 Health.PARCResearch@sa.gov.au

We are looking for previously vaccinated (with Pfizer or AZ) healthy volunteers, aged 18-60, and over 60, to join a new study investigating an Omicron Booster COVID-19 Vaccine at the Royal Adelaide Hospital.

As a participant you will:

- *Receive a COVID-19 Omicron booster vaccine, with a needle-free device*
- *Attend 4 visits over 3 months*
- *Have blood drawn during visits*

The vaccine was developed by the researchers at the University of Adelaide, manufactured by BioCina in Thebarton and delivered using a needle-free device.

Study approved by Central Adelaide Local Health Network (CALHN) Human Research Ethics Committee
