A coalition of Australia’s leading research-intensive universities.

Associated with 5 Nobel prize winners.

Produced 109 Rhodes scholars.

Produced 142 Fulbright scholars.

Member of the Group of Eight*.

Ranked in the top 1% of universities worldwide.

* A coalition of Australia’s leading research-intensive universities.
Message from the Vice-Chancellor and President

Established in 1874, the University of Adelaide is recognised as one of Australia’s most respected research intensive universities, committed to making an impact on the world’s most challenging problems. We are led by dedicated staff who are national and international leaders in their fields.

We offer world-class postgraduate programs in a range of disciplines and specialisations. Our programs are driven by cutting edge research and underpinned by innovation and relevance.

As a University of Adelaide postgraduate student, you will study at an institution that is highly valued throughout Australia and the world. We offer a stimulating, professional study environment and world-class facilities.

Studying with us will help you further your qualifications in a rich academic environment that pursues excellence, values creativity, and gives graduates the opportunity to make a major contribution to the world.

Professor Warren Bebbington
Vice-Chancellor and President
The University of Adelaide

Established in 1874, with more than 140 years of excellence in education, the University of Adelaide is one of Australia’s oldest and most prestigious tertiary institutions.

The University of Adelaide is a member of the Group of Eight, a coalition of Australia’s leading research-intensive universities. Consistently ranked among the top 1% of universities in the world, the University has developed a strong reputation for excellence in learning, teaching and research. It has produced 109 Rhodes Scholars and is associated with five Nobel Laureates.

Key research foci at the University reflect national and global research priorities, with modern lecture theatres, laboratories and computer suites, University of Adelaide students experience world-class learning environments in addition to enhanced digital and e-learning resources.

The University of Adelaide is committed to developing quality graduates who are recognised internationally for their knowledge, skills, creativity, global outlook and ability. Our students experience an educational environment in which lecturers are active researchers and teaching is informed by the latest findings.

A progressive institution

From its early beginnings, South Australia was a progressive state. Established by free settlers, it was the first Australian state to grant voting rights to women. Reflecting the values of the state in which it was founded, the University of Adelaide became the first university in Australia to:
- admit women to academic courses (1881)
- grant degrees in science (1882)
- establish a Chair of Music (1884), offer a bachelor degree in music (1886), create a Conservatorium of Music (1897), and graduate a Doctor of Music (1902)

Ground-breaking research

With more than 4,500 research staff and students working together, supported by modern infrastructure and an innovative culture, the University of Adelaide has all the ingredients to tackle global research challenges and deliver positive impacts for our partners.

The Excellence in Research for Australia (ERA) initiative, which measures the quality and impact of research conducted at Australian universities, rated 82% of our research areas above world standard in the last performance review.

The University has particular strength in areas such as: the biological sciences, engineering and earth sciences, humanities, creative arts and writing, mathematics, information technology and computer sciences, physical and chemical sciences, and social and behavioural sciences.

An international outlook

The University of Adelaide is strongly committed to international education. Since the University began enrolling international students more than 90 years ago, the University’s international student population accounts for approximately 24% of all students.
5 stars plus
QS rating

The QS Intelligence Unit has, through rigorous and independent data collection and analysis of performance metrics as set out in the QS Stars methodology, rated the University of Adelaide as a Five Stars Plus institution.

A distinctive approach to learning and teaching

Through excellence in learning and teaching, the University of Adelaide seeks to develop graduates of international distinction. Students have the chance to learn under the expert guidance of leading academics, and by studying at a research-intensive university they learn research techniques from undergraduate level. They develop problem-solving skills and the ability to innovate—skills that are invaluable for further study and employment.

Small group discovery

The University of Adelaide is committed to giving all students opportunities to learn in small groups, peer-to-peer and under the guidance of leading academics and researchers.

This experience will enhance students’ initiative and creativity, maximising the benefits of studying in a research-intensive university. For more information, visit: www.adelaide.edu.au/VCO/beacon/small-group/

Graduate attributes

The education experience is designed to prepare graduates with the following attributes:

- deep discipline knowledge
- critical thinking and problem solving
- teamwork and communication skills
- career and leadership readiness
- intercultural and ethical competency
- self-awareness and emotional intelligence.

A global alumni network

Graduates of the University of Adelaide become part of a fellowship that includes: Australia’s first NASA astronaut, Dr Andy Thomas; Australia’s first female judge, Queen’s Counsel and state governor, Dame Roma Mitchell; the President of Singapore, Dr Tony Tan Keng Yam; and a long list of distinguished Rhodes and Fulbright scholars. Following graduation, the connection with the University of Adelaide continues to grow. There are many ways alumni can continue their affiliation with their alma mater.
The University's external relations offers an active alumni program that includes international social and networking events, the Adelaide onLION community, the alumni magazine and newsletter, reunions, and awards celebrating the accomplishments of University alumni. University of Adelaide alumni also have access to a multitude of special discounts and offers in a range of different areas, including travel, entertainment, health and well-being.

