### List of revised items

| Version | Authors  | Revised items   | Date     |
|---------|--|---|----------|
| 6.0     | Matt Schapel, Business Services & Improvement, UoA | Sections 2 and 3 completely revised, appendices updated | May 2023 |

### Revision management

It is envisaged that revisions to this document will be undertaken at intervals of not more than two (2) years.

### Endorsement body

Executive Director of Infrastructure

### Owner

Director, Capital Projects Delivery

### Contact person

Associate Director, Capital Project Delivery

### Authors and acknowledgements

The standards have been developed by Capital Projects with the assistance of UoA staff, external consultants, contractors, and colleagues from other education institutions. The University conveys its thanks.

## **1. Abbreviations**

(refer –Standard Volume A. Project Process Checklist)

## **2. Introduction**

(refer –Standard Volume A. Project Process Checklist)

## **3. Technical Requirements**

(refer –Standard Volume A. Project Process Checklist)

This volume must be read in conjunction with Vol. A Project Process Checklist. Particular attention must be given to obligations relating to:

- Communication with, and distribution of documentation to UoA stakeholders
- Documentation and certification obligations at milestone checkpoints throughout the project.

### **This section is broken into parts:**

- General Documentation Requirements
- Glossary of Terms
- Workflows
- Schedules
- Appendix

### **3.1 General Documentation Requirements**

This section outlines the specific technical requirements for Documentation within the UoA Design Standards. This section relates to documentation produced during all phases of projects.

Documentation, as it is referred to in this Volume, refers to all types of project specific documentation including, but not limited to:

- Drawings (pdf, CAD and hand drawn markups)
- Document Transmittals
- Photos (including photographic surveys)
- BIM (Building Information Models)
- Surveys
- Specifications
- Registers / Schedules
- Room Data Sheets
- Manuals - Technical Discipline and O&M Manuals
- Reports
- Statutory Documentation
- other Supporting Documentation

### **3.1.1 Purpose of documentation**

The University of Adelaide maintains records of all owned and occupied facilities. It is critical that the University maintain accurate and detailed documentation of works undertaken, accordance with this Volume of the Standards, for the following reasons:

To track, and charge occupants for “live” space usage (the current live space utilisation data base includes in excess of 450 buildings and 26,000 rooms/ spaces)

- To track and manage utilisation and booking of spaces to ensure optimum efficiency
- To establish lessons- learned and continually improve the quality of building stock on campus and the process of project delivery
- To manage and maintain building stock
- To ensure a readily accessible indexed data base of existing conditions documents for use in planning future projects
- To ensure complete and accurate records for project and works

### **3.1.2 Scope of documentation**

The scope of documentation will vary within Projects due to the Project:

- Type
- Extent
- Complexity
- Scope
- Subject matter
- Timing

All Projects will communicate and clearly identify the following via Documentation:

- existing condition
- demolition works
- modified works
- new works
- phases/stages (if applicable)
- areas excluded from works
- all Discipline items, elements, equipment, products, construction, details etc needed to complete the project

### **3.1.3 Timing for Delivery of Documents**

Project Documents may have different delivery dates and lifecycles (multiple times the document is updated and submitted) though a project. The timing will be specific to the individual project and its scope of works. A guide of timings is available in:

- UofA - Design Standard Volume A Part 3
- Design Objectives & Scope Of Services

### **3.1.4 Departures**

Refer to UoA Design Standards A. Project Process Checklist. Clause 2.3 Departures. All departures including those from this Standard will need to be clearly documented and communicated.

## 3.2 Glossary of Terms

### 3.2.1 Numbering and Naming of facilities

All campuses/sites, buildings, levels, rooms and spaces where the University of Adelaide have occupancy, or have previously occupied, must be numbered and named in accordance with this Standard.

This includes accommodation that is new, deleted, retained, re-assigned to a new user, subdivided, or modified. This also includes spaces within leased accommodation (for example in hospitals), however in this instance base-building numbering and naming conventions may take precedence over UoA conventions as directed by UoA.

Review and written approval by UoA, of campus, building, level and room/space numbering must occur prior to moving into the Tender or Contract Documentation Phase of the project, to ensure compliance with this Standard.

### 3.2.2 Site/ campus code

The campus/ site code and name code follows a logical two alpha system.

