

# The future of travel has arrived

Savi – our new AI-powered online booking tool offers richer travel content that is exclusive to our business and unique functionality that has been designed in collaboration with our technology partner Serko. Providing users with a highly customised experience, Savi is the next generation in online booking tools.

### For the Savi Booker

Savi's exclusive travel Booker module, **Savi Select**, streamlines travel requests, quotes and interactions between Travel Bookers and their travellers. Savi's machine learning capabilities and rich travel content makes online bookings faster and easier.

### For Savi Businesses

Savi's AI-powered functionality significantly reduces the time it takes to make bookings, drives compliance and ensures your business will never lose your air tickets on hold with **Savi Credits**. Savi gives businesses more control and visibility of their travel spend and activity for greater overall efficiencies.

### For the Savi Traveller

Designed to provide a highly customised experience for individual travellers, Savi's AI capabilities transform the online experience into a seamless, intuitive and more personal interaction with your booking technology.

### Exclusive functionality

- Persona driven modules including **Savi Select** for Travel Bookers
- **Savi Credits** ensures that businesses never lose air credits on hold, due to missed or expired tickets. Tickets on hold, are flagged for usage to appropriate users based on past traveller or Travel Booker behaviour.
- **Savi Voice** is a specially designed module that gathers information via a two-way interaction between Savi and the user via a 'crowdsourcing' technique. (Note: this will not be implemented by the University)
- The combination of the **Savi Select**, **Savi Credits** and **Savi Voice** modules will help businesses and travellers make smarter decisions and maximise their travel savings.
- Savi dramatically reduces the time it takes to make a booking as a result of its easy-to-navigate design and powerful AI-memory.
- A world of richer product choice. Savi has access to hundreds of airlines, over 12 million room rates worldwide plus thousands of exclusive flight, hotel and car options.
