candidates. If you are an international or a master candidate or a scholarship holder, look for the headings ‘International students’, ‘Master students’, and ‘Scholarship holders’, after reading each main section of text. The information provided in these sections is specific to you and will normally supplement the general information provided in the preceding main section of text. In the event of any conflict, the specific information always takes precedent.

Location of forms

The Adelaide Graduate Centre maintains a list of all the forms that you are likely to need prior to and during candidature (e.g. applications for admission, leave of absence, change of attendance status). Given the number of forms that exist and the frequency with which they are updated, it is recommended you access the latest version on the web. All the forms you will need are organised by candidature stages and topics to allow you to easily find the ones that are relevant to your current stage of candidature: www.adelaide.edu.au/graduatecentre/forms
The administration of higher degrees by research

The overarching decision-making body on all academic matters is the University Academic Board. Under the Board sit a number of key committees which undertake much of the routine work of the Board and present recommendations to it for consideration. Of these, the University Research Committee (URC) chaired by the Deputy Vice-Chancellor Research (DVC-R) provides an interactive forum for discussing, developing, implementing and disseminating positions on research and research training. The URC has a series of subcommittees charged with specific responsibilities.

The Research Education and Development Committee (REDC) is a sub-committee of the URC and the key body responsible for addressing policy and academic matters relating to research training and higher degree by research students. REDC in turn devolves routine administrative matters to the Adelaide Graduate Centre and executive authority to the Dean of Graduate Studies.

Two other important matters are devolved to the Student Matters Sub-committee (SMS) of REDC. These are the determination of examination outcomes where examiners’ opinions diverge, and the resolution of complaints as specified under the University’s student grievance resolution process.

The awarding of scholarships both domestic and international is approved executively by the DVC-R, on behalf of URC, on recommendation from the Graduate Scholarships committee.

Understanding the structure of the academic administration of HDR students is important as it clearly enables students to identify the venue where particular issues should be addressed. It also explains the administrative role of the Adelaide Graduate Centre within the Division of the DVC(R). Details of various committees and their functions will be further discussed later in this handbook.
Support structures for higher degrees by research

Useful contacts

The Adelaide Graduate Centre
graduate.centre@adelaide.edu.au

The Graduate Centre is responsible for the management and administration of research education at the University of Adelaide including:

- admissions
- enrolments
- candidature
- scholarships
- thesis examination.

During the course of your candidature you are likely to get to know the Graduate Centre very well. It is the first area to contact whenever you have a question about your research program, candidature or scholarship. If you’re not sure whom to ask or where to go, try the Graduate Centre; the helpful and friendly staff are always available to assist you.

The Adelaide Graduate Centre
Level 6, 115 Grenfell Street
The University of Adelaide
SA 5005, Australia
T: +61 8 8313 5882
F: +61 8 8313 5725
E: graduate.centre@adelaide.edu.au
or agc.international@adelaide.edu.au
(international admissions and scholarships)
or scholarships@adelaide.edu.au
(all scholarship enquiries)
W: www.adelaide.edu.au/graduatecentre/

Career and Research Skills Training (CaRST)

Through CaRST, the Graduate Centre provides a range of face-to-face workshop programs, online modules, individual consultations and resource materials that value-add to the research experience and deliver skills and knowledge essential to research success.
E: hdrtraining@adelaide.edu.au
W: www.adelaide.edu.au/carst/

The Faculty and School

Your main source of academic support during candidature will be your supervisory panel. Each research student at the University of Adelaide has a principal supervisor and at least one co- or external supervisor. Your principal supervisor has the primary responsibility for coordinating your supervision. In addition, the head of school and your local postgraduate coordinator have significant responsibilities for research higher degree students. Your role and responsibilities and those of the head of school, postgraduate coordinator and your supervisors are discussed later in this guide and summarised in Appendix 2. A list of current postgraduate coordinators may be viewed at: www.adelaide.edu.au/graduatecentre/staff/postgraduate-coordinators/pgc-list/
Hub Central and Ask Adelaide
www.adelaide.edu.au/hub-central/
Situated in the heart of the University’s North Terrace campus, Hub Central is the ‘front door’ to the University and the Ask Adelaide staff working as part of the Hub Crew provide an initial point of contact and first point of call for support services for students. Hub Central covers 10,500sqm over three levels and facilities include: 11 project rooms, 11 project booths, student lounges with moveable furniture, two information service areas, a student kitchen, two Skype booths and a news bench, two training rooms, over 200 new computers, total wireless connectivity, print stations, lockers, the Maths Learning Centre and the Writing Centre. It blends these facilities with food and service retail outlets, merges seamlessly with the Barr Smith Library and provides connections through to lecture theatres and across campus.

Card Services
card.services@adelaide.edu.au
Card Services can be found at the Information Services Desk in Hub Central, Level 3, Barr Smith South, North Terrace campus. They have responsibility for the production of student identity cards and can provide advice and assistance regarding eligibility for an identity card, how and where cardholders may use cards, the issue of concession stickers, activation of building access and the verification of print and Internet quotas.

The Adelaide University Union
auu@adelaide.edu.au
The Adelaide University Union (AUU) provides students with essential, non-academic services on campus, for the effective representation of all students, and for the creation of a campus community and culture. The AUU provides a range of services including a casual employment service, advocacy, a resource centre, national events, emergency loans, special interest clubs and free tax and legal advice. Further details about the services the AUU provides and information on the savings that can be made by joining the AUU are available at www.auu.org.au

Research Education & Development Committee (REDC)/Dean of Graduate Studies
The Research Education and Development Committee (REDC) at the University of Adelaide has responsibility for overseeing all research higher degree policy development, including the legal responsibility for the award of doctoral degrees and master’s by research. The committee is convened by the Dean of Graduate Studies and includes a senior representative from each of the faculties, the Pro Vice-Chancellor (International), the Director, Adelaide Graduate Centre and the Director, Research Branch. A postgraduate student elected by the AUU is an ex-officio member of the committee.

The Student Matters Sub-Committee (SMS) of REDC
The SMS is responsible for decision-making in non-routine higher degree by research matters including:
> examination of theses
> candidature (e.g. extensions and recommendations for the termination of candidature)
> stage 2 appeals (where prescribed by the Research Student Handbook) and
> any matter referred for consideration by the Dean of Graduate Studies.
Where necessary, the SMS recommends changes to policy and/or processes for the consideration of REDC and the Adelaide Graduate Centre respectively. SMS is convened by the Dean of Graduate Studies and includes a senior representative from each of the faculties. A postgraduate student elected by the AUU is an ex-officio member of the committee. As for REDC, decisions are made by majority.

Faculty Higher Degrees Committee
Each faculty in the University has a higher degrees committee. The committee has responsibility for all research and coursework and higher degree matters within the faculty.

International students
The International Office
www.international.adelaide.edu.au/enquiries
The International Office is responsible for pre-arrival visa matters for international research student applicants, including the issue of the ‘Confirmation of enrolment’. However, applications for admission to higher degree by research programs are submitted to and processed by the Adelaide Graduate Centre and queries regarding admission and enrolment should be directed to the International Admissions officer. Post-arrival, the Adelaide Graduate Centre is also the primary academic and administrative contact for international students, while the International Student Centre provides additional practical and social support as highlighted below. Further information about the application process is available at: www.adelaide.edu.au/graduatecentre/admission

The International Student Centre
isc@adelaide.edu.au
The University recognises the additional challenges faced by many of our international students in relocating and adjusting to the Adelaide research and social environment. The International Student Centre (ISC) is committed to assisting students from a diverse range of cultural backgrounds to make the transition smoothly and to actively participate and succeed in their chosen degree program and beyond. The ISC provides a range of support services to cater for the needs of onshore international students. These include:
> an airport reception service
> assistance with finding temporary accommodation on arrival
> an orientation program
> assistance with contacting the Department of Immigration and Border Protection (DIBP) in relation to post-arrival visa issues
> overseas student health cover (OSHC) assistance
> support in the resolution of any financial, accommodation and personal difficulties
> social events including a regular Friday morning tea. Full contact details for the International Student Centre are available at the end of this handbook.

Professional and Continuing Education (PCE)
ibpr@adelaide.edu.au
PCE deliver the Integrated Bridging Program-Research, (IBP-R) a semester length program aimed at helping international doctoral higher degree by research students to develop an understanding of the academic, linguistic and cultural conventions of postgraduate study in their discipline. Further information is available on the web at www.adelaide.edu.au/integrated-bridging-program/overview/.
Useful services
For full contact details of service providers, please refer to the contact details section of this handbook.

Library
library@adelaide.edu.au
The University of Adelaide library comprises five separate libraries. As well as the main library on the North Terrace campus (the Barr Smith Library), there are four branch libraries: the Law and Elder Music libraries, also on the North Terrace campus, and the libraries at the Waite and Roseworthy campuses. In addition to providing orientation tours to familiarise students and staff with its services, the library has a website which provides access to online journals and databases and electronic books, as well as information on all services, including opening hours and contact details for all five libraries: www.adelaide.edu.au/library

There are specialist research librarians for every program offered by the University of Adelaide. It is recommended that you talk to your research librarian as early as possible so that they can assist you with preliminary work to define your thesis topic, and advise you about searching for information in electronic and print sources. Research librarians can also offer advice on choosing a bibliographic style, using the bibliographic software program Endnote, managing and storing your references and preparing the digital version of your thesis to be made available via the University’s digital research repository, the Library catalogue and the web. The names and contact details of the research librarians are available online at: www.adelaide.edu.au/library/guide/res_libs.html
In addition to the resources available to you at the University library, students have reciprocal borrowing rights from the other two South Australian university libraries (conditions apply). Further information is available at www.adelaide.edu.au/library/using/delivery/

Counselling service
counselling_centre@adelaide.edu.au
The Counselling service provides personal counselling in relation to issues that may be affecting your study. Professional counsellors are available to assist and help you to explore options towards resolving your difficulties. The service is free and confidential. Further information is available at www.adelaide.edu.au/counselling_centre

Disability service
disability@adelaide.edu.au
The University is committed to providing access and equity for students with disabilities or medical conditions. Students can use support services for both permanent and temporary disabilities of a physical, sensory, learning or psychiatric nature. If you have a disability, you are encouraged to contact a Disability Liaison Officer as early as possible to discuss your individual needs. The liaison officer can provide information and advice on support services to enable you to participate to your fullest potential in the academic and social life of the University. The contact details for Disability Services are available at the end of this handbook and further information is available at www.adelaide.edu.au/services/disability

Education and welfare officers
studentcare@adelaide.edu.au
The education and welfare officers (EWOs) provide confidential wide-ranging advocacy, counselling and welfare services to all University of Adelaide students. Services include:
> advocacy and representation in University and external grievances and complaints
> financial assistance including interest-free loans, emergency loans and Centrelink advice and small grants (conditions apply)
> general academic, personal and financial counselling and information
> referral and advice.
The EWOs are available between 9.00 am and 5.00 pm on a drop-in basis, but you can book an appointment if you prefer. They are located on the ground floor of the Lady Symon building at the western end of the Cloisters and can be contacted on 8313 5430 or by the email address given above.

Careers service
careers@adelaide.edu.au
The goal of the careers service is to assist students to manage their careers. The service aims to assist students to obtain an understanding of their personal qualities, skills and values as well as knowledge of the labour market, industry sectors and employers. The service can also help you to develop and implement a realistic career plan and to understand the process of career choices. The service markets the University’s graduates to employers. Further information is available at www.adelaide.edu.au/student/careers

Security services
security_office@adelaide.edu.au
The security office is located on the Hughes Plaza and provides a variety of assistance to students. Contact the security office if you:
> wish to take a free evening bus from the security office in Hughes Plaza to a destination up to 1.5km from the University
> have forgotten your bike lock and wish to borrow one for the day
> have lost or found property
> need an after-hours escort to accompany you to your car park or a near campus residence
> are interested in free self-defence courses
> require emergency assistance.
Further information is available at www.adelaide.edu.au/security

Technology services
servicedesk@adelaide.edu.au
Technology services manage the University’s shared IT infrastructure facilities, provide email and Internet access and maintain and operate administration systems and desktop systems. If you have any IT questions or problems, the Service Desk staff are very helpful. You can contact them on (08) 8313 3000 or by email at the address given above. A common username and password is used to access all University IT systems and services.

Adelaide email account
As a University of Adelaide postgraduate research student, you will have a University email address of the format: givename.familyname@adelaide.edu.au and a 15Gb email quota for research-related purposes. It is critical that you read email sent to your University email address regularly as email will frequently be used as the sole method by which academic and administrative staff convey important information to you. If you use an alternative email address, you must utilise the email forwarding facility to ensure that you receive all official emails from your University email address. Further information is available from Technology Services and on the web at www.adelaide.edu.au/technology/selfhelp/docs/diy-owa-redirectemails.pdf
Access Adelaide
www.adelaide.edu.au/access/
Access Adelaide is a web-based system that lets you view and amend your University record on-line. You can log on from any computer with Internet access – at home, at work, on campus, or at a café and view:
> your enrolment details for any term
> your candidature details, under the Research candidature menu item (including your research topic, start and end dates, details of your supervisors, and the due dates and completion status of your milestones (e.g. the core component of the structured program and annual review of progress)
> your academic transcript
> your personal details
> any fees, charges and payments on your University account
> any University invoices and
coursework results.
In addition, through Access Adelaide, you can change your address, telephone details and emergency contacts, change your password, make credit card payments online towards your University account, print evidence of your enrolment and manage your graduation.

MyUni
www.myuni.adelaide.edu.au
MyUni is the University of Adelaide’s online education service for students and staff. From MyUni students will be able to access discussion groups and course materials for any coursework courses in which they are enrolled e.g. the online postgraduate research induction and Turnitin. Some programs are also run through MyUni e.g. animal ethics training.

Printing and Internet quotas
The University treats postgraduate research students in the same way as staff members with regard to printing and Internet quotas. Consequently, enrolled students have free, unlimited access to the facilities within their schools for agreed research purposes www.adelaide.edu.au/its/quotas/internet/staff.html

Digital dial-up service
The University of Adelaide provides external access to the Internet and all University online IT services through its dial-up service. Students can access all the University’s online IT facilities from any location outside of the University at any time of the day for the cost of a local call. To set up dial-up, view the information at: www.adelaide.edu.au/its/online/dialup/

Online training courses and Microsoft Office certification
Basic, intermediate and advanced online training in Microsoft Word, Excel, Access and PowerPoint is available to research students free of charge. For a small fee, students may apply for Microsoft Office certification; certification can add value to your research qualification, demonstrate your job readiness and differentiate you from other graduates: www.adelaide.edu.au/technology/training/

Further information and assistance
You can find out more about all the IT service available to students at www.adelaide.edu.au/technology/yourservices/

Access to services for students who are not currently enrolled
In some instances, it may be possible for students who are not currently enrolled to access some or all of the privileges associated with active candidature. These privileges include IT services, use of the University libraries, building access and insurance. For further information, please refer to Appendix 1: access privileges for higher degree by research students outside candidature.
Financial matters

Tuition fees

Australian citizens and permanent residents

In 2016, it is anticipated that all eligible domestic students who enrol in a higher degree by research program at the University of Adelaide will be allocated a Research Training Scheme (RTS) place. An RTS place entitles the holder to up to four years of full-time Commonwealth funded study for a doctoral degree or up to two years for a master’s by research degree. Extensions of candidature beyond four or two years respectively may attract fees payable to the University.

Further information about the RTS is available from the Department of Education website: education.gov.au/research-training-scheme

Eligibility for an RTS place for second or subsequent awards If you are planning to enrol for a second or subsequent higher degree by research at the same level, you will not be eligible for an RTS place. Under exceptional circumstances, the University may consider offering you a fee scholarship, provided that at least five years have elapsed since the first comparable award was made and provided that your proposed project represents a major change in discipline. Please refer to the conditions of award for further information. Additional eligibility criteria apply.

Scholarships

Australian citizens and permanent residents

The University of Adelaide offers a range of scholarships for domestic higher degree by research students including Australian Postgraduate Awards (APAs), ARC PhD stipend holders, divisional scholarships, Master of Philosophy (no honours) scholarships and upgrade to PhD scholarships.

APAs are one of the primary sources of support for students undertaking research degrees at the University of Adelaide and are funded by the Australian Government through the Department of Industry. They are allocated according to the terms and conditions specified by the Department of Education, namely, on the basis of academic merit and in designated areas of research strength within the University. Australian Research Council PhD stipends are available to candidates who undertake a specific research project for which funding has been obtained from the ARC to support collaboration between the University and an industry partner. All ‘major’ scholarships provide an annual living allowance, which is renewable for the tenure of the award, subject to satisfactory progress. The tenure for a PhD scholarship is three years, with the possibility of extension for up to six months. The tenure of a master’s by research scholarship is two years, with no possibility of extension. International applicants who have applied for permanent residency may apply for ASI and AGRS scholarships but cannot apply for an IPRS. International applicants are not eligible to apply for APAs or divisional scholarships and the Adelaide Graduate Centre is unable to accept applications for these awards pending the granting of permanent residency. The conditions of award for international scholarships, including the IPRS, ASI and AGRS scholarships are available at www.adelaide.edu.au/graduatecentre/scholarships/research/multidisciplinary/

If you are unable to find the answer to your question, please contact the Graduate Centre for advice.

International students

The University of Adelaide has a range of scholarships available for outstanding international higher degree by research applicants including International Postgraduate Research Scholarships (IPRS), Adelaide Scholarships International (ASI) and Adelaide Graduate Research Scholarships (AGRS). The scholarships provide for tuition fees and a living allowance equivalent in value to an Australian Postgraduate Award ($26,288 in 2016). The tenure for an international PhD scholarship is three years, with the possibility of extension for a maximum of six months. The tenure of a master by research scholarship is two years, with no possibility of extension. International applicants who have applied for permanent residency may apply for ASI and AGRS scholarships but cannot apply for an IPRS. International applicants are not eligible to apply for APAs or divisional scholarships and the Adelaide Graduate Centre is unable to accept applications for these awards pending the granting of permanent residency. The conditions of award for international scholarships, including the IPRS, ASI and AGRS scholarships are available at www.adelaide.edu.au/graduatecentre/scholarships/research-international/opportunities/

The University of Adelaide has a range of scholarships available for outstanding international higher degree by research applicants.
Travel grants and overseas study scholarships
Postgraduate travel grants and scholarships are available to assist students wishing to undertake postgraduate research at universities and institutions in South Australia, interstate and overseas. Two types of assistance are available:

1. Research scholarships for Australian students at overseas universities
   These scholarships are intended for postgraduate students wishing to study at an overseas institution. Note that closing dates for applications for most scholarships for overseas study available through Australian sources fall between June and October each year.

2. Travel support for postgraduate students
   Travel support is available to postgraduate students enrolled at the University of Adelaide who wish to undertake travel for the purposes of research, either in South Australia, interstate or overseas. Further information is available at www.adelaide.edu.au/graduatecentre/scholarships/research-travel/

Employment and other commitments during fulltime candidature
If you enrol as a full-time candidate, you are expected to devote the majority of your time to your research program and to ensure that any work or activities you undertake that are unrelated, or peripherally related to your research project will not impede the progress of your research. Full-time research candidates are expected to keep the same hours as a member of University staff, (nominally, 36.75 hours per week). A maximum of eight hours per week of work/activity unrelated to your research project is recommended for a full-time candidate.

If you are a doctoral student, you will need to complete within 3 to 3.5 years to achieve a timely completion and if you are a master by research student, within 1.5 to 2 years. In order to achieve this goal and to maintain your work-life balance, you will need to carefully consider your commitment to activities outside of your research. These activities may be paid or unpaid and include those that could be considered professional development opportunities such as:

> avenues of research which, while interesting, are not necessary for you to complete in order to meet the required standard for your qualification
> laboratory tasks for the research group or supervisor, rather than your own research
> demonstrating, tutoring, lecturing and course coordination
> attending lectures to facilitate demonstrating, tutoring, lecturing and course coordination
> paid employment.

The University recommends that research students do not undertake any employment commitments and in particular, tutorial teaching, prior to completion of the core component of the structured program (six months from candidature commencement for full-time students). Keep in mind your goal of completing your doctorate or master degree as soon as possible and don’t be afraid to remind your supervisors too!

Scholarship holders
As a scholarship holder, the maximum amount of paid employment that you may undertake during normal working hours (Monday to Friday, 9:00am to 5:00pm) is eight hours per week. There is no limit on the amount that you can earn for employment that is not directly related to the research that you are undertaking. However, if your employment is directly related to your research in any way, the maximum earnings allowed will be up to 75% of the value of your (major) scholarship award. Outside of normal working hours, there is no restriction on the number of hours of paid employment that may be undertaken, providing that your supervisor is satisfied that it will not interfere with your progress. Scholarship holders who are interested in undertaking employment (paid or voluntary) within the above time restriction need to advise the Adelaide Graduate Centre before commencing work.

International students
Following commencement of your program, all research students with work rights are entitled to work an unlimited number of hours. However, regardless of the work rights attached to your student visa, it is important to note that international students are expected to study full-time (~37 hours per week). You will need to ensure that any work commitments do not interfere with the progress of your research and your ability to complete your degree within the required timeframe; consequently, no more than eight hours of work during the week is recommended.

Insurance for higher degree research (HDR) candidates
Subject to conditions, the University provides insurance cover for personal accidents; travel, public liability, professional indemnity and directors’ and officers’ liability to HDR candidates enrolled at the University. Further information is available in Appendix 3.

International students
The Department of Immigration and Boarder Protection (DIBP) requires all international students on student visas and their families (on ‘dependant’ visas) to have health insurance while in Australia. This insurance is called Overseas Student Health Cover (OSHC). OSHC helps you pay for medical and hospital care that you may need when you are studying in Australia. It also helps pay for most prescription drugs.

Please contact the International Student Centre with any questions relating to OSHC. Further information about OSHC is available at: international.adelaide.edu.au/life/visas/healthoshc/
Considerations in applying for a higher degree by research

Which degree should I choose?

The completion of a higher degree by research (HDR) at the University of Adelaide will provide you with the skills and experience to undertake a range of rewarding career opportunities. Employers recognise that the research ability and broad range of transferable skills which Adelaide graduates possess equip them well for challenging and diverse roles in industry, government and business, as well as in research and academic organisations. Choosing the right degree for you is an important decision and one that will be influenced by your career plans, personal circumstances and prior qualifications. We recommend that you discuss the options with the relevant school. Of course, plans and circumstances can change over time and the University of Adelaide provides you with the flexibility to adapt your study pattern accordingly; this may involve converting to half-time or external candidature, taking a short leave of absence from study or perhaps transferring to a more appropriate program.

Doctor of Philosophy (PhD)

The PhD is the basic qualification for a research career or academic position. The PhD involves three – four years of research for a full-time candidate or the equivalent in half-time candidature. In the course of completing the degree under appropriate supervision, candidates develop the capacity to conduct research independently at a high level of originality and quality and make a significant original contribution to knowledge in their chosen discipline.

A PhD thesis at the University of Adelaide may be prepared in one of the following formats:

1. Conventional written narrative presented as typescript
2. Publication
   - A thesis by publication may include publications that have been published and/or accepted and/or submitted for publication and/or unpublished and unsubmitted work written in a manuscript style.
3. Combination of conventional and publication formats
4. Major (creative, musical or visual) work (Volume 1) and exegesis (Volume 2)

Irrespective of the form of thesis presented, examiners will be looking for a candidate to:

- produce a clearly, accurately and cogently written thesis that is suitably illustrated and documented
- demonstrate a deep knowledge of the research topic
- relate the research topic to the broader framework of the discipline within which it falls
- demonstrate an independence of thought and approach
- make a significant and original contribution to knowledge by the discovery of new facts, the formulation of theories or the innovative reinterpretation of known data and established ideas.

Joint higher degree by research (HDR) programs between Australian higher education providers

Under the provisions of an approved jointly awarded PhD agreement, a PhD student at the University of Adelaide, who is a citizen of Australia or New Zealand, or a permanent resident of Australia, may divide his/her candidature between the University of Adelaide and an approved Australian Higher Education Provider (HEP) and, following the successful completion of an agreed examination process, be awarded a single doctoral degree that is awarded jointly by two institutions.
Choosing the right degree for you is an important decision and one that will be influenced by your career plans, personal circumstances and prior qualifications.

In order to provide students with the best possible research experience and to facilitate collaboration among the prestigious, research-intensive Group of Eight (Go8) universities, the University has signed a Memorandum of Understanding for a Go8 Joint PhD Program. In addition to the University of Adelaide, Go8 member universities are:

- Monash University
- The Australian National University (ANU)
- The University of Melbourne
- The University of New South Wales
- The University of Queensland
- The University of Sydney
- The University of Western Australia.

In order to be admitted as a candidate under a jointly-awarded PhD agreement, a suitably resourced project and adequate supervision must be available at each institution. Applicants are also required to satisfy the normal admission criteria at both the University of Adelaide and the partner institution. A jointly-awarded agreement must be established no later than the end of the first year of enrolment. Consequently, if you are interested in a jointly-awarded degree with your supervisors at the time of applying for candidature.

### Jointly-awarded HDR Programs with international collaborators (including the cotutelle)

HDR programs that are jointly awarded with an international collaborator are also available to University of Adelaide domestic and international research students. The University is working closely with a number of key international partners for the joint award of HDR degrees. Whilst the list below is not an exclusive list of potential joint-degree parties, it does provide an emphasis the University is anxious to support:

<table>
<thead>
<tr>
<th>Partner University</th>
<th>Fields of Research</th>
</tr>
</thead>
<tbody>
<tr>
<td>University of Freiberg (Germany)</td>
<td>Cancer and related biology</td>
</tr>
<tr>
<td>Shanghai Jiao Tong University (China)</td>
<td>Plant biosciences</td>
</tr>
<tr>
<td>University of Nagoya (Japan)</td>
<td>Medicine, medical sciences and biomedical engineering</td>
</tr>
<tr>
<td>University of Nottingham (UK)</td>
<td>Chemistry, plant biosciences, nutrition and food science</td>
</tr>
</tbody>
</table>

It is very important that students carefully read the conditions specified in the proposed joint-agreement before committing to the program; some joint-agreements have special conditions attached which are additional to the standard University of Adelaide requirements.

### What are the benefits of enrolling in an international jointly-awarded HDR program?

A jointly-awarded HDR program provides a mechanism to:

- enhance two way international research collaboration
- facilitate international study and experience for HDR students
- work in two countries and have access to the latest research equipment
- access new funding sources
- develop networks

International students wishing to apply for a jointly-awarded HDR with the University of Adelaide as their partner institution must demonstrate prior to application that:

- they are already enrolled in a HDR in an approved University
- they can satisfy the normal admission requirements (including all language proficiency requirements) at the University of Adelaide
- arrangements exist for an approximately equal sharing of candidature between institutions.

A jointly-awarded agreement between the University of Adelaide and a French university is also known as a cotutelle agreement. Enquiries concerning participation in cotutelle or other jointly-awarded doctorates should be directed to the Pro Vice-Chancellor (Research Operations) following review of the information provided in Appendix 4.

### The professional doctorate

The University offers two professional doctorates by research in the disciplines of education and nursing. Professional doctorates combine research, project activity and advanced coursework in a single program of study and are specifically aimed at practitioners in the field.

To qualify for a professional doctorate, a candidate is required to pass each component of the program individually and to complete any coursework or project requirements before submitting his/her thesis for examination.

### Master of Philosophy

The Master of Philosophy is offered in every faculty as the primary research master degree available to prospective research students. Candidates can choose to undertake the degree by either 100% research or, if available in their school, by mixed research and course work. A student who elects to undertake the MPhil by mixed research and coursework will complete one-third of the degree (15 credit points) by coursework and the remaining two-thirds of the degree by research culminating in the production of a thesis.

Programs are conducted over two years of full-time study (or the half-time equivalent) and students are trained in research methodology and techniques and are engaged in the critical evaluation of literature and results in the substantive area of the thesis at an advanced level. While Master of Philosophy degrees may include an advanced coursework component, the focus is on research.

Examiners of a Master of Philosophy thesis will be seeking evidence that the candidate has:

- a thorough understanding of the relevant techniques and methodologies in the field as demonstrated by a thorough critical review of the literature
- demonstrated competence in the chosen field through judicious selection and application of appropriate methodology to yield meaningful results
- demonstrated the capacity to evaluate critically these results
- presented a clear and well-written thesis.
International students

International students who enter the Master of Philosophy will undertake the mixed research and coursework stream of the program. Normally, the following core Integrated Bridging Program–Research (IBP-R) courses taught by the School of Education, will account for nine of the compulsory 15 units of coursework:

- Research Processes (3);
- Research Design (3); and
- Research Communication (3).

Elective coursework units may be selected from among relevant master by coursework or honours courses approved by your school. Exemptions from individual core course(s) may be granted following diagnostic testing at the start of your degree. Where exemption(s) are granted, you will be required to undertake additional discipline specific coursework in order to bring your total up to the required 15 units. If you are granted an exemption from all three core courses, you will be eligible to undertake the Master of Philosophy by 100% research if desired.

Master of Clinical Science

The Master of Clinical Science is available by 100% research or, by mixed research and 15 units of coursework. A Master of Clinical Science provides an introduction to clinically based research for candidates presenting with clinical qualifications and work experience. The objectives of the program are to:

- train candidates in the application of research methods during the conduct of an independent, supervised research project mutually agreed upon by the student, their supervisors and head of School and
- facilitate the candidate's ability to translate research into improved clinical outcomes.

Students enrolled in the Master of Clinical Science can choose to specialise in one of the following research areas:

- Nursing
- Medicine
- Dentistry
- Public Health
- Evidence Based Health Care or
- Counselling and Psychotherapy

To be eligible for entry to the program, students must have a minimum of two years approved professional work experience, in addition to completing to a satisfactory standard one of the degrees of the University of Adelaide listed below; qualifications from other institutions will also be accepted where the program of study undertaken and the academic standard reached are accepted as equivalent by the Research Education and Development Committee:

- the degrees of Bachelor of Medicine and Bachelor of Surgery
- a degree of Bachelor of Nursing
- a degree of Bachelor of Dental Surgery
- a bachelor degree in an appropriate field of study
- a relevant master by coursework degree
- a relevant master by research degree.

