

Farm Business Management & Recording

- Farm business management is important to analyse your business performance.
- You can reflect your business performance through measured data.
- Plan your business improvement monthly and annual recording.
- Set your goals, make a progress!
- Herd recording helps you analyse cow performance.
- Milk production recording is beneficial to track cows productivity and help manage feeding.

Record income & costs
Profit = income - costs

Analyse profitability and
feed costs regularly

Record health (AI date, calving)

Record milk production daily
