Configuration of SyncML .....	2
Purchasing Process.....	3

SyncML is the interface application between your PDA calendar and the University Oracle Calendar server. Once configured it will allow you to synchronise the two over your mobile GPRS Internet connection (without using the cradle/usb connection to your computer).

When you are issued with your PDA it will have the 30-day trial version of SyncML installed. To continue using the software after this 30-day period you will be required to purchase a registration code for the application, using a secure online credit card transaction. Once you complete this process an E-mail from Kagi with the subject "Thanks for your purchase" should be sent to the address you entered with your registration details.

They will look something like:

Username: "Firstname Lastname firstname.lastname@adelaide.edu.au"

Registration code: "XXXX-XXXX-XXXX-XXXX"

You will have to enter these details exactly as written in the email for the program to register correctly.

## INSTALLATION & CONFIGURATION

### INSTALL FILES

[For Touch-screen devices](#)

[For non Touch-screen devices](#)

### INSTALL PROCEDURE

1. Ensure Microsoft Activesync is installed on the PC from the CD that came with the device.
2. Connect the device to the PC via the supplied USB cable.
3. Browse to My Computer – Mobile Device.
4. Download the appropriate install file from above, and save it to your Mobile Device folder.
5. On your device, Press the Start Button.
6. Browse to Programs.
7. Browse to file explorer.
8. Use the stylus to click the “syncml\_std\_en.PPCWM” file.
9. Press the Yes button when requested to confirm installation.
10. Press the OK button.
11. Exit from the file explorer.
12. Browse to the newly installed “Synthesis SyncML” Application.

### SETTINGS OVERVIEW

Server URL: <http://webcalendar.adelaide.edu.au:80/ocst-bin/ocas.fcgi>

Username: Your University logon (eg. a1234567)

Password: Your University password

Contacts/Events/Tasks Sync Mode: Slow

Contacts Server Path: ./contacts

Events Server Path: ./calendar/events
