

Information session for researchers:

INDUSTRY-LINKED FUNDING OPPORTUNITIES

Applying for research funding, especially where that funding involves an industry partner(s) may seem a little daunting. There are internal and external deadlines to consider, as well as costings, ethics and research classification codes, just to mention a few.

This information session is designed to provide you with the knowledge and contacts to get you started on the path to funding your next research project - with funding schemes such as [ARC Linkage](#), [Trans Tasman Commercialisation Fund](#) and the [Adelaide Research & Innovation Commercial Accelerator Scheme](#).

Suitable for early-career researchers through to veteran's who want to refresh their know-how - at this session you will hear from researchers who've had great success in this area, as well as from the University divisions who manage the process - Research Branch & Adelaide Research & Innovation.

What: Industry-linked funding info session
Who: for University of Adelaide researchers
When: Fri 21 August, 3-5pm
Where: Art Gallery Function Room
Cost: Free - includes drinks, nibbles & networking

*Building
a great
research
university*

Industry-linked funding programs are an increasingly important source of research funding in order to maintain our position as a research leader, and to effectively translate research into real-world solutions. I look forward to seeing you at this information session so we can work together to improve the quantity and quality of funding applications in 2010.

Professor Mike Brooks
Deputy Vice-Chancellor & Vice-President
(Research)
