Advanced Bachelors Degrees
At the University of Adelaide, the search for new knowledge is an endeavour in which students participate.

The Advanced Bachelor degrees are designed for high achieving students who are inspired by the opportunity to contribute to the world’s important discoveries and research advancements. They provide a unique experience to learn at close quarters with Adelaide academics of international distinction.

The Advanced Bachelors are ideal for students who demonstrate readiness for independent work. With the benefit of a strong research focus from the first year of the degree, students enjoy specialised small group discovery work, personal mentors and courses that are not available through other degrees. At completion, the Advanced Bachelors provide a strong pathway to further research and careers.

The University of Adelaide is a member of the Group of Eight, a coalition of Australia’s leading research-intensive universities. In the 2012 Excellence in Research Australia ratings that measure the quality and impact of research at Australian universities, over 90 per cent of Adelaide’s research areas were rated at or above world class. The Advanced Bachelors enable students to actively participate in the University of Adelaide’s outstanding research community.

The Advanced Bachelor degrees on offer:

- Arts
- Computer Science
- Mathematical Sciences
- Economics
- Health Sciences
- Sciences
