## Accessing Engagement Dashboard

This section will show how to access the student online engagement dashboard. The dashboard is prepared and formatted using Microsoft PowerBI. You will be provided a link to an online version of the dashboard with your requested courses. You will not need to download any software, but may be asked to login or signup using your university email and login.

### Requesting Access

Email the Learning Analytics team ([learn\\_analytics@adelaide.edu.au](mailto:learn_analytics@adelaide.edu.au)) to request access to the engagement dashboard. Please include the course codes for which you want engagement insights.

### Access Dashboard via supplied link

You will be sent an email with the link to the engagement dashboard. Clicking on the link will either take you directly to the dashboard or to the PowerBI login page.

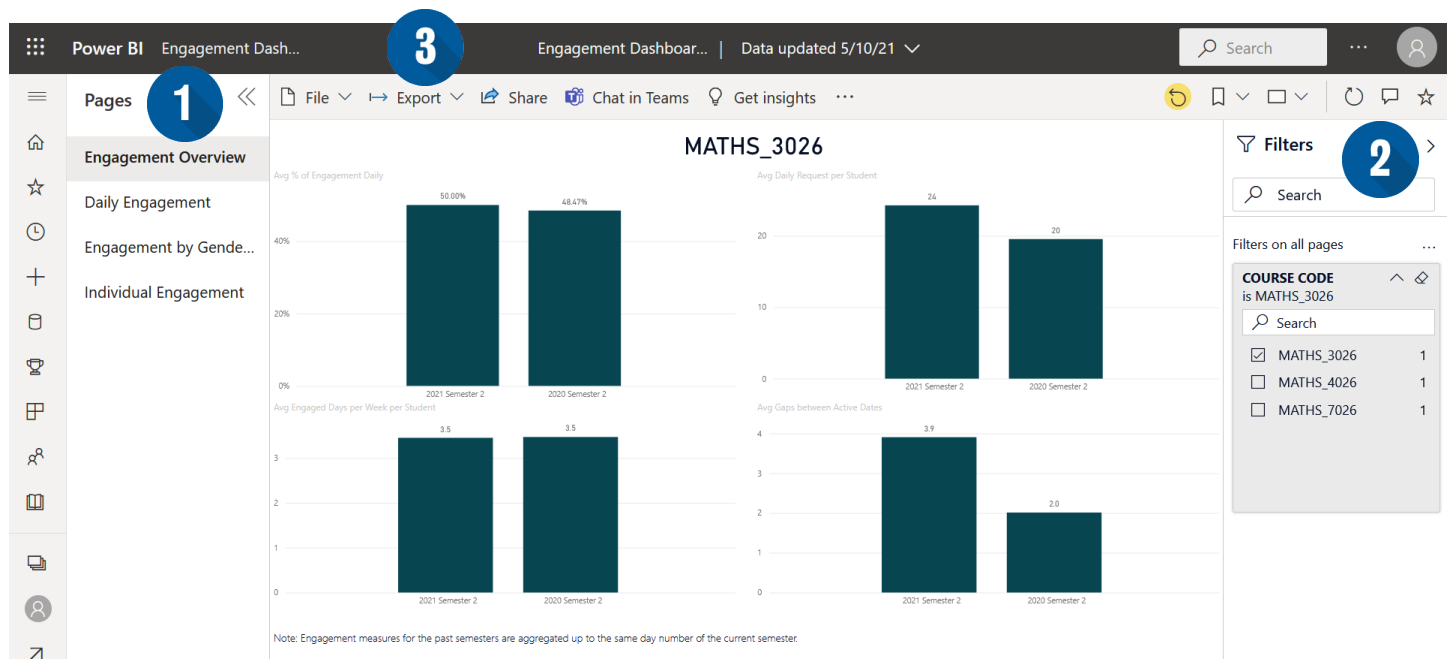

If you already have an account, login using your university email – you will be asked to enter your University login details via Okta Verify.

*Note: Engagement dashboards are updated weekly on Mondays during the teaching period.*

## How to Use the Dashboards

### View the Dashboards

The engagement dashboard will display within your browser window.

## Pages (1)

There are four pages:

- **Engagement Overview:** summary of average student online engagement based on four measures:

- % of engagement daily: # of students engaged daily out of # of students enrolled in the course;
- Average daily student request count: # of request counts as averaged by students on a daily basis;
- Average gaps between active dates: averaged day lags between student logins
- Engaged days per week: averaged engaged days per week per student.

This page will display a comparison to the previous delivery of the course. You can click on a specific metric on the graph to highlight that semester.

- **Daily Engagement:** graphical representation of student engagement throughout the semester showing:

- % of engagement daily
- Average request count

This page will display a comparison to the previous delivery of the course

- **Engagement by Demographics:** Student engagement metrics by the following demographic categories:

- Commencing vs continuing: engagement comparison between commencing students and continuing students as enrolled in the course.
- Gender: engagement comparison among different genders as enrolled in the course.
- Residency: engagement comparison between domestic and international students as enrolled in the course.

- **Individual Engagement:** shows the details of each individual student engagement from most engaged to least engaged.

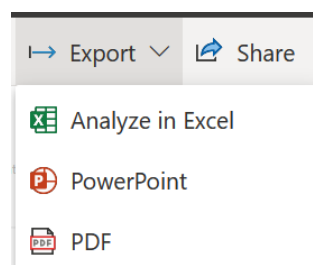

## Filter (2)

## Export (3)

There are three options of exporting: Excel, PDF and PowerPoint.

## Contact

If you have questions of using this engagement dashboard, please contact learning analytics at [learn\\_analytics@adelaide.edu.au](mailto:learn_analytics@adelaide.edu.au)
