Introduction
If you have a combined course you can use an existing Reading List (including one that has been created against either of the separate (child) courses as the Reading List for the combined (parent) course.

Procedure
1. Select My Lists from the menu, from any course Reading List

2. Open the Reading List you wish to use for the combined (parent) course
3. Click on the … icon at the top of the Reading List
4. Select Manage course association
5. If there is a course listed, remove it course by clicking on the X at the end of the course name.

![Manage course association screen with course code 3910_CHEM_3111 removed]

6. Click the box next to **Look up course** and enter combined (parent) course details (course code or name).

![Manage course association screen with course code 3910_CHEM_3111 entered]

7. Click on **Associate & Close** (no need to edit any course details on this screen first)

![Manage course association screen with course details entered and dates from 02-February-2019 to 28-July-2019 and 43 participants]
