

Generating a Publications List from Adelaide Research and Scholarship

It is possible to automatically generate a publications list from the Adelaide Research and Scholarship database for any individual or community within the University of Adelaide. This list can then be added to your Staff Directory page, or any other web page to produce an automatically-updated bibliography.

1: Establish form of name (for an individual) or unique ID (for a community/school)

Individual

It is recommended that you first browse the author index to determine the form of your name as recorded in the repository. To do this, go to –

<http://digital.library.adelaide.edu.au/dspace/>

Click Author under the Browse heading in the sidebar on the left of the page -

Enter your Lastname, First name or initial in the search box that next appears and click Go. You may only need to use your last name and first initial of your first name, but if you have a common surname you might need to enter your full first name.

If you notice that your name appears in more than one form in the author index, or in a form with which you disagree, please send an email to – digital-library@adelaide.edu.au.

Having established the form of your name, proceed to **Step 2**.

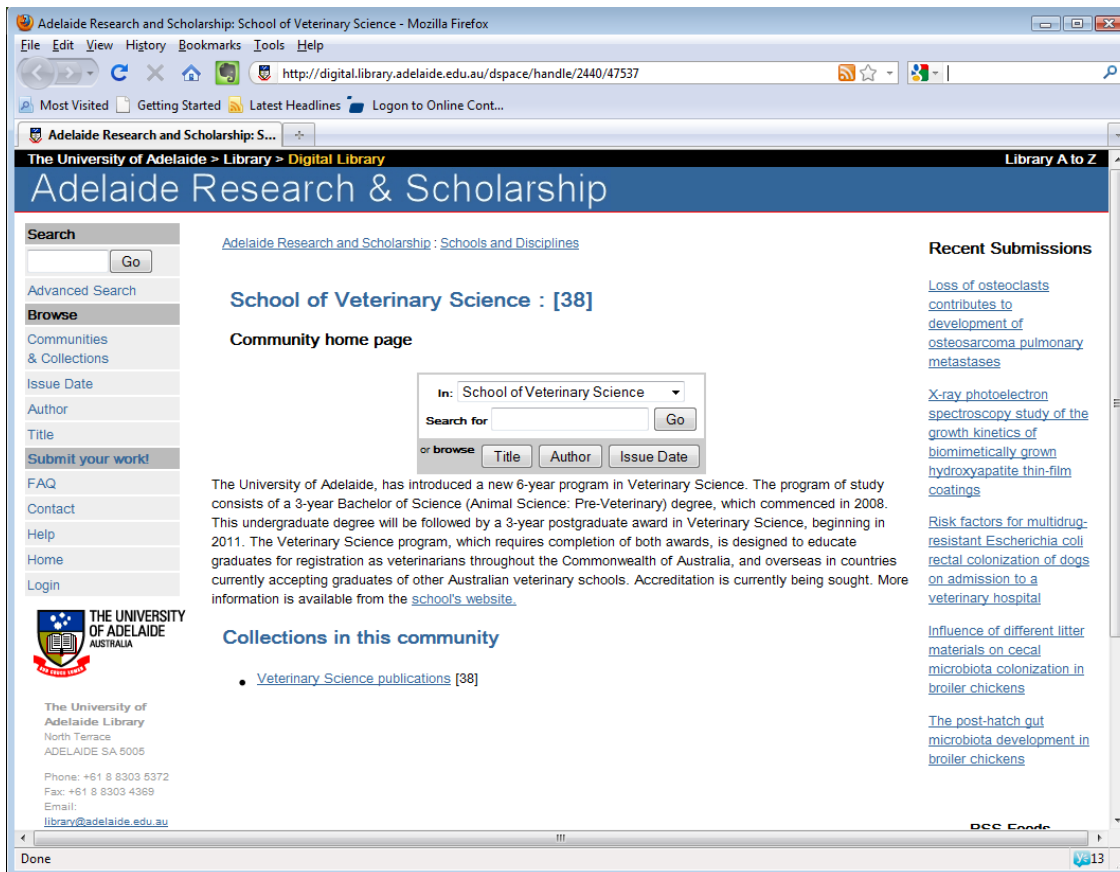

Community/Collection Handle

A community can be as large as a whole faculty or can be down to the school or discipline level.

