Introduction

Your reading list will not be viewable by students unless you have published it. You only need to publish your list once; any changes you make after it has been published will be automatically updated.

Note: publishing your course in MyUni will not make your reading list viewable. You need to publish both your course and your reading list in order for students to access the latter.

Procedure

1. Click on the ⋮ icon below the list heading and select Publish from the drop-down menu.

2. Check the status and you should see that it has changed from DRAFT to PUBLISHED.

3. If you need to un-publish the list, click on the ⋮ icon and select Publish again. The status will revert to DRAFT.
