### REVIEW OF THE PROGRAMS IN PETROLEUM ENGINEERING OFFERED BY THE FACULTY OF ENGINEERING, COMPUTER AND MATHEMATICAL SCIENCES

The Australian School of Petroleum offers the following undergraduate and postgraduate coursework programs as :

- the Bachelor of Engineering in Petroleum Engineering;
- a number of combined degrees with this Bachelor degree;
- Master of Petroleum Engineering;
- Master of Petroleum Business Management

The review is to take place in the context of the University's [2008-2012 Strategic Plan, Building a Great Research University](#) and as part of the University's five-year program review cycle. In conducting the review, the Panel will take into account the views of current staff, students and external stakeholders, including employers, alumni, and representatives of relevant professions and other relevant academic areas of the University.

The Review Panel is asked to consider and make recommendations on:

1. The structure, content, quality and overall coherence of the programs;
2. The appropriateness and effectiveness of teaching methodologies to deliver the aims and objectives of the programs;
3. The destinations and outcomes for graduates who complete the program;
4. The student profile of the programs and future demand and growth opportunities; and
5. The programs' performance and outcomes, benchmarked against similar programs at Go8 universities or similar programs in other Australian universities and relevant international institutions.

In making its recommendations, the review panel should assume that there is unlikely to be an increase in the resources provided from internal University funds, but is invited to indicate the highest priorities for the use of extra resources should they be made available.