For example:

|    |                          |
|----|--------------------------|
| NT | North Terrace            |
| RW | Roseworthy               |
| WT | Waite                    |
| WE | West End Health Precinct |

### 3.2.3 Building code

The building code is made up of the Campus/Site Code (2 alpha system), followed by the building number (typically 2, or in the case of Roseworthy 3, numbers).

For example:

|       |  |
|-------|--|
| NT20  | North Terrace- Building 20 (The Braggs)        |
| RW017 | Roseworthy Campus- Building 017 (College Hall) |
| WT74  | Waite Campus- Building 74 (Waite Building)     |

### 3.2.4 Floor code

The floor code convention follows the 2 alpha OR 2 numeric conventions.

For example:

|    |  |
|----|--|
| BA | Basement                               |
| GN | Ground                                 |
| 01 | Level 1 (can vary - building specific) |
| 02 | Level 2 (can vary - building specific) |

### 3.2.5 Room / Space Numbering and Naming

All rooms, spaces between rooms (for example circulation spaces), external building spaces must be numbered and named in accordance with this Standard.

Room naming follows the Go9 Data Dictionary Standard. The name is allocated based on the generic description of the space type, followed by the specific description, for example "Office - PHD" or "Laboratory - Laser". Where a specific description does not exist, the generic description is used alone, for example "Kitchen", "Utility", or "Compactus".

All new and modifications of room numbering shall be controlled by UoA.

### 3.2.6 Unique Room Identifier (Loccode)

It is critical that the numbering conventions outlined in this Standard are adhered to, because it is from these numbers (Campus Code-Building Code- Floor Level Code- Room Number) that a unique identifier or “Loccode” similar to a bar code is generated for each room.

example NT-NT05-04-207

This “Loccode” is used to identify the room and its attributes in the UoA Facilities and Space Management Database and other Applications. Room attributes include such things as condition, assets, people, room type, occupancy, capacity, space charging. Tracking of these attributes forms the basis for the development of management and maintenance strategies across all infrastructure facilities at the University.

### 3.2.7 Area

The areas listed below are generally defined by the UoA Method of Measurement and captured digitally in the drawing models. Noting that the University method outlined differs from that used in the commercial sector.

- UFA – Usable Floor Area (within a room)
- GFA – Gross Floor Area (per floor)
- GBA – Gross Building Area (per floor)
- NLA – Usable Floor Area (per floor)

Refer to UoA Method of Measurement documentation

<https://www.adelaide.edu.au/infrastructure/services/space-management#unispace-reference-material->

### 3.2.8 Capacity

Maximum capacity of rooms/space must be provided for all new and modified spaces. Capacity is based on the as designed solution, taking into account all technical disciplines (e.g. services loading, fire and life safety provisions, amenities provisions etc.).

This is not necessarily the same as “occupancy”.

Captured in the official UoA “Space Data Collection” form, required information includes:

- UFA (refer 3.2.1 clause above)
- As-designed space type classification (BCA/ NCC) and m<sup>2</sup>/ person (where applicable)
- Maximum capacity (people)

### 3.2.9 Occupancy

Proposed occupancy information must be provided for all new and modified space. This is not the same as maximum capacity (refer clause 3.2.2 of this Volume). Occupancy information must include (where applicable or available):

- Number of proposed occupants for the space
- Details (Faculty/Division - School/Branch - Department) (as per the UoA Organisation Structure) of the existing occupant and to where they are moving (Building/Floor/ Room)
- Details (Faculty/Division - School/Branch - Department) (as per the UoA Organisation Structure) of the proposed occupant and from where they have moved (Building/Floor/ Room)
- Name, UoA Identification and full time equivalent (FTE) status of staff member.

Refer to UoA “Space Data Collection” form

### 3.2.10 As Built (record) documentation

As Built documentation for each technical discipline must be produced by the consultant/ contractor team for all projects.

Types of documentation may include (but not limited to)

- Drawings
- Specifications
- Schedules

- Register of documents
- and all other supporting documentation

The As Built documentation is an integral part of the Operation and Maintenance Manual (O&M Manuals) produced as part of the post-construction documentation set.

The As Built documentation must be certified as compliant with the Standard (this document) as part of the certification process outlined in clause 2.4 and 3.3.4 of this Volume.

