Risk Management

Overview

This session introduces the concept of risk management and how it relates to the University, outlines the tools and resources available to staff to help better manage risk and explains the responsibilities all staff have in being risk aware.

Learning Outcomes

An understanding and appreciation of:

- The risk management standard and some basic terminology
- Risk management in the University context: who is it relevant to and why
- The differences between risk and hazards
- The importance of formalising / documenting risks
- Monitoring and reviewing risks
- Using consequence and likelihood in rating risks: University Risk Matrix
- The University Risk Register: where to find it and how to log a risk
- Who to speak to about risk issues