To generate a publications list for a particular community/school it is first necessary to determine the unique ID for your community. To do this, browse the AR&S Community list at -

<http://digital.library.adelaide.edu.au/dspace/community-list>

For example, if you browse to the School of Veterinary Science you'll see a display as shown below.

The URL for this page is <http://digital.library.adelaide.edu.au/dspace/handle/2440/47537> and therefore the unique ID for this community is the **last few digits of the URL after /2440/** (i.e. 47537).

2: Generating the Publications List

Navigate to – <http://digital.library.adelaide.edu.au/cgi-bin/workslis.pl>

For publications by an individual, enter form of name as determined in Step 1 (Lastname, First name or initial) in the box provided, as below –

Author (Lastname, First name/initial):	<input type="text" value="Bloggs, Geoffrey"/>
or Community/Collection Handle:	<input type="text"/>

For publications by a community or collection, enter the unique ID for this community/collection obtained in Step 1 into the box provided, as below -

Author (Lastname, First name/initial):	<input type="text"/>
or Community/Collection Handle:	<input type="text" value="47537"/>

'List of works' Heading

By default, a bibliography will include the header **List of works for [your name]** at the beginning. Tick the **Suppress 'List of works' Heading** box if you *don't* want this main header to appear.

Sort Order

Results can be sorted by –

- Year (of publication)
- Type (eg. Journal article, Conference paper, Book chapter, etc.)

The default action will select all publications in the database for that individual or Community/School and sort and group publications firstly by year of publication in descending order and then alphabetically by type, then by first author and then by title.

You can decide whether **Type** or **Year** is used as the first level for sorting by selecting the appropriate radio button.

Results can be displayed in descending order by ticking the **Desc** box. You are most likely to apply this to Year so that most recent publications are displayed first.

Special Order for Type

It is possible to customise the sort order of Types of material by selecting publication types from the right-hand **Available Types** box and adding them to the **Special Order for Type** box on the left.

The screenshot shows a user interface for sorting search results. On the left, under 'Sort By', there are two levels of sorting options. Level 1 has radio buttons for 'Year', 'Type' (selected), and 'Desc'. Level 2 has radio buttons for 'Year' (selected), 'Type', and a checked 'Desc' checkbox. Below this, text reads: 'Tick 'Desc' box for descending sort. Untick box for ascending sort.' In the center, the 'Special Order for Type' box contains a list with 'Journal article' selected. To its right are buttons for 'Add', 'Remove', 'up', and 'down'. On the far right, the 'Available Types' box lists various categories: Letter to Editor, Major review, Moving image, Multimedia, Musical performance, Name authority, Nucleotide sequence, Other, and Pamphlet.

Example

EXAMPLE: Generate a bibliography sorted by **Type**, with Journal articles appearing first, with all other Types of material to follow alphabetically by **Type**, sorted within each category by **Year** of publication, in reverse chronological order.

First click the **Type** radio button in **Sort by Level 1**.

Then click the **Year** and **Desc** radio buttons in **Sort by Level 2**.

Select *Journal article* from the list of **Available Types** in the right-hand list, then click the **Add** button. This will move *Journal article* into the **Special Order for Type** box. (All other Types of material will follow, sorted alphabetically by type)

Please note: journal articles will appear under the type **Journal article**, not **Journal**.

Important note: The list of types is dynamically generated from *all* types in the database. Any publications list is always going to contain only a limited number of all the possible types. *All* types of publications by a particular individual or Community/School will *always* be displayed. It is not possible to exclude material of any particular type from the results generated.

It may be advisable to first generate the list *without* any special sort order so that you can see exactly under which types your works have been classified.

