

# Master of Science (Reservoir Geoscience)

## Academic Program Rules

---

### 1 General

---

1.1 This document must be read in conjunction with:

- (a) the General Academic Program Rules for Master by Research Programs (see under Adelaide Graduate Centre, p.8) *and*
- (b) the Code of Practice for Maintaining and Monitoring Academic Quality and Standards in Higher Degrees by Research, published by the Adelaide Graduate Centre.

These documents explain procedures to be followed and contain guidelines on supervision and research for the degree of Doctor of Philosophy and the various Masters Degrees by Research, offered by the University.

All students must comply with both the General Academic Rules and the rules following below, and procedures outlined in the Code of Practice.

In addition to the General Academic Program Rules for Masters by Research degrees, in this publication, the following discipline specific rules apply.

### 2 Qualification requirements

---

2.1 Every candidate for the degree shall complete work to the value of 48 units comprising the following components:

- (a) coursework comprising the following compulsory courses:
  - PETROL 7000TB Petroleum Geology and Geophysics (B)
  - PETROL 7001TB Petroleum Geology and Geophysics (A)
- (b) no more than 6 units of coursework chosen from PETROENG 7000 to 7008 as listed in the calendar
- (c) a thesis on an approved research project with relevance to reservoir geology.

2.2 The Board of Research Education and Development may exempt candidates from the specified coursework if they have qualified for the Honours Degree of Bachelor of Science (Petroleum Geology and Geophysics) of the University, or an alternative Honours program containing equivalent coursework. In such cases, candidates shall undertake an extended research thesis.