For more information on our alumni network, visit: www.adelaide.edu.au/alumni/

Faculties and schools

**Faculty of Arts**
- Elder Conservatorium of Music
- School of Humanities*
- School of Social Sciences**
- School of Education

**Faculty of Engineering, Computer and Mathematical Sciences**
- Australian School of Petroleum
- School of Chemical Engineering
- School of Civil, Environmental and Mining Engineering
- School of Computer Science
- School of Electrical and Electronic Engineering
- School of Mathematical Sciences
- School of Mechanical Engineering

**Faculty of Health and Medical Sciences**
- Adelaide Dental School
- Adelaide Medical School
- Adelaide Nursing School
- School of Public Health
- School of Psychology

**Faculty of the Professions**
- Adelaide Business School#
- Adelaide Law School
- School of Architecture and Built Environment
- School of Economics

**Faculty of Sciences**
- School of Agriculture, Food and Wine
- School of Animal and Veterinary Sciences
- School of Biological Sciences
- School of Physical Sciences

* Includes the disciplines of: Art History, Classics, Archaeology and Ancient History, English and Creative Writing, French Studies, German Studies, History, Linguistics, Media, Philosophy and Spanish Studies.

# Includes Entrepreneurship, Commercialisation and Innovation Centre (ECIC)
Facilities

In recent years, the University has invested over $500 million in a major capital works program, delivering a suite of world-class facilities and infrastructure.

Students have access to modern lecture theatres, new technologies, and an outstanding library with a comprehensive collection of over two million items.

**The Braggs**

The Braggs is a $100-million facility on the North Terrace campus named after Nobel Prize winning alumni Sir William Henry and Sir William Lawrence Bragg. The Braggs building has more than 10,000 square metres of research and teaching facilities and is the location of the world-leading Institute for Photonics and Advanced Sensing.

**Dental Simulation Clinic**

The Dental Simulation Clinic at North Terrace is a $6-million high-tech clinic providing dentistry and oral health students with access to the best training facilities in Australia.

**Ingkarni Wardli**

The $100-million Ingkarni Wardli building on the North Terrace campus is home to the Faculty of Engineering, Computer and Mathematical Sciences. The facility was awarded Australia’s first 6 Star Green Star rating for an education building. Ingkarni Wardli takes an Indigenous Kaurna name meaning ‘place of learning or enquiry’.

**Veterinary Health Centres**

Located at Roseworthy campus, the $37-million Veterinary Health Centre offers first-class integrated teaching and research spaces, a fully operational veterinary clinic, hospital and Companion Animal Health Centre. Facilities include intensive care, a diagnostic pathology laboratory, ultrasound, radiology and surgical theatres.
Our Nobel Laureates

The Nobel Prize is an international award given yearly since 1901 for achievements in physics, chemistry, medicine, literature and peace. The University of Adelaide is associated with five Nobel Laureates, and has a long history of ground-breaking research and scholarship of international significance.

1915
Sir William Henry Bragg and William Lawrence Bragg, Physics, for their services in the analysis of crystal structure by means of X-rays.

1945
Sir Howard Walter Florey, Physiology or Medicine, for the discovery of penicillin and its curative effect in various infectious diseases.

2003
John M Coetzee, Literature, who in innumerable guises portrays the surprising involvement of the outsider.

2005
Dr J Robin Warren, Physiology or Medicine (joint), for their discovery of the bacterium Helicobacter pylori and its role in gastritis and peptic ulcer disease.

Hub Central
This three-level, $42-million building on North Terrace campus brings together learning and social spaces with student services. Hub Central was designed through a co-creation process that involved over 12,000 hours of combined student and staff consultation.

The University of Adelaide Health and Medical Sciences (AHMS) building
Located in the SA Health and Biomedical precinct, the AHMS building is home to over 1,600 medicine and nursing students and more than 600 health researchers. The brand new, $246 million 14-storey building offers state-of-the-art facilities that harness the most advanced teaching methods, simulators and latest technology.
Campuses

The University of Adelaide has three campuses in South Australia. Campuses are located at: North Terrace, Roseworthy and Waite.

For more information on our campuses, visit: adelaide.edu.au/campuses

North Terrace campus

The University’s main campus on North Terrace is renowned for its historic architecture and lively atmosphere. Located within Adelaide’s central business and shopping district, the campus is adjacent to the State Library, Festival Centre, South Australian Museum, Art Gallery of South Australia, Adelaide Zoo, and Botanic Gardens. The North Terrace campus is a five-minute walk from the closest tram and bus stops and a 10-minute walk from Adelaide train station.
Roseworthy is a 1600-hectare campus in a rural setting 55 kilometres north of Adelaide and 10 kilometres from the town of Gawler (population 19,000). Renowned as Australia’s first agricultural teaching and research centre, the campus specialises in dry-land agriculture, animal science and is the first veterinary science school in South Australia. Roseworthy services include student accommodation, swimming pool and fitness centre, and access to the campus is available via a North Terrace-Roseworthy shuttle bus service.

