## Introduction

Reading Lists can be viewed in Student View, allowing you to see the list as if you were a student.

Procedure

1. Click on the **...** icon at the top of the relevant Reading List

2. Select **View list as student** from the available options

Note: viewing your entire course in Student View will not allow you to see your Reading List in Student View. If you try to access Course Readings while in MyUni Student View you will see an error. You need to use Course Readings Student View to see a Reading List in Student View.