International students

As with the Master of Philosophy, international students are required to undertake the mixed research and coursework stream of the program and to complete the core IBP-R courses taught by the School of Education, together with discipline specific electives to the total value of 15 units.

Higher doctorates

The University of Adelaide offers seven higher doctorates: the Doctor of Dental Science; the Doctor of Health Sciences; the Doctor of Engineering; the Doctor of Science; the Doctor of Letters; the Doctor of Laws; and the Doctor of Music. Higher doctorates are typically awarded on the basis of a collection of works that have been published or accepted for publication.

Candidates for a higher doctorate are required to have a substantial association with the University of Adelaide and at the time of application, to have made an original contribution of distinguished merit to their disciplines over the course of their careers. Typically, candidates are mid-career professionals who have held a doctorate such as a PhD for a minimum of five years prior to their application.

Any enquiries about higher doctorates should be directed to the Adelaide Graduate Centre or the relevant head of school.

Entry requirements

The admission requirements for Higher Degrees by Research (HDR) are set out in the relevant set of academic program rules, as published in the University’s online calendar. The current rules are available under the Adelaide Graduate Centre Section at:

http://calendar.adelaide.edu.au
Admission to doctoral candidature is normally granted on the basis of a relevant bachelor’s degree with at least a second class honours (upper division) or a relevant master’s degree that contains a significant research component (normally at least 15 University of Adelaide credit points of research or equivalent, with at least 12 units attributed to dissertation). Coursework degrees that do not contain a significant research component are not acceptable for the purposes of admission to a PhD.

In some circumstances, the Dean of Graduate Studies may deem that other educational and research backgrounds are equivalent to honours for the purposes of admission. If you are seeking entry based on alternative qualifications, the key consideration will be that you have undertaken significant research training, leading to the production of a substantial written report such as a thesis or publication(s).

In addition to the formal academic requirements for admission, it is essential for you and your prospective school to consider a number of other criteria before a higher degree by research candidature is offered or accepted. For example:

- Is the school appropriate for your proposed research, and does it have the space, facilities and resources that your project is likely to require?
- Is the school able to provide quality, experienced panel supervision comprising a principal and at least one co- or external supervisor for the duration of the research program?
- Is there a sufficient level of similarity between your research interests and background and those of your prospective supervisors?
- Do you have the capacity to meet the ongoing time, logistical and other requirements of candidature (particularly if you are in employment, or are applying as a half-time or remote student or are intending to also pursue other studies)?
- Are you able to support yourself for the duration of your research program through receipt of a scholarship or other means? (Note that even if you are able to secure scholarship funding, the duration of your scholarship [3 to 3.5 years] may be less than that of your research program [up to 4 years].)
- Scholarship holders and (normally) full-time candidates are restricted to a maximum of eight hours of work per week during standard working hours.

If you have entry qualifications that are insufficient for direct entry into a doctoral program, in some cases it may be possible for you to enrol in a Master of Philosophy and, subject to satisfactory progress and the approval of the Research Education and Development Committee, to upgrade to doctoral candidature following completion of your first 18 months of study.

**Master’s students**

The admission requirements for the Master of Philosophy and the Master of Clinical Science are set out in the Academic Program Rules, located in the University’s online calendar: [http://calendar.adelaide.edu.au](http://calendar.adelaide.edu.au) and at [www.adelaide.edu.au/calendar/pg/agc/](http://www.adelaide.edu.au/calendar/pg/agc/)

In general, applicants may be accepted for a Master of Philosophy on the basis of the following qualifications:

- A relevant degree of bachelor completed at distinction average or higher
- A relevant honours degree at 2A or higher
- A relevant master by coursework (with less than 15 University of Adelaide credit points of research or equivalent) completed at a Grade Point Average (GPA) of 6.0 (Distinction level) or higher
- A relevant master by coursework with a significant research component (normally at least 15 University of Adelaide credit points of research or equivalent), with an overall GPA of 5.00 (Credit level) or higher and a GPA of 6.00 (Distinction level) or higher in the research component.

**English language proficiency requirement**

As English is the language of instruction at the University of Adelaide, proficiency in speaking, listening to, reading and writing English is essential. All applicants for a higher degree by research must provide evidence of their proficiency before an offer of a place is made. Evidence of a tertiary education at an Australian university is generally sufficient for this purpose. Alternatively, applicants may be required to submit the results of a suitable English language test which has been undertaken within two years of the date of the application.

Information about the University’s English language proficiency requirements is available at [www.international.adelaide.edu.au/apply/admission/](http://www.international.adelaide.edu.au/apply/admission/)

**How should I select my research topic and supervisors?**

Choosing a research topic, the school in which you will undertake your research and the supervisors who will assist you through the process of completing your degree are some of the most important decisions you will make. By thoroughly investigating your options before you commence candidature, you can avoid some of the more common difficulties that new students can face.

Before applying for admission, it is recommended that you discuss your proposed research project and how it matches with the research interests of your school of enrolment. It is not uncommon for a candidate in a laboratory-based discipline to be offered a choice of topic from a number of well-defined projects, consistent with the interests of the school’s research groups. Candidates in non-experimental fields may have the freedom to choose their own topic within wider limits.

In general terms, research projects undertaken in the University’s areas of research strength have the advantage of having a concentration of resources and facilities and a lively research culture which stems from a critical mass of good students and research staff. In addition, it is important to remember that not all research topics have the necessary scope for a higher degree by research. Others are too big to be completed within the timeframe for the degree and some topics may not be able to be supervised or resourced within the University.

Ensuring that you choose a research project that can be well supervised and resourced within your school of enrolment can prevent disappointment and wasted time later in candidature.

If you do not have particular supervisor(s) in mind, contact the head of school or postgraduate coordinator and ask who is likely to be nominated to supervise you and then arrange to meet or talk to your proposed supervisors to ensure that you are comfortable with the school’s choice and that they will have the expertise, experience and time required to supervise you well. Where possible, it is a good idea to talk to other members of the research group or school about your proposed supervisors and their track record of supervision and to ask other research students who are supervised by these staff whether or not they are happy with the amount of support they have received.
What are the University’s areas of research strength?

The University of Adelaide is a research intensive University and a member of the prestigious ‘Group of Eight’, which comprises Australia’s leading universities. Adelaide has a fine tradition of exemplary scholarship and ground-breaking research and is at the leading edge of knowledge, with research earnings consistently the highest per capita of any university in Australia. Adelaide is one of the top universities in Australia in terms of research output, research funding and quality of postgraduate research experience. Adelaide is recognised internationally for its research strengths in an array of areas including:

- engineering and environmental sciences (especially climate change and adaptation, water quality and engineering, soil and natural resource management, resources engineering and extractive metallurgy, petroleum engineering, energy technologies, civil engineering and automotive safety)
- biological and agricultural sciences (ecology and conservation biology, evolutionary biology, marine sciences, plant science, horticulture, oenology and viticulture, food and nutrition, genomics, biochemistry and cell biology and animal and veterinary sciences)
- humanities, law and creative arts (computer vision and visual technologies, distributed computing, pure and applied mathematics, statistics and communications and information networking)
- physical, chemical and earth sciences (especially astronomical and space sciences, photonics and optical physics, particle and nuclear physics and medicinal and biological chemistry)
- social and behavioural sciences (especially population and migration studies, demography and housing and social inclusion)
- medical and health sciences (especially paediatrics and reproductive health, population health, nursing, oral health, molecular genetics, medical microbiology, cancer, nutrition, cardiovascular health, psychology and neuroscience) In addition, the University has outstanding research teams spread across a wide range of disciplines.

Should I study full-time or half-time?

When you apply to undertake a doctorate or Master of Philosophy degree, you will be asked to nominate your preferred ‘mode of attendance’; in other words, whether you would prefer to be a full-time or a half-time student. While half-time candidature is appropriate for some candidates who would otherwise not have the time or financial resources to undertake a research degree, it is advisable to enrol as a full-time candidate where possible.

The pursuit of a higher degree by research is an engrossing, challenging and time consuming occupation and can be made more demanding where work and family commitments must also be juggled. Anyone carrying out research must, to a certain extent, ‘live with’ their research questions and problems until they are solved and given that full-time students normally need three to four years to obtain a PhD, the difficulties of half-time study are obvious. It is also worth considering the hidden risk of undertaking a half-time degree: will the results of a research project conceived seven or eight years earlier still have currency at the time of submission? In fast moving, experimental fields, the answer is likely to be no. An added advantage of full-time candidature is that you can fully engage with the research culture of the school and the University and interact daily on an informal basis with peers and academic staff in your school.

The availability of these support structures, together with the opportunity to gauge your progress against that of other students, can greatly assist you to keep your candidature on track for a timely completion.

International students

As an international remote student, you will be required to pay tuition fees at the full internal rate for any periods of time that you are studying in Australia. Fees are charged at 50% of the applicable full-time or half-time rate while you are studying remotely outside Australia.

Can I enrol in another program concurrently with my higher degree by research?

No, the University does not permit research students to enrol in another academic program at the same time as studying for a research higher degree.
Can I appoint a principal supervisor from a different school than the one in which I am enrolled?

Enrolment in a different school than your principal supervisor is not recommended as it can make the coordination of your supervision and the management of your progress more difficult. Consequently, this course of action is only permitted under exceptional circumstances, on the grounds that your research interests and those of your prospective principal supervisor are closely matched and that the research to be undertaken is appropriately identified with your nominated school of enrolment.

An application form to ‘Enrol Outside of Supervisor’s School’ should be lodged, where possible, together with your application form and is available at www.adelaide.edu.au/graduatecentre/forms/enrolment/

How do I apply for a higher degree by research?

Both domestic and international prospective higher degree by research students apply for admission and scholarships online. In addition to satisfying the academic requirements for admission, all applicants are required to satisfy the English proficiency requirements.

Further information, together with access to the online application system is available at www.adelaide.edu.au/graduatecentre/admission/

Following receipt of advice from the head of school about your suitability as an applicant and the availability of supervision and resources to support your candidature, a letter of offer (or refusal) will be forwarded to you. Generally, the time taken from application to the issue of a letter of offer (or refusal) is between two and four weeks.

International applicants

As an international applicant for a student visa, you must also provide assurance to the Australian immigration authorities that you have adequate financial resources to undertake your studies.

When should I apply for and commence a higher degree by research?

It is possible to apply for higher degree by research candidature at any time of the year. However, the University’s preferred start dates are January for students intending to start in Semester 1 (2 January–30 June) and July for students intending to start in Semester 2 (1 July–31 December). Commencement at other times will only be permitted, with the approval of the Dean of Graduate Studies, where a sound academic reason exists.

Further information about what the induction, CCSP, IBP-R and other ‘milestones’ entail, is provided in the ‘Candidature’ section of this handbook.

Scholarship applicants

The closing date for the major round of scholarship applications for domestic students (including Australian postgraduate awards and the majority of University scholarships) is 31 October each year. The closing date for the midyear round of scholarships for domestic students is generally required to commence study by 31 March of the year for which the scholarship is awarded. However, under special circumstances, an award holder may be permitted to commence study after 31 March but no later than 30 June.

Further information regarding domestic scholarships is available from the senior scholarships and finance officers in the Adelaide Graduate Centre.

International students

The University holds three international scholarship rounds for prospective international students. Two types of scholarships are offered in the scholarship rounds:

- international postgraduate research scholarships
- adelaide scholarships international

Further information, including the closing dates for each round, is available at: www.adelaide.edu.au/graduatecentre/scholarships/research-international/
Enrolment

Applicants who have been made an offer of a place in a higher degree by research program at the University of Adelaide will be forwarded a personalised enrolment form by the Adelaide Graduate Centre, with instructions on how to complete it.

The instructions are also available at [www.adelaide.edu.au/graduatecentre/forms/enrolment/](http://www.adelaide.edu.au/graduatecentre/forms/enrolment/)

After completing the required information on the front and back of the enrolment form, you will need to take the form to your school where the remaining details will be completed by your principal supervisor and head of school or postgraduate coordinator. The form should then be returned to the Adelaide Graduate Centre prior to the date nominated as the commencement date of candidature.

Processing of the enrolment form is undertaken by the Adelaide Graduate Centre and is normally completed within one week of receipt of the form. However, you should be aware that there may be a delay if enrolment is undertaken during the early part of the year when enrolment for many other students is also in progress.

An incorrectly completed form or missing information can cause delays in the processing of enrolments, so it is important that you obtain all the required information and signatures before lodging your enrolment form with the Adelaide Graduate Centre.

Following processing of your enrolment form, the Graduate Centre will send you a letter confirming the details of your candidature and specifying the due dates of the various milestones you will be required to complete.

An ‘authority to collect a University identification card’ (purple slip), and a ‘PIN number’ will also be included with your enrolment confirmation letter. The purple slip, when presented at Card Services, will authorise the issue of your student card and the PIN number will enable them to access IT services including your student email and Access Adelaide.

Master of Philosophy and Master of Clinical Science students only

If you will be undertaking your program by mixed research and coursework, the Adelaide Graduate Centre will enrol you into the research component of your degree as outlined above. You will still need to enrol into the coursework component of your degree in order to finalise your enrolment. After agreeing your coursework selections with your supervisors (and the IBP-R coordinator in the case of international students) please contact your faculty or school, or the professions’ student hub (students in the Faculty of Professions only) for advice on how to complete your coursework enrolment.

Scholarship holders

If you have been offered a living allowance scholarship, it is important to complete, sign and lodge the ‘Bank Credit Authority’ form with the Adelaide Graduate Centre as soon as possible in order to avoid any delays in scholarship payments. Payments commence 3–4 weeks after submission of your completed enrolment form to the Graduate Centre. Payments will be made fortnightly in arrears, directly into a nominated Australian bank account in your name.

International students

On arrival in Australia, international applicants who have been made an offer of a place will be provided with their enrolment form, ‘Authority to collect a University identification card’ and ‘PIN number’, together with information about the compulsory Integrated Bridging Program—Research (IBP-R), by the International Student Centre (ISC). Further information about the IBP-R is available later in this handbook. Completed enrolment forms should be returned to the Adelaide Graduate Centre, prior to the nominated start date of candidature.

Transferring from another institution

If you are a higher degree by research candidate at another institution and you wish to transfer your candidature to the University of Adelaide, you will need to submit a formal application for admission and credit. Where applicable (domestic students only), your maximum Research Training Scheme (RTS) entitlement will be reduced by the number of full-time equivalent (FTE) days for which you were enrolled at your previous institution and your maximum candidature duration will normally be reduced in parallel. If your transfer to the University of Adelaide is approved, you will be required to complete a minimum of one year of full-time study and research before submitting your thesis for examination.

Scholarship holders

Applications for Government-funded scholarship holders to transfer their scholarship from another university to the University of Adelaide will be considered on a case-by-case basis. The University does not undertake to accept all incoming applications. Note that an application to transfer your scholarship will automatically be rejected if you have completed less than six months of candidature at your previous institution. Where a scholarship transfer is approved, the duration will be the normal tenure less the number of full-time equivalent (FTE) days for which you were enrolled at your former institution.

International students

International students are only permitted to transfer their candidature to another university under exceptional circumstances within the first 12 months of study; the approval of both the home institution and the Department of Immigration and Border Protection (DIBP) are required. If you are considering a transfer, please contact the International Student Centre for advice.
Candidature

Communicating with the University

The University will regularly communicate important information to you both by email and in writing, so it is very important that you keep your contact details up-to-date. This is your responsibility; not receiving an email or letter asking you to do something is no excuse for not having done it and in many cases will have far reaching consequences for your candidature.

Written communication and changes to your personal details

On occasion, written correspondence regarding your candidature may be sent to your nominated mailing address; if you have not specified a mailing address, correspondence will be sent to your home address. If your contact details change, you can update them by logging onto Access Adelaide via the unified portal which is available as a quick link from the University’s home page. For changes of name, title and date of birth, you will need to complete a change of details form and provide the requested evidence to Hub Central for the change to be processed. Further information, together with the change of personal details form is available at: www.adelaide.edu.au/sas/forms/

For changes of residency status, you must complete a change of residency form and provide the requested evidence to Hub Central. The form can be downloaded at: www.adelaide.edu.au/student/finance/residency/

International students

Under the conditions of a student visa, international students are required to provide the University with their local (Adelaide) contact details at enrolment and thereafter, and to notify the University of changes to their address and telephone number within seven days.

Electronic communication

Much of the University’s communication with you about your candidature will be by email. Consequently, it is essential to set up email forwarding if you use an email address other than your campus address or if you have more than one campus address, so that you continue to receive official University email. Instructions for email forwarding are available at: www.adelaide.edu.au/technology/selfhelp/docs/diy-owa-redirectemails.pdf and students may contact the Technology Services service desk on 8313 3000 or servicedesk@adelaide.edu.au for assistance if required. See also the earlier ‘Adelaide email account’ section of this guide.

In addition, the Adelaide Graduate Centre newsletter AGC e-News will be emailed to your campus email address fortnightly. This publication contains important information about the professional development opportunities available to you, together with reminders about approaching deadlines and useful policy and procedural information. You can expect to receive a copy of AGC e-News shortly after enrolling. If you have not received a copy within three weeks of your commencement, please advise the Adelaide Graduate Centre by email to graduatecentre@adelaide.edu.au or by phoning (08) 8313 5882. Current and past copies of the publication may be viewed at: www.adelaide.edu.au/graduatecentre/news/

Insurance and confidentiality

The University provides all research students who have an active enrolment with the following insurance cover; for approved activities and travel:

- Personal Accident Insurance
- Travel Insurance
- Public Liability
- Professional Indemnity
- Directors and Officers Liability.

If you take leave of absence, you are not insured by the University during the period of leave and you may not access any University facilities (including laboratories and libraries) or supervision until you resume your candidature. It is important to note that under the conditions of the University’s insurance policy, the University is obliged to advise the insurer of any ‘Notifiable Events’, namely any incident or episode that results in, or has potential for, financial loss, damage to property, injury to persons or damage to reputation. In practice this means that if, for example, you were to advise a University staff member that you planned to initiate legal proceedings against the University or to contact the media with a negative story about the University, or to damage University property, the staff member would be obliged to inform the insurer.

Consequently, whilst you can normally expect to be able to have a confidential discussion about problems, issues and their solutions with your supervisor(s), postgraduate coordinator, head of school, the Dean of Graduate Studies and others, it is important to be aware that in very limited circumstances, as highlighted above, absolute confidentiality cannot be guaranteed. However, the insurer is required to maintain the confidentiality of any information presented under the Insurance Act. If you have concerns about confidentiality, please discuss them with the staff member concerned at the beginning of your discussion(s). Further information about insurance is available in Appendix 3.

In the unlikely event of an accident or claims situation arising, personal accident insurance is available in Appendix 3.
Supervision

From the time of commencing your candidature until your degree is awarded or your program discontinued, you will have a panel of supervisors comprising a principal and at least one co- or external supervisor, appointed by the head of school. The number of supervisors on your panel will not exceed three in total.

All supervisors will be on the University's register in accordance with the Supervisor Register Policy. To ensure that you have continuity of access to expert academic advice, instruction and assistance throughout your candidature, changes to the supervisory panel (particularly the principal supervisor) are discouraged. However, additional supervisors may be added to the panel to reflect changes in the direction of your research. More rarely, the composition of your supervisory panel can be modified to accommodate staff departures, absences (exceeding one month) and irresolvable personality conflicts.

Any changes to the supervisory panel must first be discussed with all parties involved in the supervision process to ensure that each is satisfied with the proposed arrangement and then approved by the head of school. In rare circumstances where there is disagreement about the composition of the supervisory panel, the head of school, who has the responsibility for ensuring appropriate supervision arrangements are in place may, in the best interests of the student, overrule the wishes of any of the parties involved, provided that the new supervisory arrangement remains consistent with University policy.

Roles of the supervisors

The principal supervisor carries the primary responsibility for your supervision (a minimum of 60%), including the coordination of all communication between the supervisors and you. The supervisor will be a member of the academic staff of the school in which you are enrolled, or an affiliate, adjunct or clinical titleholder with that school. Your principal supervisor will normally hold a degree at the same level or higher than the degree for which you are enrolled, have a proven and current record of research in your field and be experienced in supervision. The second and any additional member of your supervisory panel are referred to as ‘co-supervisors’ or ‘external supervisors’. These supervisory types can be distinguished by their level of affiliation with the University. A co-supervisor is a staff member or titleholder with any of the University’s schools, while an external supervisor is not a University staff member and has no formal affiliation with, or responsibility to the University (visiting academics are classified as external supervisors for the purposes of the register).

Co- and/or external supervisors act as a source of independent advice, or add specialised expertise to the supervisory panel. They need not be discipline experts, but are sufficiently familiar with your topic area to be able to follow the progress of your research. Each co- or external supervisor on your supervisory panel will have a minimum of 20% responsibility for the supervision process.

In broad terms, the role of your supervisors is to help guide your research and assist you to develop the skills and knowledge that you will need to complete your research project within the time allowed for the degree. In the early stages of your candidature, your supervisors are likely to know more about your chosen field of study than you do and can therefore offer valuable advice on preparing a realistic research proposal, together with instruction in the methodology and (any) technical skills that are necessary for your project. As you progress in candidature and your expertise grows, your relationship with your supervisors will gradually change; their role will increasingly be to act as a sounding board for your ideas, to review and comment on your written work and to provide you with feedback on your progress towards completion.
As you progress in candidature and your expertise grows, your relationship with your supervisors will gradually change...

In addition to the academic guidance they provide, your supervisors can also help you with any personal difficulties you may be experiencing either personally or by referring you to support services provided by the University. Detailed information about the roles and responsibilities of your supervisors is available in Appendix 2.

As each student and supervisor relationship is unique, it can be beneficial for students and supervisors to discuss their mutual expectations at an early stage of candidature to avoid future misunderstandings. To facilitate this discussion, you and your supervisor(s) may find it helpful to independently complete the ‘Expectations in supervision scale’ and then to compare your answers. This document has been reproduced in Appendix 5 and is also available at www.adelaide.edu.au/graduatecentre/forms/supervision/

Meeting with your supervisors

Regular meetings and communication with your supervisors are essential to ensure that you have frequent opportunities to raise any concerns or problems and to receive feedback on your research progress. For this reason, the University stipulates that supervisor(s) meet with (or otherwise contact) research students at least once per fortnight. It is recommended that you take brief notes at these meetings and circulate them to all your supervisors afterwards so that everyone remains fully informed about the progress of your research and its future directions. Some schools may request that a file copy of the notes of your supervisory meetings, signed by all participants, be kept in the school office or by the postgraduate coordinator. Where this is not the case you ought to, as a minimum, maintain your own signed file copies of the notes for future reference. If you are studying remotely, half-time or are on study leave, meeting with your supervisor(s) in person can be more difficult.

However, it is still essential that you maintain frequent contact: phone calls, video conferencing and email discussions about your research are all regarded as interactive forms of communication and these can usefully supplement your less frequent face to face meetings. It is normal for most students to meet more frequently with their principal supervisor than with their co- or external supervisor(s). However, it is expected that all members of the supervisory team will meet together with you at least twice per year to ensure that all parties have a common understanding of and approach to the development of the research. More regular meetings with the entire supervisory panel are recommended, particularly in the early stages of your research project when the research proposal is being shaped and, of course, in any situations where your supervisors have expressed differing opinions about your research. It is worth remembering that your supervisors are busy people who have many demands on their time and may not always be immediately available to advise you. However, you are not expected to wait until you are approached by your supervisor(s) before you can raise a problem or have a discussion about your research. Don’t be afraid to ask for help. Your supervisor(s) will make time for you as soon as they are able; it’s their job! Other members of the research group may also be able to assist you with technical or methodological problems and don’t forget your postgraduate coordinator is there to help. A useful tool to ensure that regular meetings with your supervisor(s) proceed is to take the lead early on in your candidature for scheduling a regular timetable of meetings with your principal supervisor and with your whole supervisory panel. Your Microsoft Outlook calendar can be used for this purpose.

Award for excellence for higher degree by research supervision

Every year around October/November the University calls for each faculty to propose a nominee for the University’s award for excellence in higher degree by research supervision. The award recognises and encourages sustained excellence in the supervision and support of higher degree by research students and is accompanied by a grant of $10,000 to be used for professional development purposes. If you would like your supervisor to be considered for an award, please suggest his or her name to your postgraduate coordinator.

Further information, including the eligibility criteria for the award are available at: www.adelaide.edu.au/graduatecentre/staff/awards/

Previous award recipients are listed at the aforementioned web address.

The postgraduate coordinator

After your supervisors, the postgraduate coordinator (PGC) is likely to be your most important source of support. He or she is responsible for overseeing the work of all postgraduate research students in the school. As you progress through your candidature, you should get to know the postgraduate coordinator quite well. The postgraduate coordinator is available to discuss any concerns or problems that you may have with your research, your supervisor(s) or in your personal life and as a senior and generally long-standing member of academic staff, the postgraduate coordinator is also a useful source of information and career advice. Another of the PGC’s roles is to monitor your progress and to ensure that you complete the required candidature milestones (such as the core component of the structured program and annual review of progress) on time.

Detailed information about the roles and responsibilities of the postgraduate coordinator is provided in Appendix 2. The current list of postgraduate coordinators is available at: www.adelaide.edu.au/graduatecentre/staff/postgraduate-coordinators/pgc-list/
Monitoring academic progress

Duration of candidature

Students are reminded that the maximum period of candidature is four years full-time equivalent (FTE) for a PhD and two years FTE for a master’s by research degree. This must be taken into account in planning your research project and candidates should not expect extensions of candidature to be granted except under the most exceptional circumstances. You should plan to complete the entire research, writing-up and examination process within candidature.

Candidature milestones

Candidature milestones, hereafter referred to as ‘milestones’, are specific points during your degree program at which you will be required to complete a task. Through the process of completing the various milestones, you, your school and the University will be able to monitor your progress and ensure that your research is proceeding at a rate that will enable you to complete your research program within the time allocated for the degree.

Engaging with the research culture of the University

Whatever your discipline, there will be many opportunities for you to benefit from, and contribute to, the rich research culture of the University. Within your School, there will be a seminar program for you to attend and present at; this will provide you with valuable opportunities to both engage with a broader cross section of research and to develop your presentation skills and receive feedback about your own research. Additionally, whenever possible, it is recommended that you participate in conferences, network with your peers and research collaborators and get involved with University life. For example, you could volunteer to be a postgraduate student representative on your school committee or undertake one of the many Career and Research Training Skills (CaRST) course(s) provided free of charge to research students by the Adelaide Graduate Centre: www.adelaide.edu.au/carst/

Adjusting to life as a research student

The relatively unstructured nature of research is very different from the study mode that you would have experienced as an undergraduate or postgraduate coursework student; there are fewer fixed deadlines to meet and much longer periods of time between them. Even more significantly, you are embarking on a process of discovery, in many cases through trial and error.

There will not always be someone there who can steer you in the right direction or confirm that you have the ‘correct’ answer and it is quite likely that at some point during your candidature, things will not go the way that you expected (or wanted them to). While individual students will have different experiences of undertaking a higher degree by research, it is important to realise that some of the hurdles to completion will be emotional and these may be more difficult to conquer than the practical problems. During the course of your degree you are likely to experience several emotions, many positive (intellectual stimulation, challenge, curiosity, understanding, the excitement of new discovery) and some negative (frustration, impatience, failure, fear). On balance, most students find research to be a rewarding experience, but for those times when you’re feeling overwhelmed by it all, the top five strategies for survival are to:

> seek the support of others, be they friends, family other research students in your School, your supervisor(s) or a University counsellor. The more people that you can talk to the better
> develop self-management techniques that work for you
> learn and understand the research process and what to expect at each stage of your candidature
> engage with the research culture of your School and the University; and of course
> have a life outside of research! Make time for yourself, your friends and family and the activities that you enjoy.

You also need a supervisor who understands your needs and is able to support and develop them. Don’t be afraid to tell your supervisor if you are struggling; he or she was a research student once and will remember the challenges of their own candidature.
Pathways to completion of a higher degree by research for a full-time candidate

The diagram below summarises the time frames for completion of candidature milestones for full-time students commencing in 2016. Further information about what each milestone involves is provided later in this handbook.

Half-time students
If you are a half-time student, please double the indicated time frames for the core component and major review of progress and the submission and completion time frames. All other due dates remain unchanged.

Remote students
For simplicity, the minor review of progress milestone, which remote students are required to complete on 15 April each year following confirmation and the pre-submission review milestone, have not been shown on the diagram below.

### Doctorate (max 4 years)

0 months
Start Candidature

0-1 month
Complete Local and Online Induction

6 months
CCSP and Research Proposal

12 months
Major Review

Year 2+3
Annual Review due 31 October

3-3.5 years
Thesis Submission

Max 4 years
Completion

### Masters (max 2 years)

0 months
Start Candidature

0-1 month
Complete Local and Online Induction

6 months
CCSP and Research Proposal

12 months
Major Review

Year 2
Annual Review due 31 October

1.5-2 years
Thesis Submission

Max 2 years
Completion
Provisional candidature requirements

Formal acceptance as a higher degree by research candidate is a multi-stage process. The first 12 months of candidature (or half-time equivalent) are provisional and during this time, you will undertake a number of milestones.

These are:

> attendance at a local induction program
> undertaking the Adelaide Graduate Centre induction program
> completion of the core component of the structured program
> completion of the major review of progress.

The number of milestones is greater during the period of provisional candidature than following confirmation, in order to ensure that, irrespective of discipline, you will receive a comprehensive induction to the facilities, services and professional development opportunities available to you; to introduce as much structure as possible into the first 12 months of your research program whilst you are adjusting to what is often a very different study environment and style; and to ensure that you formulate an academically sound and feasible research proposal in the early stages of your candidature.

