

Meet Sam:]

Sam is a travel companion in your pocket.

Besides organising all your business trips in a beautiful itinerary, Sam gets in touch anytime there's something about your travel plans you need to be aware of. Flight status? Change of gate? Traffic jam on your way to the airport? With Sam, you will never miss anything.

Sam, powered by Campus Travel, has been specifically designed to manage business travel. It will soon become your favourite trip planner.

Features

- Sam organises all of your travel plans in an easy to read itinerary which displays all relevant travel information including departure time, terminal, boarding gate and baggage claim info, reservation numbers, phone numbers, directions and more!
- Automatic itinerary synchronisation of corporate bookings with Sam
- Notifications including flight status reports, boarding gate changes, weather and traffic reports, restaurant recommendations and more are sent to you by Sam
- Never miss a check in with online check in reminders – Sam sends direct links to airline check in portals and stores your reservation numbers and boarding pass information
- Easily forward any other reservations (such as Travel Club or Flight Centre leisure bookings) to Sam email to integrate these trips into your itinerary
- Share your trips easily with family and colleagues via SMS, email, WhatsApp, Facebook Messenger and other social channels
- Export trips within your itinerary to your calendar easily
- Request a ride with Uber or Lyft to any of the locations in your itinerary
- Contact your dedicated travel manager or support team via phone
- Share your location at any time with colleagues and family*
- Upload your expenses on the go with one tap access to your integrated report expense tool^

^Sam currently integrates with Certify in Australia and New Zealand.

The next phase of Sam:]

Features coming soon to Sam in Australia and New Zealand.

Update your itinerary on the go

Soon you'll be able to update your flight, hotel and car bookings on the go as well as contact your travel manager for other requests via instant chat.

Business travel tips and advice via Sam Community

Sam Community will be the world's first chatbot assisted community for travellers. This next phase feature taps into the knowledge and experience of a global community of business travellers, serving up user-generated tips and advice based on a traveller's location or when they ask Sam for assistance or inspiration.

Seamless travel management with Sam for Travel Managers

Sam is being enhanced to cater for the needs of Travel Managers including bookers, executive assistants and meeting organisers who manage multiple travellers as part of their role. Sam will ensure Travel Managers are aware of potential issues impacting their traveller(s) and prompt appropriate actions including booking changes and allow direct communication with the traveller to ensure their wellbeing.

Enhanced traveller safety and duty of care features

Sam will soon recognise the user's location via a blend of itinerary information and GPS and match this to any critical incidents, triggering real time relevant alerts with an ability to respond with appropriate action for the individual traveller.

Integration with more providers

We love your favourite apps as much as you do. That's why we integrate with them, becoming the starting point for a more seamless experience. Sam currently integrates with many leading service providers including Uber, Lyft and Certify, with more integrations underway every day to improve the traveller experience.
