

Course Readings: Publishing a readings list.

Introduction

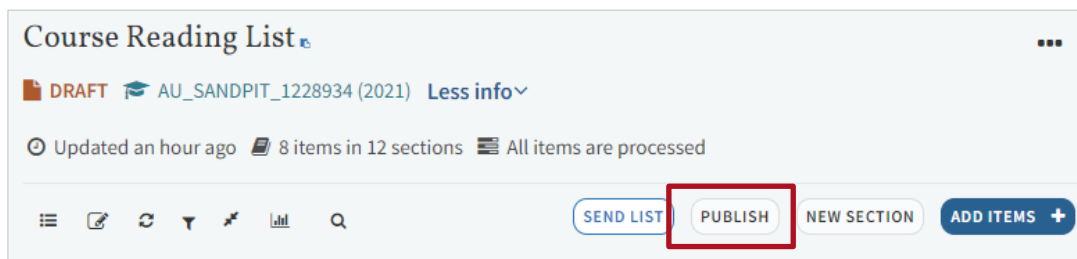

Your reading list will not be viewable by students unless you have published it. You only need to publish your list once; any changes you make after it has been published will be automatically updated.

Note: publishing your course in MyUni will not make your reading list viewable. You need to publish both your course and your reading list in order for students to access the latter.

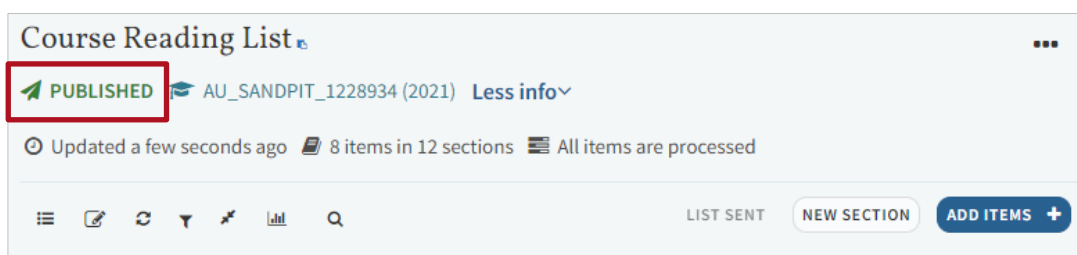

This quick reference guide will demonstrate how to publish your reading list.

Procedure

1. From your reading list, select **PUBLISH**.

2. Check the status and you should see that it has changed from DRAFT to PUBLISHED.

3. To unpublish the list, select the icon and select the icon and select **Unpublish**. The status will revert to DRAFT.

Remember: if you publish your list it will automatically SEND LIST to the Library for processing.