Local induction program

Soon after you enrol, your supervisors(s), or postgraduate coordinator will arrange an induction for you. The induction will provide you with an opportunity to familiarise yourself with your new work environment, the administrative procedures within your school and, of course, some of the staff and other students with whom you will interact during your candidature. Features of your induction program will commonly include a discussion of:

> the arrangements made for you to access the resources and facilities that will be required for completion of your research project. These arrangements will be set down formally when you lodge the ‘Minimum resources proforma’ as part of the requirements for completing the ‘Core component of the structured program’ and include:
  - on-site facilities (e.g. phone, facsimile, pigeon hole, stationery) office and/or laboratory accommodation
  - equipment (including computer hardware and appropriate software) and technical support
  - Internet access for research purposes;
  - available financial support for research maintenance, which may include individual student travel, conference and workshop attendances, photocopying, printing, interlibrary loans, database searches
  - special equipment and facilities not available within your school
> the schedule of your school’s program of seminars
> your responsibilities as a research candidate and your supervisors’ responsibilities (refer to Appendix 2)
> completion of the ‘Expectations in supervision scale’ with your supervisors (refer to Appendix 5)
> the nature and standard of research expected of a doctoral or master’s by research candidate in your discipline and the timeframes for achieving the various milestones
> your requirements under the ‘Australian Code for the Responsible Practice of Research’, which is available at www.adelaide.edu.au/research/our-research/integrity/ The Code encompasses a number of research considerations including:
> - data storage, retention and management
> - the requirement to deposit all original data and primary research materials with the University prior to final qualification for your degree
> - authorship of publications
> - intellectual property and confidentiality considerations
> - ethical guidelines for University research
> - conflicts of interest
> - research misconduct (including plagiarism and misrepresentation)
> health, safety and wellbeing procedures appropriate to your discipline
> how to apply for ethical clearance (where applicable).

In schools that have a larger number of research students, the arrangements for induction programs are likely to be quite structured, while in other areas of the University you may be inducted informally by your supervisor(s). If you have any questions after your induction and require further information about any of the topics outlined above, you are encouraged to approach your supervisor(s) or postgraduate coordinator in the first instance.

Adelaide Graduate Centre Induction program

The Adelaide Graduate Centre provides an online induction program for commencing higher degree by research students which you can access through MyUni. Online induction enables all research students to be inducted at the very beginning of their research program, regardless of their research location. The induction provides a valuable introduction to life as a research student at the University of Adelaide, and is intended to complement your school level induction program.

> The induction will introduce you to a range of topics and services including:
> - the roles of the Adelaide Graduate Centre and your supervisors
> - the time frame for your completion of academic milestones and your program
> - research conduct (e.g. avoiding plagiarism, authorship, data management, IP and ethics)
> - changing your candidature conditions (e.g. leave, upgrades, transfers and attendance status)
> - the professional development opportunities available to you
> - student services on campus (e.g. library, IT, counselling and disability)
> - keeping your research on track and what to do when things go wrong
> - the role of the education welfare officers (EWOs) and the Adelaide University Union (AUU).

Undertaking the online induction is a compulsory requirement of your candidature which must be completed within one month of starting your research degree. For further information and to access the online induction program, refer to www.adelaide.edu.au/graduatecentre/milestones/induction/ and https://myuni.adelaide.edu.au

Core component of the structured program

The University of Adelaide structured program comprises ‘core’ and ‘development’ components. Further information about the development component of the structured program is provided later in this guide. The core component must be completed within six months (or half-time equivalent) from the commencement of your candidature. Satisfactory completion requires that you have:

> attended a school induction program
> completed the Adelaide Graduate Centre’s online induction program
> completed the introductory training on the Australian Code for the Responsible Conduct of Research: www.adelaide.edu.au/research/our-research/integrity/ and sms.gradcentre.adelaide.edu.au
> completed the introductory training on animal and/or human ethics where these are applicable to your research project (note that if your work involves the use of animals, you must complete the online animal ethics assessment and include the resulting certificate of completion with your “Core Component” documentation: www.adelaide.edu.au/carst/online-modules/)

and determined a data-management plan to facilitate the appropriate management and back-up of data during your research project. The data-management plan should encompass the storage of primary materials, access to metadata and information about tracking and sharing the data once the research project is complete.

> obtained an Open Research and Contributor ID (ORCID): libguides.adelaide.edu.au/c.php?q=1650988&p=1083690 and entered the details into Aurora, the University’s web-based system for capturing and reporting research publications and outputs: www.adelaide.edu.au/aurora/

> formulated a research proposal using the relevant research proposal template for your faculty www.adelaide.edu.au/graduatecentre/forms/milestones/core-component-structured-program/.
The proposal should explicitly consider the ethical, intellectual property and resource implications of your proposed research and be all your own work, except where there is clear acknowledgement and reference to the work of others.

- checked your research proposal for originality and referencing issues using Turnitin (recommended)
- presented your research proposal at a school seminar program
- regularly attended your school's seminar program
- given preliminary consideration to whether your planned thesis is consistent with the approved thesis formats detailed in the current year’s Specifications for Thesis: www.adelaide.edu.au/graduatecentre/program-rules and where there is an intention for the length, language, composition or structure of the thesis to differ relative to the approved formats, completed an ‘Application to vary thesis format’ form: www.adelaide.edu.au/graduatecentre/forms/thesis/preparing-thesis-submission/ and

- lodged the ‘Completion of the core component of the structured program’ form and all other required documentation with the Adelaide Graduate Centre by the due date.

In many schools, students are required to complete a literature review and/or to audit coursework courses as part of their core component; your supervisor(s) or postgraduate coordinator will advise you where this is the case. The process for the core component is as follows:

1. you, your principal supervisor and the postgraduate coordinator will receive an email reminder approximately one month prior to the due date of your core component. The email will direct you to download a copy of the ‘Completion of the core component of the structured program’ form from the Adelaide Graduate Centre website (a form will be mailed to you on request)

2. if you fail to lodge the core component documentation by the due date and if no application for extension has been received from your supervisor(s), your candidature will be suspended. Refer to the ‘Suspension of Candidature’ section of this Handbook for further information. “Approved period(s) of leave of absence will extend the due date.

If your school has concerns about your progress these will be discussed with you...

Preparing for submission of your core component

In preparing for submission of the core component of the structured program, there are several areas to which you should pay particular attention to ensure that your proposed research proposal will adhere to the conventions for the responsible conduct of research.

The following areas are discussed under the ‘Conduct of Research’ section of this handbook:

- the Australian Code for the Responsible Practice of Research
- management of research data and primary materials
- ethics in research (including human and animal research and GMO technology)
- intellectual property
- copyright
- embargos and commercially, culturally, politically or criminally sensitive research
- authorship and the importance of obtaining ‘Statements of Authorship’ as your research progresses
- the requirement to acknowledge the University of Adelaide in research publications
- health, safety and wellbeing
Resourcing your research

In addition to ensuring that your research will comply with the standards outlined in the Code, when preparing your research proposal, you and your school should consider the minimum resources to which you will require access during your candidature in order to successfully complete your proposed research project. These will be specified in the 'Minimum resources proforma', which forms part of the 'Core component of the structured program' form. Your school may provide a fixed amount of money to you each year for research-related purposes (e.g. travel, conference and workshop attendances, photocopying, printing, interlibrary loans etc.). The agreed sum will be specified on the 'Minimum resources proforma'. It is important to note that the proforma is not a legally binding document, but is an undertaking that your school has considered and is able to provide the resources and facilities to which it is expected you will need access during your research. Ongoing resource needs and entitlements are reviewed each year at the time of the annual review.

International students and recent permanent residents

The Integrated Bridging Program—Research (IBP–R) for doctoral students

If you are an international doctoral student and you have not been granted an exemption, satisfactory completion of the core component of the structured program also involves compulsory participation in the Integrated Bridging Program—Research (IBP–R). Domestic students who have held Australian permanent residency for less than two years are welcome to participate in the program; however, attendance is not compulsory. The IBP–R for doctoral students is a semester-length program designed to help international students and recent permanent residents gain access quickly and effectively to the academic, linguistic and cultural conventions of postgraduate study. If you are an international student or recent permanent resident, the program can assist you to complete your core component, by supporting you in the production of a literature review and a research proposal presented both as an oral presentation and as a written document. In some cases, participation in the IBP–R may extend the timeframe for the completion of your core component. On commencement of your doctoral program, you are requested to contact the IBP–R coordinator to discuss how the IBP–R can best contribute to supporting your progress. The coordinator's details are provided in the contact details section of this handbook. Note that if you completed the IBP–R during your master degree (or were exempted from completing it), you are not required to participate in the IBP–R at doctoral level unless you wish to, or are instructed to do so by your supervisors.

Voluntary or recommended participation in the IBP–R

The University strives to ensure that students with English as an Additional Language (EAL) receive all the support needed to succeed in their research degree. Consequently, if you are a domestic student with EAL, or an international student who has been exempted from the formal requirement to participate in the IBP–R, should you and/or your supervisors, feel that you would benefit, participation in some or all parts of the IBP–R program can be negotiated. Please contact the IBP–R team in Professional and Continuing Education (PCE) for advice: pce@adelaide.edu.au and for further information, see: www.adelaide.edu.au/integrated-bridging-program/

The Integrated Bridging Program—Research (IBP–R) for masters students

International Master of Philosophy and Master of Clinical Science students undertake a more extensive version of the Integrated Bridging Program—Research which is normally completed over the first two semesters of enrolment. Therefore, you are not required to have completed the IBP–R at the time of submitting your core component of the structured program.

The IBP–R for master's students has been formalised into the following three core courses:

> EDUC 7054 Research Design (3 units)
> EDUC 7055 Research Communication (3 units)
> EDUC 7058 Research Processes (3 units)

As detailed earlier in this handbook, as an international Master by Research student, you will undertake your degree by mixed research and coursework and the core courses listed above will comprise nine of the required fifteen units of coursework.

On arrival in Australia, please make an appointment with the IBP–R coordinator to discuss your IBP–R enrolment. If required, you can also discuss the possibility of exemption from one or more of the compulsory core courses (diagnostic testing will be required) and/or substitution with a discipline-specific equivalent. In the event that the IBP–R coordinator grants you exemption from one or more of the Core IBP courses specified above, additional discipline-specific coursework electives to the same value will be undertaken.

If you can provide evidence of tertiary education for a period of two years within the last five years, or one year within the last two years, at an Australian university or an institution where the medium of instruction and assessment is in English, you will be granted exemption from all three core courses.

If you are exempted from all IBP–R courses, you can elect whether to undertake the Master of Philosophy by 100% research or, by mixed research and coursework. If you choose the mixed research and coursework stream, you will undertake relevant discipline specific electives to the value of 15 units.
**Major review of progress**

The major review of progress occurs at the latest, by 12 months (or half-time equivalent) from the commencement of candidature. The purpose of the review is to assess your progress against both the quality and quantity of work required for completion of your degree within the required timeframe (namely, your capacity to achieve thesis submission within three to three-and-a-half years if you are a doctoral candidate, or eighteen months to two years if you are a master's candidate).

The Adelaide Graduate Centre will advise you and your principal supervisor approximately one month in advance that your major review is due and direct you to the website where you can download a copy of the form (a form will be mailed to you on request). The due date for return of your major review form is 12 months (or half-time equivalent) from the commencement of your candidature.

The review will be undertaken by the Candidature Confirmation Review Committee, which normally comprises, at a minimum, your supervisors and the postgraduate coordinator. The purpose of the review is to:

> ensure that the scope of your research project is achievable within the required timeframe for the degree
> identify, document and resolve any problems or issues which are beyond your control that are likely to affect your ability to complete the degree within the required time frame
> assess your relationships with your supervisor(s) to determine whether your professional compatibility is sufficient to facilitate completion of the degree within the required time frame
> recommend confirmation of candidature, extension of provisional status, conversion to a master’s enrolment (where applicable) or termination
> where an extension of provisional candidature is recommended, set a series of tasks/milestones which enable you by completing them, to demonstrate your competence to finish the program within the required time frame
> undertake a further review of progress following an extension of provisional candidature and recommend confirmation, termination or conversion to a master’s enrolment.

**Preparing for the major review of progress**

In preparation for your major review, you are required to complete the major review of progress form including a one-page summary of your progress to your principal supervisor, no later than three weeks prior to the due date.

Your supervisor will add their own progress report to the form before sharing it with the Candidature Confirmation Review Committee.

Supervisors may view an exemplar of a supervisor's progress report for the annual review at: [www.adelaide.edu.au/graduatecentre/staff/candidature-management/](http://www.adelaide.edu.au/graduatecentre/staff/candidature-management/) (staff access only)

In determining whether or not your overall progress has been satisfactory, the Candidature Confirmation Review Committee may require additional tasks to be completed during a further period of provisional enrolment of three to six months in duration. Where this is the case, you will undertake an extended major review at the end of the extended provisional period. This review will confirm candidature, recommend conversion to the Master of Philosophy (if applicable) or recommend termination of candidature. No further extensions of the provisional status will be permitted.

**Minimum requirements for the confirmation of candidature**

To fulfil the requirements of the major review of progress, you must have:

> satisfactorily completed all the preceding milestones, including the Adelaide Graduate Centre induction program and (for international PhD students only) the IBP-R
> regularly attended the school seminar program (remote students are exempted)
> achieved a minimum of acceptable progress during your provisional candidature for all student capability measures submitted a Gantt chart or completion plan with your major review documentation which details the timelines for your research from candidature commencement to thesis submission [www.adelaide.edu.au/graduatecentre/forms/milestones/major-review/](http://www.adelaide.edu.au/graduatecentre/forms/milestones/major-review/)

In addition, your school should complete a risk assessment detailing contingency planning on how to proceed in the event that one or more of the following occur:

> your research direction(s) prove unsuccessful, or not worth pursuing
> supervisor(s) will be absent e.g. on study leave
> existing skills/experience are inadequate to undertake the planned research (i.e. training is required)
> existing resources are inadequate to undertake the planned research
> you have taken excessive leave.

In addition, you must submit the completed major review form together with the progress reports prepared by yourself and your supervisor by the due date. In the rare event that an extension is required, this should be arranged with the Adelaide Graduate Centre by your principal supervisor.

Email: graduate.centre@adelaide.edu.au or telephone (08) 8313 5882.
Confirmed candidature requirements

Following the satisfactory completion of the major review of progress, the Adelaide Graduate Centre will notify you, in writing, of your confirmation of candidature.

In each year following your acceptance as a higher degree by research candidate, you will complete an annual review of progress (refer to the annual review of progress section earlier in this guide for further information).

**Annual review of progress**

The annual review of progress is undertaken by all higher degree by research students during September/October every year following their year of enrolment. Accordingly, if you enrolled in 2016, your first annual review will be in 2017.

Regardless of whether you are active in candidature or on leave of absence, the annual review must be submitted to the Graduate Centre by the due date of 31 October.

Re-enrolment and the continuation of your scholarship (where applicable) are dependent on satisfactory progress in the 12 months preceding the review or since the commencement of your candidature where this was less than 12 months ago.

The annual review is intended to be an open and frank appraisal of your rate of progress by both you and your supervisory panel. The review serves several purposes. It:

- ensures that you highlight your achievements during the preceding year so that you can clearly see the progress you have made both in your research and your professional development (it is common for students to underestimate their progress and the review process can provide some useful reassurance)
- provides you with an opportunity to formally set goals with your whole supervisory panel for the next stage of your project and in the next stage of your professional development and to record them in the form of a Gantt chart or completion plan.
- is an important tool for identifying any problems that may be occurring in candidature so that they can be documented and resolved. Documentation is very important, as any problems you report on your annual review form (which were beyond your control and have negatively affected your progress) will be taken into consideration if you submit an application for a candidature or scholarship extension in the future.
- provides an opportunity to review and renegotiate your access to resources and facilities.
- provides an opportunity to review ethics requirements and a prompt to provide any necessary clearances to the Adelaide Graduate Centre.
- provides an opportunity to review your supervisory arrangements, including the frequency and usefulness of meetings; and
- serves to ensure that your postgraduate coordinator, the head of school and the Dean of Graduate Studies are kept fully informed of your progress.

The process for the annual review is as follows:

In the September before each annual review is due, the Adelaide Graduate Centre will email to advise you that the annual review form and associated information is available for download at [www.adelaide.edu.au/graduatecentre/milestones/annual-review/](http://www.adelaide.edu.au/graduatecentre/milestones/annual-review/)

After reading and completing the relevant sections of the form, please make two appointments: one with your supervisors and a second, later appointment, with your postgraduate coordinator or head of school. Note that if the head of school is one of your supervisors, the second appointment should be made with the postgraduate coordinator. Similarly, if the postgraduate coordinator is one of your supervisors, the second appointment should be made with the head of school. On those rare occasions when both the head of school and the postgraduate coordinator are your supervisor(s), the head of school or postgraduate coordinator will nominate another senior academic staff member of the school to conduct the second interview.

You should complete Section A of the Annual Review form before meeting with your supervisors. This information will form the basis of the discussion between you and your supervisors. The contents of the form may be refined at ensuing meetings with supervisors and the head of school or postgraduate coordinator. During the first appointment, discuss your work with your supervisors, who will complete their section(s) before returning the form to you.
In each year following your acceptance as a higher degree by research candidate, you will complete an annual review of progress...

Next, pass your completed annual review form to your postgraduate coordinator or head of school prior to your scheduled meeting; he or she may wish to interview you alone or together with your supervisor(s). The postgraduate coordinator or head of school then signs the form before returning it to you. When you have viewed the comments of your supervisors and postgraduate coordinator or head of school and checked that all sections have been completed and signed by the appropriate persons, sign the form yourself and make a photocopy for your records before lodging it with the Graduate Centre by no later than 31 October.

Your completed annual review form will be examined by staff in the Graduate Centre and any problems identified will be pursued at the appropriate level. Unresolved problems may be referred to the Dean of Graduate Studies for further consideration if required.

The outcome of the review will be an assessment of your progress by your school as:

1. satisfactory
2. acceptable, but with some (specified) reservations
3. unsatisfactory.

A period of conditional (re)enrolment may be recommended in the event of unsatisfactory progress during provisional and confirmed candidature. If it appears likely that you will not be able to have your review completed by 31 October, you should request that your principal supervisor arrange for an extension (prior to the 31 October deadline) by contacting the Adelaide Graduate Centre on (08) 8313 5882 or by email to graduatecentre@adelaide.edu.au. It is important to note that failure to lodge a completed annual review or to arrange an extension by the due date, will result in the suspension of your candidature and any scholarship payments.

A word of warning: do not assume that your supervisor has requested an extension or that your supervisor/postgraduate coordinator or head of school has forwarded your completed annual review form to the Adelaide Graduate Centre. Make sure you check with them before the annual review deadline—it is your personal responsibility, not theirs, to ensure that you complete the annual review on time.

Remote students and students on study leave

If you are a remote candidate, or if you are absent from the University on leave, it may be problematical for you to meet with your supervisors and the postgraduate coordinator or head of school in person. Whilst you are still required to undergo an annual review of progress, the Adelaide Graduate Centre, for your convenience, will accept either original or faxed signatures on the annual review form (your signature must be original). From the University's perspective, the most important consideration is that all the relevant parties have discussed, assessed and agreed on your rate of progress.

Gantt charts, completion plans and planning your research

As part of the Annual Review of Progress, each student is required to complete (or update) a Gantt chart or completion plan to illustrate the various stages and activities of research in candidature, from commencement to completion. A Gantt chart or completion plan must also be submitted with the documentation required for the confirmation of your candidature (see major review of progress below).

Planning for publications and conferences could be incorporated into your chart or plan. While it is desirable that the document is flexible enough to allow for revision of timelines, such flexibility should not be seen as an opportunity to justify numerous changes resulting from a lack of progress for reasons that were not beyond your control.

Examples of a Gantt chart and completion plan are available on the annual review website at: www.adelaide.edu.au/graduatecentre/forms/milestones/annual-review. Obviously it is not possible to include charts or plans to cover all student experiences, but it is hoped that the examples provided will be an aid in helping you and your supervisors set appropriate timelines for your candidature.

Minor review of progress for remote candidates

If you are a remote candidate, you will be required to undertake a minor review of progress. The minor review is due on 15 April each year and is essentially a second annual review. The greater frequency of reviews that you are required to undertake as a remote student reflects the University's responsibility to ensure that, despite your external location, you are continuing to make satisfactory progress towards completion of your research program and that you are not being unduly hindered by the quality of the facilities, resources and supervision available to you at the remote location. If you enrol as, or change to, remote candidature in January, February or March, you are exempt from the minor review in your year of enrolment.

If it appears likely that you will not be able to have your review completed by 15 April, your principal supervisor should arrange for an extension of the deadline by contacting the Adelaide Graduate Centre on (08) 8313 5882 or by email to graduatecentre@adelaide.edu.au.
Re-enrolment

Re-enrolment is an automatic process provided that you have satisfactorily completed and lodged the annual review of progress by the due date and have no outstanding financial obligations to the University.

Clause 4 of Chapter 89 of the Statutes of the University states that a student may not re-enrol unless ‘all outstanding fees and all other financial obligations due to the University have been discharged or arrangements for their discharge have been approved’.

Consequently, it is important that you discharge any financial obligations with the appropriate areas as soon as possible after they are incurred and, at the latest, by 30 November to ensure that your re-enrolment for the following year is not jeopardised.

Details of any outstanding financial obligations that you may have and information about where to discharge them are available on Access Adelaide.

Log on to Access Adelaide via the Unified portal, which is available as a Quick Link from the University’s home page or at www.access.adelaide.edu.au/sa/login.asp

The Adelaide Graduate Centre will notify you in writing if you have not been re-enrolled.

If the reason is your failure to discharge an outstanding financial obligation, documentary evidence demonstrating the discharge of the obligation, or suitably approved arrangements for the discharge must be provided to the centre before your re-enrolment will be processed. In the event that you were not re-enrolled because of your failure to submit your annual review by the due date, a satisfactorily completed annual review must be submitted to the Adelaide Graduate Centre before your re-enrolment will be processed. You may incur a late fee of $75 for an annual review form submitted after the due date.

Renewing your student ID card

In mid-December, the Adelaide Graduate Centre will re-enrol all research students who have satisfactorily completed their annual review and who have discharged any outstanding financial obligations.

Once you have been re-enrolled, you will be able to view your enrolment details on Access Adelaide. If you have not been re-enrolled by mid-December and were expecting to be, please contact the Adelaide Graduate Centre.

In order to validate your student ID card for the following year, you will need to present your student card to Card Services after your re-enrolment has been processed. Card Services will check to see that you have been re-enrolled before authorising the update of your student card. Further information about the dates on which you can validate your card at Card Services or alternative venues will be available on the Card Services website from late December at: www.adelaide.edu.au/unicard/student/#update

Remote students may contact Card Services to arrange for a sticker update or replacement card to be posted out.
The development component provides you with access to an individually tailored program of workshops, courses and seminars and consequently, with the opportunity to acquire skills, knowledge and experience that will complement your research training and prepare you for a wide range of professional positions.

In addition to regular attendance of your school’s seminar program, it is recommended that you take advantage of the numerous and generally free courses provided by the University to develop your transferable skills and increase your future employability.

The development component will be formulated in conjunction with your supervisor(s) in response to the specific professional or academic needs identified in your background and will be reviewed (at least) once per year at the time of the annual review of progress. Certificates are generally awarded for participation in workshops or courses.

Details of the upcoming Career and Research Skills training (CaRST) opportunities provided by the University will be advertised via the Graduate Centre’s fortnightly newsletter AGCNews and are also available at: www.adelaide.edu.au/carst/
Changing the conditions of your candidature

By accepting an offer of admission to a higher degree by research, you are accepting the conditions of candidature prescribed in that offer. These include your attendance status (full-time or part-time), field of study, supervisors and your mode of attendance (internal or remote).

In particular, the University must seek to:

- prevent students from sanctioned countries from undertaking research that could provide them with the skills, knowledge and experience to return to their home country and develop technology that is on the sanctioned list;
- prevent students from accessing facilities they are not entitled to as students from sanctioned countries. Consequently, any change of candidature which would affect your research project or environment (e.g. change of program, school or research topic) is subject to the provisions of the Autonomous Sanctions Act (2011).

Further information on autonomous sanctions is available from the Department of Foreign Affairs and Trade (DFAT) at: www.dfat.gov.au/sanctions/

Applying to change a condition of candidature

The application forms for any change to candidature that you may need to make are available on the Adelaide Graduate Centre website at: www.adelaide.edu.au/graduatecentre/forms/ or, on request from the Adelaide Graduate Centre.

Completed forms should be lodged with the Graduate Centre.

Changing field of study

Your research topic is detailed on your academic transcript and therefore it is important to ensure that the description of your topic is an accurate reflection of your area of research. The title for the research topic should be quite broad so that it is accessible to a general reader, written in title case and limited to 250 characters.

After you have commenced your research, you may find that there is a need to amend your research topic. Minor amendments that have no effect on your expected completion date, such as a refinement of the wording of your research topic are readily processed. An application to change your research topic description should be made on the ‘Change of Research Topic’ form.

If the change in your research topic is major, it is likely to influence the submission date of your thesis and may involve a change in supervisor(s), school or even a new program or candidature. As your scholarship and Research Training Scheme entitlements may be affected by a major change of research topic, you are encouraged to contact the Adelaide Graduate Centre for advice before proceeding.
International students

International students who are considering a major change to their field of study that is likely to result in a change of research program are advised to contact the International Student Centre to discuss the visa and any sponsorship implications of the proposed change.

Changing supervisor(s)

To ensure that the supervisory panel comprises those staff members with the greatest expertise and experience in your research area, a change (or addition) of supervisors may be appropriate to reflect changes in the direction of your research.

Where a supervisor is no longer available to supervise, your supervisory arrangements will also be amended. This can be necessary, for example, when a supervisor leaves the employment of the University. The supervisory arrangement may also be changed if the relationship between you and your supervisor(s) has broken down because of, for example, a personality conflict.

Proposed changes to your supervisory arrangements should be discussed and preferably agreed with all members of your supervisory panel before the ‘Change of Supervisor Details form is completed. All members of the new panel must be members of the Supervisor Register and be appointed in accordance with the Supervisor Register Policy.

Where all parties are in agreement, the proposed changes must be endorsed by either the head of school or the postgraduate coordinator. Note that the proposed supervisor(s) must be a member of the supervisor register.

If there are any disputes regarding the proposed changes, it is the responsibility of the head of school to ensure that you are provided with a satisfactory supervisory arrangement and he or she may authorise changes to the supervisory panel in consultation with you.

In the event that your principal supervisor will be absent from the University for a period in excess of one month, an acting principal supervisor must be nominated.

Changing attendance status (full-time/half-time)

Research students are permitted to enrol as either full-time (1.0) or half-time (0.5) candidates. With the approval of your supervisors and school, you may change your attendance status from full-time to half-time or vice versa at any time during candidature.

Such changes will generally be supported. However your School may caution you against converting from a full-time to a half-time enrolment if you are conducting research in a fast paced experimental field because of the risk of your research becoming obsolete before your thesis has been submitted for examination.

Applications should be made on the form ‘Change attendance status’, available at: www.adelaide.edu.au/graduatecentre/forms/candidature-management/

Scholarship holders

If you are a scholarship holder, you are normally required to maintain a full-time attendance status. Applications to convert to a half-time enrolment can only be approved where there are exceptional circumstances that relate to significant caring commitments or a medical condition which limits your capacity to undertake full-time study. If you are in receipt of a half-time award, the University may require you to convert to a full-time attendance status when the compelling reasons that were the basis of the approval no longer apply.

Half-time awards are paid at a reduced stipend and are not exempt from taxation.

International students

International students are required to maintain a full-time attendance status while studying in Australia.

International students who change residency status during candidature

To update your residency details with the University, you must complete a ‘Change of Citizenship/Residency Status’ form which is available at: www.adelaide.edu.au/student/finance/residency/

You can go in person to Information Services at Hub Central with your completed form and

> your original or a certified copy of your permanent residency visa if you are changing to a permanent resident. The staff in the Hub will make a copy of the supporting paperwork to attach to the form. If you are unable to lodge your paperwork in person, you can post your completed form along with the certified copy of your supporting document to:

Student Finance

The University of Adelaide

SA 5005 AUSTRALIA

If you are an international student who is granted permanent residency during your candidature, you should provide evidence of your residency change to the University as soon as possible. Any changes to financial entitlements will only take effect in the current semester if notification is lodged prior to the census date relevant to that semester.

Consequently, if you present your evidence:

> prior to the semester 1 census date (31 March), you will be converted to a fee-exempt Research Training Scheme (RTS) place backdated to the start of semester 1 (1 January)

> after the semester 1 census date (31 March) and prior to the end of the semester (30 June), you will remain liable for fees until you are converted to a fee-exempt RTS place from the start of semester 2 (1 July)

> prior to the semester 2 census date (31 August), you will be converted to a fee-exempt Research Training Scheme (RTS) place backdated to the start of semester 2 (1 July)

> after the semester 2 census date (31 August) and prior to the end of the semester (31 December), you will remain liable for fees until you are converted to a fee-exempt RTS place from the start of semester 1 the following year (1 January); Note that an RTS place entitles the holder to an exemption from fees for up to four years of full-time candidature for a doctoral degree and two years for a master by research degree. Periods of study already undertaken towards your degree prior to the commencement of the RTS place will be deducted from your maximum period of entitlement.

> your original or a certified copy of your
Transferring between degree programs

Upgrading from a Master of Philosophy to a PhD

In order to upgrade your candidature to a PhD, you must have demonstrated your ability to undertake research at a doctoral level and a suitable project, resources and supervision must be available.

Demonstrating your ability to undertake research at doctoral level

If you had the necessary formal qualifications to undertake a doctoral program at the time of your enrolment into the Master of Philosophy, you may be permitted to transfer to a PhD after 12 months or half-time equivalent, subject to satisfactory completion of your major review of progress, evidence of research outcomes, such as publications, peer reviewed conference papers, scholarly works and creative arts and the submission of a revised research proposal which can reasonably be completed within 3–4 years (less the time already spent in your master’s candidature).

