This event is brought to you by the following organisations and their state-wide partners:
Professor Robert Norman is Director of the Robinson Institute at the University of Adelaide, co-convener of Healthy Development Adelaide and one of the world’s most respected authorities on reproductive health. His research focuses on ART and reproductive endocrinology, particularly in PCOS, the effect of lifestyle on reproductive outcomes and periconception medicine. He is an active clinician and subspecialist in Reproductive Endocrinology and Infertility at FertilitySA, Flinders Reproductive Medicine, Royal Adelaide Hospital and the new Adelaide Women’s Health Centre.

Associate Professor Jane Halliday is a National Health and Medical Council Senior Research Fellow from the Murdoch Childrens Research Institute. She is an experienced epidemiologist specialising in the field of genetics. Her research aims to provide evidence that may assist consumers and their health professionals to be aware of and reduce the possible risks to unborn children of exposures in early pregnancy, such as prenatal genetic diagnosis and assisted reproduction.

Professor Andrew Dutney is Principal of Uniting College for Leadership and Theology, and Professor in Theology at Flinders University. From 1996 until 2006 Andrew was the chairperson of the South Australian Council on Reproductive Technology. He is a member of the Advisory Board of the Ethics Centre for South Australia. He is widely published in theology and ethics. Andrew is the President-Elect of the Uniting Church in Australia.

Professor William Ledger is Head and Professor of Obstetrics & Gynaecology, School of Women’s & Children’s Health at the Royal Hospital for Women in Sydney, Head of the Discipline of Obstetrics and Gynaecology at the University of New South Wales and Director of Research and Development with IVF-Australia in Sydney. His research interests focus on in vitro fertilisation and assisted reproduction, impacts of reproductive disorders such as gynaecological cancer, endometriosis and polycystic ovary syndrome on quality of life, reproductive effects of cancer treatment and health economic and demographic aspects of infertility.
