

## School of Molecular & Biomedical Science

### School Safety Strategy

The School of Molecular & Biomedical Science is continually striving to provide and maintain the highest possible standard of health, safety and well being for its employees and students while they are at work.

The School upholds the University's Policy on Health, Safety and Welfare as contained in the Health, Safety and Wellbeing Policy and Handbook.

<http://www.adelaide.edu.au/hr/ohs/handbook/>

And, in order to achieve the goals outlined in that policy, undertakes to take all reasonable steps to:

- Integrate health and safety with all other operational functions.
- Assign health and safety equal priority with other business objectives.
- Comply with relevant statutory requirements and University policies.
- Provide necessary resources to meet these standards.
- Encourage employee and student participation in health and safety matters.
- Pursue progressive improvement in health and safety performance.
- Develop where appropriate, school procedures to assist personnel in meeting these aims.

These pages are intended to be a resource for information about safety in the workplace. The information has been presented in categories that relate directly to day to day safety issues.

There is a legal and moral requirement on the School and all people who work in the School to be fully aware of safety in the workplace. It is the responsibility of all persons to ensure they are conversant with safe practise BEFORE carrying out laboratory and non-laboratory based procedures.
