* Exception Start Date

[📅]

Exception End Date

[DD-MM-YYYY   📅]

* Please select the type of exception request:

[Specialist remote access to the University network - e.g.: AnyDesk, Team Viewer.   ▼]

* Provide details of why you require this exception, including business justification. ❓

If you are requesting specialist remote access to the University network, please include the following details: ✖
• Name of the software being used
• Host name and IP address of the device that you wish to allow remote access to
• Source IP address ranges where the remote access will be initiated from

I require a security exception for using TeamViewer Tensor to access the below device. This computer hosts licensed software which I will access for the analysis of image data collected at Adelaide Microscopy as part of my research. This computer has TeamViewer Tensor installed and Adelaide Microscopy has provided me with a TeamViewer Tensor license for accessing this system.

Device details:

Hostname: DCED0087R07 ←————— Speak with an Adelaide Microscopy staff member for Hostname and IP address details

IP address: 10.90.102.111

I will initiate remote access from my work laptop/PC.

IP address: 10.91.91.95 ←————— Replace with your IP address. If on a UofA computer this can be found by clicking the ℹ️ icon in the task bar

☑ I understand the risks associated with this exception and agree to: (a) contact ITDS when the exception is no longer needed, (b) report any suspected and actual security incidents to ITDS.

* Please select your Head of School or Head of Branch from the list below.

[▼]

Once you submit this request:

- It will first go to **ITDS Information Security** for assessment.
- If approved by ITDS, the request will be submitted for approval to your head of school/head of branch.
- If rejected or more information is required, a member of the **ITDS** team will be in touch.