Waite campus

The Waite campus is eight kilometres south of the city centre and features a ‘super’ greenhouse known as the Plant Accelerator. Other research areas include plant biotechnology, plant breeding, sustainable agriculture, wine, horticulture and land management. Waite’s students have access to facilities such as a field trials plot, vineyard, winery, orchard and arboretum, and campus services include a childcare centre, gym and sporting facilities. Access to the campus is via public transport and a Waite-North Terrace shuttle bus service.

Roseworthy campus

Roseworthy is a 1600-hectare campus in a rural setting 55 kilometres north of Adelaide and 10 kilometres from the town of Gawler (population 19,000). Renowned as Australia’s first agricultural teaching and research centre, the campus specialises in dry-land agriculture, animal science and is the first veterinary science school in South Australia. Roseworthy services include student accommodation, swimming pool and fitness centre, and access to the campus is available via a North Terrace-Roseworthy shuttle bus service.
Why you will love Adelaide

With all the advantages of a major city but few of the inconveniences, Adelaide offers an enviable lifestyle in an environment that is ideal for study.

Precision planning
Adelaide is situated between rolling hills to the east and 22 kilometres of white sandy beaches to the west. When Colonel Light founded Adelaide in 1836, he had a simple plan: a one-square-mile city centre and lots of open green space. He laid out the streets in a grid, surrounded by a ring of what are now state heritage-listed parklands.

Australia’s most affordable mainland city
Recent research by the National Centre for Social and Economic Modelling shows Adelaide is one of the most affordable mainland cities in Australia. Adelaide’s relatively low cost of living makes it an ideal choice for those who want to enjoy a city life on a budget. The cost of living in Adelaide is up to 19% less than Sydney and Melbourne and 4% less than Perth and Brisbane.

A truly liveable city
Adelaide is a safe and relaxed place to live. In The Economist Intelligence Unit’s 2016 Liveability Survey, Adelaide was ranked as the 5th most liveable city in the world.

Culturally diverse
South Australians hail from over 120 different countries, creating a wonderful mix of cultures and influences. One in five South Australians was born overseas!
Thriving industry
The state of South Australia boasts a stable economy and a low unemployment rate, with a broad base of thriving industries, including agriculture, wine, information and communications technology, defence, biosciences, health, tourism and the arts. Adelaide offers an enviable lifestyle in an environment that is ideal for study.

Why you will love Adelaide
Vibrant city living

Adelaide is a great city for international students.

It has a bustling and energetic city centre and is renowned for its festivals, cultural life and sporting events. With great shopping, beaches, a café culture, affordable student accommodation and friendly residents, Adelaide offers a relaxed lifestyle with all the convenience of city living.

For more information on South Australia, visit: southaustralia.com

Live centrally

Student accommodation is more affordable in Adelaide than in other cities in Australia and much of it is in the heart of the city, meaning plenty of students simply walk to their lectures.

Shopping

Adelaide boasts a range of shopping experiences comparable to anywhere in Australia. Rundle Mall has the biggest concentration of department and chain stores, while Rundle Street is known for its trendy boutiques, pubs and cafés.
Café culture

Adelaide is one of Australia’s most cosmopolitan cities, with an array of cafés, restaurants and shops reflecting the diversity of its ethnic communities. Adelaide is reputed to have more cafés and restaurants per head of population than any other city in Australia.

Easy to get around

Adelaide is a busy and vibrant city, but unlike some larger cities getting around is quick and easy. The city is easy to navigate, thanks to its broad boulevards and public transit network of buses, trains and trams, which offer the same discounts for international students as for local students.

Hit the beach

Adelaide is a coastal city where pristine white sandy beaches become the focus of relaxation and recreation in the summer. It takes just 20 minutes on the tram to get from the city centre to the beach.
Life in South Australia

Adelaide’s beaches
Take a walk on one of Adelaide’s beaches.

Native animals
Experience native animals at Cleland Wildlife Park, Adelaide Hills.

Flinders Ranges
Sleep under the stars in the Flinders Ranges, outback South Australia.

For more information on South Australian activities, visit: southaustralia.com
South Australia is known as the festival state of Australia because of the large number of national and international cultural and sporting festivals it hosts each year.

For more information on festival events, visit: festivalsadelaide.com.au

Why you will love Adelaide 19
Student life

Student Life offers a range of support services to help international students succeed at university.

Friendly staff at these services are available to help students manage their studies, assist with any student visa queries, help with health or disability needs, fit in to their new life at the University, and help solve any personal problems. All Student Life services are free, and are available throughout the year.

International student support

international.adelaide.edu.au/life

Working closely with student groups, faculties, and University administration, the international student support team provides ongoing support to ensure the experience of all international students is a positive and successful one.

Support services include:
- provision of pre-departure information
- orientation for new international students
- assistance with student visa matters, including visa extensions and meeting compliance obligations
- ongoing support by International Student Advisors
- information on Overseas Student Health Cover (OSHC)
- support for students finishing study or returning home
- Peer Mentor program
- Language and Cultural Engagement program
- English conversation program—Talking with Aussies
- Experience Adelaide program
- social activities and workshops
- students’ newsletter and blog.

