

ANIMAL TRAINING PRACTICALS IN LABORATORY RAT & MOUSE TECHNIQUES

RESEARCH EDUCATION & SUPPORT

Animal Welfare Officer / Laboratory Animal Services

Large Group Session: Introductory Animal Handling, Injection & Blood Collection Techniques in Laboratory Rodents.

Practice of handling & restraint methods, weighing, sexing, blood collection, and injection techniques.

Format: Practical and demonstrations

Duration: 2.5-3 hours

Who: These practicals are intended as an introduction to commonly used laboratory animal procedures and techniques, and an opportunity for new students and less experienced staff to gain some practical skills with laboratory mice and rats.

When: Practicals will be run on dates listed at <http://www.adelaide.edu.au/animalwelfare/training-workshops>)

Venue: University of Adelaide North Terrace Campus, Frome Road.
Medical School South Building, Level 2, Laboratory Room S210

Directions from the **Public pedestrian** entrance central steps of the Medical School Frome Road:

Enter the foyer of Medical School, turn right, walk down the stairs to the ground level of Medical School South, turn left and past the lifts and the first stairway entrance. Do not use the lifts. **USE THE SOUTH EASTERN STAIRWELL as the Level 2 passageway from lifts is locked off.** Take these second (most eastern) stairs at the end of the corridor and climb the stairway to Level 2. Open the doorway from the stairwell to Level 2 and turn left. The Laboratory entrance is in the foyer off the Level 2 stairwell.

Campus Map <http://www.adelaide.edu.au/campuses/northtce/>

Laboratory Safety: Participants must wear suitable laboratory footwear (shoes with closed toe and solid non-slip soles). Laboratory gowns and gloves will be provided. Standard laboratory safety rules and practices apply.
