

# Course Readings: Splitting courses

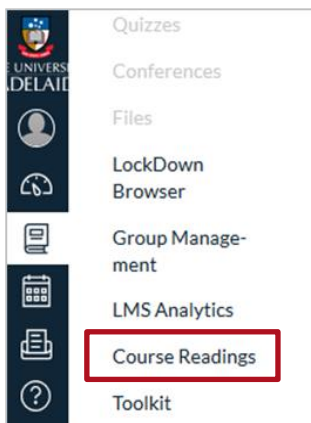

## Introduction

This quick reference guide will demonstrate how to use the same Reading List if you have a combined (parent) course that needs to be split into separate (child) courses.

## Procedure

### Add the Reading List to the first separate (child) course

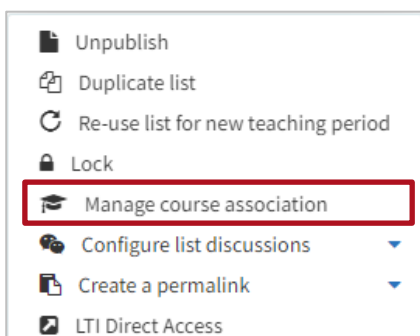

1. In your MyUni course, select **Course Readings**.

2. Select the  icon of the list you wish to re-use.

3. Select **Manage course association**.

4. Select the drop-down box underneath the course name. Enter course details (course code or name) to find the separate (child) course.

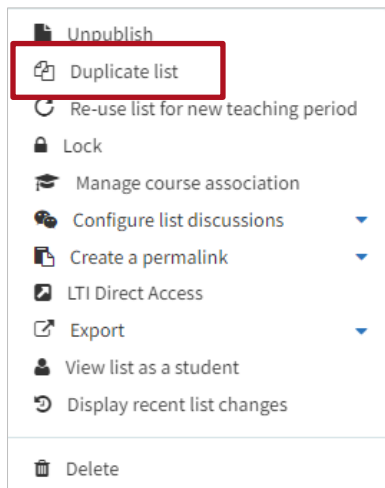

5. Select **Associate & Close**.

### Duplicate this Reading List for the other separate (child) course

6. Open the Reading List now associated with the first separate (child) course.
7. Select the **⋮** icon at the top of the Reading List.
8. Select **Duplicate list**.

9. Select **Manage course association**.
10. Repeat steps 4 and 5 above.