As Built documentation must meet the following requirements:

- a. Documentation must be an accurate reflection of the “As Built” project at the time of practical completion.
- b. This includes all information contained in the “For Construction” and execution of the contract documentation package including:
  - Existing
  - Demolished / Removed
  - Modified
  - New elements
  - as well as any revisions, contract variations and instructions that occurred during the construction period.
- c. Changes that occur during the construction period must be fully incorporated into the documentation (eg manuals, drawings and specification) and must not be appended as a separate document or register. It is critical that all information pertaining to the construction of University facilities is easily retrievable without the need to search through construction correspondence.
- d. Changes, works, defect or rectifications that occur during the post-construction period must be fully incorporated into the documentation
- e. All Consultant must allow time and resources to carry out these changes during the course of the construction period to ensure “As- Built” documentation is available at the achievement of practical completion.

### **3.3 Appendix**

#### **3.3.1 Documentation - Deliverables**

This document outlines the minimum deliverables and requirements all projects need to achieve in order to have Documentation accepted by The University of Adelaide.

#### **3.3.2 Documentation – Deliverable Timing**

This document outlines the deliverable timing requirements all projects need to achieve in order to have Documentation accepted by The University of Adelaide.

#### **3.3.3 Documentation - Document Detail Matrix**

This Register lists Documentation Types that maybe required to be delivered during the Project. It lists:

- Documentation Name
- Documentation Type
- Lifecycle – does the document get used multiple times in the project
- Template or “minimum requirements” available
- Timing/Phase for Delivery of Documents (to be read in-conjunction with Standard Volume A. Project Process Checklist)

#### **3.3.4 Documentation - Document Lifecycle**

This document outlines the document details and key responsibilities in the lifecycle of documents.

#### **3.3.5 Documentation - Checklist for Projects**

This document outlines the items and elements (but not limited to this list) that UoA will validate Documentation against. Especially when documentation is submitted for Post Construction review