If you did not have the necessary qualifications to undertake a doctoral program at the time of your enrolment into the Master of Philosophy, you can apply to transfer to the PhD after eighteen months of candidature or half-time equivalent, subject to satisfactory completion of the major review of progress, evidence of research outcomes such as publications, peer reviewed conference papers, scholarly works and creative arts and the submission of a revised research proposal which can reasonably be completed within 3–4 years (less the time already spent in your master’s candidature).

The upgrade process

The process for applying to transfer to a PhD program is as follows: After discussing the proposed transfer with your supervisors:

1. complete an ‘Upgrade Candidature from a Master to a PhD’ application form and prepare your revised research proposal and evidence of outcomes where applicable
2. provide these documents first to your supervisors for consideration and then to the head of school or postgraduate coordinator
3. obtain the necessary endorsements and the supporting statement from your school (where applicable) and return the completed documentation to the Adelaide Graduate Centre, which will seek the endorsement of the Faculty Higher Degrees Committee and the Research Education and Development Committee
4. the Adelaide Graduate Centre will advise you in writing whether or not the transfer of your candidature has been approved
5. where applicable, your maximum candidature duration and Research Training Scheme (RTS) entitlement will be reduced by the number of full-time equivalent (FTE) days for which you were enrolled in the master program.

Scholarship holders

When your transfer to a doctoral program has been approved, your scholarship duration will be extended up to three years, less the number of days of a master’s candidature previously completed.

International students

As an international student, approval to transfer to a PhD program is subject to the approval of your sponsor (where applicable) and to the granting of a new student visa from the Department of Immigration and Border Protection. Please contact the International Student Centre for advice before lodging your application to transfer.

Transferring from a PhD to a Master of Philosophy

While you may start your research in a PhD program, you should be aware that life sometimes gets in the way of the intensive 3–4 year full-time commitment required to complete a PhD. Some students may come to realise that a research career, or the particular research project they have commenced, is not for them while others may find that the time and focus required to complete a PhD is simply not achievable due to their personal circumstances.

Whatever the reason, it is important to be honest with yourself and your supervisors about your commitment to your research project, so that you can ensure the best outcome for you. Where appropriate, completing your research as a Master of Philosophy is a good result and will ensure that the significant investment of time and energy that you have already made in your research will not go unrewarded. A Master of Philosophy will provide you with a postgraduate qualification which will be recognised and valued by a wide range of employers as well as providing you with an excellent basis to pursue further research study in the future, not to mention a strong competitive advantage for future research scholarship applications.

It is important to note that examiners cannot recommend that a thesis which is below PhD standard be awarded a master by research qualification (with or without amendments). Therefore, it is essential to ensure that the work submitted for examination reflects the required standard for the degree; a borderline PhD submission may result in no degree being awarded and no recourse for future submission as a master.

If you or your supervisors consider that the product of your research is not going to achieve doctoral standard within the allowable timeframe for the PhD, candidature should be transferred to a master program as soon as possible. Typically, applications for transfer naturally follow from the major review of progress and are processed within two years from commencement. However, subject to the necessary approvals, transfer may be permitted at any time prior to submission.

If you wish to transfer from a PhD to a Master of Philosophy or other approved master by research program, you may apply by completing the ‘Transfer candidature from a PhD to a master’s application.’

www.adelaide.edu.au/graduatecentre/forms/candidature-management/

The application requires the approval of your supervisors and the head of school or postgraduate coordinator. Steps (ii)–(iv) of the process described above for upgrading from a Masters to a PhD above are identical.

On approval of the transfer, your maximum candidature duration and Research Training Scheme entitlement will be two years (or half-time equivalent) less the number of days of doctoral candidature previously completed.
Note that if you have completed two or more years of candidature at the time of approved transfer, your candidature in the master program will lapse immediately. The lapse date may be extended by six months (or half-time equivalent) by lodging an ‘Extension to candidature application’, at the same time as your application to transfer.

Scholarship holders
The maximum duration of a Master of Philosophy scholarship is two years. Therefore, if you intend to transfer to a Master of Philosophy, it is advisable to do so within two years from the commencement of your PhD candidature, as you may be required to repay any scholarship payments you receive beyond the maximum tenure of the award.

International students
International students who are considering transferring to a Master of Philosophy level program should contact the Adelaide Graduate Centre for advice in the first instance.

Changing from a coursework program to a research program
If you are enrolled in a coursework program at the University of Adelaide, it is not possible to simply transfer your candidature to a research program. You will first need to establish that you meet all the eligibility requirements to apply for admission to your chosen research program by consulting the relevant academic program rules. The next step is to apply for admission to your chosen program and to seek credit (where relevant) as part of the application process. Credit can only be granted for studies which have not been presented for another award and for coursework, only where there is a formal coursework component within the chosen research program.

Note that any credit granted will reduce the duration of your candidature and if applicable, your scholarship proportionally. For example, if you were granted 12 units of credit for courses undertaken at the University of Adelaide (equivalent to six months full-time candidature), your maximum candidature and scholarship duration would be reduced from two years to 18 months.

Leave of absence
It is preferable to progress your research program without interruption as far as possible and this is particularly true in the final stages of candidature. However, in some circumstances such as in case of illness, financial or family difficulties, it may be sensible to take a leave of absence until the problems have been resolved. When leave of absence is granted, the ‘clock’ stops ticking, which means that precious candidature and scholarship time are not being eroded during a period when you are not able to work at full capacity.

Is there a limit on when and how much leave I can take?
Yes. Irrespective of full-time or half-time status, you may take a maximum of 12 months of leave of absence during your candidature with the endorsement of your school. However, for students commencing in or after 2015) leave is not permitted except in exceptional circumstances, during the twelve months immediately prior to your candidature expiry date, or, during an extension of candidature, or, during a candidature reactivated for the purposes of revising and resubmitting a thesis for re-examination. The Research Education and Development Committee will consider applications for leave beyond 12 months, or in the final stages of candidature (≥2015 commences), only where there are exceptional circumstances that are beyond your control.

It is important to note that if you are granted exceptional leave, the University will endeavour to ensure, but cannot guarantee, that it will be possible for you to resume the project you were pursuing prior to taking leave. On your return from leave, several factors will need to be considered: for example, is your research still current, or have advances in the field superseded the work that you were doing? Are the same supervisor(s) still available to supervise your research? Because of staff departures, study leave and/or work load issues, it may not be possible for you to be placed with the same supervisor(s) on returning from leave and in extreme cases, particularly in very specialised fields, there may be no staff in the discipline who are equipped to supervise your research. Regrettably, in these cases, you should be aware that continuation of your candidature may not be possible.

If you wish to apply for leave of absence, first discuss your situation with your supervisors and then complete the form ‘Application for leave of absence/study leave’, attaching a medical certificate if you are applying for leave on medical grounds. Your supervisors and the head of school or postgraduate coordinator must support your application. It is important to note that, except with the written approval of the Dean of Graduate Studies, if you are enrolled in both a higher degree by research and another program(s), you will only be granted leave of absence from your research higher degree if all other programs in which you are enrolled are also intermitted. When leave of absence is approved, your candidature will be extended by the period of time for which the leave was granted.

Note that students are entitled to take four weeks of annual leave per year. Annual leave does not affect your milestone due dates, or candidature/scholarship expiry dates and any scholarship payments will continue as usual. Domestic students are not required to complete an application form for annual leave; however, it is important to discuss your plans and negotiate any time that you will be absent from the University with your supervisors.

Scholarship holders
Continuation of a scholarship after a period of leave of absence exceeding the maximum entitlement will be subject to the approval of your school and the Dean of Graduate Studies. Some scholarship holders may be entitled to receive additional paid sick leave of up to a total of 12 weeks during the term of their (major) scholarship for periods of illness lasting longer than ten days and for which a medical certificate has been provided. If you are unsure of your entitlements, please contact the Adelaide Graduate Centre for advice.

As your scholarship payments will be suspended while you are on leave (except paid medical leave), it is advisable to apply for leave of absence at least two weeks in advance of the commencement date of the leave, where possible, to ensure that your scholarship payment can be adjusted before an overpayment is incurred. You will be required to reimburse the University in the event of a scholarship overpayment.
International students

Annual Recreation leave
Taking annual leave does not affect your student visa in any way. However, as an international student if you are planning to travel interstate or overseas during your recreation leave, you will need to complete the form ‘Application for Leave of Absence and/or Recreation Leave’ to ensure that the University has your current contact details in the event of an emergency e.g. natural disaster.

If you do not plan to take recreation leave interstate or overseas, you simply need to negotiate the time you will be away from the University with your supervisors (to a maximum of four weeks per calendar year).

Leave of absence
If you plan to take a leave of absence from your studies, you need to be aware of the implications this will have on your visa status.

> As a student visa holder, you are expected to study while you remain onshore in Australia. This is because study is the main condition of your student visa. Research students are allowed to take a leave of absence for up to 28 calendar days (i.e. including weekends) in any given calendar year (i.e. from 1 January until 31 December) without it affecting their student visa. If you need to take a Leave of Absence for longer than 28 days in a given calendar year, please contact the International Student Centre and ask to speak to a Compliance Officer about your leave options.

Note that if a research student takes more than 28 days Leave of Absence in a given calendar year, the University of Adelaide is required to report this to the Department of Immigration and Border Protection.

Depending on the circumstances, this may result in the cancellation of your CoE and subsequently your student visa. To allow time for any visa/sponsorship issues to be addressed and for any scholarship payments to be adjusted, it is important that your application for Leave of Absence should be lodged with the Graduate Centre at least 10 working days in advance of the planned leave or 15 working days in advance if you are a scholarship holder.

Return from leave of absence
On return from leave, it is important that you notify the Adelaide Graduate Centre so that your enrolment and any scholarship payments can be reactivated. Note that:

1. within two weeks of your expected date of return, you are required to notify the Graduate Centre of the resumption of your candidature by completing and lodging the ‘Return from Leave of Absence Notification’ form

2. If you do not intend to return from leave on the date previously approved by the University, you are required to apply for an extension of leave of absence at least one week prior to the originally approved date of return. Failure to comply with the conditions specified above will result in the suspension of your candidature.

International students
Under the provisions of the Education Services for Overseas Students Act 2000, the University must notify the Department of Immigration and Border Protection (DIBP) if students breach their visa conditions.

Failure to return from leave of absence on the approved date constitutes such a breach and following notification to DIBP, is likely to result in the cancellation of your student visa.

Study leave
Study leave is intended for when you wish to undertake fieldwork, research or study towards your research degree while located outside the University for a limited period of time, not normally exceeding 12 months in total. In considering the approval of study leave, factors such as the availability of appropriate supervision, travel costs, subsistence arrangements and means of communication with your University supervisors are taken into account.

An application for study leave before you have completed the core component of the structured program requires both a supporting statement from your principal supervisor and head of school or postgraduate coordinator and the approval of the Dean of Graduate Studies.

To apply for a period of study leave, complete the form ‘Application for Study Leave’. The form can be requested from the Adelaide Graduate Centre or downloaded at: www.adelaide.edu.au/graduatecentre/forms/candidature-management/

To ensure that you are covered by insurance during the time you are absent from the University, your application for study leave must be lodged with the Adelaide Graduate Centre well in advance of your expected departure date. The Graduate Centre will notify you in writing of the results of your application. It is important to note that approval from the Graduate Centre for your study leave does not exempt you from the requirement to seek approval for travel to a high-risk destination where applicable.

What if my study will take me overseas?

Travel Safety
The University has a robust travel safety system in place for all business and study travel which is informed by the Department of Foreign Affairs and Trade (DFAT).

Special authorisation is required from the Vice-Chancellor and President for any proposed study leave which will involve travel to a high risk destination for which the DFAT travel advice is ‘reconsider your need to travel’ (level 3 alert) or ‘do not travel’ (level 4 alert). This process assists the University to monitor, manage and, where appropriate, control travel to areas with increased safety risks. The current travel alert levels are available on DFAT’s ‘Smart Traveller’ web site at: www.smartraveller.gov.au/ These are regularly updated and it is important that you check the site and before submitting your study leave application. Where your planned study will involve travel to a high risk destination (DFAT level 3 or 4 alert), you must additionally complete a ‘Request for travel to a high risk destination’ form and obtain approval by the University’s Vice-Chancellor and President before the travel occurs.

In accordance with the University’s travel and entertainment policy, all travel for study/ business purposes should be arranged through the University’s preferred travel provider (Campus Travel). Further information is available at: www.adelaide.edu.au/finance/travel/ and www.adelaide.edu.au/policies/2723/

The University highly recommends that you register your travel plans with DFAT at the Smart Traveller website. www.smartraveller.gov.au/
Updates on health and security situations

Email advice to travellers including the

1. The University is required to abide by
   both The United Nations Sanctions
   (Regulation 2008) as well as the Australian
   Autonomous Sanctions Regulation 2011.
   Therefore, if you are a citizen of a country
   that is subject to sanctions, detailed plans
   of your proposed study leave may need to
   be forwarded to DFAT for consideration.
   In this event, notification of the decision
   on your study leave application will
   take some time.

2. To avoid delays in the approval of your
   study leave application, particularly if you
   are a citizen of a country that is subject to
   sanctions, you must lodge your application
   well in advance of your proposed
   travel and prior to making any travel
   arrangements; a minimum of 15 working
   days is recommended.

3. The Adelaide Graduate Centre may
   contact your principal supervisor for
   further details of your proposed off-site
   research activity.

Changing attendance mode
(internal/remote)

Following the commencement of
   candidature, you can apply to change from
   an internal to a remote mode of attendance
   after satisfactorily completing the core
   component of the structured program.
   Applications to convert to a remote PhD
   or master’s by research can be made on
   the form ‘Application and Guidelines
   for Remote Candidature’ and require the
   approval of your school and the Research
   Education and Development Committee.
   Approval will only be granted where the
   arrangements for external supervision and
   access to financial support, resources
   and facilities are adequate.

Remote candidature may be undertaken
   on a full-time or a half-time basis.

International students

Fee paying remote international students
   pay 50% of the internal international student
   fee. Note that student visa holders must
   maintain a full-time attendance status
   while in Australia.

Completion of your thesis
outside the University

After completing a minimum of two years
of research towards a doctoral degree or
one year of research towards a Master
of Philosophy and (where applicable) all
required experiments and coursework
(including placements), you may apply for
permission to complete the writing up of your
thesis outside the University.

In assessing your application, the school
will consider whether your progress is
sufficiently well advanced to enable you
to satisfactorily complete your thesis
independently outside the University.
An application to write up outside requires the
support of your supervisors and the head
of school or postgraduate coordinator.
Approval is normally granted for a maximum
period of 12 months or for the remainder
of your candidature, whichever is less.
After this time, your candidature will lapse
and no further extension of candidature
will be permitted.

Note that in some cases, writing up
outside may have the effect of shortening
your candidature.

Extension of candidature

If you do not expect to be able to submit your
thesis by the candidature expiry date you can apply,
with the approval of your school, for an
extension of candidature for a maximum
of 12 months if you are a doctoral student or
six months if you are a Master of Philosophy
student. Note that the maximum period of
extension is the same for both fulltime and
half-time candidates and is usually granted
only for exceptional academic circumstances.
Candidature extension should not be viewed
as an alternative to the appropriate use of
leave of absence.

As an application to extend candidature
cannot be processed after your candidature
has lapsed, you are encouraged to submit
an application well before your candidature
expiry date. The Adelaide Graduate Centre
will remind you that your candidature
is due to lapse approximately three
months in advance.

An application to extend your candidature
can be made on the form ‘Extension to
Candidature Application’, available at:
www.adelaide.edu.au/graduatecentre/
forms/candidature-management/

International students

If you are a sponsored international student,
it is advisable to consult the International
Student Centre regarding the possibility of an
extension of your sponsorship before lodging
an application for extension of candidature.
Your sponsor may not permit you to extend
your candidature by the maximum period.
Where necessary, the International Student
Centre can also provide advice about
extending your student visa and Overseas
Student Health Cover (OSHC).

Extension of scholarship

If you are a Doctoral student, you may apply
to extend your scholarship for a maximum
period of six months beyond the three year
tenure of the award. In assessing your
application, the Adelaide Graduate Centre
will seek evidence, both in the information
provided on the application form and in
your previously submitted annual reviews of
progress, that the extension is required as a
consequence of delays in your research that
were beyond your control.

An application to extend your scholarship
can be made two months before the
expected expiry of your award on the form
‘Application for extension to scholarship’. The
form is available at: www.adelaide.edu.au/
graduatecentre/scholarships/forms/

Insurance

The University purchases travel insurance
for all staff and students travelling interstate
or overseas on approved University travel.
In general, duration of travel covered is 180
days, however where a period of travel
is greater, arrangements for a different
category of travel insurance can be made
by contacting Legal & Risk. This will incur
additional cost.

Where travel is booked through the preferred
travel supplier, the traveller can access the
services of Customer Care to assist in the
management of travel safety. Customer
Care provide:

> Updates on health and security situations
   across the globe

> Email advice to travellers including the
   immunisations required prior to travel,
   local customs and laws

> An online tool that enables the University
   (Health, Safety & Wellbeing) to quickly
determine the location and contact details
of University travellers

Please note: Customer Care is not the
University’s insurance provider. Travellers
needing emergency assistance (as opposed
to travel advice) should contact ACE
Emergency Assistance reverse charges on
+61 2 8907 5995.

For further information and advice, refer
to: www.adelaide.edu.au/legalandrisk/
insurance/travel/

International students

You should be aware that:

1. The University is required to abide by
   the Australian
   Autonomous Sanctions Regulation 2011.

2. To avoid delays in the approval of your
   study leave application, particularly if you
   are a citizen of a country that is subject to
   sanctions, you must lodge your application
   well in advance of your proposed
   travel and prior to making any travel
   arrangements; a minimum of 15 working
   days is recommended.

3. The Adelaide Graduate Centre may
   contact your principal supervisor for
   further details of your proposed off-site
   research activity.
If you plan to take a leave of absence from your studies, you need to be aware of the implications this will have on your visa status.

The maximum tenure of a Master of Philosophy scholarship is two years with no possibility of extension.

International students
If you are an international doctoral student you may, under very exceptional circumstances, apply for a further extension of your scholarship for a maximum of six months, on the ‘Application for extension to scholarship’ form.

Submission
After submission of your thesis for examination, your candidature remains active (with a load of zero) and you should be able to access University services and facilities as normal for a period of time. As your load is set to zero, you will cease to incur any tuition or Student Services fee liabilities.

If your library access expires, it is possible to have it reinstated where your School grants you visitor access: www.adelaide.edu.au/technology/youreservices/accounts/new-account/#tab-3-

Scholarship holders
If you are in receipt of a scholarship, payments will stop from the time you submit your thesis for examination or the expiry date of the scholarship (whichever falls first).

International students
For students who hold a student visa (subclass 574) issued after 5 November 2011
The Government has introduced an increase to the visa validity of all HDR visas (subclass 574) by six- eight months for the purpose of interactive marking of a thesis (the actual visa duration is determined by the Department of Immigration and Border Protection on a case-by-case basis). Consequently, students issued with a visa on or after 5 November 2011 no longer need to make a specific application to remain in Australia during the period of thesis examination.

For students who hold a student visa (subclass 574) issued prior to 5 November 2011
If your visa is due to expire before you have received your examiner’s reports or completed any corrections required by your examiners prior to final submission, you can apply for an extension by following these steps:
1. obtain a statement from your principal supervisor indicating support for you to remain in Australia during the thesis marking period. Your supervisor can provide a statement via email to isc@adelaide.edu.au or by letter
2. if you have been provided with a letter from your supervisor please take this with you to the International Student Centre where the staff will provide you with a letter that you can take to the Department of Immigration and Border Protection to accompany your application to extend your visa. The letter provided by the ISC replaces the need for a Confirmation of Enrolment (CoE)
3. extend your Overseas Student Health Cover (OSHC) to ensure you have sufficient cover for the duration of your new visa. The ISC will advise you of the duration when they provide you with your letter. Please note: no scholarship or sponsor will cover the cost of OSHC for the portion of your visa set aside for marking purposes, and as such you will need to purchase additional OSHC coverage. You can do so through the University’s preferred supplier by following this link: www.oshcallianzassistance.com.au/?AgentID=238236
4. submit your new visa application along with any required documentation in person to the Department of Immigration and Border Protection (please note that this type of application cannot be submitted online).

The Department of Immigration and Border Protection will advise you of any other information you may need to supply and whether or not you will need to undertake any medical checks.
If you have any questions regarding this process, please contact the International Student Centre on (08) 8313 4828.

Lapsed candidature
If you do not submit your thesis for examination (nor apply for an extension) before your candidature expiry date, your attendance status will be recorded as lapsed. The Adelaide Graduate Centre will remind you of your approaching candidature expiry date, approximately two months in advance. Once your candidature has lapsed, you are no longer an enrolled student of the University and consequently, are not entitled to the rights and privileges, including access to University resources, facilities, supervision and insurance cover, associated with an active candidature.
A lapsed candidature can normally only be reactivated for the purpose of submission and then only if the submission takes place within 12 months of the lapse date. Approval of the Dean of Graduate Studies is required for submission of a thesis when a candidature has been lapsed for longer than 12 months.

Withdrawal
If you are considering withdrawing from your degree program, you should first discuss the matter with your supervisors to discuss the options available to you. In some cases, it may be more appropriate to, for example: take a period of leave of absence; convert to a half-time attendance status; apply to study remotely; or to transfer your candidature to a Master of Philosophy rather than to withdraw completely. If you do decide to withdraw, you will need to formally notify the Adelaide Graduate Centre by lodging the form ‘Withdrawal from Candidature Notification’, which is available at www.adelaide.edu.au/graduatecentre/forms/candidature-management/.

Readmission after withdrawal may be possible in some circumstances provided that the application is supported by your head of school and approved by the Dean of Graduate Studies.

International students
If you withdraw from your research program, the University is required to notify the Department of Immigration and Border Protection of the discontinuation of your study; this is likely to result in the cancellation of your student visa.
Suspension of candidature

Your candidature and any scholarship payments will be suspended if you do not comply with any formal requirement of your candidature, for example by:

1. failing to undertake a required review of progress by the due date or extended due date
2. failing to respond to any University correspondence sent to your nominated mailing address or campus email address within two months of the requested date of response
3. taking leave of absence without approval (suspension will be immediate on receipt of notification by the Adelaide Graduate Centre)
4. failing to return from leave of absence on the expected date
5. failing to notify the Adelaide Graduate Centre of your return from leave of absence within two weeks of your return
6. non-payment of University fees and charges without making arrangements with the relevant area to discharge your obligation.

In the event that your candidature is suspended, reinstatement will only be possible with the approval of your school or, in the case of 6 above, with the approval of the relevant area, where the research undertaken prior to suspension remains current and appropriate supervision and resources are available to support your reinstated candidature and where the reason for the suspension has been addressed. The reason(s) for suspension may be addressed by, (as applicable):

1. lodging a satisfactorily completed review of progress
2. responding to the University as requested, with a satisfactory explanation for the lateness of the response
3. lodging an application for retrospective leave of absence to cover the actual dates of absence from the University
4. lodging a return from leave of absence form
5. discharging an outstanding financial obligation or entering into a payment plan with the relevant area.

If you have been suspended and do not take action to reinstate your candidature within 12 months from the date of suspension, your candidature will be irrevocably terminated.

International students

If you are suspended from your research program, the University is required to notify the Department of Immigration and Border Protection and this is likely to result in the cancellation of your student visa.

Scholarship holders

If your candidature is reinstated following a period of suspension, any scholarship payments that would have been payable during the period of suspension are forfeited and the expiry date of your scholarship will not be adjusted.

Termination of candidature

Your candidature and any scholarship payments may be terminated if:

1. your progress is unsatisfactory as reported to the Adelaide Graduate Centre following a review of progress, whether scheduled or unscheduled, or
2. your candidature has been suspended for a total of 12 months or more.

If your candidature has been terminated for unsatisfactory academic progress, reinstatement is only possible following a successful appeal through the provisions of the Student Grievance Resolution Process. Please refer to the sections on ‘unsatisfactory progress during provisional candidature’ and ‘unsatisfactory progress during confirmed candidature’ for further information.

International students

If your research program is terminated, the University is required to notify the Department of Immigration and Border Protection and this is likely to result in the cancellation of your student visa.
By reviewing progress regularly throughout your candidature, the University aims to address any problems or difficulties as quickly as possible at the local level and to foster a supportive research environment in which students can fulfil their academic goals.

You will have regular meetings with your supervisors, in which you and they can discuss your research progress, identify any impediments to progress and progress concerns and how these could be addressed.

In addition you will undergo ‘scheduled’ formal reviews of progress in the form of milestones, including:
1. The core component of the structured program
2. The major review of progress
3. Annual reviews of progress due 31 October each year and
4. Minor reviews of progress due 15 April each year (remote candidates only).

Some candidates may also complete a pre-submission review.

As your candidature progresses, if, in the academic judgement of your school, there are significant and/or ongoing concerns about your progress and capacity to complete, the following will occur:

**Unsatisfactory progress during provisional candidature**

Prior to confirmation of candidature, if your progress is deemed to be unsatisfactory, the school may recommend that candidature be terminated or, if you are a doctoral student, transferred to a master by research. Such a recommendation will normally be made during a scheduled review of progress (e.g. the core component of the structured program or the major review), however, if significant progress issues arise outside of the scheduled reviews, the school is authorised to initiate a formal review of progress at any time in accordance with the procedures outlined in this Handbook.

Where the school recommends termination of candidature following a review of progress and this recommendation is upheld by the University, your candidature and any scholarship payments will be discontinued.

During the major review of progress, if the school recommends the extension of provisional candidature, you will be granted the opportunity to demonstrate that you can improve your performance to a satisfactory level through the completion of an agreed set of tasks over (typically) a three month period. At the end of the period, the school will undertake a final assessment of your progress in the form of an extended major review, leading to the following possible outcomes: confirmation of candidature, termination of candidature or (if applicable) transfer to a master by research.

**Unsatisfactory progress during confirmed candidature**

The confirmation of candidature reflects that for approximately the first year of your enrolment, your supervisors were positive about your potential for successful completion of your research program.

Following confirmation, students undertake an annual review of progress each year, however, if significant progress concerns develop, your school may initiate a formal progress review at any time.

**Procedure for reviewing unsatisfactory progress by the school**

A school-level review of progress, whether scheduled or unscheduled, will incorporate the following elements:

1. The head of school or postgraduate coordinator or candidature confirmation committee convenor (in the case of the major review) will chair a meeting with you and your supervisors in which the progress issue(s) will be discussed.
2. You may bring another student, staff member or support person (e.g. an education and welfare officer (EWO)) with you to support you and to advocate for you during the meeting, if required.
3. You will be given an opportunity to address the school’s progress concerns, identify any personal and/or academic issues that may have contributed to the unsatisfactory performance, and to outline what measures you have taken or intend to take to help improve your progress.

4. Following the meeting, if the chair is satisfied that the problem has been resolved and that your progress will improve, no further action will be taken.

5. If, however, the chair believes that a problem still exists, (s)he will write to the Adelaide Graduate Centre, outlining the school’s concerns and recommending either: (i) termination of candidature, or (ii) transfer to a lower qualification (if applicable).

(ii) a period(s) of extended provisional enrolment, usually of three months duration, but not exceeding five months in total (major review only); or (iii) three months of conditional enrolment (confirmed candidates only)

In the event of an extension of provisional enrolment or conditional enrolment, the recommendation will detail a series of research tasks and time frames for completion, which will be set by the school in consultation with you. The tasks will be calibrated at a level that a research student working at a satisfactory level can reasonably be expected to complete within the specified time frames.

At the end of the allocated time, the chair will call you and your supervisors to another meeting to review your progress. If the chair considers that your progress has been satisfactory, a report to this effect will be sent to the Adelaide Graduate Centre. The Graduate Centre will notify you in writing that your candidature has been confirmed (in the case of an extended major review), or that your conditional enrolment has been lifted (confirmed candidates) and that the matter is considered closed.

If, however, the school still considers that progress has been unsatisfactory, the school will make a recommendation for termination of candidature or transfer to a master by research (if applicable).

Procedure for the candidate to disagree with the school’s assessment of progress and recommendation

Following a progress review resulting in a recommendation from your school for the termination of your candidature, transfer to a lesser qualification or extension of provisional candidature, you may submit, together with the review, a confidential statement for the attention of the Dean of Graduate Studies. The statement should explain your views on the school’s recommendation and stipulate your preferred outcome; if desired, you may also request in your statement the opportunity to present your views on the school’s recommendation in person to the Dean of Graduate Studies.

If you are a confirmed candidate you may request that your case be reviewed by the Student Matters Sub-committee (SMS) of REDC rather than the Dean of Graduate Studies alone. Provisional candidates, including those undergoing the major review/extended major review of progress may only have their case heard by the Dean of Graduate Studies.

Students meeting with the Dean of Graduate Studies in person, or presenting their position to the SMS may bring a support person to the meeting such as an education and welfare officer.

Procedure for the Dean of Graduate Studies’ review of school recommendations in the case of unsatisfactory progress

Following an unsatisfactory progress review, recommendations by the school/faculty for termination of candidature, transfer to a lesser qualification or conditional/extended provisional candidature will be reviewed by the Dean of Graduate Studies. It is important to remember that the role of the Dean of Graduate Studies in this process is to ensure that all relevant circumstances have been taken into consideration by the school in making their recommendation, rather than to re-evaluate the school’s academic judgement of your progress.

At the discretion of the Dean of Graduate Studies, yourself and/or your school and/or the relevant Faculty Higher Degrees Committee Convenor may be consulted prior to the Dean’s determination. Furthermore, at the discretion of the Dean of Graduate Studies (or at the request of a confirmed candidate), a school’s recommendation for the termination or transfer of candidature may be referred to the SMS for confidential consideration.

In the event that the SMS is involved in reviewing a school’s recommendation, any relevant written materials you previously provided to the Dean of Graduate Studies will be made available to SMS.

