

## Appendix 'D'

<b>Ecologically Sustainable Design: Design Review Checklist</b>				
Project:				
Designer:				
Date:				
ITEM	QUESTION	YES	NO	COMMENTS (required for all questions)
1	Has building fabric been designed to minimise energy use.			
2	Have energy design targets been achieved.			
3	Has natural ventilation been considered?			
4	Were economy cycle systems considered?			
5	Were heat recovery systems considered?			
6	Were alternative air conditioning /energy systems considered.			
7	Are air conditioning controls via BMS, movement detectors or time clock control?			
8	Are pipework, ductwork, filters and coils designed for low resistance?			
9	Has solar hot water been considered for providing domestic hot water?			
10	Are high efficiency motors used?			
11	Is air conditioning system designed for conditions nominated in the project brief?