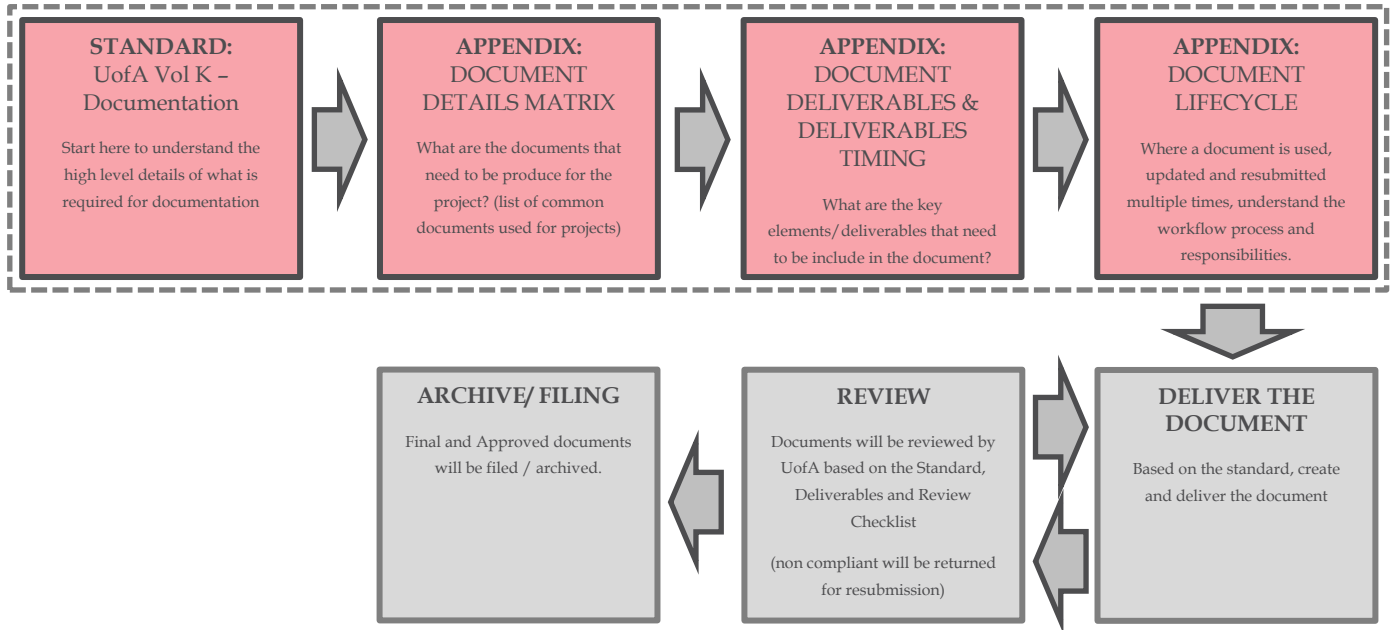

#### **3.3.6 Documentation - O&M Manual Review Matrix**

This document outlines the items required for O&M Manual submissions including:

- Responsibilities of Document Author and Reviewers (high level)
- Reviewer(s) responsible for reviewing the submitted documents
- Manual sections to be provided by author for "Post Construction Documentation submission / Aconex Workflow"

### 3.4 Workflow

How to use the Volume K documents

## DOCUMENT DELIVERABLES

# DOCUMENT DELIVERABLES

## Description

This document outlines the minimum **requirements** Documentation need to achieve in order to be accepted by The University of Adelaide | Division of Operations | Infrastructure Branch.

| DOCUMENT                         | REQUIREMENTS   |
|----------------------------------|--|
| <b>General</b>                   | <p>Details of Project<br/>(Stored, maintaining and shared within Infrastructure Systems)</p> <p>and include</p> <ul style="list-style-type: none"> <li>• Official UofA Project Number</li> <li>• Official UofA Project Name</li> <li>• Official UofA Project Description</li> </ul>  |
| <b>1.0<br/>All Documentation</b> | <p>All documents regardless of:</p> <ul style="list-style-type: none"> <li>• Project Type</li> <li>• Extent</li> <li>• Complexity</li> <li>• Scope</li> <li>• Subject matter</li> <li>• Project Phase</li> <li>• Timing</li> </ul> <p>Documents shall have the following clearly identified:</p> <ul style="list-style-type: none"> <li>• UofA Project Number</li> <li>• UofA Building numbers and naming</li> <li>• UofA Floor numbers and naming</li> <li>• UofA Room numbers and naming</li> <li>• Revisions/dates</li> <li>• Issue type/reason</li> <li>• Document author</li> <li>• Discipline Type (eg Architectural, Electrical etc)</li> <li>• UofA Project Manager (where applicable)</li> </ul> <p>Project scope shall be clearly identified and documented to include:</p> <ul style="list-style-type: none"> <li>• existing</li> <li>• demolition</li> <li>• modified</li> <li>• new</li> <li>• phases/stages (if applicable)</li> <li>• areas excluded from works</li> <li>• all Discipline items, elements, equipment, products, construction, details etc needed to complete the project</li> </ul> <p>Documents shall have the documentation revision and description/ Issue type/reason clearly identified and will be industry accepted terms eg:</p> <ul style="list-style-type: none"> <li>• Preliminary</li> <li>• Tender</li> <li>• For Construction</li> <li>• For Approval</li> <li>• As Built (or Record Set, or As Constructed) – (these are the only revision types acceptable for inclusion in O&amp;M Manual)</li> <li>• etc</li> </ul> |
| <b>2.0</b>                       | Documents transmitted via 'electronic transmission' and shall include all support files.   |