Careers Service

adelaide.edu.au/student/careers

The Careers Service markets the University’s graduates to employers and assists students in developing the necessary skills to manage their careers throughout their lives.

Services include helping students to make informed career and study choices, and connecting local, national and international employers with students when recruiting for graduate vacancies.

Current students have access to online advice and job vacancies through Career Hub, the career and resource database, and can participate in skill development workshops on labour-market document preparation, maximising interview performance and professional resume presentation.

An annual program of career events is provided, including career education in lectures, employer visits, career information evenings and workshops, and the annual Careers Expo—one of the largest events held on campus. Additionally, the on-campus Careers Service has many excellent resources, including online facilities, weekly newspapers, a library of career-related DVDs, and careers publications relevant to university students and graduates.

Study skills

The Writing Centre and the Maths Learning Centre offer activities and resources to assist with all aspects of coursework involving writing and maths. Seminars and individual consultations are free for students enrolled at the University of Adelaide. Peer Assisted Study Sessions (PASS) is also offered in some courses. Student leaders facilitate small study group learning and revision each week, starting week 2 of semester.

Writing Centre

adelaide.edu.au/writingcentre

The Writing Centre exists to help all students develop the skills they need to confidently produce written and spoken work at university. They provide Learning Guides on various
aspects of writing such as essays, referencing and research. There is also a Writing Centre drop-in service where students can visit without appointments for one-on-one assistance with improving their writing skills.

Maths Learning Centre
adelaide.edu.au/mathslearning
The Maths Learning Centre (MLC) exists to help all students develop the skills they need to learn and use the maths involved in their courses, including statistics. The MLC provides bridging courses, seminars, workshops and online resources, as well as a drop-in service where students can visit without an appointment for one-on-one assistance with their maths/stats.

Childcare
adelaide.edu.au/childcare
The University has childcare centres at the North Terrace and Waite campuses. Childcare services are available to University students, staff and associated organisations of the University, as well as the wider community. Places are available on a part-time or full-time basis. Professional staff provide quality care for children ranging from three months of age to school-aged. Individual needs of the children are supported, while also promoting and enhancing their emotional, physical, psychological, social, educational and overall developmental needs.

All of the centres follow the National Quality Standard and are accredited through the National Quality Improvement and Accreditation System.

Due to the high demand for childcare places, it is important to register future childcare needs with the centre via a waiting-list application form as early as possible; these application forms are located on the centre’s website, along with opening hours and contact details. Fees are also available on the website; however, these vary according to parental childcare benefit entitlements.

Counselling Service
adelaide.edu.au/counselling_centre
At the University of Adelaide we understand that students can experience difficulties. Students new to Adelaide often don’t know where to get help and their ability to study can be affected. At the Counselling Service there are counsellors who can help. They provide free and professional support to help manage these times, as well as offer strategies to improve general well-being. Contact with the Counselling Service is completely confidential.

Disability Service
adelaide.edu.au/disability
The University of Adelaide provides a range of services to students with temporary or ongoing disabilities or medical conditions. Disability advisers are available to advise on how to access special provisions—such as specialised software, enlarged print, and examination arrangements—and help to manage assignment and assessment requirements. The Disability Service is confidential and registration does not appear on student academic records.

Elite athlete support
adelaide.edu.au/eliteathletes
The University of Adelaide is an Elite Athlete Friendly University and offers support and information to eligible student athletes.

The University helps students balance their sporting and academic commitments by providing a flexible and responsive approach to study. Elite athletes studying at the University are engaged nationally and internationally in a broad range of sports, including swimming, soccer, water skiing and rowing, to name a few.

Students who have been identified as elite athletes, or think they may fall into this category, should visit the website to register, or phone the Elite Athlete Support and Information Service on +61 8 8313 5663.

Health
adelaideunicare.com.au
The University Health Practice is an on-campus health service, providing comprehensive and confidential health care to all students and staff in a friendly and comfortable environment.

Services include:
> health checks
> immunisations and vaccinations
> psychotherapy/counselling
> skin care
> travel medicine
> drug and alcohol counselling
> grief and bereavement counselling
> sports medicine

> weight disorders
> men’s and women’s sexual health and contraceptive advice.

Both female and male doctors are available. International students who have overseas health insurance with Allianz Global Assistance, Medibank Private or AHM will not be charged a consultation fee when they see a doctor at the health practice. Students are encouraged to visit the health service early in the year so they become familiar with the many services on offer that help to make their time at university fulfilling and healthy.

Library
adelaide.edu.au/library
The University of Adelaide Library—comprising the Barr Smith, Law, Music, Roseworthy and Waite libraries—is the largest research library in South Australia. The library provides access to over two million print volumes and tens of thousands of online resources, including journals, databases, newspapers and books.

