

Non-antimicrobial control of postweaning diarrhoea in pigs

Principal Supervisor: Associate Professor Darren Trott

Email: darren.trott@adelaide.edu.au

Phone: 37989

Co-supervisors: Dr Roy Kirkwood, Dr Huub Brouwers, Dr Bec Forder

Background

The Pork CRC is devoting a large program to developing alternatives to antibiotics for the treatment of this debilitating disease. Given the success of a project application, an honours project will be available in 2012 (the student must apply directly to the Pork CRC). It is anticipated that the student would spend part of their time at NSW Department of Primary Industries in Menangle.

Funding: Application just submitted

Other information

The Pork CRC offers generous stipends.