Executively, or following referral to the SMS, you will be advised in writing that one of the following outcomes has been determined:

1. Termination of candidature
In this event, you will be notified of the limited circumstances in which a Stage 3 appeal may be lodged in accordance with the provisions of the Student Grievance Resolution Procedure (SGRP; see the section of this handbook on the SGRP). If an appeal has not been submitted within the required timeframe (20 business days), your candidature and any scholarship payments will be discontinued by the Adelaide Graduate Centre.

2. Transfer to a lesser qualification
In this event, you will be notified of the limited circumstances in which a Stage 3 appeal may be lodged in accordance with the provisions of the Student Grievance Resolution Procedure (see the section of this handbook on the SGRP). Where you notify the Adelaide Graduate Centre of your acceptance of the decision, or, where you do not lodge an appeal within the allowable timeframe (20 business days), the centre will process the transfer and advise you of your new program details, including the revised candidature expiry date and scholarship expiry date, where applicable.

3. A brokered settlement
To implement a ‘brokered settlement’, the Dean of Graduate Studies will negotiate with your school to achieve an equitable outcome in cases where there are extenuating circumstances for your unsatisfactory progress. A brokered settlement will provide you with the opportunity to continue in candidature subject to the specified negotiated conditions. The Dean of Graduate Studies will write to you and your school outlining the requirements for the continuation of your candidature.

46 Research Student Handbook 2016
Grievances, complaints and problems during candidature

Student grievance resolution process

The procedures for resolving grievances during your candidature are detailed in the Student Grievance Resolution Process (SGRP), which is available at: www.adelaide.edu.au/student/grievance/

There are three stages that a grievance may go through within the University before it is resolved — Stage 1: informal discussion; Stage 2: formal review; and Stage 3: appeal.

If you are dissatisfied with the outcome at any stage of the University’s grievance resolution process, you may seek external appeal or review of your appeal. Note that if the University receives notification that a grievance is the subject of formal external enquiry or legal action, the application of Stages 1-3 of the process will be suspended until the external enquiry or action is completed. In addition, where your grievance has been dealt with under Stage 3, the only avenue for review or appeal if you remain dissatisfied with the outcome is external (Stage 4). No further review or appeal is available.

A Stage 4 external review or appeal may be undertaken by:

> consulting a solicitor with a view to pursuing legal remedies (fees usually involved)

> seeking assistance from one of the external agencies listed on the Student Grievance Resolution web site (free or nominal charges): www.adelaide.edu.au/student/grievance/process/stage4/

The SGRP is structured so that grievances and complaints are resolved as quickly as possible, at the local level. The vast majority of student grievances are resolved at the local level at Stage 1 or Stage 2 of the SGRP.

Stage 1

If you have a concern or problem during your candidature, first raise it with the person who made the decision or took the action that resulted in your problem or concern.

www.adelaide.edu.au/student/grievance/process/stage1/

You can use your supervisors as a source of advice, however, if you feel uncomfortable raising your concern directly with your supervisor(s), you can talk to the postgraduate coordinator or, if you prefer, the head of school. Note that if the postgraduate coordinator is also your supervisor, you can contact the head of school directly. Similarly, if the head of school is also your supervisor, you may speak to the deputy head of school or another senior academic staff member of the school whom you find approachable.

Stage 2

If you remain unhappy with the outcome of your informal discussions, you can request a Stage 2 formal review in accordance with the SGRP. For further information, refer to www.adelaide.edu.au/student/grievance/process/stage2/

Before proceeding, you may wish to consult with a support person outside your school. Education and welfare officers (EWOs) are available to provide independent advice about your options, and may also liaise or advocate on your behalf if there are complications involved in your directly approaching the subject of the grievance or complaint. EWO services are free of charge for students of the University, and contact details for the EWOs are provided in the Contact Details section of the handbook.

Once a Stage 2 formal review has been initiated, the relevant authority will review your problem or complaint and advise you of their decision. The relevant authority is the Dean of Graduate Studies in the case of grievances against administrative decisions. As described below, there are no Stage 2 formal reviews in the case of academic evaluations of student progress during candidature and examination outcomes.

Stage 3

If the matter is not satisfactorily resolved at Stage 2 or if a Stage 2 review is not required and you have eligible grounds for doing so, you can lodge an application for a Stage 3 appeal. Applications for appeals must be submitted within the prescribed timeframe of 20 business days, as defined in the SGRP:

A grievance will usually proceed to a Stage 3 appeal to the University’s Student Grievance and Appeals Committee only if the following conditions have been satisfied:

> a Stage 2 formal review has been completed or is not required (see ‘Administrative determinations and academic evaluations of student progress during candidature’ on the next page), and

> there are reasonable and eligible grounds for appeal, with sufficient supporting evidence for the Student Grievance and Appeals Committee to be able to make a safe determination.

Once the application has been checked for completeness, the University's Student Grievance and Appeals Committee will hold a hearing to make a final determination on the matter — see www.adelaide.edu.au/student/grievance/process/stage3/

You are encouraged to seek advice and assistance from the education and welfare officers (EWOs) or other support person, at all stages of the process.

If there appears to be some common ground between the parties to an appeal, the SGRP provides for independent mediation or the brokering of a settlement agreement instead of a hearing by the Appeals Committee — see www.adelaide.edu.au/student/grievance/process/stage3/process/
Categories of grievances and complaints

Grievances during candidature tend to fall into three main categories:

1. Administrative determinations
   In the first instance, a grievance concerning an administrative determination (e.g. suspension of candidature because required documentation has not been lodged) should be directed to the Director of the Adelaide Graduate Centre. If the matter is not resolved to your satisfaction, you may be eligible to lodge a request for a Stage 2 formal review by the Dean of Graduate Studies.
   If you are dissatisfied with the outcome of the review, and if you have eligible grounds, you can lodge an appeal application with Student Policy and Appeals. Application forms (including lodgement and contact details) are available at www.adelaide.edu.au/student/grievance/process/stage3/process/

2. Academic evaluations of student progress during candidature
   Academic evaluations of unsatisfactory progress during candidature are made by a committee at school level. The resulting recommendations for termination of candidature or transfer to a lower qualification (if applicable), are then considered by the Dean of Graduate Studies or the Student Matters Sub-committee (SMS) of REDC, to ensure that any personal circumstances relating to the student’s performance are taken into account before a final determination is made.
   As a result, a student excluded from their program or transferred to a lesser qualification for unsatisfactory progress can only appeal on procedural grounds. The appeal cannot go to the merits of the decision. (Note: no Stage 1 or 2 reviews) If you believe there are procedural grounds for overturning or amending the decision made by the Dean of Graduate Studies or the SMS, you may lodge an application for a Stage 3 appeal in accordance with the provisions of the SGRP. Appeals must include evidence to show that:
   - the decision was not made in compliance with the program rules and/or handbook procedures, and
   - such non-compliance amounted to a serious defect in the decision.
   Candidates are encouraged to seek advice from an EWO to support them during reviews of unsatisfactory progress and ensuing processes. Students may also contact the Dean of Graduate Studies for advice at any stage.
   For further information on the Student Grievance Resolution Process, please contact Student Policy and Appeals on (08) 8313 7503 or (08) 8313 7572; or by email to grievance.resolution@adelaide.edu.au

3. Examination outcomes
   Outcomes for thesis examinations are based on the advice of independent examiners. Normally two examiners are involved, but where there is a significant divergence of opinion between them, additional examiners and/or an arbitrator may be appointed to help reach a consensus outcome. In such cases, the final decision is determined by the Student Matters Sub-committee of REDC in accordance with the procedures detailed in this handbook.
   Therefore, the sole recourse within the University for HDR students who are dissatisfied with the outcome of a thesis examination is to lodge an application for a Stage 3 appeal on procedural grounds only. Appeals cannot go to the merits of the examiners’ reports or the final decision of the SMS. Appeals must include evidence to show that:
   - the decision was not made in compliance with the program rules and/or handbook procedures, and
   - such non-compliance amounted to a serious defect in the decision.

48 Research Student Handbook 2016
Students and staff members engaged in research are expected to be committed to exemplary standards of professional conduct and integrity.

The broad elements that guide the conduct of research include:

- the maintenance of high ethical standards and intellectual honesty
- validity and accuracy in the collection and reporting of data
- appropriate storage and retention of data
- adherence to the Health, Safety and Wellbeing requirements of the discipline
- abiding by the University's guidelines for the authorship of publications
- avoidance of real or apparent conflicts of interest
- the appropriate recognition and assignment of intellectual property, copyright and technical/editing assistance and
- adherence to any confidentiality agreements and contractual agreements.

### Responsible conduct of research policy

The University’s “Responsible Conduct of Research” policy summarises the standards of conduct and performance required of all those engaged in research at the University. Please also refer to the “Australian Code for the Responsible Conduct of Research 2007”. The policy can be viewed at: www.adelaide.edu.au/policies/96/

### The Australian Code for the Responsible Conduct of Research

The Australian Code for the Responsible Conduct of Research (the Code) provides guidance to institutions and researchers in responsible research practices. Information is also provided on how to manage breaches of the Code and allegations of research misconduct, how to publish and disseminate research findings, including proper attribution of authorship, how to conduct effective peer review and how to manage conflicts of interest. It also explains the responsibilities and rights of researchers if they witness research misconduct.

Compliance with the Code is a prerequisite for receipt of National Health and Medical Research Council and Australian Research Council funding. The Code can be viewed at: www.adelaide.edu.au/research/our-research/integrity/

### Management of research data and primary materials

All students and staff engaged in research at the University of Adelaide are required to undertake training in the Code. For research students, online training materials are available in the form of the following three modules:

- publication and dissemination of research findings
- management of data and primary materials
- authorship issues.

The modules can be accessed at: sms.gradcentre.adelaide.edu.au/admin/login and are completed as part of the core component of the structured program.

If you have questions about the appropriate conduct of research in your discipline, you are encouraged to consult your supervisors, postgraduate coordinator or head of school in the first instance. The Dean of Graduate Studies and the Deputy Vice-Chancellor and Vice-President (Research) are also available for consultation where required.

As outlined in the Code, the responsible conduct of research includes the proper management and retention of research data. Retaining research data is important because it may be all that remains of the research work at the end of the project. While it may not be practical to keep all the primary material (such as ore, artefacts, biological material, or questionnaires), durable records derived from them (such as assays, photographs, digital recordings, test results, transcripts and laboratory and field notes) must be retained and remain accessible.
The central aim is that sufficient materials and data are retained to justify the outcomes of the research and to defend them if they are challenged. The potential value of the material for further research should also be considered, particularly where the research would be difficult or impossible to repeat.

Before thesis submission, you will be required to deposit all the original data or primary research materials relevant to your thesis with your supervisor.

Working with your supervisor to determine a data management plan for the appropriate management and back-up of data and primary materials during and on conclusion of your research project is essential. The appropriate management and retention of research data becomes a much easier task where a data management plan is put in place from the beginning of your degree. Accordingly, development and lodgement of a plan is a compulsory requirement for completion of your Core Component of the Structured Program.

To assist you in developing your plan, a number of resources are available as follows:

- the University of Adelaide's guide to research data management and a template for a data management plan: libguides.adelaide.edu.au/researchdata
- the University's Research Data and Primary Materials Policy: www.adelaide.edu.au/policies/4043/
- online training in data management: sms.gradcentre.adelaide.edu.au/admin/login
- data management planning workshops: www.adelaide.edu.au/carst/hdr-workshops/
- individualised information and advice to assist you in developing a data management approach specific to your project, from Ms Mary O'Connor, eResearch Support Librarian.

DataConnect UPDATE

DataConnect, the University's public research data catalogue can be used to record descriptions of data arising from your research. DataConnect serves two important functions for staff and research students. First, it allows the University to maintain a record of research data including where it is stored and second, it lets us expose information about datasets that we may wish to share with other researchers.

Further information is available at: libguides.adelaide.edu.au/researchdata/dataconnect

In consultation with your supervisor, you should agree on plans for deposit of data and recording the data’s storage location in DataConnect. Simply log in to DataConnect (only on the University network or via the virtual private network), then complete and submit the form as instructed.

Remember not to include sensitive or confidential information as the record will be published on Research Data Australia.

Ethics in research

Training in animal and human ethics is a requirement for all students who need the appropriate ethical approval for their work.

All students must be familiar with the relevant legislative and compliance requirements of the University and also of regulatory and advisory bodies in relation to their research or experimentation. As research projects and practices must conform to the accepted ethical standards and statutory requirements, you will not be permitted to commence research involving human or animal subjects, or genetically modified organisms until you have completed appropriate ethics training and obtained the required approvals.

Students are reminded that ethics approval cannot be granted in retrospect and that the conduct of research without appropriate ethics approval would be a breach of the Australian Code for the Responsible Practice of Research.

Required ethics approvals must be arranged by the time you lodge the ‘Core Component of the Structured Program’ form with the Adelaide Graduate Centre and it is important to note that your core component will not be approved while required ethics clearance(s) remain outstanding. To demonstrate that you have obtained the necessary ethics approval(s), you must record the relevant approval number on the core component form and attach a copy of the letter(s) confirming ethics approval from the relevant ethics committee(s) before lodgement with the Graduate Centre. A copy of the ethics application itself is not required.

Following approval of your core component, if there is a change in project direction and ethics approval becomes necessary later in your degree, you must ensure that an application is submitted at least three months prior to the date when you expect to commence this aspect of your research to allow sufficient time for the application to be considered and processed.

During your annual reviews, you will be asked to report on whether you needed to apply (or will need to apply) for ethics approval subsequent to completion of your core component or previous annual review. As for the core component, it is important to note that your annual review will not be approved while required ethics clearance(s) remain outstanding as evidenced by your supply of the relevant approval number on the annual review form and provision letter(s) confirming ethics approval from the relevant ethics committee(s).

Failure to obtain the necessary ethics approval(s) before commencement of research can have serious consequences.

For example:

- You as a researcher can be held personally liable in relation to non-compliance. Not only could your candidature be jeopardised, penalties can include criminal prosecution, fines or imprisonment. A major noncompliance could possibly cause a shut down in a particular area if a statutory body withdrew its accreditation licence;
- major funding bodies will only release funds to successful grant holders once all relevant approvals have been obtained. Ongoing funding is also dependent on ongoing compliance with your ethics approvals;
- indemnity and insurance are becoming more and more of an issue. It is a condition of the University’s insurance policies that you have the necessary approvals in place. Whilst it is your principal supervisor who will submit the application(s) for any required ethical approval(s) for your higher degree project, you will be involved in preparing applications for approval which may involve interaction with the relevant ethics officer. It is your responsibility to ensure that your supervisor has obtained ethics approval and to see that this is reported to the Adelaide Graduate Centre. It is also your responsibility not to commence research without any necessary ethics approvals and your supervisor’s awareness that the research is due to commence.

The ethics officers can be found in the University’s Office of Research Ethics, Compliance and Integrity (ORECI). ORECI provides resources, advice and assistance to University researchers regarding their ethics and compliance obligations: www.adelaide.edu.au/ethics/
The work of the office covers: human research ethics, animal ethics, gene technology, quarantine and security sensitive biological agents.

Human research
Human research is research conducted with or about people, or their data or tissue. It can be broadly understood to include: taking part in surveys, interviews or focus groups; undergoing psychological, physiological or medical testing or treatment; being observed by researchers; the collection and use of participants’ body organs, tissues or fluids and access to their personal documents or other materials.

There are 3 levels of ethical review for human research which are determined based upon the level of risk to the project’s participants. These are:
- research exempt from Human Research Ethics Committee (HREC) review;
- research eligible for low risk review; and
- research requiring full review.

A risk is a potential for harm, discomfort or inconvenience. It involves:
- the likelihood that any harm (or discomfort or inconvenience) will occur; and
- the severity of the harm (or discomfort or inconvenience), including its consequences.

Further information on determining the risk level for your proposed research is available on the Office of Research Ethics, Compliance and Integrity web site at: www.adelaide.edu.au/ethics/human/guidelines/levels/

If your research requires full or low risk HREC review, you must obtain ethics approval in advance in accordance with requirements explained at the University of Adelaide Human Research Ethics Committee’s (HREC) web site: www.adelaide.edu.au/research/ethics/human/

You are encouraged to contact the HREC Secretariat for advice where required: hrec@adelaide.edu.au

Training in animal and human ethics is a requirement for all students who need the appropriate ethical approval for their work.

Animal ethics
The use of animals is regulated by State legislation and must comply with the Australian Code of Practice for the Care and Use of Animals for Scientific Purposes 8th Edition, 2013 (available at the animal ethics website). All student projects which intend to use animals for teaching, research or experimentation must obtain ethical approval from the University of Adelaide Animal Ethics Committee (AEC) prior to any use or involvement with animals, irrespective of where they are located, where animals may be housed or used, or of the source of funding. From 2016, applications for animal ethics approval will be submitted online via a web based interface.

If your research will involve the use of animals, completion of either the face-to-face training course conducted by the Animal Ethics Committee in March of each year, or, the animal ethics online induction course (in MyUnl) is required. Following completion of the face-to-face or online course, you must undertake and satisfactorily complete the mandatory online assessment in animal ethics and provide the resulting certificate to the Graduate Centre on completion of your core component of the structured program.

Further information is available as follows:
- Face-to-face training: www.adelaide.edu.au/ethics/animal/training/

Gene technology
Students whose research will involve genetically modified organisms (GMOs) will need the appropriate approvals from the University of Adelaide Institutional Biosafety Committee and, where necessary, the Office of the Gene Technology Regulator, prior to commencing their research. All dealings with GMOs must comply with the Gene Technology Act 2000 and the associated Gene Technology Regulations 2001. Certain dealings with GMOs must be conducted within physical containment facilities that are certified by the OGTR and students working in these facilities must be trained in the OGTR requirements. Students should also be aware that if they are working in another organisation’s premises or facilities, there is the requirement to meet both the University and the other organisation’s compliance protocols.

For further information and advice refer to: www.adelaide.edu.au/ethics/genetech/

Quarantine
The Quarantine Act 1908 regulates the importation of certain material from overseas. Students wishing to import/receive material from overseas need to determine if they require an Import Permit from the Department of Agriculture and Water Resources (formerly the Australian Quarantine and Inspection Service (AQIS)). In addition, some quarantine status material must be stored or dealt with in a Quarantine Approved Premise (QAP).

Researchers should be aware of their responsibilities in relation to maintaining compliance with quarantine status materials, including the new requirements for training.

For further information and contact details for queries regarding quarantine compliance obligations and training please refer to the web at: www.adelaide.edu.au/ethics/quarantine/.
Security sensitive biological agents

To improve the security of biological agents of security concern in Australia, a regulatory scheme has been implemented by the Office of Health Protection, Department of Health and Ageing for the regulation of security-sensitive biological agents. The aim is ‘to give effect to Australia’s obligations to establish controls for the security of certain biological agents that could be used as weapons.’ Agents that are considered to be of security concern to Australia are regulated by inclusion on the List of Security Sensitive Biological Agents (the List of SSBAs). The list may be viewed on the OHECI website at: www.adelaide.edu.au/ethics/ssba/

If your research will involve handling any agent on the List of SSBAs your supervisor must first contact the Research Ethics and Compliance Unit in order to register the SSBAs.

Intellectual Property

The revised University Intellectual Property Policy (‘IP Policy’) was approved by the University Council in July 2012 and is available on the web at: www.adelaide.edu.au/policies/1263/

The general principle is that as a student you are not an employee of the University and in the absence of a contract or agreement to the contrary, you own the intellectual property (IP) generated by your research. However, there are two classes of IP where the general principle does not apply and where the University claims ownership of such IP from the outset through an assignment of the relevant IP. Pursuant to the IP Policy, the effect of such assignment is that you will be treated as a member of staff for the purpose of sharing in any benefits arising from commercialisation of the relevant IP.

It also means that you are able to utilise the expertise available within the University to protect and service your interests, as provided by Adelaide Commercial (formerly Adelaide Research and Innovation). Adelaide Commercial helps researchers at the University by providing expert legal advice on all IP issues, which the Adelaide Graduate Centre then administers in accordance with their directions.

These two classes of University owned IP are where the IP arises from a project that:

1. builds on pre-existing University IP (‘Special Case A’); or
2. is being carried out for or in conjunction with an external third party (e.g. a Cooperative Research Centre, industry partner, company or other institution) whether under a separate formal agreement or not (‘Special Case B’).

It is important to note that if you do not agree to assign such IP to the University, you will be unable to work on a Special Case A project or a Special Case B project and you will therefore need to choose another project that does not build on pre-existing University IP nor involve an external third party. Your supervisors are responsible for assessing up front (through the core component of the structured program (CCSP)) if your project falls into ‘Special Case A’ and/or ‘Special Case B’. Based on the answers provided in the IP section of the CCSP, your Principal Supervisor may be required to provide further particulars.

‘IP Guidelines’: www.adelaide.edu.au/graduatecentre/forms/intellectual-property/ are available to assist in the completion of your CCSP form.

The information provided will be reviewed by Adelaide Commercial. For all instances of Special Case B, and in certain other cases, the Adelaide Graduate Centre will send relevant students a confirmatory IP Deed Poll which must be signed as evidence of ownership of the IP by the University. Certain third-party partners such as CSIRO/SA Pathology/MedVet/CRCs have their own student agreements which may contain other provisions relating to IP. As the student’s IP will be owned by the University in instances of Special Case A and/or Special Case B (or where it has been assigned to the University under a Student Project Participation Agreement or through another mechanism), the University will negotiate and sign a further agreement with the third party partner to clarify the agreed arrangements relating to the IP, and there is no further action required by the affected student.

Unless otherwise approved by Adelaide Commercial, if you are working on a Special Case A and/or Special Case B project, a two year IP embargo will be placed on both the hard copy and electronic versions of your thesis from the date of original submission. At the end of the two year period, the embargo will expire and be automatically lifted; meaning that access to your thesis will no longer be restricted.

Under exceptional circumstances, authorisation to extend the period of the embargo may be provided by the University. All applications to extend the period of the embargo will be considered by the Dean of Graduate Studies on a case-by-case basis and must be received by the Adelaide Graduate Centre at least two months before the embargo is due to expire. If an application for extension is not lodged two months before the embargo expiry date, the embargo will be lifted and the thesis copies placed in the public domain.

IP matters are complex and may take time to resolve. To ensure that unnecessary delays are avoided, you are encouraged to discuss IP with your supervisor(s)/postgraduate coordinator at an early stage of candidature and, if necessary, to obtain independent legal advice.

Further information regarding IP, including the University’s policy and the relevant forms is available from the web at: www.adelaide.edu.au/graduatecentre/forms/intellectualproperty/

Embargo

It is the University’s expectation that the full text of the vast majority of theses will be made available for unrestricted worldwide access. However, in some cases, it may be appropriate to restrict access to the electronic version and/or the hard copy version of your thesis.

An embargo is a restriction on public access to your thesis. If you have an embargo over both your hard copy and electronic thesis, the hard copy is not available for reading in the University Library, and the full electronic version is not available for download on the web via the Adelaide Research & Scholarship (AR&S) Digital Repository or the National Library of Australia’s Trove Service, as would normally be the case otherwise.
Only the citation of the thesis (comprising author, title, date the degree was awarded, physical description, name of the degree for which the thesis was accepted and the Faculty/School/Discipline of enrolment) and the exegesis (if applicable) will appear online. An embargo is generally granted for a specified period of time which runs from the date of submission. However, from time to time, circumstances may warrant a permanent embargo, such as when the thesis contains information relevant to national defence security. Where a permanent restriction is approved, only an approved title of the thesis will appear in the citation to be placed on the web and the printed thesis will not be made available for public access in the University Library. If an embargo on your thesis has been requested by the University under its Intellectual Property Policy, other publications containing components of the thesis or the results of your research will also be restricted from being made available to the public, including through published papers. This is to protect any intellectual property or confidential information that may be contained in the publication. In such cases you will require the prior approval of the University if you wish to publish.

Although the most common reason behind the placing of an embargo is the intellectual property contained in the thesis, an embargo may be put in place for a variety of reasons. If you are working on a project that builds on pre-existing University intellectual property (‘Special Case A’) or the project is being carried out for or in conjunction with an external third party (whether under a separate formal agreement or not ‘Special Case B’), an automatic two year embargo will be placed over both your hard copy and electronic thesis. At the expiry of this period, the embargo will automatically be lifted, unless prior arrangements have been made and approved by the University. You will be notified accordingly. For more information in relation to this, please refer to the preceding section entitled ‘Intellectual Property’.

Other reasons necessitating you to make an application for an embargo to be placed over your thesis include:

- confidentiality (for example if the project involves human participants and it is necessary to protect their anonymity)
- if the thesis contains commercially, culturally, politically, or criminally sensitive data which the author, with prior approval of the University, had given an undertaking to the sources not to disclose or make public for a limited period of time
- security restrictions
- a pending patent application or publishing contract
- sponsor or school requirements; and
- other legal restrictions

To make an application, complete and lodge the relevant form(s), all of which are available at www.adelaide.edu.au/graduatecentre/forms/intellectual-property/

Applications may be made:

- for an embargo to be placed over your thesis at any stage in candidature (but preferably as soon as possible and well in advance of submission so as to avoid delays in sending your thesis out for examination), for any of the reasons set out in the paragraph above;
- to remove an embargo (if you have already submitted your thesis for examination), or waive the embargo (if you have not yet submitted your thesis for examination).

Based on such application, the Adelaide Graduate Centre may place an embargo on your thesis, or remove it, on the advice of Adelaide Research & Innovation, and in consultation with you, your sponsor (if applicable) and your supervisors.

For creative works such as a novel or a musical performance, you may make an application for an embargo upon the work at any stage in candidature (but probably as soon as possible and well in advance of submission, so as to avoid delays in sending your thesis out for examination), for any of the reasons set out in the paragraph above;

- to remove an embargo (if you have already submitted your thesis for examination), or waive the embargo (if you have not yet submitted your thesis for examination).

Plagiarism and Turnitin

Put simply, plagiarism is the theft of other peoples’ work and ideas without due acknowledgement and attribution. The University has a zero tolerance policy for plagiarism amongst researchers and HDR students and will address any such instances as potential research misconduct. HDR students who commit plagiarism may find their candidature terminated or their degree failed, so the matter is one that is treated very seriously indeed.

A learning module on plagiarism and independent research writing developed by the Research Education Development Unit in cooperation with the Centre for Learning and Professional Development is available to assist research students develop an understanding of what plagiarism is and the importance of academic honesty in research writing. The workshop is available through the MyUni ‘Academic Skills Resources’ course, under the section labelled Career and Research Skills Training (CaRST) for postgraduate students. The direct web link is: www.myuni.adelaide.edu.au/webapps/blackboard/content/listContent.jsp?course_id=_115783_1&content_id=_1488018_1&mode=reset

Copyright

As a student or researcher you will often use other people’s copyright material in the course of your education or research.

The Copyright Act has provisions for students and researchers to use material for certain purposes without being in breach of copyright.

However strict limits apply to the copying and use of this material. These exceptions are for your personal use, not for use on behalf of the University. It is the personal responsibility of all students and researchers to comply with the Copyright Act.

Further information is available at: www.adelaide.edu.au/legalandrisk/copyright/study-research/ and in the University’s copyright policy: www.adelaide.edu.au/policies/2643/

In addition, the University’s Research Librarians, particularly Ms Angela Mills and Ms Marie Kozulic may be contacted for advice: www.adelaide.edu.au/library/about/contacts/res_libs.html
In addition, the University has made ‘Turnitin’, an Internet-based plagiarism-prevention service created by iParadigms LLC, available through MyUni as a resource for you to check and manage the originality of your written work. Some originality checking websites immediately publish your submitted materials online; this can compromise intellectual property agreements and has the potential to create serious issues for yourself, the University and any third parties involved in your research project.

However, the Graduate Centre has customised Turnitin for research students to ensure that you can check any piece of written work for originality e.g. a draft publication, research proposal or thesis chapter without the risk of online publication. You can access Turnitin ‘self-check’ as a course within MyUni and submit, review, revise and resubmit your documents as many times as necessary to ensure that your work contains no examples of accidental plagiarism. Turnitin can be a powerful tool to help you refine your skills as a researcher in compliance with the Australian Code for the Responsible Conduct of Research: www.adelaide.edu.au/research/our-research/integrity/

Authorship

The University’s Authorship Policy adopts the principles embodied in the Australian Code for the responsible Conduct of Research for the attribution of authorship in research publications. To be an author, it is essential to have made a substantial scholarly contribution to the published work. While specific practices may differ from discipline to discipline, there are a number of overarching ethical principles and procedures to which all researchers are expected to adhere. The Authorship Policy sets out formal procedures to assist researchers to determine the appropriate authorship of papers and to minimise potential disputes over authorship issues.

The policy is viewable on the web at: www.adelaide.edu.au/policies/3503

It is advisable to discuss and agree upon the matter of authorship/co-authorship with your supervisors in the early stages of your research project and to revisit the issue as necessary throughout candidature to avoid any misunderstanding that may delay the completion of your research project or publication(s).

In many research projects a number of participants are involved, each undertaking different tasks; it is acceptable in such circumstances for you to use the data/information derived collectively for publication(s) provided that each person’s contribution is duly acknowledged.

In recognition of the fact that your supervisors contribute to the development of your research by providing direction and guidance and by contributing ideas, it is normally appropriate that they be named as co-authors in publications, providing that each has made a substantial contribution to at least two of the following three activities:

1. conception and design of the project;
2. analysis and interpretation of data;
3. drafting significant parts of the article or critically revising it so as to contribute to the interpretation

Further information about determining authorship and resolving any disputes, is available in the Authorship Policy. See also the relevant section of the ‘Responsible Conduct of Research Policy’ and the ‘Australian Code for the Responsible Conduct of Research’, which can be found at: www.adelaide.edu.au/research/our-research/integrity/

The Statement of Authorship

Many students now elect to submit their thesis for examination in publication format. Further information about this option appears in the thesis section of the Handbook. Each publication included in a thesis, whether, published, accepted for publication, submitted or unpublished and unsubmitted work written in a manuscript style must be prefaced by its own Statement of Authorship.

