

What's Happening in Road Safety Research

Wednesday 3 February 2010

Staff at the Centre for Automotive Safety Research invite you to attend the 2010 series of seminars presenting a selection of the Centre's work and research outcomes.

CASR (formerly the Road Accident Research Unit) was established in 1973 and is internationally recognised as an important part of road safety research both in Australia and overseas. The Centre has an excellent relationship with policy makers and practitioners, and actively pursues internal, national and international collaboration.

The CASR seminar series will address major topics in the fight to reduce road trauma and highlight the latest research in the area.

TITLE:

What's Happening in Road Safety Research

presented by Professor Mary Lydon

SYNOPSIS:

The Centre for Automotive Research (CASR) at the University of Adelaide has been involved in road safety research for over 30 years and has earned an international reputation. With ongoing support from the South Australian Department of Transport, Energy and Infrastructure and the Motor Accident Commission, CASR is continuing to carry out important, relevant and respected research which is making a difference on our roads.

In the seminar Professor Mary Lydon, the Director of CASR, will present an overview of current and planned road safety research at CASR including research into safer roads, safer vehicles, safer road users and safer speeds. She will also provide an overview of current directions in road safety research both in Australia and overseas and identify the types of countermeasures likely to have major impacts on road safety in the future.

DATE AND TIME:

Wednesday 3 February, 2010, 4pm – 5.30pm

VENUE:

Art Gallery Auditorium

Please register your attendance by RSVP to **Leonie Witter** on **8303 4114** or email: leonie.witter@adelaide.edu.au
