

Nokia N95 Calendar Setup

With internet access via Wi-Fi/GPRS (GPRS will involve costs) you can sync the calendar on your phone with the University Calendar system.

All this is done via the phone

Pre-requisite – internet

Create Synchronisation Profile

1. Go to Menu > Tools > Sync
2. Select Options > New Sync Profile
3. Select No to copping values

Settings

1. Sync Profile Name : UofA Calendar (recommended)
2. Select Applications > Calendar (ensure all others are “Not Defined”)
 - i. Include in sync: Yes
 - ii. Remote Database set to: ./calendar
 - iii. Synchronisation type: Both ways
 - iv. Back > Back
3. Select Connection settings:
 - i. Server Version : 1.1
 - ii. Data Bearer : Internet
 - iii. Access Point : Always Ask (recommended)
 - iv. Host Address: <http://webcalendar.adelaide.edu.au/ocst-bin/ocas.fcgi>
 - v. Port : 80
 - vi. Username : your username e.g. a1234567
 - vii. Password : Your Password
 - viii. Allow Sync Requests : Yes
 - ix. Accept All Sync Requests : Yes
 - x. Network Auth : No
4. Select Back > Back > Exit > Back > Exit
5. You are now configured.

First time manual sync

Note – Synchronisation needs to be done manually.

1. Go to Menu > Tools > Sync
2. Highlight UofA Calendar
3. Select Options > Synchronise
4. Select type of connection (use Wireless when possible e.g. “UofA” or home wireless)
5. Select Exit > Back > Exit