Additional student support includes research help, subject-specific resource guides, student computers, printers, photocopiers and scanners. Quiet study spaces are also available. The library, conveniently located right next to Hub Central, offers wireless network access for laptops and other mobile devices, study areas for quiet individual study, student computers, printing and copying/scanning, and an inter-library loan and document delivery service.

In addition, specialist librarians provide assistance in searching and accessing scholarly information and using the library.

Peer Assisted Study Sessions (PASS)
adelaide.edu.au/pass
PASS assists students to gain deeper understanding of course material, maximise their grades, and develop academic skills. PASS addresses HOW to learn as well as WHAT to learn. Weekly classes offer a relaxed environment in which to work with formal class content in small groups, guided by a peer who has recently excelled in the course.
Campus life

The University of Adelaide offers a stimulating environment where students are encouraged to take part in a wide range of extracurricular activities.

Life on campus
Adelaide University Union
auu.org.au

The Adelaide University Union (AUU) is the peak student organisation at the University. The AUU aims to develop and implement the philosophy that life at university is so much more than textbooks and lectures. This philosophy is applied through a fantastic range of programs, services, activities and events that combine to make student life a rewarding, supportive and memorable experience.

The AUU delivers and/or funds services such as an employment service, VolunteerConnect, a membership program offering discounts and benefits, a wide range of campus events, advocacy, education and welfare, The Fitness Hub, O’Week, social clubs, student radio, free tax and legal service, On Dit (student publication), the Student Representative Council, and retail services such as The General, the University’s on-campus convenience store.

Student services
Student Care
auu.org.au

The Education and Welfare Officers (EWOs) at the Student Care office provide vital, confidential assistance and support to students experiencing any problems surrounding the complexities of student life.

The EWOs are the first point of contact for:
> academic advice and advocacy
> accommodation advice
> legal issues
> financial assistance (grants, loans, some scholarships)
> taxation advice
> welfare information and advice
> information about, and referral to, other services.

The EWOs have an understanding of University culture, systems and policy, plus experience dealing with external agencies (e.g. Residential Tenancies Tribunal, welfare and rights bodies, utilities providers).

Volunteering
auu.org.au

The Union’s volunteering program aims to connect students to volunteering opportunities with not-for-profit organisations. Students can also register for on-campus volunteering opportunities if they are interested in being involved in AUU events. Volunteering helps students develop on-the-job skills, build their resumes, and create valuable networks, and provides the opportunity to practise speaking English and make new friends.

Special-interest and social clubs
auu.org.au/clubs

For a university student, how time is spent outside the classroom is just as important as how time is spent in lectures, tutorials and practicals. Students have the opportunity to fine-tune their leadership skills, network with potential employers, master language skills, or simply hang out, socialise with other students, or disengage from formal studies for awhile by getting involved in a student club or society.

There are more than 100 different non-sporting clubs and societies active on campus. These range from faculty student societies to religious, cultural and political, and activity-based clubs, and if students’ can’t find what they’re looking for, they can easily start their own.
**Student media**

**On Dit**
auu.org.au/ondit

The student newspaper On Dit (pronounced ‘on dee’) was established in 1932 and continues to provide a lively forum for student news and views. Editors are elected each year, and they are joined by a large group of students who contribute articles, sub-edit, proofread, and help with distribution.

**Sporting clubs and facilities**

**Adelaide University Sport**
www.adelaide.edu.au/sports/

Adelaide University Sport (AU Sport) gives students access to an extensive range of sporting facilities and clubs. Catering for everyone from elite athletes through to social players, AU Sport exists to provide and promote the best possible sporting and recreational environment for the University community.

There are almost 40 sports to choose from, ranging from bushwalking and rowing to water, field and indoor sports.

AU Sport hosts Australia’s largest university snow trip and also organises teams for Australian University Sport events, including the Australian University Games (AUG), Southern University Games and Australian University Championships (snow sports, distance running, rowing, triathlon, surfing and orienteering). Visit unisport.com.au for information on how to get involved.

While many sporting clubs enjoy their own permanent facilities, students also have access to the University’s extensive playing fields and well-maintained grounds.

Sporting equipment and occasional ground hire is available via the AU Sport office.

**The Fitness Hub**
thefitnesshub.com.au

The Fitness Hub provides the ultimate health and fitness solution. The on-campus gym has discounted rates and extended opening hours, injecting fitness, fun and friendship into university life.

The Fitness Hub delivers the latest in fitness and resistance equipment, including treadmills, cross trainers, bikes and rowers. The pinloaded machines and free weights are suitable for all gym users from beginners to expert lifters.

Various popular classes such as yoga, Zumba and spin are also held on premises.

Qualified gym instructors are always on-hand to provide expert fitness advice and free program consultations for new members.

**StudyAdelaide**
studyadelaide.com

Facebook: Facebook.com/studyadelaide
Twitter: @studyadelaide
Instagram: @studyadelaide

StudyAdelaide provides information and support to students before they arrive in Adelaide and once they settle into life in their new home.

A busy schedule of events and activities are held each year, and include everything from welcome and farewell ceremonies, international student awards and career advancement seminars, through to social events such as sports days, wine education functions and regional trips.