The purpose of the Statement of Authorship is two-fold. Firstly, it provides thesis examiners with information about each author’s contribution (in terms of the conceptualisation of the work, its realisation and its documentation) and secondly, it secures the written permission of all co-authors for the paper to be included in the thesis, whilst confirming they agree with each author’s stated contribution.

If you are considering submitting your thesis in publication format, you can avoid delays in the submission of your thesis for examination by ensuring that you prepare a Statement of Authorship for each publication to be included in the thesis as you write it.

The importance of acknowledging the University of Adelaide in research publications

Research publications are very important to the University; the more publications our staff and students generate, the more funding we receive to support research activities and research training at the University. Consequently, it is vital that you acknowledge the University of Adelaide, in the form of a by-line, in your publications whether you are a sole or co-author, staff member or student. This also applies after you have left the University, where the publication is a result of your research at the University of Adelaide. Researchers must also acknowledge any funding that enabled the research which led to the publication.

Research publications include:

> refereed journal articles
> refereed conference papers;
> research books or chapters; and
> all forms of publication and performance in the areas of creative practice, including exhibitions, concerts and recordings and their associated publications such as catalogues, programs and sleeve notes.

In addition, a University by-line should be included in the notes of contributors (or equivalent) for all forms of publication (both print and digital).

For further information please consult the Australian Code for the Responsible Conduct of Research www.adelaide.edu.au/research/our-research/integrity/ and in particular, refer to Section 4 Publication and dissemination of research findings and Section 5 Authorship.
An ORCID is a persistent digital identifier that distinguishes you from every other researcher, throughout your career. All researchers at the University of Adelaide, including research students who enrol after 1 January 2016, are required to obtain an ORCID and to enter the details into Aurora, the University’s web-based system for capturing and reporting research publications and outputs.

By cataloguing your publications in Aurora as you progress through candidature, you will help to ensure that the University can accurately report its publication outputs during the annual Higher Education Research Data Collection (HERDC) and Excellence in Research Australia (ERA) research performance exercises and therefore to maximise the University’s funding from Government sources.

In addition to benefitting the University, Aurora offers a number of features to support researchers at the University of Adelaide, most notably streamlined, and in many cases, automated publications data entry that will enable you to easily compile all your publications in one place and benefit from an easy export option that will assist you in the creation of publication lists for CVs, grants and future promotion applications.

For further information on how to register for an ORCID: www.libguides.adelaide.edu.au/c.php?g=165098&p=1083690

For further information about Aurora and managing your research publications: www.adelaide.edu.au/aurora/

Health, safety and wellbeing

The University of Adelaide is committed to maintaining the highest possible standards of health, safety and wellbeing for all students, employees and visitors while they are at the University.

As a student, your supervisors have the primary responsibility for implementing and maintaining safe working practices at the local level by ensuring that you are:

> fully informed about the hazards associated with work/studies activities
> adequately trained and instructed in safe working procedures and
> appropriately supervised.

If you have any concerns about health and safety issues, talk to your supervisor in the first instance and then the postgraduate coordinator or head of school. The Health, Safety and Wellbeing (HSW) unit is also available to provide advice. The contact number is (08) 8313 5666.

Conflicts of interest

A conflict of interest occurs when you have a private or personal interest or other external commitment, which may appear to an independent observer to be sufficient to influence and therefore compromise the validity of the research process by influencing impartial judgement. Disclosure of any actual or potential conflict of interest is essential for the responsible conduct of research.

The University’s Behaviour and Conduct Policy and the associated Conflict of Interest guidelines set out the University’s position of interest. A close personal relationship is defined as ‘one which gives rise to a real or potential conflict of interest and includes relatives and financial relationships’. If you are in a close personal relationship with a staff member, he or she is precluded from participating in any of the following with respect to you:

> selection for entry to the University
> selection for any undergraduate or postgraduate program offered by the University
> assessment procedures
> selection for any scholarship or prize
> honours or postgraduate supervision. Close personal relationships must be disclosed to the head of school or, if the head of school is involved, to the dean of the faculty.

The policy is available online at: www.adelaide.edu.au/policies/3863/

Paid assistance for undertaking research

The Research Education and Development Committee has determined that it is acceptable for you to engage another person(s) (paid or otherwise) to assist in your research. The assistance may take the form of data collection (though not the manipulation of those data), preparation of routine chemicals and media or any similar tasks, provided that the proposed assistance is discussed with and approved by the school from the beginning and is appropriately acknowledged in your thesis.

Postgraduate students as research grant recipients

The University recognises the value of students applying for a postgraduate grant-in-aid, as distinct from an independent research project (grant-in-contract), but is concerned that this could detract you from the prime objective of completing your research within the prescribed duration of your candidature. The project emphasis or workload demanded by an externally funded project may compromise or delay your study program.

Several practical problems exist if you were to be accepted as the sole applicant and holder of a grant(s) from an external body, and they include the following:

> The work to be conducted solely in your name for an external body is not covered for any risk category under the University’s insurance, as the grant is not awarded to a member of University staff. It is also questionable whether insurers would accept such a risk

> There can be problems in respect of Intellectual Property, notably where there are differences between the granting body and the University in this regard

> There are also problems relating to financial administration and accountability, especially as most granting bodies will only accept applications from staff of institutions.

For these reasons, the University does not permit students to undertake a ‘grant-in-contract’ in their own right. In the case of a grant-in-aid, it would be in your interest to apply for, and receive, external grant support jointly with your supervisors.
The Thesis

It is recommended that you discuss the length, composition and format of the thesis with your supervisor at an early stage of candidature and that you take the time to review both the relevant academic program rules and the document ‘specifications for thesis’, which describes in detail the current requirements for the preparation and presentation of a higher degree by research thesis.

As you approach the end of your candidature, you will be able to choose whether you wish your thesis to be examined under the academic program rules and specifications for thesis in place during your year of enrolment, or, those in place at the time you submit for examination. This selection is made at the time of notifying the Adelaide Graduate Centre of your intention to submit your thesis for examination (3 months prior to the actual submission).

Where possible, it is recommended that you choose to submit under the current rules and specifications for thesis for the following reasons:

> to ensure that the thesis delivered to examiners is consistent with current national and international expectations of a doctoral or master by research thesis;
> the University has, in general, moved to permit greater flexibility in the format of research theses e.g. PhDs may now be submitted in one of the following formats:

1. conventional written narrative presented as typescript;
2. publication - a thesis by publication may include publications that have been published and/or accepted and/or submitted for publication and/or unpublished and unsubmitted work written in a manuscript style;
3. combination of conventional and publication formats; and
4. major (creative, musical or visual) work (Volume 1) and exegesis (Volume 2)

> the yearly revisions to the program rules and specifications for thesis document have resulted in greater clarity of doctoral and Master requirements to students, staff and examiners.

Current and historical academic program rules and specifications for thesis are maintained on the Adelaide Graduate Centre website at: www.adelaide.edu.au/graduatecentre/program-rules/ and may also be found in the online University calendar: calendar.adelaide.edu.au.

Note that if you are a scholarship student, you may be eligible for an allowance to assist you with the costs of producing your thesis. Please consult your scholarship ‘Conditions of Award’, or contact the Adelaide Graduate Centre for further information.

The conventional thesis

Generally, theses submitted for examination comprise a substantial written narrative of around 80,000 words in the case of a doctorate, 40,000 words in the case of a 100% research master’s thesis and 27,500 words in the case of a thesis for a student in the mixed research and coursework Master of Philosophy or Master of Clinical Science stream.

Please note that approval from the Research Education & Development Committee must be obtained, prior to submission of your thesis, if it is considerably longer then the stipulated length.

Under normal circumstances, the thesis must be presented in English. However, where academic reasons to submit the thesis in a language other than English exist, an ‘Application to Vary Thesis Format’ should be completed and submitted to the Dean of Graduate Studies for approval together with the core component of the structured program. If approval is granted, a substantial abstract in English will be required at the time of submission.

Publication format

An alternative to the conventional written thesis is a thesis that comprises a portfolio of publications which have been published and/or submitted for publication and/or comprise unpublished and unsubmitted work written in a manuscript style. The publications/manuscripts must be closely related in terms of subject matter, form a cohesive research narrative and not have been accepted for any other University award. All publications included in the thesis must derive from research undertaken within candidature; publications generated outside of candidature cannot be included.

The thesis should contain, in addition to the relevant publications/manuscripts, a contextual statement which normally includes the aims underpinning the publications/manuscripts; a literature review or commentary which establishes the field of knowledge and provides a link between publications/manuscripts; and a conclusion showing the overall significance of the work and contribution to knowledge, problems encountered and future directions of the work. The discussion should not include a detailed re-working of the discussions from individual papers within the thesis.

All papers included in the thesis must be prefaced by a statement of authorship which details each author’s contribution (in terms of the conceptualisation of the work, its realisation and its documentation). The statement must be sufficiently detailed to describe accurately the contribution of each author. All authors are required to sign the statement and co-authors must give written permission for the paper to be included in the thesis. Original signatures are preferred but scanned signatures are acceptable. A template for the statement of authorship is available on the Adelaide Graduate Centre website at www.adelaide.edu.au/graduatecentre/forms/thesis/preparing-thesis-submission/

In addition to clarifying the candidate’s contribution to a paper, a statement of authorship also provides clarity about the publication status of the work and therefore...
the scope of changes that examiners can recommend. Published/accepted papers which have already been subject to peer review are exempted from specific recommendations for change, rather, the examiners focus on an assessment of the quality and quantity of work and the presentation of the overall thesis against the criteria for award of the degree. In contrast, recommendations for change can be made to any part of ‘submitted’ or ‘unpublished and unsubmitted’ manuscripts.

Accordingly, statement(s) of authorship are still required for publication format theses which include only ‘paper(s)’ that comprise unpublished and unsubmitted work written in manuscript style. Typically such statements would list the candidate as the sole author.

To avoid delays in submitting your thesis for examination, you are encouraged to complete a statement of authorship for each paper as it is written.

How many papers are enough?

The number of publication(s) that are required for a PhD thesis or a Master of Philosophy thesis will vary greatly according to the discipline of study, the content of the publication(s) and where applicable, the impact factor of the journals in which they are published. In some fields of scientific research, three papers may be sufficient for a PhD, whilst in others, six may be the norm; for other fields, such as the Humanities, a single book length work may be sufficient.

The length and number of publications to be included in the thesis will be determined by your supervisory team. Each research project is different and the number of publications that will be required for your project may differ from that of other students, even those in the same school as you. The primary consideration is that the body of work included in the thesis satisfies the requirements for the degree for which it is presented.

Combination conventional/publication format

Another alternative to the conventional written thesis is a thesis that comprises a combination of conventional written narrative presented as typescript and publications that have been published and/or submitted for publication and/or comprise unpublished and unsubmitted work written in a manuscript style. Both the conventional written narrative and the publications must be closely related in terms of subject matter and form a cohesive research narrative. The publications must not have been accepted for any other University award or have been generated outside of candidature.

The main body of the work should contain, in addition to the relevant publications, a contextual statement which normally includes the aims underpinning the publications; a literature review or commentary which establishes the field of knowledge and provides a link between publications/manuscripts; and a conclusion showing the overall significance of the work and contribution to knowledge, problems encountered and future directions of the work. The discussion should not include a detailed reworking of the discussions from individual papers within the thesis.

As for publication format theses, all papers included in the thesis must be prefaced by a statement of authorship which details each author’s contribution (in terms of the conceptualisation of the work, its realisation and its documentation). The statement must be sufficiently detailed to describe accurately the contribution of each author. All authors are required to sign the statement and coauthors must give written permission for the paper to be included in the thesis. Original signatures are preferred but scanned signatures are acceptable. A template for the statement of authorship is available on the Adelaide Graduate Centre website at: www.adelaide.edu.au/graduatecentre/forms/thesis/preparing-thesis-submission/

Major work and exegesis

In creative disciplines, the thesis submitted for examination may include a major work in the form of exhibition, music composition or performance, literary work or film (volume 1 of the thesis), together with an exegesis (volume 2).

For the PhD, the exegesis should not exceed 20,000 words in the case of a creative or visual work, 10,000–15,000 words in the case of music composition and 15,000 words in the case of music performance.

For the master’s degree, the exegesis normally should not exceed 7,500 words.

The exegesis should contain a description of the form and presentation of the artistic practice which constitutes the remainder of the thesis and inter alia an analytical commentary and consideration of the work in the broader framework of the discipline and/or repertory. It should demonstrate mastery of the conceptual and scholarly skills associated with higher degree candidature.

The approval of the Research Education and Development Committee for an alternative form and presentation of the thesis must be sought by the time of completion of the core component of the structured program.

Applications should be made on the ‘Application to Vary Thesis Format’ form and be submitted with your core component after obtaining the endorsement of your supervisors and the postgraduate coordinator or head of school.

Presentation of the thesis and editing assistance

While you are ultimately responsible for the content of your thesis, the University would be remiss in permitting a thesis to be sent for examination that was below the standard required for the degree and/or which contained numerous typographical and spelling errors. Careful proofreading of the text is essential to ensure that such errors have been corrected and you should not rely on your supervisors to undertake this task for you. Textual errors are a source of irritation to examiners and suggest a lack of care and attention on your part.

If desired, and provided that the assistance is acknowledged in your thesis, you may engage the services of a professional editor to assist you in preparing the thesis. In such cases the editor must be provided with a copy of the Australian Standards for Editing Practice (ASEP) and advised to restrict their assistance to the standards for ‘Language and Illustrations’ and for ‘Completeness and Consistency’ in accordance with the University’s policy. Material for professional editing or proofreading should be submitted in hard copy; the submission of an electronic copy and the use of ‘tracked changes’ by an editor is unacceptable.

For your convenience, the Graduate Centre maintains a register of professional editors who have been provided with the ASEP requirements: www.adelaide.edu.au/carst/language/editor-register/

For further information, please contact the Dean of Graduate Studies: ddog@adelaide.edu.au
The yearly revisions to the program rules and specifications for thesis documents have resulted in greater clarity of doctoral and master requirements to students, staff and examiners. Further information about this important decision, together with current and historical academic program rules are available at: http://calendar.adelaide.edu.au
The Notification of Intention to Submit form is available at: www.adelaide.edu.au/graduatecentre/forms/thesis/ or from the Adelaide Graduate Centre on request.
Note that if three months or more have elapsed since your expected submission date (as recorded on your notification of intention to submit form), you will need to advise the Graduate Centre of your revised submission date so that examiner availability can be re-confirmed.

The Australian Higher Education Graduation Statement (AHEGS)
The AHEGS is a Commonwealth initiative that has been introduced to assist in both national and international recognition of Australian qualifications and to promote international mobility and professional recognition of graduates. The graduation statement is additional to other documentation such as degree certificates and academic transcripts and is based on nationally agreed specifications approved by the Government.

The AHEGS provides a description of the award, which includes your thesis title and a 100-word abstract, a description of the University of Adelaide, a list of the academic achievements relevant to your degree and details of the Australian Higher Education System. It is intended to provide potential employers and other institutions with a greater understanding of your achievements. Background information on the AHEGS is available at: www.education.gov.au/australian-higher-education-graduation-statement

In order for the University to be able to provide you with an AHEGS at graduation, all higher degree by research students are required to provide a 100-word abstract of their research to be included on their AHEGS. The abstract must be endorsed by your principal supervisor on behalf of the supervisory panel and should be provided on the “AHEGS thesis abstract collection” template. It is important to note that the abstract has a strict maximum limit of 100 words and it must be provided in plain text with no formatting (e.g. bold, italics), symbols or sub/superscripts, as these are not recognised by the University’s student information system (PeopleSoft).

The procedure for providing your abstract to the Adelaide Graduate Centre, together with the abstract collection template are available at www.adelaide.edu.au/graduatecentre/current-students/ahegs/
The exit survey

The University is committed to improving the quality of the educational experience for its higher degree by research students. In an effort to determine the views of completing students and in doing so, to identify ways in which the University can improve its programs and support structures, all research students are required to complete an exit survey prior to submission of their thesis for examination.

The data collected are stored in a database, analysed regularly and the results reported to the Research Education and Development Committee (REDC). The results of the exit survey inform policy development at the University and are instrumental in shaping positive change throughout the institution.

All matters regarding the exit survey are kept strictly confidential and may be released to interested parties only with the approval of REDC and then only in aggregated form to ensure that the anonymity of individuals remains protected.

The process for lodging an exit survey is as follows:

On receipt of your Notification of Intention to Submit form, the Adelaide Graduate Centre will email you a reminder to complete the survey online. The survey is available from: www.adelaide.edu.au/surveys/graduatecentre.html

If you object to completing an exit survey, you may appeal to the Deputy Vice-Chancellor and Vice-President (Research) in writing, specifying the reasons for the objection. In this event, please note that the Adelaide Graduate Centre is unable to accept your thesis for examination until the matter has been resolved.

Appointment of examiners

The examination of a higher degree by research thesis is complex. Examiners must judge your understanding of a body of existing knowledge, your approach to research, construction of hypotheses, arguments and analyses.

Students have a special relationship with their examiners, who will become their peers if the degree is awarded, so the selection of examiners is therefore of critical importance. Doctoral theses are examined by at least two examiners of international standing in their field, all of whom are external to the University of Adelaide. Master’s theses are examined by at least two examiners, at least one of whom is external to the University of Adelaide.

In nominating your prospective examiners, your supervisors will ensure that they are academic members or affiliate members of a tertiary institution or, where this is not the case, will provide information about the employment, research, supervisory and examination experience of each for the consideration of the Research Education and Development Committee. Examiners must:

> normally be active in research/scholarship, to ensure that their knowledge of your field is current
> have empathy with the theoretical framework you have used during your research
> not have acted in a supervisory capacity, be co-authors on any papers arising from your doctoral or master’s research, or have otherwise been involved in the development of your research
> not be employed by the same institution
> not be advised of the identity of the other nominated examiners; or have their identity revealed to you.
> not be a Titleholder of the University of Adelaide except if being appointed as the internal examiner for a Master by Research thesis examination.

On receipt of your notification of intention to submit, the Adelaide Graduate Centre will forward a ‘Nomination of Examiners’ form to your school for completion.

Your right to object to potential examiners

Around the time of giving notice of your intention to submit your thesis, your supervisors may discuss the names of potential examiners.

While it is acceptable for you to be aware of the names of potential examiners under consideration, you will not be advised of the names of those examiners finally recommended by your school or appointed by the University.

Examiners have the right to remain anonymous and if their identity is revealed to you (except following the examination process, with their consent) the examination will be invalidated. In such circumstances, new examiners must be appointed and consequently, the examination process will be significantly delayed.

You have the right to identify any person(s) you believe should not be considered to examine your thesis. This does not mean that your supervisor is obliged to present you with an exhaustive list of potential examiners, and the onus is on you to raise any objections.

You may exercise this right once only, prior to the commencement of the examination process. You can register your objection on the ‘Notification of Intention to Submit’ form. It is important to remember that this objection does not serve as a veto. If, on academic grounds, the school wishes to recommend the appointment of a particular examiner to whom you have objected, it can make a case to the Dean of Graduate Studies for the appointment to proceed. Where disagreement exists, the final decision to appoint a particular examiner rests with the Dean of Graduate Studies.

Submission

Three printed copies of the thesis are required for examination purposes, together with an identical electronic copy. The electronic copy must be provided in a single portable document format (PDF) file on disc or USB flash drive (or two files in the case of theses submitted by creative work and exegesis).

Any supplementary material included in your thesis such as musical performance must be digitised and provided in duplicate on disc.
The printed copies may be soft-bound or hard-bound (soft-bound is recommended). The submitted theses must comply with the conditions detailed in the document ‘Specifications for Thesis’ (see www.adelaide.edu.au/graduatecentre/hdr-program-rules/ or the online University calendar for the relevant year: calendar.adelaide.edu.au).

A declaration signed and dated by you, should follow the title page of each thesis copy. The purpose of the declaration is to:

> certify that the work is original and has not been accepted for the award of any other degree or diploma in any university or other tertiary institution and contains no material previously published or written by another person, except where due acknowledgement is made in the text

> certify that no part of the work will be used in a submission for any other degree or diploma in any university or other tertiary institution without the prior approval of the University of Adelaide and where applicable, any partner institution responsible for the joint-award of the degree except where due reference has been made in the text

> give consent for the thesis to be made available for loan and photocopying after it has been examined and placed in the library, subject to the provisions of the Copyright Act 1968; To give consent for the digital version of the thesis to be made available on the web, via the University’s digital research repository, the library catalogue and also through web search engines and

> declare the ownership of (any) copyright included in the thesis that is held by others for theses which include publications

A completed ‘Certification of Thesis for Examination’ is also required.

If you have signed a ‘Student Project Participation Agreement’, are working on a Special Case A or Special Case B project (refer Intellectual Property information in the Conduct of Research section of this handbook for more information), or received approval from the Dean of Graduate Studies for an embargo to be placed on your thesis, you should still include the declaration. Your thesis will be withheld from public access for the approved duration of the embargo.

Certification of thesis for examination

At the time of submission you are required to lodge a ‘Certification of Thesis for Examination’ form completed by your school. The purpose of the form is two-fold. Firstly, it confirms your program of study, the relative weight of the thesis component of your degree and the thesis format so that appropriate instructions can be given to your thesis examiners. Secondly, it provides a mechanism for your school to certify that:

> they are satisfied with the content and technical presentation of your thesis and consider it to be of an acceptable standard for examination in its current form

> you have satisfactorily completed any coursework requirements (including any placements)

> the thesis is within the maximum allowable word-length for the program

> you have abided by the University’s policies with regard to assistance and editing and the inclusion of appropriate acknowledgements within the thesis and

> you have lodged all the original data or primary research materials relevant to your research with the school, as is required under the Australian Code for the Responsible Conduct of Research.

The Adelaide Graduate Centre will provide you with a copy of the certification of thesis for examination form on receipt of your ‘Notification of Intention to Submit’. You will need to arrange for completion of this form by your principal supervisor and head of school or postgraduate coordinator. If required, the form may also be downloaded at: www.adelaide.edu.au/graduatecentre/forms/thesis/preparing-thesis-submission/

Submission against the advice of your school

The Adelaide Graduate Centre is unable to accept a thesis that has not been certified for examination by the relevant school.

If you disagree with your school’s advice about the readiness of your thesis for examination, it is expected that the dispute will be dealt with, in the first instance, at the local level by the head of school or postgraduate coordinator.

If the dispute cannot be resolved at the local level, the matter should be referred to the Dean of Graduate Studies, either by the school or the student concerned. All relevant documents must be forwarded to the Dean of Graduate Studies at the same time. The Dean will deal with the matter in consultation with the convenor of the relevant Faculty Higher Degrees Committee and the head of school or postgraduate coordinator concerned, if required.

If the Dean’s decision overrides that of the school, the matter shall then be referred to Student Matters Sub-committee (SMS) of REDC for final resolution. Depending on the circumstances surrounding each case, SMS will determine whether or not examiners should be informed of the dispute and what information should be disclosed to examiners. At all times, the independence of examiners must be preserved.

Submission after your candidature has lapsed

If your candidacy has lapsed for not more than 12 months, you will still be permitted to submit your completed thesis for examination provided that it has not departed from the field of study you were pursuing before your candidacy expired, and provided that your school is prepared to certify that the thesis is worthy of examination.

Submission after your candidacy has been suspended or terminated

If your candidacy has been suspended or terminated, you will not be permitted to submit your thesis for examination. Note that your candidacy is automatically suspended if you have not submitted your thesis for examination within 12 months of the date your candidature lapsed.

The ‘suspension of candidacy’ and ‘termination of candidacy’ sections of this handbook describe the limited circumstances in which it may be possible to reinstate your candidacy following suspension or termination to enable you to submit your thesis for examination.
Examination

Time spent under examination
Examiners are asked to complete the examination and provide their reports within four weeks of receiving a thesis. In practice, as examiners are busy people with many other demands on their time, a turnaround time of approximately eight to ten weeks is normally expected. To expedite the examination process, the Adelaide Graduate Centre reminds examiners if their reports have not been received by the due date and follows up with additional reminders where necessary.

On completing their assessment, each examiner submits an independent report and recommends that the thesis be awarded (with or without amendments), revised and resubmitted, or failed. In cases where the examiners make discrepant recommendations, the University will normally appoint a third independent examiner. In such cases, it is important to note that the length of the examination process may be significantly increased.

If you have not received notification of the outcome of your examination three months after submitting your thesis, you are welcome to contact the Adelaide Graduate Centre to enquire about the progress of the examination process. Students should be aware that while the centre will endeavour to ensure that the examination is completed within three months, it is not possible to guarantee an outcome in this timeframe. In addition, it is important to remember that Adelaide Graduate Centre staff are not at liberty to disclose any details regarding the examination result until the whole examination process is completed.

Detailed information about the examination process is provided in the following sections.

Examiner recommendations
In addition to their written reports, examiners of doctoral theses are asked to nominate one of the following categories of recommendation:

1. Award of degree
This recommendation indicates that the thesis presented is of the standard required for the degree and that no amendments are required.

2. Award of degree subject to the specified amendments
This recommendation indicates that the thesis presented is of the standard required for the degree after the specified amendments have been made to the satisfaction of the University. Specified amendments may include the rewriting of paragraphs, clarification of results, minor additional explanations, the addition of tables and figures; minor amendments of spelling, grammar or referencing may additionally be required.

3. Not be awarded the degree but be permitted to resubmit the thesis in a revised form
A recommendation of revise and resubmit indicates that the thesis is not acceptable for the award of the degree in its current form and that a major restructuring or rewriting, (possibly requiring additional research to be undertaken) is required to raise the thesis to the required standard.

4. Not be awarded the degree
This recommendation indicates that the thesis presented is not of the standard required for a doctorate.

Master of Philosophy and Master of Clinical Science students
The examiners of master by research theses who recommend outcome 1 (Award of the degree) or 2 (Award of the degree subject to the specified amendments) are additionally asked to nominate one of the following grades in which to pass the thesis:

- High Distinction (90-100)
- High Distinction (85-90)
- High Distinction (80-84)
- Distinction (75-79)
- Credit (65-74)
- Pass (50-64).

To assist them in nominating an appropriate grade, examiners are provided with a set of grade descriptors (Appendix 6). The final grade for the thesis will be determined by the University after consideration of all examiners’ reports and any other relevant documentation (including coursework results if you are in the mixed research and coursework stream of your master’s degree). The grade will only be used in the event that you apply to undertake a PhD at the University of Adelaide on conclusion of your master’s degree, in which case, it will assist the University to determine your position on the ranked scholarship order of merit list; the grade is for internal purposes only and will not appear on your University transcript or parchment.
Dean’s commendation for doctoral or master by research thesis excellence

Where an examiner has recommended that the degree be awarded with or without amendment (recommendation categories 1 or 2), examiners are also asked to indicate whether the thesis is outstanding and deserves a commendation for doctoral or master by research thesis excellence from the Dean of Graduate Studies.

If your thesis is rated by both examiners as worthy of a commendation, you will receive a letter of congratulations from the Dean of Graduate Studies and a record of the commendation will be added to the prizes and awards section of your academic transcript. Theses submitted within four years (doctorate) or two years (master by research), in which at least one examiner has recommended a commendation may also be eligible for a commendation, provided that all examiners have recommended the award of the degree.

University research medals

The University awards up to 15 doctoral research medals and up to two master by research medals for the highest quality research theses examined each year. The medals are presented at the relevant April graduation ceremony in the year following the one for which the medal was awarded, or privately by appointment. Recipients are eligible for V.I.P. seating for three guests.

Selection process for the University research medals

1. At the end of the year, the Adelaide Graduate Centre prepares a short-list of candidates for medal consideration. In order to be short-listed, students must have:
   i) qualified for their award within the calendar year for which the medals are to be awarded
   ii) completed within four years FTE from the commencement of candidature (doctoral research medal) or two years FTE from the commencement of candidature (master by research medal)
   iii) have achieved an examiner recommendation of category 1 award or category 2 award degree (subject to the specified amendments) from all examiners; and
   iv) been nominated for a University medal by at least one examiner

2. For each faculty, the Adelaide Graduate Centre prepares a spreadsheet containing the following information about their shortlisted candidates:
   i) the number of examiners who recommended that the student’s thesis was worthy of a Dean’s Commendation (1or 2);
   ii) the number of examiners who recommended that the student’s thesis was worthy of a University research medal (1 or 2);
   iii) the quality ratings provided by each examiner (from 1, exceptional to 6, flawed) for the following criteria:
      - The thesis as a whole is a substantial and original contribution to knowledge of the subject with which it deals;
      - the candidate shows familiarity with, and understanding of, the relevant literature;
      - the thesis provides a sufficiently comprehensive study of the topic;
      - the techniques adopted are appropriate to the subject matter and are properly applied;
      - the results are suitably set out and are accompanied by adequate exposition;
      - the quality of English and general presentation are of a standard for publication; and
   iv) any comments made by the examiners in support of a University medal recommendation.

3. The spreadsheets are sent to executive deans, together with copies of the examiners’ and supervisor’s reports for each short-listed candidate.

4. With reference to the materials provided, executive deans determine the order of merit list for short-listed candidates in their faculty;

5. The Dean of Graduate Studies and the Director, Adelaide Graduate Centre will determine the University order of merit list from the faculty rankings provided and the number of doctoral and master by research medals to be offered for the year.

Consideration of the examiners reports

It is important to remember that the final outcome of your examination will be determined by the University and not by the examiners. In making the final decision, the Dean of Graduate Studies or Student Matters Sub-committee (SMS) will consider all the examiners’ reports provided, together with the recommendations of your school and the Faculty Higher Degrees Committee, where applicable. The process for consideration of the examiners’ reports is detailed below:

1. If both examiners recommend the award of the degree without amendments, the Dean of Graduate Studies will normally accept the recommendations of the examiners and the outcome of the examination will be to award the degree.

2. If both examiners recommend the award of the degree subject to amendments, the Dean of Graduate Studies will normally accept the recommendations of the examiners and the outcome of the examination will be to award the degree, subject to the specified amendments being made to the thesis to the satisfaction of the University.

