The University of Adelaide
Academic Risk Management Framework

The Academic Risk Management Framework Summary

1. Connects the mandate with the process. The mandate comes from the University of Adelaide Act and the Council and is expressed through, and overseen by the Academic Board whose terms of reference explicitly address academic policy in education, research and research training.

2. Recognises the influence and expectations of various external funders/regulators/auditors and collaborators, legislation and policy, and through the enterprise and operational risks, connects those expectations and aspirations with what we do.

3. Seeks to influence existing culture to better manage academic risk and opportunity, having regard for our economic, social, regulatory, political and competitive environment locally, regionally and internationally in alignment with our strategic objectives.

Key funders & other regulators
- Federal & State Governments
- ESOS (CRICOS)
- TEQSA
