

## Information Form for Laminar Flame Program

Name:

Institution:

Email address:

1. Does your data correspond to one of the 13 target flames listed on the ISF website: <http://www.adelaide.edu.au/cet/isfworkshop/data-sets/laminar/>? If 'yes', which one(s)? If 'no', are there particular characteristics of this flame that you find advantageous for study? Please describe.
2. If the flame is not one of the 13 target flames listed on the ISF website, please provide a description of the flow/boundary conditions, and any other relevant information you deem relevant to describe the flame.
3. Please provide a brief overview of your numerical or experimental methods.
4. Has your experiment or computation been devised with any particular phenomenon in mind, such as PAH formation, inception, coalescence, etc.? If so, briefly explain.
5. Is there any other information related to this dataset that is relevant to the workshop?
6. Do you have any special restrictions on sharing/posting your data imposed by your institution or funding body that need to be considered?

Please submit completed form to Prof Reza Kholghy: [RezaKholghy@cunet.carleton.ca](mailto:RezaKholghy@cunet.carleton.ca)