3. If the examiners present divergent recommendations and at least one examiner recommends that the thesis be revised and resubmitted or the degree not be awarded (recommendation categories 3 or 4), the supervisors will be sent copies of the examiners’ reports and the principal supervisor will be asked to comment on them and to make a recommendation on behalf of the supervisory panel. The Faculty Higher Degrees Committee will then consider all the documentation presented and recommend an examination outcome or (more typically) recommend that a third examiner be appointed. The faculty and school recommendations will be reviewed by the Student Matters Sub-committee (SMS) of REDC who will determine the next step in the examination process.

In cases where a third examiner is appointed, the examiner will independently examine the thesis and recommend an examination outcome. The SMS will consider all three examiners’ reports, together with the supervisor’s report and the Faculty Higher Degree Committee’s recommendation before determining the final outcome of the examination;
4. On rare occasions where there is a stalemate in the examination process; for example, the examiners’ recommendations are such that it is not possible for a consensus decision to be made, an arbitrator will normally be appointed. The arbitrator will be given copies of the reports from all the previous examiners, together with the supervisor’s report and will be asked to adjudicate. The recommendation of the arbitrator is generally accepted and treated as final. Where SMS considers it expedient, or in the best interests of a student to do so, the process outlined above may be varied. Variations will occur rarely and will be determined by SMS on a case-by-case basis. For example:

- appointment of an arbitrator instead of a third examiner
- appointment of an entirely new set of examiners.

Outcome of the examination

The Adelaide Graduate Centre will convey the outcome of the examination to you and your supervisors and head of school in writing.

Specified amendments outcome

It is advisable not to make any ‘anticipated’ amendments to your thesis; amendments (if required) should only be made on receipt of written notification of your final result from the Adelaide Graduate Centre.

Once you have received written notification of your final result, you are permitted a maximum of three months from the date of notification to undertake the required amendments and to lodge your final hardbound and electronic thesis copies, together with a completed ‘Final Thesis Lodgement’ form with the Adelaide Graduate Centre.

Amended theses submitted after three months will not be accepted for the award of the degree. Applications for additional time in which to complete amendments will be considered only when exceptional circumstances exist. Such an application, in writing and detailing the reasons for your request, must be endorsed by your principal supervisor and the head of school or postgraduate coordinator. The endorsed application must be lodged with the Dean of Graduate Studies.

Revise and resubmit

If the outcome of the examination is revise and resubmit, you are encouraged to discuss the result with your supervisors and to determine how much additional research and writing will be required before your thesis can be presented for re-examination.

You have three months in which to decide whether to revise and resubmit and to notify the Adelaide Graduate Centre of your decision. If you do not notify the centre within this time, it will be concluded that you do not wish to revise and resubmit your thesis for examination.

If you choose to revise and resubmit, the following procedures apply:

- You will be granted a maximum of 12 months of candidature (from the date on which you notify the Adelaide Graduate Centre that you wish to revise and resubmit) in which to re-present your thesis for examination.
- The 12-month time limit applies irrespective of whether you are a full-time or half-time student. However, any approved periods of leave of absence will extend your candidature expiry date.
- You are required to complete any annual review(s) which fall due during the revise and resubmit period.
- At least one month before you expected to submit your revised thesis, you will need to complete a ‘Notification of Intention to Submit a Revised Thesis for Re-examination’ form.
- On submission of your revised thesis for examination, you are required to provide a comprehensive statement outlining the substantive changes made to the thesis prior to resubmission, together with a concise defence against any of the examiner(s)’ recommendations for changes that were not accepted.
- Under normal circumstances, the revised thesis will be examined by the original examiners. However, for valid academic reasons, the Student Matters Subcommittee (SMS) of REDC may decide that the thesis be examined by different examiner(s). Such a decision is very rarely undertaken and will be made on a case-by-case basis.
- The examiners will be advised that your thesis has been revised and resubmitted and will be instructed to check whether or not the requirements for additional work specified by the original examiners and in your supervisor(s)’ report and your outcome letter, have been addressed.
- Examiners will also be advised not to introduce new areas of substantive concern in the re-examination.
- Examiners will be asked not to recommend an outcome of ‘revise and resubmit’ as the University’s rules permit a student to revise and resubmit their thesis for examination once only.
- Following consideration by the SMS, the outcome of the re-examination will be to award the degree (with or without amendments), or, to not award the degree.

Where the examination outcome is to award the degree with amendments, you will be permitted a maximum of three months from the date of notification of the outcome in which to undertake the required amendments.

Final form of the thesis

Following the completion of any required amendments to the thesis to the satisfaction of the University, you are required to lodge with the Adelaide Graduate Centre one hardbound copy and one electronic copy of the thesis in a single PDF file on disc or USB flash drive before the degree can be conferred.

In the case of theses submitted by creative work and exegesis, two PDF files, one containing the creative work and one containing exegesis are acceptable.

The final thesis copies will be used as follows:

- 1 x hard-bound copy for inclusion in the University library’s collections and
- 1 x electronic copy for the library to be made available on the web, via the University’s digital research repository, the Library catalogue and also through web search engines. Further information is available online at: www.adelaide.edu.au/library/research/theses/

You should make separate arrangements for the provision of a physical or digital copy of your thesis to your school/supervisors for their own collection(s).
Digital theses at the University of Adelaide

Researchers have a responsibility to their colleagues and the wider community to disseminate a full account of their research as broadly as possible. In keeping with the University's commitment to make research data available for the use and information of other researchers and the public, the electronic copy of your thesis will be made available on the web, via the University's digital research repository, Adelaide Research & Scholarship (AR&S) and the National Library of Australia’s Trove service, unless arrangements have been made to restrict access for a period of time, such as where dissemination of the research is prevented by ethical, privacy or confidentiality matters and the thesis is under embargo. Provision of an electronic copy of the thesis is compulsory at the University of Adelaide, which means that until you have lodged both the final hard and e-copies of your thesis (post examination and the undertaking of any required amendments) with the Adelaide Graduate Centre, you will not be eligible to qualify for your award. Further assistance and deposit instructions for digital theses are available on the library’s website at: www.adelaide.edu.au/library/research/theses/ Any questions relating to the preparation of your digital thesis should be addressed to the library's digital thesis contacts: www.adelaide.edu.au/library/research/theses/contact.html

Copyright issues in preparation of your digital thesis

When preparing your final (examined and amended) thesis for lodgement with the Adelaide Graduate Centre, you will need to check it for any material that is subject to copyright. For example, if you have included any diagrams, illustrations, maps, tables, photographs, musical notations, images and/or audio-visual recordings that are not your own creation, you will need to obtain written permission from the copyright owners. Make sure you apply for the necessary permissions early (preferably as you are preparing your thesis for examination) so that you allow sufficient time to receive an answer before your final thesis is ready to be lodged with the Adelaide Graduate Centre. If you cannot obtain written permission for any items, they should be clearly identified so that library staff can remove them. An errata sheet containing a list of pages, sections and/or numbered figures that need to be deleted should be prepared and saved onto the disc together with the copy of the final thesis (see also the section on ‘Steps for Depositing a Thesis’ below). Except where copyright is owned by others, copyright ownership of the thesis remains with you as the author. This will remain the case unless you choose to transfer it to another entity; the act of making a digital copy of the thesis available on the web in no way transfers copyright ownership. Any questions relating to the identification, acknowledgement or removing of copyrighted material in your digital thesis should be addressed to the library’s digital thesis contacts: www.adelaide.edu.au/library/research/theses/contact.html Refer also to the copyright information in the Conduct of Research section of this handbook and to the following website for further information: www.adelaide.edu.au/legalandrisk/copyright/study-research/

Document security

Theses included in the library’s digital research repository can be read or printed only. No changes can be made to the document, and “copying and pasting” is not enabled.

Publishing issues

It is important for you to be aware that making your thesis available on the web is equivalent to publishing it. Some publishers (notably book publishers) may regard inclusion of a thesis on the web as a ‘prior publication’ and consequently may not wish to publish the work themselves. Some major journal publishers accept electronic publication of theses and are happy to publish articles based on these theses. If you have a relevant pre-existing contract with a publisher (or some other third party who funded, or collaborated with your research) in regard to your thesis, you are advised to seek further advice on this matter from the publisher(s) concerned. If the form of the thesis is a collection of published papers, it is possible that copyright permission may have been transferred to the publisher(s), and explicit permission will be required to include the papers in the University’s digital research repository. Students do not require permission from the University to publish elsewhere.

Steps for depositing a thesis

Once the examination process is complete and you have made any required amendments to the satisfaction of the University, you will need to copy the final version of your thesis onto a disc or USB flash drive in Portable Document Format (PDF). Further information is available on the library’s website at: www.adelaide.edu.au/library/research/theses/ The electronic copy must be identical to the thesis that has been approved for the award of the degree. Do not set document security as this will be done by the library. An errata sheet listing any third-party copyrighted page(s), section(s) and/or figure(s) contained within the thesis which you do not have permission to include in your thesis should also be saved onto the disc where applicable. The electronic copy of the thesis must be provided to the Adelaide Graduate Centre when you lodge the paper copies required at the completion of examination. A completed ‘Final Thesis Lodgement’ form must also be provided with the digital copy of your thesis.

Further information about the University’s digital theses program

For further information about including your thesis in the University’s digital theses program, please refer to the Library’s website at: www.adelaide.edu.au/library/research/theses/
Appeals following examination

Within the University, appeals against the outcome of the examination process are permitted on procedural grounds only, through the provisions of the Student Grievance Resolution Process. For further information, please refer to the ‘Grievance, complaints and problems during candidature’ section of this handbook. If you are thinking of appealing the outcome of your examination, it is recommended that you consult the University’s Student Policy and Appeals coordinator before proceeding.
Graduation

Degree conferral
The presence of a conferral statement on your transcript confirms to future employers that you have qualified for your award and are an official graduate of the University of Adelaide; for doctoral graduates, conferral bestows upon you the right to use the title of Doctor. The University of Adelaide confers students three times a year: 9 March, 31 July, and 31 December. Information about how to apply for conferral can be found here: www.adelaide.edu.au/student/graduations/students/howtograduate/

Graduation ceremonies
The University holds presentation ceremonies three times a year for students who have been conferred into their awards; ceremony dates are available on the Graduations website at: www.adelaide.edu.au/student/graduations/ceremonydates/. As part of the conferral process you will need to indicate how you wish to receive your parchment. Please note that if you do not indicate how you wish to receive your parchment, one will not be printed for you. You do not need to attend a graduation ceremony in order to graduate from the University of Adelaide. However, for many, participating in a graduation ceremony provides a valued opportunity to celebrate their achievement with family, friends and University colleagues. It is important that you familiarise yourself with the relevant deadlines for attendance at your preferred graduation ceremony: www.adelaide.edu.au/student/graduations/deadlines/
All correspondence regarding graduations will be sent to your University of Adelaide email address only, so it is important to check your University email account regularly.
You will need to log on to Access Adelaide periodically to manage the graduation process, specifically to:

> check for an automatic application/submit a manual application for conferral
> check that your award details are correct
> check that all personal details are correct
> view your graduation status letter
> check that your award has been conferred
> choose to collect your parchment at a graduation ceremony or
> choose to collect your parchment in absentia and select your preferred collection method (e.g. in person, by mail).
For further information about graduation, including application, conferral, ceremony allocation, tickets, etc., please refer to the Graduations website: www.adelaide.edu.au/student/graduations/

Please note that the Graduate Centre is not be confused with ‘Graduations’ or the ‘Graduations Office’. Once you have received confirmation of your examination outcome from the Graduate Centre, all future enquiries about the graduation process should be directed to Graduations on 8313 0899.

Australian Higher Education Graduation Statement (AHEGS) replacement and re-issue
An AHEGS is a graduation statement that provides a description of your award, the awarding institution, a list of your academic achievements relevant to the degree and details of the Australian Higher Education System. It can provide potential employers and other institutions with a greater understanding of your achievements. All University of Adelaide students receive a complimentary copy of their AHEGS at graduation. Additional copies of the AHEGS are available for purchase from the University’s online shop: https://shop.adelaide.edu.au

Academic transcripts
Academic transcripts are available to all students who have commenced or completed academic study at the University of Adelaide. You can view a copy of your unofficial transcript at any time by logging on to Access Adelaide. You will have access to Access Adelaide for 365 days after your date of completion, should you wish to view your unofficial transcript after completion. If you would like to purchase an official copy, there are a number of options via the online shop: shop.adelaide.edu.au. Information about the current charge(s) for obtaining transcript copies is available on the web at: www.adelaide.edu.au/student/graduations/parchment-transcript-ahegs/

Parchment replacement and re-issue
‘Parchment’ is the word the University uses for your certificate, a legal document that is made available when your award is conferred. Your parchment is an official document which proves that you have a University qualification. If the parchment you are issued with is lost, missing, destroyed, stolen or damaged, you may apply for a replacement. Similarly, if you have changed your name since graduation, you may apply to have your parchment re-issued under your current name, if desired. An administrative fee applies for each parchment replacement and re-issue. The higher fee for the latter service reflects the additional student record tracking, amendments and data matching procedures involved. Further information, including the applicable fee(s), is available on the web at: www.adelaide.edu.au/student/graduations/parchment-transcript-ahegs/
To facilitate this goal, the University seeks to provide an environment in which students are supported to develop self-confidence, independence of thought and creativity. In the course of undertaking their research and producing a thesis, students develop diverse graduate attributes. The importance of these attributes both to your personal development and to your future employment prospects is not to be underestimated. On conclusion of your research program, you can be confident that you will have acquired the following graduate attributes, to a level consistent with the timeframe for completion of your degree and its objectives:

1. The capability to conduct research independently at a high level of originality, quality and creativity. This will be evidenced by the conceptual design and implementation of a research project that leads to a contribution to knowledge and/or to the production of a body of creative work. Indicators will include peer review, milestones set and goals achieved, the ability to frame questions and explore emerging issues and, where appropriate, to identify solutions using a wide range of analytical methods.

2. A deep knowledge of the field of study. This will be evidenced by:
   - The ability to critically review information from a wide range of sources, and to develop a comprehensive understanding of relevant prior research
   - The demonstration of a sound theoretical basis of knowledge, as evidenced by the arguments presented within the thesis, or a series of publications or creative works produced during candidature.

3. The ability to communicate research significance clearly and concisely with audiences at all levels and to demonstrate its relevance to the broader community.

A contribution to knowledge, or the production of a body of creative work, will be achieved through one or more of the following:
- The discovery of new information
- The formulation and defence of new theories
- The innovative re-interpretation of known data and/or established ideas
- The innovative re-interpretation of the practice of the profession.

Graduate attributes

The University aspires to equip its research students to become leaders in their chosen field, be that within academia, industry or the wider community, and to be aware of the ethical, social and cultural issues in the exercise of their professional duties.

This will be evidenced by:
- Successful examination of the thesis;
- peer reviewed publications or professional outcomes; participation in specialist and generalist conferences, public forums and other professional contexts;> A capacity to apply theoretical knowledge to discipline-specific practical activity, where appropriate
- Being sought after by employers. In addition to those attributes that you have developed naturally during the course of your research candidature, many of you will have taken the opportunity to broaden your research experience by undertaking professional development in a range of areas of interest through the framework provided by the development component of the structured program. It is hoped that recognising the attributes you have acquired during the course of your research candidature will assist you to market your unique skills and competencies to your future employers and the community.
The Australian Qualification Framework (AQF)

Further insight into the skills and learning outcomes you have achieved by completing your research degree can be obtained by viewing the Australian Qualifications Framework (AQF) specifications for your level of qualification.

All University of Adelaide research degrees comply with the Australian Qualifications Framework (AQF). The AQF is the national policy for regulated qualifications in Australian education and training. It incorporates the qualifications from each education and training sector into a single comprehensive national qualifications framework. The AQF ensures that employers, educational institutions and students all have an understanding of the standards required to attain an AQF compliant qualification at any given level. The AQF standards range from certificate 1 qualifications (AQF Level 1) to master degrees by research (AQF Level 9) and doctoral degrees (AQF Level 10).

Further information about the AQF and the specifications and learning descriptor outcomes for each AQF level of qualification is available at: aqf.edu.au/
Appendices

Appendix 1: Access privileges for higher degree by research students outside candidature

Appendix 2: Responsibilities

Appendix 3: Insurance for higher degree by research (HDR) Candidates

Appendix 4A: Rules for a jointly-awarded Doctor of Philosophy (including cotutelle)

Appendix 4B: Information sheet jointly-awarded PhD program (including cotutelle)

Appendix 5: Expectations in supervision

Appendix 6: Master by research grade, mark ranges and descriptors
This information is intended to provide heads of school, postgraduate coordinators and higher degree by research (HDR) students with information on what is considered appropriate practice for HDR students outside of their formal candidature. Students who are formally enrolled in an HDR program, and who abide by the associated rules and regulations, are entitled to the privileges associated with active candidature. These privileges include:

> access to IT services
> use of the University library
> defined building access
> postgraduate insurance cover,
> the issuance of a University card

## HDR students outside candidature

There will be some instances where it is desirable to allow a student who is not currently enrolled some or all of the privileges associated with active candidature. This would be in the following instances:

1. For pre-candidature HDR students who arrive before the commencement of their candidature at the invitation of the relevant academic area, where that support may assist with their orientation to the University. Where these students arrive without an invitation, the head of school may choose to authorise the issue of a University card, at their discretion.

2. For HDR students who are intermitted or have lapsed or suspended candidature where such privileges might facilitate the completion of their degree, they may be afforded rights as an approved visitor to the University, on the authorisation of the head of school.

3. For post-candidature HDR students who have been awarded their degree and are voluntarily contributing to University research and publications, they may be afforded rights as an approved visitor to the University, on the authorisation of the head of school.

### Responsibilities

It is the responsibility of the student to request access, utilising the appropriate forms, and the responsibility of heads of school to consider such requests.

#### 1. Technology services

Technology services visitor access is used to provide access to University online services, desktop computers, files and printers for people who are not staff or students, but who have a defined relationship with the University. This includes visiting academics, contractors, researchers and volunteers. Visitor accounts are active for a maximum of 12 months. More information is available at: [www.adelaide.edu.au/technology/yourservices/accounts/](www.adelaide.edu.au/technology/yourservices/accounts/)

#### 2. Use of the University library

The University library may grant borrowing privileges to those outside their candidature period provided that you retain a valid IT account. Further information is available on the web at: [www.adelaide.edu.au/library/using/membership/](www.adelaide.edu.au/library/using/membership/)

#### 3. Building access

Card services process all valid requests for building access. If you require building access to a particular area when you are outside candidature, see your school office for assistance. To be given visitor access, the Access Request form must be signed by an ‘Access Control Delegate’ and forwarded to Card services in person for processing. Further information is available at: [www.adelaide.edu.au/unicard/visitor/](www.adelaide.edu.au/unicard/visitor/)

#### 4. Insurance

Only students who are formally enrolled in an academic program are covered by general University insurance. This includes students who arrive at the University before the commencement of their candidature without an invitation from the relevant academic area, or who are on leave of absence, lapsed, or suspended in candidature are not covered by general University insurance. It is also important to note that ‘visitors’ to the University are also not covered by general University insurance. Students who have been awarded their degree and are ‘providing services whilst under the direction or control of the University’ (e.g. voluntarily contributing to University research and publications) are covered by the University’s Personal Accident Insurance. This includes necessary direct travel between the volunteers’ normal place of residence or employment at the place of voluntary activities. Volunteers are provided with indemnity under the University Public Liability Policy for action or lack of action on their part during activities associated with their University volunteer role, which results in a loss, damage or injury to a third party, providing that there is no criminal intent. Note that this cover is specific to volunteers and differs from that available to formally enrolled students. Further information on University insurance is available from Legal & Risk or at [www.adelaide.edu.au/legalandrisk/insurance](www.adelaide.edu.au/legalandrisk/insurance)

#### 5. University card

Only students enrolled in academic programs or courses offered by the University of Adelaide are eligible for the University of Adelaide Identity Card. University cards will not usually be issued more than four weeks before the commencement of candidature. A visitor card can be authorised by your School if you are outside candidature. Further information is available at [www.adelaide.edu.au/unicard/visitor/](www.adelaide.edu.au/unicard/visitor/)
Responsibilities

Research training at the University involves the active participation of both staff and students. The responsibility for ensuring that it is conducted in the most efficient and effective manner is shared by all parties: the University, the faculties, schools, staff and students, all have obligations to each other. The responsibilities of the various participants are summarised in the following sections.

Glossary of terms

The terms used in this Appendix are defined at the front of the Research Student Handbook. An extract of the key definitions is provided below for convenience.

The Adelaide Graduate Centre is the area responsible for the management and administration of research education at the University.

Candidate is a person enrolled for a higher degree by research of the University of Adelaide. The terms candidate and student are used interchangeably in this document.

Co-supervisor refers to a member of the supervisory panel who is a University staff member or titleholder of the school and who is not the principal supervisor.

External supervisor refers to a member of the supervisory panel who is not a staff member or titleholder of the University and who is not the principal supervisor (includes casual staff and visitors).

Higher degree by research refers to any master or doctoral degree (PhD/professional doctorate/combined degree) that comprises a minimum of two-thirds of its assessable content by research.

Principal supervisor refers to a member of the supervisory panel who is a University staff member or titleholder of the school/discipline in which the student is enrolled and who has been appointed by the head of school to have the primary responsibility for the supervision of a candidate.

School refers to the academic organisation unit in which higher degree by research students are enrolled; this may be a school or discipline depending on the structure of the faculty concerned.

Responsibilities of the University and faculties

The University has the responsibility to establish a policy framework within which faculty-specific and school-specific policies can be developed. The University is responsible for establishing and/or implementing general policies in relation to:

1. clearly specified entry standards which apply regardless of discipline, and are set to ensure that given adequate commitment, enrolling doctoral and master’s by research students will have the capacity to succeed within three to four years and one-and-a-half to two years respectively

2. defining existing and potential areas of research strength, for the purpose of allocating Australian Postgraduate Awards and Research Training Scheme places (as required by the Commonwealth Government)

3. the establishment of Jointly-awarded agreements between the University of Adelaide and quality overseas/Australian institutions for the award of the Doctor of Philosophy

4. providing access to physical facilities and resources which, while varying between different parts of the University, will conform to the specified minimum standard defined in the Minimum Resources Proforma

5. provision of training in the responsible conduct of research

6. ethics clearance procedures concerning research in the areas of human participants, animals, genetically modified organisms and hazardous materials

7. intellectual property

8. the Integrated Bridging Program—Research (IBP-R)

9. reviews of progress

10. privacy: the University is required to ensure the privacy of its students in accordance with the University’s privacy policy: www.adelaide.edu.au/policies/62

11. providing consumer protection to international students studying in Australia, in accordance with the Education Services for Overseas Students (ESOS) Act 2000

12. assisting the government to check that international students comply with their visa conditions, and advising the Department of Immigration and Border Protection (DIBP) if students breach their visa conditions

13. grievances, complaints and appeals

14. ensuring the quality of supervision

15. examination of higher degrees by research

16. the right of higher degree by research students to hold a research grant.

Responsibilities of the faculties

Faculties are expected to:

1. convey issues relating to higher degree by research matters arising in the faculty, to the Research Education & Development Committee (REDC) and conversely, to convey decisions and relevant information relating to higher degree by research matters discussed by the REDC, to the Faculty Higher Degrees Committee and through them to those with responsibilities for postgraduate matters within the schools

2. ensure that schools offer a quality structured program, including an induction, for all commencing higher degree by research students

3. give consideration to the feasibility of providing a structured program of activities that is complementary to the locally provided school level structured programs

4. ensure that schools implement the policies and processes detailed in this publication

5. nominate supervisors (including external and affiliate supervisors), in accordance with the Supervisor Register Policy.

Responsibilities of the head of school

The head of school has the ultimate responsibility for the quality of supervision and the provision of resources for all higher degree by research students within the school. It is the responsibility of the head of school to ensure that:

3.1 Appointment of postgraduate coordinators

(i) In each school a postgraduate coordinator who is an experienced, motivated staff member with the confidence of the postgraduate students is appointed
3.2 Appointment of supervisors
(i) a high-quality panel of registered supervisors, not exceeding three in number, is provided and maintained throughout the research period for both internal and external candidates, in accordance with the Supervisor Register Policy.
(ii) no supervisor is assigned to more students than their category and level in the Register permits and this includes commitments to both principal supervision and co-supervision.
(iii) registered supervisors are only assigned to students who are studying for a degree less than or equal to their own highest qualification, noting that a prospective supervisor who does not hold a PhD may be approved to supervise by the Dean of Graduate Studies where he/she is able to demonstrate equivalent research experience and is active in research and publishing in, or otherwise making original contributions to, a relevant field or discipline. At minimum, the experience should include a sound record of publication and over the last five years meet the minimum requirements for at least one research quality measure and at least one research output measure equal to a Level C academic in the discipline as specified on the relevant Adelaide Academic Role Statement.
(iv) supervisors are not assigned to, or permitted to remain on, a student’s supervisory panel if they are enrolled in a Higher Degree by Research program, unless approval has been sought from the Dean of Graduate Studies in accordance with the guidelines: www.adelaide.edu.au/graduatecentre/forms/supervision/
(v) both new and existing supervisors undertake ongoing staff development in supervision and that supervision outcomes should be included in staff performance and planning reviews
(vi) under normal circumstances, contract employees or titleholders (including postdoctoral researchers) are not permitted to supervise in the capacity of principal supervisor where the tenure of their appointment is less than that of the student’s candidature
(vii) a register is kept of all external and affiliate supervisors (including visitors) within the school. These staff are to be fully informed of their responsibilities as outlined in this handbook and are provided with the same opportunities as University of Adelaide employees to attend ongoing professional development in supervision
3.3 Before admitting a student to candidature
(i) the student meets the requirements set down by the University for admission to candidature
(ii) the proposed research project is appropriate for the degree
(iii) the school is appropriate for the research to be undertaken, and has the space, facilities, supervision and resources that the work may require.
3.4 At the beginning of candidature
(i) all commencing research students are provided with an adequate induction to the school
(ii) each student has written guidelines (and where needed, training) concerning ethical and safety procedures appropriate to their field of research
(iii) students are made aware that the development component of the structured program offers the opportunity to acquire generic skills that may increase employability; certificates will be awarded for participation in workshops or courses
(iv) by the time of candidacy confirmation there is a sufficient pool of examiners available to examine the proposed thesis
(v) unsatisfactory progress is identified and addressed in accordance with the procedures defined in this handbook and the Student Grievance Resolution Process.
3.5 During candidature
(i) a structured program of activities is provided for all higher degree by research students within the school
(ii) all international doctoral higher degree by research students (who have not been granted an exemption) undertake and complete the Integrated Bridging Program—Research (IBP—R) in the first full semester following their enrolment as part of the core component of the structured program
(iii) components of the IBP—R such as the research proposal and literature review, are assessed as part of the core component of the structured program where appropriate
(iv) opportunities are provided for students and staff to interact and develop profitable intellectual relationships with one another
(v) an appropriate procedure is established for dealing with unresolved conflict between supervisor(s) and student(s), in line with University policy
(vi) unsatisfactory progress is identified and addressed in accordance with the procedures defined in this handbook and the Student Grievance Resolution Process.
3.6 At the time of submission certifying that:
(i) the thesis is prima facie worthy of examination both in terms of its content and its presentation relative to the standards specified in the Academic Program Rules for the degree.
(ii) the student has satisfactorily completed any coursework requirements
(iii) the thesis is within the maximum allowable word length for the program
(iv) the student has abided by the University’s policies with regard to assistance and editing and the inclusion of appropriate acknowledgements within the thesis
(v) the student has lodged all the original data or primary research materials associated with their research with the school, as required under the Australian Code for the Responsible Conduct of Research: www.adelaide.edu.au/research/our-research/integrity/

Responsibilities of the Postgraduate Coordinator
Under the direction of the head of school, the postgraduate coordinator will oversee higher degree by research matters within the school by:
4.1 Communication
(i) notifying the Adelaide Graduate Centre of their details on appointment, together with the name of the postgraduate coordinator that they are replacing, by email to graduatecentre@adelaide.edu.au so that up-to-date email and web lists of postgraduate coordinators can be maintained
(ii) maintaining membership of the postgraduate coordinators’ mailing list “PGCnet” pgcnetv.agc@list.adelaide.edu.au for the entire term of appointment to ensure that important information regarding higher degree by research student matters is received from the Adelaide Graduate Centre
(iii) ensuring that relevant information regarding higher degree by research matters (e.g. from the Adelaide Graduate Centre via the postgraduate coordinators’ mailing list) is distributed to all postgraduate research students and that any requests by the Adelaide Graduate Centre are acted upon by students and staff where applicable
(iv) assisting students to resolve any questions or problems they may be experiencing, either directly or by referral to the relevant areas
(v) providing students with aggregated information on completion rates and completion times for recent higher degrees by research graduates together, where possible, with information on employment destinations.

4.2 At the beginning of candidature

(i) new higher degree by research students, assisting with the administration of their candidatures and ensuring that they are aware of the responsibilities of the postgraduate coordinator, head of school and their supervisors

(ii) ensuring that commencing higher degree by research students are adequately inducted into their School

(iii) students in the mixed research and coursework stream of the Master of Philosophy and Master of Clinical Science know where, how and when to complete their coursework enrolment

(iv) reviewing and managing unsatisfactory progress identified by the supervisors in accordance with the procedures defined in this handbook and the Student Grievance Resolution Process.

4.3 During candidature:

(i) co-ordinating the delivery of the structured program

(ii) ensuring that students in the mixed research and coursework stream of a master by research or combined PhD/ master of philosophy program enrol in and complete the required coursework (including placements where applicable) prior to submitting a thesis for examination (and that any failed or approved alternative courses are repeated on a non-award basis)

(iii) ensuring that students in the mixed research and coursework stream of a master by research or combined PhD/ master of philosophy program are advised, informally, of their coursework results as they are achieved (results will be withheld from students’ transcripts until thesis submission)

(iv) helping to resolve problems that may arise between the students and their supervisors, or other members of the school

(v) reviewing and managing unsatisfactory progress identified by the supervisors in accordance with the procedures defined in this handbook and the Student Grievance Resolution Process.

