To whom it may concern

I am writing in support of Prof Ockie Bosch's application. I have known Prof Bosch for a number of years through the International Federation for Systems Research, in particular for his highly esteemed work on systems education, in which area he serves the International Society for the Systems Sciences as its Vice President (Systems Education). I am also very aware of Prof Bosch's work on learning laboratories and the application of systems science to ecological problems. I would unreservedly describe Prof Bosch as a leading international expert in systems research.

Yours sincerely

Dr Magnus Ramage

Lecturer in Information Systems

Editor-in-chief, *Kybernetes: The international journal of cybernetics, systems and management sciences*

Author, *Systems Thinkers* (Springer, 2009)