Head to studyadelaide.com to find out more about these events and activities, and follow us on Facebook, Twitter and Instagram for photos, news, information, ticket giveaways and competitions.
The University understands that accommodation plays an important part in building a solid foundation for academic success. University of Adelaide students benefit from the advantages that come from choosing to study in a city where accommodation of all types, including university-managed accommodation, is not only accessible but more affordable than in other Australian cities.

The University recommends that students adopt the RECAS approach to identifying an accommodation option to suit their individual needs and support a positive educational experience.

- **R**esearch all available accommodation options
- **E**stablish a realistic budget
- **C**onsider the value of managed student accommodation
- **A**void extended temporary accommodation
- **S**eek assistance from the University Accommodation Service

Students unfamiliar with Adelaide are encouraged to consider living in managed student accommodation during their first year of university. Managed student accommodation provides new students with the opportunity to become better acquainted with the city, settle into their academic program and make new friends, without having to worry about the challenges of the private rental market.

University of Adelaide students benefit from the advantages that come from choosing to study in a city where accommodation of all types, including university-managed accommodation, is not only accessible but more affordable than in other Australian cities.

**Long-term student accommodation**

[adelaide.edu.au/accommodation](https://adelaide.edu.au/accommodation)

The University assists international students to obtain suitable longer-term housing. Students may choose any of the following options.

**The University of Adelaide Village**

The University of Adelaide Village is the largest of the University’s student accommodation properties and is home to over 400 students. Students living at the Village experience the safety and security of having access to University staff on-site, 24 hours a day, seven days a week. All students need to bring are their personal belongings, as furniture, kitchen appliances, utilities (including electricity), phone and Internet are all included in the accommodation fees. The only additional costs are for meals (students must cook and clean for themselves) and the on-site, coin-operated laundry facilities.
Long-term student accommodation options

This table matches long-term student accommodation options to individual needs.

<table>

<td>Commercial student accommodation</td>
<td>Urbanest</td>
<td>Students looking for the convenience and comfort of packaged accommodation in a student residential environment.</td>
</tr>
<tr>
<td>Independent living</td>
<td>Share/rental accommodation</td>
<td>Students with the skills and experience to enter into tenancy arrangements and pursue an independent lifestyle.</td>
</tr>
</tbody>
</table>

Residential colleges

Five residential colleges are affiliated with the University: Aquinas, Lincoln, St Ann’s and St Mark’s colleges, which are primarily for undergraduate students, and Kathleen Lumley College, which is suited to postgraduate and mature-age students. These colleges are situated in North Adelaide, within easy walking distance of the main North Terrace campus. A residential college is also located at Roseworthy, one hour’s drive north of the city, for students whose study is based at the Roseworthy campus.

Most college rooms are single study bedrooms. All colleges are co-educational, with shared bathrooms. The colleges generally provide three meals per day—no individual cooking facilities are available.

Commercial student accommodation

Commercial student accommodation refers to purpose-built student accommodation facilities, situated off-campus and managed by private management companies. These facilities offer fully-furnished, self-contained apartments that provide students with the flexibility to live alone or share with others in a student community. Some room types in commercial student accommodation are offered specifically to couples.

In addition to rent, students may need to budget for additional expenses, including:
- gas
- electricity
- telephone connection (optional)
- Internet connection (optional)

Places in commercial student accommodation facilities are offered on a 6 or 12-month fixed-term lease agreement.

Accommodation for families

Students accompanied by family members will find that private rental accommodation in houses or apartments is the most suitable accommodation option. It is easier for an individual student to initially travel to Adelaide on their own in order to arrange suitable permanent family accommodation. Spouses and children who arrive later can then move directly into permanent accommodation without requiring temporary arrangements.

Arrival reception and temporary accommodation

Temporary accommodation and arrival reception services are available to commencing international students. Eligible students can book an arrival reception service and be met by a University representative at Adelaide Airport, via a domestic or international flight. Students will then be transported to their accommodation.

Eligible students who choose not to secure long-term managed student accommodation for their arrival in Adelaide may also be eligible for seven nights of temporary accommodation booked through the University. It is important to note that temporary accommodation options arranged through the University are unlikely to be extended further than a period of seven nights due to high demand for short-term accommodation during the traditional student intake periods.

For more information on eligibility criteria and arrival reception and temporary accommodation services, please contact:

Money matters

International applicants need to consider a range of financial issues, including the cost of living, health insurance and tuition fees, before applying to the University.

All students should allow at least AUD $500 per year for textbooks and basic study materials. Depending on the program, other costs may include specialist equipment (e.g. laboratory coats, microscopes, stethoscopes), optional supplementary reading and academic program materials, field trips, and expenses such as thesis preparation, printing and binding.

Planning a budget

Adelaide is more affordable than other Australian cities, such as Sydney, Melbourne, Perth and Brisbane. Accommodation is the largest variable expense for students—it can cost anywhere from around AUD $135 per week for shared private accommodation outside the city centre, to AUD $248 for University-managed accommodation within the city centre or AUD $385 for private sole-occupancy accommodation.