(vi) ensuring that opportunities are provided for students to develop their presentation skills

(vii) ensuring students are notified of any forthcoming conferences and seminars by prominent display of notices and are actively encouraged to attend and participate.

4.4 At the annual review:

(i) interviewing each candidate during the annual review of progress. (Note that if the postgraduate coordinator is a supervisor, the head of school, or senior academic staff member nominated by the head of school, will undertake this responsibility. If the head of school is also a supervisor, another senior academic within the school, should be asked to assume this responsibility)

(ii) interviewing supervisors separately as part of the annual review of progress where problems or issues have been identified during the review process that require resolution.

4.5 Reviews of progress:

(i) participating in each candidate’s progress reviews and addressing any progress issues or impediments to progress as they arise, to the extent delegated by the Head of school.

4.6 At the time of submission certifying that:

(i) the thesis is prima facie worthy of examination both in terms of its content and its presentation relative to the standards specified in the Academic Program Rules for the degree.

(ii) the student has satisfactorily completed any coursework requirements

(iii) the thesis is within the maximum allowable word-length for the program

(iv) the student has abided by the University’s policies with regard to assistance and editing and the inclusion of appropriate acknowledgements within the thesis

(v) the student has lodged all the original data or primary research materials associated with their research with the School, as required under the Australian Code for the Responsible Conduct of Research

www.adelaide.edu.au/research/ourresearch/integrity/ Responsibilities of the supervisors

The responsibilities of supervisors are detailed below. In all cases, the principal supervisor has the primary responsibility for coordinating the supervisory process. The supervisors have responsibilities that include:

5.1 Commitment to providing high quality supervision

(i) becoming familiar with and abiding by the University's Academic Program Rules and the policies and procedures governing research degrees, including, but not limited to:

> the University's Supervisor Register Policy, which is available at: www.adelaide.edu.au/policies/2063

> the Guidelines for Current and Prospective University of Adelaide Supervisors who Wish to Enrol in a Higher Degree by Research: www.adelaide.edu.au/graduatecentre/forms-supervision/

> the ‘Australian Code for the Responsible Conduct of Research’ and the University’s Responsible Conduct of Research Policy, which are available at: www.adelaide.edu.au/research/our-research/integrity/

> University and faculty policies concerning animal ethics, human ethics and genetically modified organisms

> the University’s Privacy Policy and Management Plan, which is available at: www.adelaide.edu.au/policies/62

> the University’s Behaviour and Conduct Policy, together with the associated guidelines. These are available at: www.adelaide.edu.au/policies/3863

> the University’s Academic Honesty Policy at: www.adelaide.edu.au/policies/230

> the University’s Reasonable Adjustments to Teaching & Assessment for Students with a Disability Policy at: www.adelaide.edu.au/policies/64

> Jointly Conferred Academic Awards Policy at: www.adelaide.edu.au/policies/1184/ (currently under review)

> The Code of Practice in relation to the employment of part-time tutors: hss.adelaide.edu.au/intranet/learningteaching/

(ii) maintaining membership of the supervisor register and participating in on-going training in supervision as directed by the school or the Dean of Graduate Studies, which may include one or more of the following:
> facilitating or attending University-based workshops or seminars on supervision
> serving as a postgraduate coordinator
> serving as a member of a Working Party of the Research Education and Development Committee
> reading of web-based supervisory materials and undertaking related activities
> attending and contributing to an internal School or Faculty seminar on supervision
> attending and/or presenting at a conference on postgraduate supervision
> conducting research or submitting material for publication in the area of supervision
> mentoring of early career researchers in regard to good supervisory practice.
> (iii) providing academic guidance to students at all stages of candidature.

5.2 Communication

(i) before discussing/offering supervision to an applicant or prospective applicant, ensuring that the category and level of membership to the Supervisor Register and available capacity to supervise, is sufficient to do so
(ii) discussing any plans to enrol in a HDR program with the relevant stakeholders and seeking the relevant approval from the Dean of Graduate Studies prior to commencement.

(iii) maintaining membership of the higher degree by research supervisors mailing list ‘HDR Supervisors’ hdrsupervisors-v.agc@list.adelaide.edu.au for the entire term of the supervisory appointment to ensure that important information regarding higher degree by research student matters is received from the Adelaide Graduate Centre
(iv) assisting students to resolve any questions or problems they may be experiencing, either directly or by referral to the relevant areas.

5.3 At the beginning of candidature

(i) arranging a meeting with the student at the commencement of candidature to clarify their respective roles, responsibilities and expectations throughout the candidature (completion of the Expectations in Supervision scale is recommended, refer to Appendix 5 of the Research Student Handbook)

(ii) determining a program of research and study in consultation with the student that is capable of being completed by a competent and well-supervised Doctoral or Masters research student within three to four years or one and a half years to two years (of full-time equivalent candidature) respectively. The research topic should be agreed prior to enrolment where possible

(iii) ensuring that international students in the mixed research and coursework stream of the Master of Philosophy/Master of Clinical Science are appropriately directed to undertake any core IBP-R courses stipulated by the IBP-R Coordinator: www.adelaide.edu.au/integrated-bridging-program/

(iv) ensuring that all students in the mixed research and coursework stream of the Master of Philosophy/Master of Clinical Science are counselled in their selection of elective coursework units to the total value of 15 units (less any core course requirements)

(vi) carefully monitoring the performance of the student relative to the standard required for the degree, and ensuring that inadequate progress or work below the standard generally expected is brought to the student’s attention. Supervisors should assist with the development of solutions to problems as they are identified; these may include transfer to a lower level program or withdrawal

(v) Counselling against and refraining from suggesting, any commitment to undertake work or activities that are unrelated, or peripherally related, to the students’ research project and are likely to impede the progress of their research or ability to complete within 3–3.5 years for a PhD or 1.5–2 years for a Master by Research

(vi) applying to the Adelaide Graduate Centre for an extension of the due date for a candidature milestone (e.g. the annual review or core component of the structured program), where the student is unable to complete the milestone in the expected timeframe for reasons beyond their control

(vii) using the regular reporting procedures established by the University as the minimum means by which any difficulties and problems discussed with the student during the year are noted, indicating the action taken or advice given. If the problem is not resolved, the postgraduate coordinator, in the first instance, should be involved.

Where the postgraduate coordinator is also the student’s supervisor, the head of school should be contacted directly. Similarly, if the head of school is also the student’s supervisor and/or the postgraduate coordinator, the deputy head of school or another senior academic staff member of the school should be involved. The head of school (or deputy dead) and the Dean of Graduate Studies should be notified, in writing, of continuing problems between reporting periods

(viii) reporting at the annual reviews of progress whether the resources provided in the previous term (as detailed in the minimum resources proforma) were adequate AND re-negotiating the resource requirements for the year ahead, ensuring that any modifications are detailed on the annual review of progress form (vi) requiring written work from the student on a prearranged and agreed
with their research with the school, as required under the Australian Code for the Responsible Conduct of Research www.adelaide.edu.au/research/our-research/integrity/ or, recommending that the thesis is unacceptable for examination in its current form for the specified reasons and participating fully in any dispute resolution process subsequently initiated by the student.

Responsibilities of research candidates
The responsibilities of research students include:

6.1 Communication
(i) ensuring that contact details are kept up to date on Access Adelaide
(ii) ensuring that email forwarding is set up to forward University emails from the campus email address to the preferred email address, where the preferred email address is not the campus address.

6.2 At the beginning of candidature
(i) reading, becoming familiar with, and abiding by, the academic program rules governing the research program; the Research Student Handbook and all University policies and administrative processes relevant to research higher degree students including, but not limited to: the Student Charter: www.adelaide.edu.au/student/policies/charter/
The University’s Responsible Conduct of Research Policy. Please also refer to the ‘Australian code for the Responsible Conduct of Research’ at www.adelaide.edu.au/research/our-research/integrity/
> the health, safety and wellbeing policies and procedures within the school
> the University’s policies concerning animal ethics, human ethics and genetically modified organisms
the University’s Privacy Policy and Management Plan, which is available at www.adelaide.edu.au/policies/62
the Student Grievance Resolution Process, which is available at www.adelaide.edu.au/student/grievance/
the University’s Intellectual Property Policy which is available at www.adelaide.edu.au/policies/1263
the University’s Copyright Policy which is available at www.adelaide.edu.au/policies/2643
the University’s Rules for Student Conduct, available at www.adelaide.edu.au/policies/33

> the University’s Policy for the Operation and Conduct of the Integrated Bridging Program — Research (where applicable)
the University’s Academic Honesty Policy at www.adelaide.edu.au/policies/230
Plagiarism and independent research writing, refer to the online workshop available through the MyUni ‘Academic Skills Resources’ course, under the section labelled Career and Research Skills Training (CaRST) for postgraduate students. The direct web link is: myuni.adelaide.edu.au/webapps/blackboard/content/listContent.jsp?course_id=_115783_1&content_id=_1488018_1&mode=reset

> Guidelines on Access Privileges for HDR Students Outside Candidature, refer to Appendix 1 of this Handbook
The Code of Practice in relation to the employment of part-time tutors: hss.adelaide.edu.au/intranet/learningteaching/

(ii) becoming familiar with faculty and school information including resources, facilities, funding allowances and postgraduate representation on committees
(iii) selecting supervisors with the assistance of the postgraduate coordinator or head of school and accepting reasonable offers of supervision facilitated by the University
(iv) selecting an appropriate research topic with the assistance and advice of the postgraduate coordinator or head of school for which the University is capable of providing adequate supervision
(v) initiating discussions with the supervisors concerning the type of supervisory assistance that is preferred.

6.3 During candidature
(i) pursuing research diligently, at a high standard and without interruption as far as possible, to ensure completion within the timeframe allowed for the degree
(ii) adopting at all times, safe working practices relevant to the field of research and adhering to the ethical practices appropriate to the discipline
(iii) obtaining an ORCID and entering it, together with all publications generated from research undertaken during candidature into Aurora, the University’s publication management system
(iv) Ensuring that your principal supervisor has obtained any required ethics approval prior to your commencement of research.
(v) keeping an agreed schedule of meetings that will ensure regular contact with the supervisors
(vi) taking notes during each scheduled meeting with the supervisor(s) and circulating them to all members of the supervisory panel afterwards
(vii) maintaining the progress of research in accordance with the University’s and the supervisors’ expectations, including in particular, completing all milestones and progress reviews by their due dates and presenting any required written material to the supervisors (e.g. drafts of the thesis or publications) in sufficient time to allow for comments and discussions
(viii) maintaining regular attendance of and participation in the school’s seminar program
(ix) accepting reasonable offers of alternative supervision facilitated by the University where required as a result of staff departures, absences (exceeding one month) and conflict with a supervisor(s) that have not been resolved by mediation or which are deemed unsuitable for mediation
(x) requesting that the principal supervisor apply to the Adelaide Graduate Centre for an extension of the due date of any candidacy milestone or progress review that cannot be completed on time, for reasons beyond the control of the student
(xi) completing and lodging the appropriate paperwork with the Adelaide Graduate Centre when seeking approval to change the conditions of candidacy or scholarship
(xii) applying (in advance where possible) for leave of absence from candidature during any periods, to a maximum of 12 months, where it is not possible to work at full capacity
(xiii) returning to study on the approved date following an approved leave of absence and notifying the Adelaide Graduate Centre of resumption of studies by lodging a notification of return from leave of absence within two weeks
(xiv) notifying the Adelaide Graduate Centre and supervisors promptly of withdrawal from candidacy
(xv) taking the initiative in raising problems or difficulties and sharing responsibility for seeking solutions
(xvi) discharging all financial obligations to the University promptly.

6.4 During the later stages of candidature:
(i) accepting responsibility for producing the final copies of the thesis and ensuring that both content and presentation are in accord with the relevant requirements
(ii) ensuring that a University of Adelaide by-line is included in all research publications which result during or after candidature from the product of research undertaken at the University
(iii) where there is disagreement with the supervisor(s) regarding the readiness of the thesis for examination, and the student still wishes to submit that thesis for examination, instigating dispute resolution procedures in accordance with the section of the handbook entitled ‘Submission against the advice of your school’.

Appendix 3

Insurance for higher degree by research (HDR) candidates

The University provides the following insurance cover for higher degree by research candidates during the period of their enrolment. A student who is on leave of absence (or suspended), is not insured during this period.

Personal accident insurance
> Provides insurance for HDR candidates undertaking any activity organised by, approved by or under the control of the University, including participation in sporting events as a financial member of the University Sports Association

Travel Insurance
> Provides insurance for HDR candidates undertaking travel authorised by the University
> Funding to meet the cost of the travel does not have to be sourced from the University but the University must authorise the travel
> The insurance provides for personal travel time providing it does not exceed 50% of the travel time and is not greater than four weeks

The insurance is only provided for the HDR candidate and does not provide cover for spouse or children.

The insurance is for a time limit of 180 days any period longer than this time limit requires separate insurance arrangements; research students are able to be covered for up to 360 days by contacting Legal and Risk

Public liability
1. Provides indemnity for the University where HDR candidates enter into arrangements that require interface with a third party and loss, damage or injury is experienced by the third party arising from the actions of the HDR candidate
2. The arrangement with the third party must be by written agreement between the University and the third party where the University agrees to indemnify the HDR candidate
3. Should the HDR candidate suffer a loss, damage or injury which is a result of negligence or failure on the part of the third party the agreement should provide for the third party to have public liability insurance that enables the HDR candidate to claim against the third party insurance policy.

Professional indemnity
Provides indemnity for an HDR candidate in the provision of professional advice under a contractual agreement with a third party.

Directors and officers liability
Indemnifies an HDR candidate who is appointed to a position as a member of a board or as an officer of an association, which is approved by the University. This includes participation in Student Union associations. A condition of cover under this policy is that it is not to be disclosed. Please contact Legal & Risk for further information.

Information guides are available on the levels of cover provided. These can be accessed through the University intranet under Legal & Risk—Insurance: www.adelaide.edu.au/legalandrisk/insurance Enquiries may be directed to the help desk in the first instance: helpdesklegal@adelaide.edu.au
Appendix 4A

Rules for jointly awarded Higher Degree by Research (HDR) programs (including cotutelle)

1. Where there is sound academic reason and the Academic Program Rules for the degree permit, the University may, on advice from the Pro Vice-Chancellor (International) and the Dean of Graduate Studies, permit a student to enrol simultaneously in an HDR at The University of Adelaide and at a second overseas university under a Joint-Award agreement.

2. Any approved ‘agreement’ must clearly define the roles of the two member universities, either as the institution of primary enrolment or the institution of partner enrolment.

3. The primary institution should be responsible for the management of candidature and ensuring that deadlines and goals are met.

4. An ‘agreement’ shall apply only to an individual student and must be compatible with the Rules for the relevant HDR program at the University of Adelaide, and related Research Education and Development Committee guidelines.

5. The Nature of an agreement

5.1 The Research Education and Development Committee will be responsible for the detailed requirements of a jointly-awarded HDR Agreement.

5.2 Notwithstanding rule 5.1, an agreement must specify the requirements pertaining to:

1) arrangements for fees
2) scholarships and stipends
3) supervision
4) the language in which the thesis will be written and defended
5) details of the examination process and the selection of examiners
6) arrangements for students to spend not less than 12 months full-time study at each of the two participating institutions; and Agreements must also comply with the requirements of Rule 8.

5.3 This agreement will supplement but not replace the need for formal admission to the University.

5.4 The agreement must be in place no later than the end of the first year of full-time equivalent study.

6. Supervision

6.1 A candidate seeking enrolment in a jointly awarded HDR program, must have as their principal supervisor, a member of the University’s Supervisor Register who is an employee of the University; University titleholders are ineligible to undertake the principal supervision of a candidate in a jointly awarded program.

7. Withdrawal from Candidature

7.1 A Candidate may withdraw from a Jointly-Awarded HDR program at any time prior to thesis submission.

7.2 Where the Candidate’s primary institution is the University of Adelaide, he or she may transfer their enrolment into a relevant University of Adelaide Higher Degree by Research subject to the applicable academic program rules.

8. The thesis

8.1 The thesis will be written in English; unless approval to write in it a different language is acknowledged at the time the candidature agreement is accepted.

8.2 When permission is granted to produce a thesis in a language other than English, the thesis will include a substantial summary in English. Conversely if the thesis is written in English, a substantial summary will be written in the language of the other participating university.

9. Conduct of examinations

9.1 An agreement will not include an examination process less rigorous than that required under the Rules for the relevant HDR program at the University of Adelaide.

9.2 Examiner’s reports (original) must be submitted in English irrespective of the language in which the thesis is written.

10. Outcome of examination

10.1 A candidate who meets all the examination criteria under an agreement shall be eligible for the award of the relevant jointly awarded HDR degree from both participating institutions.

11. The nature of the degree certificate

The degree certificate issued to graduates who have undertaken a HDR program under a jointly awarded degree agreement including a cotutelle agreement shall read: “Conferred as a single degree under a joint [‘name of program’] program between the University of Adelaide and the [‘University of XXX’]. This requirement must be specified in all Jointly-Awarded degree agreements, including Cotutelle agreements.

12. General

When, in the opinion of the Research Education and Development Committee, special circumstances exist, the Committee, on the recommendation of the relevant School/Discipline in each case, may vary any of the provisions in Rules 1–11 above.

Examiner’s reports (original) must be submitted in English irrespective of the language in which the thesis is written.
Information sheet for jointly-awarded higher degree by research (HDR) programs (including cotutelle)

**What is a jointly-awarded HDR program?**

A Jointly-Awarded HDR program allows approved HDR students to be supervised jointly by academics from the University of Adelaide and academics from a nominated approved university. Selected HDR students are enrolled concurrently at the two universities for the entire period of their program and they spend at least one year in each university. Each student’s program takes place under an Agreement which needs to be drawn up for each student between the two institutions. The Memorandum of Understanding (MOU) is completed by the student, the two institutions and the supervisors and sets out in detail the terms and conditions for joint supervision and examination. The candidate pays fees at one institution only. It is very important for a student to carefully read the conditions specified in the proposed joint-agreement before committing to the program; some joint-agreements may have special conditions attached which are additional to the standard University of Adelaide requirements. If successful in completing the program, the student will be granted a single HDR degree jointly-awarded by the two institutions. The testamur will clearly reflect the joint nature of the program and that the degree is jointly awarded by the partner institutions.

**What are the benefits of enrolling in a jointly-awarded HDR program?**

A Jointly-Awarded HDR program provides a mechanism:

- to enhance two way research collaboration, including recruitment of research students
- to facilitate cross-institutional study and experience for PhD students
- to work in two countries and have access to the latest research equipment
- to access new funding sources
- to develop networks

The prime intent of Jointly-Awarded HDR programs is that they form part of an ongoing or developing cooperative research collaboration between a School or research group in this University and one in another approved University.

Examples of research collaboration include:

- evidence of dialogue between respective academic scholars
- exchange of personnel to other institutions
- co-publication of research.

Of course, not all collaboration needs to be at the level of a Jointly-Awarded HDR program. Study leave is another option for students who wish to undertake fieldwork, research or study towards their degree whilst located outside the University for a period of time, not exceeding 12 months in total. A Jointly-Awarded HDR program will be a more substantial association, a real collaboration in research supervision, which will raise an existing research collaboration to a higher level. It will provide the best HDR students with international experience and personal links at an early stage of their career.

**Major Partnerships for Joint Degrees**

The University is working closely with a number of key international partners for the joint award of HDR degrees. Whilst the list below is not an exclusive list of potential joint-degree parties, it does provide an emphasis the University is anxious to support:

<table>
<thead>
<tr>
<th>Partner University</th>
<th>Fields of Research</th>
</tr>
</thead>
<tbody>
<tr>
<td>University of Freiberg (Germany)</td>
<td>Cancer and related biology</td>
</tr>
<tr>
<td>Shanghai Jiao Tong University (China)</td>
<td>Plant biosciences</td>
</tr>
<tr>
<td>University of Nagoya (Japan)</td>
<td>Medicine, medical sciences and biomedical engineering</td>
</tr>
<tr>
<td>University of Nottingham (UK)</td>
<td>Chemistry, plant biosciences, nutrition and food science</td>
</tr>
</tbody>
</table>

**What financial support is available to students undertaking a jointly awarded HDR degree?**

The funding opportunities depend on the location of the student’s primary institution. The primary institution is nominated by the candidate at the time of application and is normally the institution where the candidate will spend the majority of their time. The second institution is referred to as the partner institution. All students enrolled in a Jointly-awarded HDR program will only be required to pay course fees to their primary institution. If the University of Adelaide is the primary institution the student:

- will normally not be required to pay course fees to the partner institution
- may be considered for the living allowances (i.e. stipends) offered as part of the Adelaide Scholarships Program. Examples include the Australian Postgraduate Award (APA) and the University of Adelaide Divisional Scholarships (domestic students only) and the International Postgraduate Research Scholarships and the Adelaide International Scholarships (international students only). Recipients of these scholarships will continue to receive payments while they are undertaking their studies at the Partner institution
- may be considered for the travelling scholarships offered as part of the Adelaide Scholarships Program, such as the Research Abroad Scholarships

The Adelaide Scholarships Program is detailed at the Adelaide Graduate Centre website: [www.adelaide.edu.au/graduatecentre/scholarships/](http://www.adelaide.edu.au/graduatecentre/scholarships/)

If the University of Adelaide is not the primary institution, the following funding situation applies:

- University of Adelaide course fees will normally be covered by the University of Adelaide and fees will only be payable to the partner institution
Students are not eligible for a scholarship which provides a living allowance (stipend) from the University of Adelaide. They will therefore need to seek a stipend from another source.

Students are not eligible for the Research Abroad scholarships.

All students are encouraged to explore a wide range of funding options. Good starting places are:

- the universities participating in the jointly-awarded HDR program
- national and regional governments
- overseas embassies and missions
- Hobsons Course Finder Database, an online database of postgraduate scholarships at www.scholarships.acir.com.au/
- the ‘other funding’ information provided in the University of Adelaide Scholarship Office website: www.adelaide.edu.au/graduatecentre/scholarships/

Where do I find a template agreement for a jointly-awarded PhD program? 

The ‘Agreement for a Jointly-awarded HDR Degree’ is available from the Adelaide Graduate Centre, email DDOG@adelaide.edu.au or telephone (08)8313 3506. This agreement must be submitted by the school either at the time of application or after the candidate has commenced, noting that the agreement must be finalised within the first 12 months of candidature. In the case of arrangements with universities in France, the completed agreement must be accompanied by the French institution’s cotutelle contract.

It is important to remember that the ‘Agreement for a Jointly-Awarded HDR Degree’ is not an application form for HDR candidature. Before a Jointly-Awarded HDR program can be approved, an applicant must be approved as eligible for admission to the relevant HDR degree by both of the participating universities. The applicant must therefore be successfully selected for candidature by each of the participating universities in line with their respective selection and other entry requirements. Applicants not currently enrolled at The University of Adelaide must submit a separate application for candidature. For further information about the application process: www.adelaide.edu.au/graduatecentre/admission/

When setting up a Jointly-awarded HDR arrangement it is important to keep the following points in mind:

1. A Jointly-awarded HDR agreement must be drawn up between the two participating institutions in respect of each candidate, detailing the particular arrangements pertaining to that particular candidature. Normally such agreements take effect from the beginning of a candidature
2. The agreement must list the supervisors who are to undertake the joint supervision. The University of Adelaide supervisor must be an employee of the University (not a Titleholder) and admitted to the University’s Supervisor Register.
3. The candidature is to be divided between the two institutions with alternate periods of attendance at each and a minimum of one year to be spent researching at each institution
4. The agreement must set out the arrangements with regard to payment of fees
5. There is to be one examination process agreed to by both institutions, and the initial agreement must detail the procedures that will be followed. Both Universities must agree to respect the outcome of the agreed examination process.

Once enrolled in a jointly-awarded HDR program are tuition fees paid to both institutions?

A HDR student undertaking a Jointly-Awarded HDR program will normally only be liable for tuition fees at the ‘lead’/’home’ institution. Is there anything that needs to be submitted in addition to the HDR thesis for examination?

The thesis will be written in English; unless approval to write in it a different language is acknowledged at the time the candidature agreement is accepted. When permission is granted to produce a thesis in a language other than English, the thesis will include a substantial summary of 5,000 to 10,000 words in English. Conversely in the thesis is written in English, a substantial summary will be written in the language of the other participating university.

How is examination of the HDR thesis conducted in the jointly-awarded HDR Program? 

The examination will be carried out in a manner that meets the essential requirements of both institutions and is at least as rigorous as that required under the academic program rules for the relevant HDR at the University of Adelaide. The home institution normally has the responsibility of coordinating the examination process. Students should be very clear, at the commencement of candidature, as to any special examination requirements such as mandated publications, or an oral exam defence.

Examiners reports on the thesis, prepared in English, must be submitted to the University of Adelaide irrespective of the language in which the thesis is written. Students may be required to undertake an oral examination in defence of their thesis, if one of the participating institutions requires this.

The successful outcome of the examination process would be the granting of a Jointly-Awarded HDR degree.

Research Training Scheme funding

The completion of an HDR student enrolled under a Jointly-awarded degree arrangement will contribute to an Australian higher education institution’s total completion count and will be included in the completions component of the formula for allocating Research Training Scheme funding. Where the student is undertaking a jointly awarded degree program at the University of Adelaide and another Australian university, the completion will be reported according to the proportions agreed and documented in the Memorandum of Understanding.

What award do I receive once I have passed?

The successful outcome of the examination would be the award of a single HDR degree, with testamurs from both institutions each of which will contain the following expression “Conferred as a single degree under a joint [‘name of program’] program between the University of Adelaide and [name of partner institution]”.

Further information

For further information or advice, please contact the Dean of Graduate Studies after discussion with your supervisor (where applicable): DDOG@adelaide.edu.au
Appendix 5

Expectations in supervision

Read each pair of statements below and then estimate your position on each. For example with statement 1 if you believe very strongly that it is the supervisor's responsibility to select a good topic you would put a ring round '1'. If you think that both the supervisor and student should equally be involved you put a ring round '3' and if you think it is definitely the student's responsibility to select a topic, put a ring round '5'.

<table>
<thead>
<tr>
<th>Supervisor's responsibilities</th>
<th>Rating</th>
<th>Student's responsibilities</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. It is the supervisor's responsibility to select a research topic.</td>
<td>1 2 3 4 5</td>
<td>The student is responsible for selecting her/his own topic.</td>
</tr>
<tr>
<td>2. It is the supervisor who decides which theoretical framework or methodology is most appropriate.</td>
<td>1 2 3 4 5</td>
<td>Students should decide which theoretical framework or methodology they wish to use.</td>
</tr>
<tr>
<td>3. The supervisor should develop an appropriate program and timetable of research and study for the student.</td>
<td>1 2 3 4 5</td>
<td>The supervisor should leave the development of the program of study to the student.</td>
</tr>
<tr>
<td>4. The supervisor is responsible for ensuring that the student is introduced to the appropriate services and facilities of the school and the University.</td>
<td>1 2 3 4 5</td>
<td><em>5</em> It is the student's responsibility to ensure that she/he has located and accessed all relevant services and facilities for research.</td>
</tr>
<tr>
<td>5. Supervisors should only accept students when they have specific knowledge of the student's chosen topic.</td>
<td>1 2 3 4 5</td>
<td>Supervisors should feel free to accept students, even if they do not have specific knowledge of the student's topic.</td>
</tr>
<tr>
<td>6. A warm, supportive relationship between supervisor and student is important for successful candidature.</td>
<td>1 2 3 4 5</td>
<td>A personal, supportive relationship is inadvisable because it may obstruct objectivity for both student and supervisor candidature.</td>

Appendix 6

Master by research grade, mark ranges and descriptors

Introduction

During discussions of the Research Education and Development Committee during 2010, it was agreed that the Master of Philosophy at the University of Adelaide would be a graded degree and that a set of grade descriptors would be developed to provide a guide to the standard of work expected to achieve each grade level. Subsequently, the grading scheme was extended to the Master of Clinical Science. The grade descriptors which follow are made available to examiners of a Master of Philosophy or Master of Clinical Science thesis to facilitate consistency in the examination process, as required for Doctoral scholarship selection purposes. Grades and indicative marks will be used for internal University purposes only and will not appear on students' transcripts or parchments.
Appendix 6

Master by research grade, mark ranges and descriptors

High Distinction HD (80–100)

Broad features
An ‘upper HD’ (90–100) student has strengths in all of the following areas:

> Clear and coherent interpretation of the thesis data, and/or the results of other studies.
> Comprehensive understanding of the importance of the results in the context of the theoretical framework.

Overall: a C student may be capable of undertaking postgraduate research at doctoral level.

C (65–74)

Broad features
The project is characterised by most of the following:

> Generally competent written and logically organised. Some minor problems may exist in the expression and/or cohesion of the text.
> Provides an adequate coverage of the literature, although it may at times tend to be more descriptive than evaluative, and arguments are sometimes disjointed.
> Reasonable insight and some evidence of original thought in dealing with the critical.
> A general understanding of the research methods.
> Adequate design of the research project, although possibly containing minor but retrievable errors.
> Data analysis is appropriate for the design, and results are generally clearly presented.
> Generally sound interpretation of results and their importance to the theoretical context.

Overall: a C student may be capable of undertaking postgraduate research at Doctoral level with close supervision.

Fail (0–50)

Broad features
The project is characterised by most of the following:

> The work is not well written and shows a serious inability to structure and present a logical argument.
> Coverage of the necessary literature is inadequate, with little information provided relevant to the claims made, or conclusions drawn, within the thesis.
> Little evidence of insight including serious misunderstanding of key concepts and issues.
> Knowledge of research methods is lacking.
> Serious flaws exist in the design of the research project making it difficult or impossible for the research to meet its aims.
