

UofA Wireless Guide

Windows Vista

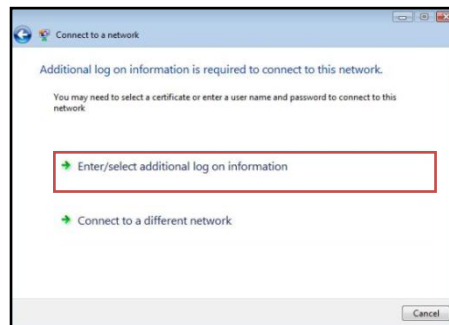

1. Click the wireless icon  in the taskbar
2. Select “connect to a network”

3. Select the “UofA” wireless network from the list and press the “Connect” button

4. Select “Enter/select additional log on information”

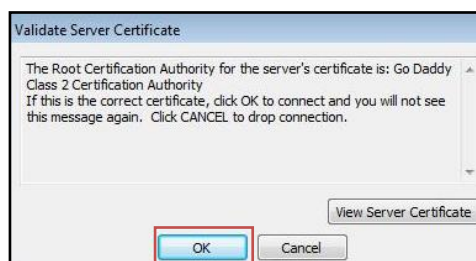

5. Enter your University username and password into the authentication window; you may be required to enter this up to 3 times.

- University Username (Eg. a1234567)
- University Password
- Leave Logon domain blank

6. Click “Ok” on the Validate Server Certificate window **

7. You will now be connected! If you are still having difficulties connecting:
Staff: Contact the Technology Service Desk on 8303 3000
Students: Go to the Support Desk on level 2 of the Innova Building

** The certificate can be trusted provided the error message detail contains the text "The server "radius.adelaide.edu.au" presented a valid certificate issued by "Go Daddy Class 2 Certification Authority" or "ValiCert, Inc", but "Go Daddy Class 2 Certificate Authority" is not configured as a valid trust anchor for this profile."
