Establishment

This prize has been established by a contribution to the University by Mrs Moya Sutton in memory of her late husband Dr. David John Sutton, a member of the staff of the Department of Physics and Mathematical Physics for thirty-one years.

Value

The value of the prize will be $500 or such other amount as the University shall from time to time determine.

Selection of Candidate

The Discipline of Physics will award the prize to the student in experimental physics at the examination for the Honours degree of Bachelor of Science who is placed highest in the first class.

The prize will be awarded by the University annually during the School of Chemistry and Physics Prizes and Awards Ceremony.

If there is no candidate of sufficient merit in a given year then the prize will not be awarded in that year and the money will be used in subsequent years.

If there is more than one candidate of equal merit, then the prize shall be shared.

Variations

The University may vary the rules from time to time in a manner consistent with the original objectives of the prize.
