

Cambridge Laboratory  
Cambridge  
Dec 7. 1885

Mr. W. H. Bray of Trinity  
College. attended several  
courses of my lectures  
while preparing for  
the Mathematical Ex-  
pos and since that  
time he has worked  
under my suggestions

at the University of Toronto  
while studying practical  
physics. In his preparation  
work for the third  
part of the Mathematics  
Tripos supervised  
his reading as Uni-  
versity Lecturer in the  
branch he was taking  
up. I have also exam-  
ined in various other

Examinations. I have  
thus had ample oppor-  
tunity of becoming ac-  
quainted with Mr  
Bragg's powers and  
I have no hesitation  
in recommending him  
most strongly to the  
Directors for the Profes-  
ship of Mathematics  
and Physics at Adelaide.

as being extremely well  
qualified to discharge  
the duties of the post  
and likely in every  
respect to prove satis-  
factory.

R. J. Theobald M.A. F.R.S.  
Fellow and Assistant Tutor  
of Trinity College, Demons-  
trator of Physics and  
University Lecturer in  
Mathematics.