| DOCUMENT                  | REQUIREMENTS   |
|---------------------------|--|
| <b>Transmittals</b>       | <p><b>Tool</b></p> <ul style="list-style-type: none"> <li>• Aconex is to be used for all Document Management for Projects.</li> <li>• Other bulk file transfer application maybe used by only used by negotiation with Project PM</li> </ul> <p><b>Register</b></p> <ul style="list-style-type: none"> <li>• Documents shall have an electronic “Document Transmittal”</li> </ul> <p><b>Document Transmittal</b><br/>Must contain the following:</p> <ul style="list-style-type: none"> <li>• Document / Drawing Name</li> <li>• Revisions/dates</li> <li>• Issue type/reason</li> <li>• Document author</li> <li>• Drawing Discipline</li> <li>• File type</li> <li>• Name of Document recipient</li> </ul> <p><b>ZIP files</b></p> <ul style="list-style-type: none"> <li>• Documentation may be transmitted via ZIP files</li> <li>• File name must include the UofA Project Number</li> <li>• File name must include the date</li> </ul>   |
| <b>3.0 Drawings - CAD</b> | <p>In addition to the “All Documentation” requirements, CAD drawings shall reflect their published PDF drawings and have the following:</p> <p><b>scope</b></p> <ul style="list-style-type: none"> <li>• Include an entire floor plan of the building (project in context)</li> </ul> <p><b>xrefs</b></p> <ul style="list-style-type: none"> <li>• NO xref’s or external support files, all files to have xref bound (images exempt)</li> </ul> <p><b>layers</b></p> <ul style="list-style-type: none"> <li>• All elements within the drawings to be BYLAYER for colour and line type.</li> </ul> <p><b>blocks</b></p> <ul style="list-style-type: none"> <li>• All blocks of the same element to have same ‘block name’</li> <li>• All blocks to be created with BYLAYER colours and linetypes.</li> </ul> <p><b>layouts</b></p> <ul style="list-style-type: none"> <li>• one layout / tab per drawing file (*.dwg) (no multiple tabs – split out drawing set)</li> </ul> <p><b>paper sizes</b></p> <ul style="list-style-type: none"> <li>• Only standard "A" or "B" sized paper sizes shall be used. (A0, A1, A2, A3, A4 or B1 only)</li> </ul> <p><b>scale</b></p> <ul style="list-style-type: none"> <li>• drawings created at 1:1 scale</li> <li>• all layouts with industry standard scales (eg 1:10, 1:20, 1:50, 1:100, 1:200 etc)</li> </ul> <p><b>file/folder name</b></p> <ul style="list-style-type: none"> <li>• File name must include the UofA Project Number</li> <li>• File name must include the Drawing Number</li> </ul> <p><b>area polylines</b></p> <ul style="list-style-type: none"> <li>• Area polylines for UFA, GBA, GFA and NLA must be closed and have no ‘z’ values or extrusion values.</li> </ul> <p><b>CAD management</b></p> <ul style="list-style-type: none"> <li>• All drawings shall be purged and audited, free of errors and surplus information.</li> <li>• Any unused drawings elements to be removed.</li> </ul> <p><b>CAD format</b></p> <ul style="list-style-type: none"> <li>• All drawings shall be provided in Autodesk Autocad version 2017</li> </ul> |

| DOCUMENT                                  | REQUIREMENTS  |
|---|---|
| <p><b>4.0 Drawings - PDF</b></p>          | <p>In addition to the “All Documentation” requirements, PDF drawings shall accurately reflect their CAD drawings and have the following:</p> <p><b>layers</b></p> <ul style="list-style-type: none"> <li>All pdf drawings to have NO layers - i.e. a flattened pdf</li> </ul> <p><b>paper sizes</b></p> <ul style="list-style-type: none"> <li>Only standard "A" or "B" sized paper sizes shall be used. ## DOCUMENT DELIVERABLE TIMING

### Description

This document outlines the **deliverable timing requirements** all projects need to achieve in order to have Documentation accepted by The University of Adelaide | Division of Operations | Infrastructure Branch.

Refer to Project Contract for Timing Requirements

| DOCUMENT   | TIMING REQUIREMENTS (minimum)  | COMMENTS   |
|--|--|--|
| <b>O&amp;M Manual</b><br>50% Review submission                             | 50% through construction period <ul style="list-style-type: none"><li>• <b>Refer to Contract</b></li></ul>           | Date to be documented at Project Start-Up meeting.   |
| <b>O&amp;M Manual</b><br>95% Review submission<br>(for provisional PC)     | 2 working days prior to PC date – minimum <ul style="list-style-type: none"><li>• <b>Refer to Contract</b></li></ul> | Date to be documented at Project Start-Up meeting.   |
| <b>O&amp;M Manual</b><br>100% Review submission<br>& 100% Final submission | 3 months after PC date – maximum <ul style="list-style-type: none"><li>• <b>Refer to Contract</b></li></ul>          | Date to be documented at Project Start-Up meeting.   |
| <b>Asset Register</b>  | 10 business days prior to PC date - minimum  | 100% complete and compliant  |
| <b>Space Charge Floor Plan &amp; Data Documentation</b>                    | 10 business days prior to PC date - minimum  | Date to be documented at Project Start-Up meeting.<br><br>Provide Space Charge Floor Plans and Space Data Capture Spreadsheet. |
| <b>ESP (Essential Safety Provision) Documentation</b>                      | 10 business days prior to PC date - minimum  | Date to be documented at Project Start-Up meeting.   |

