

Why can't I find a staff member in Calendar?

Only staff members may currently have access to Oracle Calendar accounts although many post-graduate students have staff accounts.

If a staff member can not be located it may mean that :

- they do not have a Calendar account, or
- their name may be stored differently from your input.

To locate a staff member whose name may be stored differently from your input we suggest the following:

- try just the last name
- try the last name and part of the first name e.g. Ter to locate Terence and Terry.
