

eduroam Wireless Guide

Windows Vista

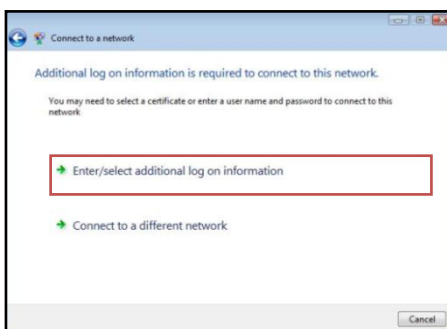

1. Click the wireless icon  in the taskbar
2. Select “connect to a network”

3. Select the “eduroam” wireless network from the list and press the “Connect” button

4. Select “Enter/select additional log on information”

5. Enter your University username and password into the authentication window; you may be required to enter this up to 5 times.

- University Username (as shown)
- University Password
- Leave Logon domain blank

6. Click “Ok” on the Validate Server Certificate window **

7. You will now be connected! If you are still having difficulties connecting:
