National Research Program
2014 PhD Scholarship Funding

Assessment Criteria

All Asthma Australia Scholarship applications will be assessed as follows:

- Track record of applicant & suitability for research: 50%
- Track record of supervisor: 30%
- Proposed research: 20%

Evidence must be provided of the following pre-requisite being met: Honours II or above or equivalent research experience.

If a student does not have evidence of a Bachelor Degree with Honours then Asthma Australia may determine that a student has demonstrated an equivalent level of academic attainment on the basis of previous study, relevant work experience, research publications, referee reports and other research experience.

Only Australian citizens, New Zealand citizens, Australian permanent residents and international students awarded an International Postgraduate Research Scholarship (IPRS) are eligible for these Awards.

Awards will not be available to those who:
- Have already completed a PhD or research professional doctorate or equivalent;
- Have already completed a research masters degree or equivalent unless intending to undertake a research or professional doctorate (ie a scholarship holder cannot hold an award for a second research masters);
- Have previously held an APA, APA (Industry) or an Australian government funded Postgraduate Research Award unless it was terminated within six months of commencement of the award.

Completed applications and attachments must be emailed to research@asthmaaustralia.org.au and received by midnight Friday 14 February 2014.