There can also be large costs associated with setting up private accommodation, as most private rental houses and apartments are rented unfurnished.

Application fee

An application fee of AUD $100 must be paid with the University of Adelaide postgraduate online application. An exemption may apply for some government or externally-sponsored students.

Tuition fees

International students are required to pay international student tuition fees, which cover the cost of teaching and many student support services. The indicative annual tuition fee quoted in this prospectus is based on the standard full-time enrolment load of 24 units per year or 12 units per semester. The quoted fee is reviewed annually and may increase in future years. Each student will be advised of their fee schedule in their offer of admission to the University. Fees may vary depending on enrolment load e.g. if students ‘overload’ or ‘underload’, fees may be increased or decreased accordingly.

New international students are required to pay a specified tuition fee deposit when accepting an offer of admission. The payment will be counted as credit towards tuition fees in the first enrolment period.

After enrolment, students are invoiced for the balance of their fees in that enrolment period. The University invoices students (or their sponsor) each enrolment period according to enrolment load.

Student Services and Amenities Fee

International students commencing in 2018 will be required to pay an annual Student Services and Amenities Fee, which will cover activities such as clubs, sporting and recreational activities, and many other services. In 2017, the fee was AUD $294 and it is indexed annually. For more information, visit: adelaide.edu.au/student/finance/ssaf/

Refund policy

All applicants must read the University’s policy on refunds and adjustments before accepting an offer of admission. The policy complies with all requirements for tuition fee refunds stipulated in the Education Services for Overseas Students (ESOS) Act 2000, associated Australian Government regulations, and the ESOS National Code of Practice (2007). For policy details, visit: adelaide.edu.au/student/finance/refunds/

Health and medical

International students and their dependants are required to have health insurance in Australia through the Overseas Student Health Cover (OSHC) scheme. The University’s preferred provider of OSHC is Allianz Global Assistance. Visit: oshcallianzassistance.com.au/?AgentID=238236

The Department of Immigration and Border Protection requires all student visa holders to have OSHC for the duration of their visa. For additional information, please refer to: international.adelaide.edu.au/life/visas/healthoshc

Based on 2017 premiums, 12 months of OSHC Essentials cover is AUD $609 for a single student. A dual family policy is AUD $2,375, and a multi-family policy is AUD $3,438. OSHC covers up to 100% of the scheduled fee for most medical services and 100% of the scheduled fees in hospitals and emergency ambulance. Students may consider taking out additional insurance for extras such as dental work, physiotherapy and optometry.

Students with families

Students who bring their families with them to Australia will need to take into account additional costs associated with health cover, housing, food, transport, childcare and education expenses. For information and advice for international students with families, visit international.adelaide.edu.au/life and enter ‘family’ in the ‘Find what you’re looking for’ search box.

School attendance is compulsory for all children aged six to 17 unless the senior school student becomes employed, or is engaged in an apprenticeship or alternative tertiary study. Most children start school at five years of age. Children may attend government-operated schools or independent schools.

All schooling services attract a fee. At the time of printing, the fees for government operated schools were AUD $4,700 per year for primary school (from Reception to Year 7) and AUD $5,600 per year for secondary school (from Years 8 to 12). These fees include intensive English language
development and support if required. A registration fee is charged per family. This is currently AUD $600 in the first year and AUD $300 in subsequent years.

For details visit internationalstudents.sa.edu.au and select ‘Children of International Tertiary Students’ from the menu.

Part-time work

Many international students and their dependants hope to obtain part-time work to supplement funds for living costs. It may be possible to secure employment; however, we advise that students should not rely on part-time work for essential expenses, as obtaining a job is not guaranteed and can take time. Students should also be aware that the workload for many programs is intense and so they may not have the time to undertake employment as well as study full-time.

Under current visa regulations, students have the right to work after their studies in Australia have commenced. Students may work up to 40 hours per fortnight during term time, and unrestricted hours during published University holidays. The Australian Government imposes certain restrictions on the employment of dependants or spouses of people holding student visas.

For more information on working while studying, visit: border.gov.au/Trav/Stud/More then select ‘Work conditions for Student visa holders’ from the menu.

Change to permanent resident status

Admission for international students and for Australian residents is subject to different quota restrictions imposed by the University and the Australian Government. International students whose immigration status changes to Australian Permanent Resident will be required to transfer to a domestic fee-paying place. They may subsequently apply to transfer into a Commonwealth-supported place, depending on their program of study.

Scholarships

A small number of scholarships will be available for students who wish to undertake an undergraduate degree at the University of Adelaide commencing in 2018. More information on available scholarships, the application process, minimum eligibility criteria and important deadlines is available by visiting international.adelaide.edu.au/choosing/ and selecting ‘Scholarships’ from the menu. For information on Australian Government scholarships, please refer to: australiaawards.gov.au

As these details are subject to change, interested students are encouraged to check these websites from time to time.

