

ARC CENTRE OF EXCELLENCE IN CRITICAL MINERALS

The Centre of Excellence team invites partners from industry, government and public institutions with an interest in, or curiosity about critical minerals to join our exciting program of research. We need you to help us design attractive, integrated case studies that will be core to the Centre's research program, and provide answers to questions of mutual interest. Further information is available in an accompanying flyer on the ARC Centre of Excellence in Critical Minerals.

If your goals align with our vision, you are passionate about developing the research program, and you are willing to commit to an Expression of Interest due for submission to the ARC in July 2021, please contact us. We would be delighted to discuss the Centre with you. We anticipate ~\$35M ARC Funding; ~\$9M University funding and ~\$5M Industry/Government funding (cash, over a seven-year Centre lifetime 2023-2030). Four levels of sponsorship support are available, offering a range of benefits and privileges.

PARTICIPANTS AT ALL LEVELS ARE ENTITLED TO:

- Company logo displayed on the Centre website and other marketing material;
- Receive preprints and reports of the Centre's research outputs;
- Receive invitations to attend annual meetings of the Centre's researchers and sponsors;
- Participate at regular Centre networking events.
