System Requirements

- The iPhone or iPod device must have software version 2.0 or higher installed. Earlier software versions lack the security functions required to connect to the UoA network.

Wireless Configuration

1. Press settings and then press Wi-Fi. You should be taken to a list of the networks that your iPhone or iPod are able to see.

Figure 1.1 – The iPhone Home Page and the list of Wi-Fi networks.

2. Select UofA. Enter your student ID prefixed by the **a** and your password.

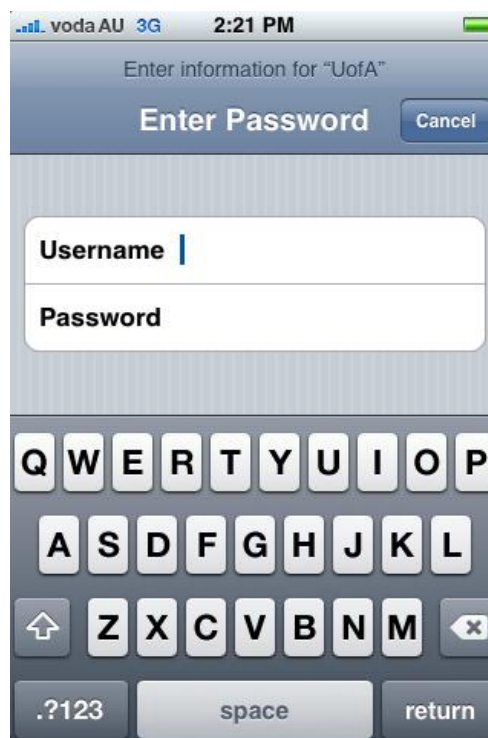

Figure 1.2 The Credentials Screen

3. Accept the certificate when prompted. Once the device has connected to the network, you will be returned to the list of available networks.
4. Press the blue arrow next to UofA.
5. At the bottom of the screen, select Auto as the http proxy.
6. Enter <http://www.adelaide.edu.au/proxy.pac>

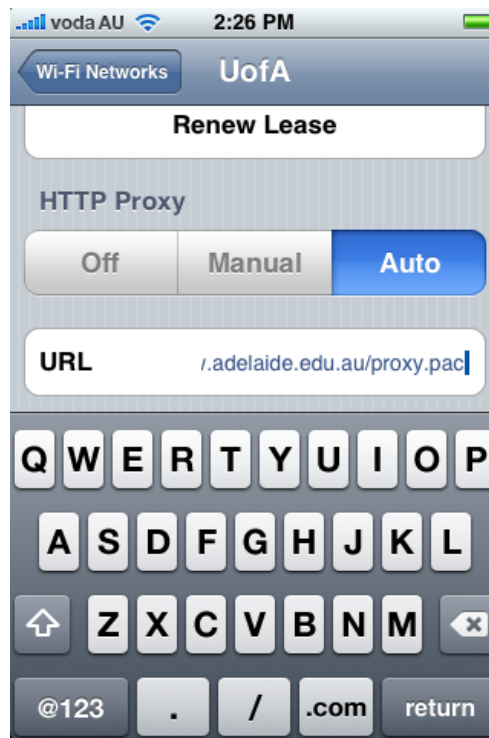

Figure 1.3 Proxy Configuration Details

7. Press the Menu button and then select Safari.

8. Enter your UserID prefixed with the **a** and your password and select log in.