Years to Display

Years to Display

Number of Years to Display:

or

Specific Year to Display:

Suppress Year Heading

Leaving all fields in this box blank will select *all* publications, regardless of year of publication.

There are several variations possible on this basic output, using the following fields –

Number of Years to Display

Use this if you want to restrict display to recent years, inclusive of the current year.

For example Number of Years = 5 currently will display 2007-2011 publications only. Then from January 2012 it will display 2008-2012 publications only.

Specific Year to Display

Use this if you want to display one year's publications only.

Enter the year in full (eg. 2005)

Suppress Year Heading

Check this box if you don't want to display the date header.

(You may want to use this in conjunction with the **Specific Year to Display** box where you have included the year of publication as part of the display)

Get Works!

Finally, click the Get works button located at the bottom of the page to generate your publications list.

Should you wish to amend your search/sort parameters after the list has been generated, click the **show search entry** button located at the top of the results page –

Need help to create a list of works? Use [these instructions](#)

To add an automatically-updated bibliography to your web page, insert this HTML code into the appropriate place:

```
<script type="text/javascript"
src="http://digital.library.adelaide.edu.au/cgi-bin
/workslist.pl?author=Keig%2C%20A&
orderBy=year%20desc%2Ctype%2Cauthors%2Ctitle&js=1"></script>
```

There will be a HTML code box below this **show search entry** button, which can then be embedded in web pages to produce an automatically-updated bibliography (refer next page).

3: Adding an Automatically-Updated Bibliography to Your Staff Directory Page

This procedure assumes some familiarity with editing your Staff Directory page. See - https://www.adelaide.edu.au/webguide/special/staff_dir/ for details

1. Navigate to your Staff Directory page and [Login].

Entry last updated: Tuesday, 11 Jan 2011

3. Choose <Publications> as the Category from the drop down list.

4. Select <HTML>

- Paste the script generated earlier (refer page 4 above) into the HTML box.

The screenshot shows the 'HTML Source Editor' window with the following content:

```

HTML Source Editor
Word wrap
<script type="text/javascript" src="http://digital.library.adelaide.edu.au/cgi-bin/workslis.pl?author=Bennetto%2C%20E&orderBy=uals_special_order(type%2C'Journal%20article%2CConference%20paper%2CBook')%20desc%2Cyear%2Cauthors%2Ctitle&js=1"></script>
Update
Cancel

```

The background interface includes a navigation bar with 'Faculties & Divisions | People A to Z | Media Expertise | Phonebook', a login status 'Logged in as Elise Bennetto [Logout] [homepage]', and a 'Data*' field. Below the field is a rich text editor toolbar and a 'Category*' dropdown menu set to 'Publications'. 'Save' and 'Cancel' buttons are visible at the bottom left.

The information in this directory is provided to support the academic, administrative and business activities of the University of Adelaide. To facilitate these activities, entries in employees. The use of information provided here for any other purpose, including the sending of unsolicited commercial material via email or any other electronic format, is strictly prohibited. The University of Adelaide does not recover all costs incurred in the event of breach of this policy.

- Select **<Update>** at the bottom left hand corner. This will return you to the previous screen. NB at this stage you will not see the list displayed.
- Click the **<Save>** button and you should now see the list of publications.

The screenshot shows the profile page for 'Ms Elise Bennetto'. The page includes a navigation bar, a 'Publications' link, and a table of contact information:

Telephone	830 33629
Position	Digital Services Officer
Email	elise.bennetto@adelaide.edu.au
Fax	0 8303 8097
Building	Barr Smith Library
Floor/Room	3
Campus	North Terrace
Org Unit	Metadata Services

Below the table, there is a URL: <https://www.adelaide.edu.au/directory/elise.bennetto>

The page also features a 'Publications' section with an '[edit]' link and a 'List of works for "Bennetto, E"' section. At the bottom, it states 'Entry last updated: Tuesday, 25 Oct 2011'.

- If you would like to reformat the page or make further amendments, select **<Edit>** and continue, or else **[Logout]**.
