

Tougher crops for a warming world

A Research Tuesday with Mark Tester

The second in the University of Adelaide's new **RESEARCH TUESDAYS** seminar series will be held on Tuesday 8 May at 5.30pm.

Professor Mark Tester, a Federation Fellow from the Australian Centre for Plant Functional Genomics and the School of Agriculture, Food and Wine, will talk about how we are hunting down the 'toughness' genes in plants and moving them into our crops to enhance crop yield and sustainability.

Held every second Tuesday of the month, Research Tuesdays provide business leaders and members of the community with the opportunity to listen to leading researchers, interact, ask questions, and have their say.

Venue and Time:

Research Tuesdays will be held in the Napier Building (Lower Ground) on the North Terrace campus at 5.30pm, and will run for approximately one hour. Admission is free.

Bookings essential:

Email: research.tuesdays@adelaide.edu.au
Phone: 8303 3692