# DOCUMENT LIFECYCLE - HOW TO USE THIS DOCUMENT

## DOCUMENT **[insert the documentation name/type]**

|                          |   |
|--------------------------|---|
| <b>USE</b>               | <b>Description of how the documentation is used</b>                     |
| <b>DETAILS</b>           | Detail of the document  |
| <b>TEMPLATE</b>          | UofA template if available  |
| <b>FORMAT (PROVIDED)</b> | In what format is the UofA Template is provided                         |
| <b>RISK</b>              | Explains the risks associated with NOT providing quality documentation. |

## LIFECYCLE PROCESS

### Phase **[insert the project phase that documentation relates to]**

| <b>RESPONSIBILITY</b>     | <b>ACTION</b>            | <b>RECIPIENT</b>               |
|---------------------------|--------------------------|--------------------------------|
| <b>Who is responsible</b> | Responsible party action | <b>Who receives the action</b> |

## SPACE DATA – ROOM NUMBERING / SPACE DATA COLLECTION

| USE                               | Room Numbering / Space Data Collection   |
|-----------------------------------|--|
| <b>DETAILS</b>                    | <p>Room/Space Numbering - All rooms, spaces between rooms (for example circulation spaces) and other spaces must be numbered and named in accordance with UofA Standards.</p> <p>Space Data Collection Documentation detailing the Area, Capacity, and Occupancy shall be issued during the Project</p> <p>The Space Data must accurately reflect the proposal at that time and be updated as subsequent versions of that drawing are issued and include: (refer glossary of terms)</p> <ul style="list-style-type: none"> <li>• Room Areas (UFAM2)</li> <li>• Floor Areas (GBAM2, GFAM2, NLAM2)</li> <li>• Capacity – maximum capacity of the spaces</li> <li>• Occupancy – who is now occupying the spaces</li> <li>• etc</li> </ul> |
| <b>DOCUMENT DELIVERABLE</b>       | <b>Registers</b><br><b>Drawings - PDF</b>  |
| <b>TEMPLATE</b>                   | document issued on request to BSI Team   |
| <b>TEMPLATE FORMAT (PROVIDED)</b> | *.xlsx   |
| <b>RISK</b>                       | Information is used to populate the live UniSpace-Home / Archibus System. Incomplete, inaccurate or non-receipt of information will increase the gap between what has been reality and records.  |
| <b>REFERENCE</b>                  | University of Adelaide Methods of Measurements Reference Guide.  |
| <b>FILING</b>                     | Internal filing - TBA  |

## LIFECYCLE PROCESS

### Phase Contract Documentation Phase

| RESPONSIBILITY           | ACTION   | RECIPIENT        |
|--------------------------|--|------------------|
| Architectural Consultant | Provide “Preliminary” Architectural floor plans <b>Drawings - PDF</b>  | UofA CPFM        |
| UofA CPFM                | Provide “Preliminary” Architectural floor plans <b>Drawings - PDF</b> and request room numbering               | UofA BSI Team    |
| UofA BSI Team            | Review, assign/deallocated room numbers and document on Project Space Data Collection Document <b>Register</b> |                  |
| UofA BSI Team            | Transmit Document and supporting documents (internal process)  | UofA CPFM        |
| UofA CPFM                | Review, approve, distribution to all stakeholders, with supporting documents.                                  | All stakeholders |

### Phase Hand-Over Phase

| RESPONSIBILITY           | ACTION  | RECIPIENT           |
|--------------------------|---|---------------------|
| Architectural Consultant | Complete Project Space Data Collection <b>Register</b> with all project information                           |                     |
| Architectural Consultant | Transmit completed Project Space Data Collection Document <b>Register</b>                                     | UofA CPFM           |
| UofA CPFM                | Review and provide completed <b>Register</b> (* note this is to accompany <b>Drawings – CAD floor plans</b> ) | UofA BSI Team       |
| UofA BSI Team            | Review and incorporate data in to UniSpace Systems for Record and live Space Charging                         | UofA Infrastructure |

