

Go8 Space Management Data Dictionary 2.0

21 November 2014

Go8 Room Type codes and definitions have been updated to generate the **Go8 Data Dictionary 2.0**. Accurate reporting and benchmarking on space usage by the Go8 Universities is important and reliant on consistent use of Room Type (and also Room Function) codes. The Data Dictionary aims to bring consistency in interpretation to room and space assignments. Where possible the codes have been kept the same, however, with changes over time in the way space is used, managed and classified, the need has arisen to change some of the codes and their definitions. The Primary Room Type codes in Data Dictionary 2.0 for the most part align with TEFMA Room Type codes. However, the Go8 use more Room Type codes than is listed in the TEFMA SPG (2009), edition 3.

Go8 Space SubTypes - this is a new addition to the Data Dictionary. All Room Types roll up under a Space SubType to provide operationally useful categories for Go8 space reporting / trend analysis / benchmarking, as they have more granularity than the nine Primary Room Types.

Go8 Room Function codes and definitions have not been updated in Data Dictionary 2.0, as this is a work in progress.

Acknowledgement should be given to all Go8 Space Managers and other staff who contributed to updating the Data Dictionary. They include Jillian Loney, Claire Paton – University of Western Australia, Harald Baulis, Oliver Ponsonby – University of Adelaide, Andrew Border – Monash University, Lody Dannaoui, Jade Germantis – University of Melbourne, Lisa Brown - Australian National University, Di Montgomerie, Andrew Lewis – University of New South Wales, Rose Chaaya, Sharon Vaughan – University of Sydney, Barbara Robinson - University of Queensland.

Go8 Data Dictionary 2.0 Room Function Codes

In 2016, the Go8 Room Function codes and definitions were revised and implemented across the Go8 in order to create a better fit of space use to current core activities within the Institutions. The Room Function codes in the Go8 Data Dictionary have been compiled by the Go8 University Space Managers, and it is important that the codes (and their definitions) are adhered to when assigning space function, so that there is consistent reporting and benchmarking of Go8 Universities' space.

The Go8 Room Function codes readily aligned with TEFMA Room Functions. The **Primary Room Function and subordinate Room Function** codes listed in this document are a useful space assignment when reporting on space to Go8 Universities, TEFMA and other benchmarking requirements.

Acknowledgement should be given for the contribution to the development of this document by Go8 Space Managers and other Go8 staff.
