Excellence in Research Australia (ERA)

The results of the first Excellence in Research Australia (ERA) process in 2011 awarded Nursing at the University of Adelaide a "5" (well above world standard ratings), one of only three nursing Departments in the whole of Australia to be awarded the top score. These results confirm our broad research base. The full ERA report can be viewed at www.arc.gov.au/era/default.htm.

Scholarships are open to 2012 Intake Applicants

The learning experience offered by the University of Adelaide School of Nursing is not about complex taxonomy but understanding it in simple terms with effective applications to clinical practice. It is truly an interactive and engaging experience that enlightens me with the application of nursing concepts and evidence-based practice.

Wong Yoke Ping
Palliative Care
Changi General Hospital
Nanyang Poly

The University of Adelaide Bachelor of Nursing's curriculum is current and practical to the nursing practice enabling graduates with more opportunities for career advancement. This program equips me with knowledge and experience essential to my daily care for patients.

Zulianah Zainol
Staff Nurse
KK Women's & Children's Hospital
Ngee Ann Poly

I'm really happy studying in NAA as the program syllabus allows me to sharpen my critical thinking skills and equips me with a universal knowledge about nursing practise in other countries. I strongly believe that this degree program will pave my pathway as a future leader in the healthcare industry.

Ananthavally
Senior Staff Nurse
Khoo Teck Puat Hospital, Day Surgery Centre
Nanyang Poly

CONGRATULATIONS!

5 students from the Bachelor of Nursing are selected as posters presenters @ the 1st NUS-NUH International Nursing Conference 2011

1 Sep 2011

NAA, the proud sponsor of NUHS Evidence-Based Nursing Seminar

The poster exhibition will serve my goal to bring awareness to the prevalence of Cholera worldwide and the nurses' role in the event of a Cholera outbreak in Singapore. Through this participation, I have gained much confidence and satisfaction in my area of work.

Priscilla Chng
Staff Nurse
Khoo Teck Puat Hospital
Nanyang Poly

The conceptualising of the poster was an interdisciplinary experience. I had the opportunity to meet with experts in the design industry. Not only have I learnt about graphic design, the process has unleashed the creative part of me. Furthermore, the whole presentation has deepened and strengthened my belief that there are many practices which should not be compromised for the efficiency of a health setting.

Clifford Xu De Sheng
Senior Staff Nurse
NUH (Surgical Intensive Care Unit)
Nanyang Poly

(R to L) Chee Sow Chin, Priscilla Chng, Clifford Xu, Freya Tan
Absent: Gabriel Wong

Through this opportunity, I am able to bring across valuable lessons that can be learned from the SARS outbreak, for example, hand hygiene compliance and isolation among many others. As a mature student, the opportunity not only boosted my self-confidence but enhanced my learning curve. Do not stop learning as continuous hard work will bear the fruits of success.

Chee Sow Chin
Staff Nurse
Sue Nursing Agency, Alfred Hospital, Melbourne Australia