## SPACE DATA - FLOOR PLANS

|                                   |   |
|-----------------------------------|---|
| <b>USE</b>                        | <b>Architectural CAD plans for inclusion in UniSpace floorplans and data</b>  |
| <b>DETAILS</b>                    | <p>Before Practical Completion (or occupation), the consultant must provide Architectural floor plans (only) that include the official Room Numbering, with:</p> <ul style="list-style-type: none"> <li>• numbered workstations</li> <li>• furniture layouts</li> <li>• Space Data spreadsheet</li> <li>• designated/drawn CAD polylines representing Areas (UFAM2, GBAM2, GFAM2, NLAM2) there changed/updated</li> </ul> <p>to enable immediate update of the room data base. This is essential for live tracking and charging of occupants for space usage. (This is not the same as “As-built” documentation.)</p> |
| <b>DOCUMENT DELIVERABLE</b>       | <b>Drawings – CAD Registers / Schedules</b>   |
| <b>TEMPLATE</b>                   | n/a – consultants drawings provided to UofA   |
| <b>TEMPLATE FORMAT (PROVIDED)</b> | n/a   |
| <b>RISK</b>                       | Information is used to populate the live UniSpace-Home / Archibus System. Incomplete, inaccurate or non-receipt of information will increase the gap between what has been reality and records.   |
| <b>REFERENCE</b>                  | University of Adelaide Methods of Measurements Reference Guide.   |
| <b>FILING</b>                     | Internal filing - TBA   |

## LIFECYCLE PROCESS

### Phase Hand-Over Phase

| RESPONSIBILITY           | ACTION  | RECIPIENT        |
|--------------------------|---|------------------|
| Architectural Consultant | Provide final “For Construction” Architectural <b>Drawings – CAD and Space Data Capture</b>                                   | UofA CPFM        |
| UofA CPFM                | Transmit final “For Construction” Architectural <b>Drawings – CAD and Space Data Capture</b>                                  | UofA BSI Team    |
| UofA BSI Team            | Review and incorporate <b>Drawings – CAD and Space Data Capture</b> in to UniSpace Systems for Record and live Space Charging |                  |
| UofA BSI Team            | Provide confirmation of update  | UofA CPFM        |
| UofA CPFM                | Review, approve, distribution to all stakeholders, with supporting documents.   | All stakeholders |

## ROOM DATA SHEETS

|                                   |  |
|-----------------------------------|--|
| <b>USE</b>                        | <b>Register of all room and assets within a project for design signoff and project review</b>  |
| <b>DETAILS</b>                    | Room data sheets are required to be produced as part of the contract documentation (for- construction) package, for all construction projects, with the exception being those projects that are very simple, involve a single discipline, or deemed as exempt by the Associate Director, Capital Projects Delivery.<br><br>The Room Data Sheet and Space Data Schedule may be combined, however if this is the case, the document must be formatted to ensure easy retrieval of archival Space Data by UoA staff at the completion of the project. |
| <b>DOCUMENT DELIVERABLE</b>       | <b>Registers<br/>Drawings - PDF</b>  |
| <b>TEMPLATE</b>                   | n/a – consultants documents  |
| <b>TEMPLATE FORMAT (PROVIDED)</b> | n/a  |
| <b>RISK</b>                       | Information is used to populate the live UniSpace-Home / Archibus System. Incomplete, inaccurate or non-receipt of information will increase the gap between reality and records.  |
| <b>REFERENCE</b>                  |  |

|---------|---|---------------|--------|
| 1.0     | Matt Schapel,<br>Business Services &<br>Improvement,<br>UoA | New document  | Jul-22 |

Description

This document:

- Lists common issues with previous Documentation transmittals (not the complete "deliverable" listing)
- Requires sign off or comment from the Documentaiton Authors that the Requirements has been achieved, prior to UofA review
- Allows for UofA Stakeholders to review the "Requirement Achieved" against what has been supplied
- The List of Requirements / Specification" may change as any time, in accordance with the "Deliverables" document, and reoccurring issues

|                      |            |
|----------------------|------------|

of ADELAIDE

# SCHEDULES

[K. Documentation](#)

## 4. Schedules

### 4.1 Certification of Compliance with UoA Design Standards and Project Brief

The below templates (or equivalent) must be used to certify compliance with the UoA Design Standards, and Project Brief and disclose any departures for approval.

**Project details and schedule of documentation**

|   |                     |
|---|---------------------|
| <b>Project details</b>  |                     |
| UoA Project Number (Access/ Other)  | e.g. 1234           |
| Project Name  | Amesbury Upgrade    |
| Campus  | North Terrace (NT)  |
| Building Name and Number  | Big Building (22)   |
| Location (level and rooms)  | Ground (G0) Room 12 |
| UoA Design Standard technical discipline volume/s certified, including revision<br>e.g. - UoA Design Standard Volume 2 Building and Architecture, Rev 2;<br>- UoA Design Standard Volume 3 Hydraulic Services, Rev 2  |                     |
| Project delivery phase/ purpose of issue (refer UoA Vol A Project Delivery Checklist for phase names)<br>Contract Documentation 50% Complete/ mandatory milestone checklist   |                     |
| Certification submission date<br>08/10/2018   |                     |
| Schedule of documentation to be certified<br>- UoA-A-NT21-G012-VID02 - Floor Plans- Rev D-08/10/2018- Contract Documentation 50% Complete- for approval<br>- UoA-A-NT21-G012-VID02 - Internal Elevations- Rev B-08/10/2018- Contract Documentation 50% Complete- for approval<br>- UoA-A-NT21-G012- Architectural Specifications- Rev C-08/10/2018- Contract Documentation 50% Complete- for approval<br>- UoA-A-NT21-G012- Room Data Sheets- Rev D-08/10/2018- Contract Documentation 50% Complete- for approval |                     |

**Statement of compliance and Schedule of departures/ clarifications**

|   |                    |
|---|--------------------|
| <b>Statement of compliance</b><br>The documentation listed above, complies with all clauses, of all Volumes, of the UoA Design Standards, and with the Project Brief, with the exception of the departures/ clarifications listed below. Exceptions are submitted here for consideration and shall not be adopted until approval is received. |                    |
| Signature of certifying person (consultant/ contractor)<br><i>A. N. Architect</i>   | Date<br>08/10/2018 |
| Contact details of certifying consultant/ contractor<br>Architects BLD Consultants<br>A. Architect (Project Architect)<br>Phone number<br>Email   |                    |

**UoA Design Standard technical discipline Volumes, to which departure/ clarification refers**  
e.g. UoA Design Standard Volume 2 Building and Architecture, Rev 2

| Clause | Description                          | Departure from Standard and justification  | Approval of A.D. Capital Projects Delivery signature or email and date       | Approval of Director Infrastructure signature or email and date | Status and direction/ notes                         |
|--------|--------------------------------------|--|--|---|---|
| 1.4.3  | Hand dryer and paper towel dispenser | Paper towel dispenser proposed in lieu of hand dryer.<br>Value management proposal.<br>Cost comparison attached. | Denied<br>(in advice from UoA technical representatives)<br>Email 10/10/2018 | N/A<br>(Decided by A.D.)  | Denied<br>Alternative VM options to be investigated |

**UoA Project Brief, including revision/ date reference to which departure/ clarification refers**  
e.g. Return Brief approved 08/08/2018

| Clause/ Reference | Description    | Departure from Brief and justification   | Approval of A.D. Capital Projects Delivery signature and date                        | Approval of Director Infrastructure signature and date                                      | Status and direction/ notes  |
|-------------------|----------------|--|--|---|--|
| BR.01             | First aid room | Consultative risk assessment identified first aid room is not required.<br>Outcome of assessment attached.   | Approved<br>A.D. Red<br>10/10/2018   | Approved<br>D. Infrastructure<br>10/10/18   | Approved<br>Proceed to next phase  |
| BR.12             | Cooling tower  | Deletion of cooling tower.<br>Value Management proposal.<br>Alternative proposal and order of cost attached. | Approved<br>(in advice from UoA technical representatives)<br>A.D. Red<br>10/10/2018 | Denied<br>(alternative proposal failing to meet strategic requirements)<br>Email 10/10/2018 | Denied<br>Cooling tower required.<br>Alternative VM and funding options to be investigated (during next phase) |