Study-related costs

This should be viewed as a guide only for a single student. Costs can vary significantly from one student to another. These are basic living costs at the time of publication and do not include program tuition fees, costs for textbooks, other study-related needs, running a car, medical expenses, or any luxuries.

English language proficiency requirements

English is the language of instruction at the University of Adelaide, therefore proficiency in speaking, reading, writing and listening to English is essential.

The University accepts the following tests of English language:
- International English Language Testing System (IELTS) - Academic test
- Test of English as a Foreign Language (TOEFL)
- Pearson Test of English (Academic)
- Cambridge Certificate in Advanced English (CAE).

Students without the required level of English will need to satisfactorily complete an intensive program of English language before being admitted to the University of Adelaide. The University can arrange an appropriate English language program in Adelaide at the English Language Centre (refer to page 30). Our Pre-enrolment English Programs (PEP) provide an alternative entry pathway for prospective students who have received offers to the University of Adelaide conditional upon English proficiency. On successful completion of one of the Pre-Enrolment English Programs (PEP) at the required standard, students are granted entry into the majority of programs at the University.

Other evidence of proficiency in English may be accepted in individual cases.

For more information about English language requirements, visit: international.adelaide.edu.au/apply/admission

Notes:

Applicants whose English test scores are slightly below the requirements of their preferred program may choose to enrol in an appropriate Academic English Pre-Enrolment English Program (PEP) as an alternative means for meeting the English language proficiency requirements. Students who successfully complete the PEP at the required standard will be eligible for direct entry to the program nominated in their offer without any further English test requirements. An offer to the PEP is included for eligible students. PEP entry requirements are listed at: adelaide.edu.au/ele/courses/pathways/

* Applicants seeking entry to the programs marked * must present the required IELTS/TOEFL/Pearson/CAE scores to meet the English language proficiency requirements and are not permitted to undertake an Academic English PEP pathway.

1 Applicants to master’s programs offered by the School of Psychology must provide an IELTS unless eligible for an exemption in accordance with Psychology Board of Australia requirements prescribed at: psychologyboard.gov.au/Registration/Overseas-Applicants.aspx

2 These entry requirements are correct at the time of printing. Please see the following website for up-to-date information: international.adelaide.edu.au/apply/

The University of Adelaide reserves the right to make the final decision regarding admission to the University.

---

**English language proficiency requirements**

29
The University’s English Language Centre (ELC) provides outstanding Academic English programs and English teacher training services for international students and groups.

Academic English pathways
The University of Adelaide offers two packaged Academic English pathways for students who have not met the minimum English language entry requirements of their postgraduate program.

Academic English PEP pathway
This is a direct entry pathway into further studies at the University of Adelaide. The length of the program depends on the applicant’s English proficiency test score. Students who successfully complete the Pre-enrolment English Program (PEP) at the required level do not need to sit another English test before entering their University program. For more information on the PEP please visit the website: adelaide.edu.au/elc/courses/pathways/pep

Academic English GEAP pathway
This is a packaged program involving a mixture of General English for Academic Purposes (GEAP) and (PEP) classes. A further English language test (IELTS, TOEFL, CAE or Pearson) is required during the program, either to allow transfer into the PEP program or to give students direct entry to their award program.

Eligibility
To find out which packaged Academic English Pathway program they are eligible for, students should refer to the Academic English pathways diagram opposite.

Other programs
General English for Academic Purposes (GEAP)
General English for Academic Purposes (GEAP) is a general English program for students wishing to develop their language skills at one of the most prestigious universities in Australia, with students from all around the world. Delivered in the academic environment of the University of Adelaide, GEAP is designed to build effective and confident oral and written communication skills.
GEAP is offered in five levels of language proficiency, from elementary through to advanced. Students can choose the length of their program—from as little as five weeks to 45 weeks. All levels focus on developing the students’ speaking, listening, reading and writing skills. As a student’s English proficiency increases, academic tasks are added to the course content.

Group Study Tour programs
Group Study Tour programs offer the ideal mix of academic excellence and cultural experience for groups of international students or professionals looking for a rewarding Australian experience. These programs are tailored towards each group’s specific needs and can be for any length of time, but are usually between two and eight weeks. Homestay accommodation can be included as part of the program. Academic sessions can focus on general English tuition or a specific discipline or interest, while cultural activities include excursions to destinations of cultural, historical, geographical and social interest.

TOEFL Test
The Test of English as a Foreign Language internet-Based Test (TOEFL iBT) is available at the University of Adelaide. English is the language of instruction at Australian universities, and proficiency in speaking, listening, reading and writing is essential. The TOEFL iBT measures these four language skills to ensure students can communicate their ideas and interact in real life, classroom and campus situations. The TOEFL iBT is accepted at all Australian universities. Tests are held regularly throughout the year at the ELC. For more information and dates, visit: adelaide.edu.au/elc/toefl/

Academic English Pathway program timelines and costs
In addition to the fees below, an enrolment fee of $295 will apply to Academic English Pathway programs.

For information on Trimester intake programs please visit: www.adelaide.edu.au/elc/courses/pathways/dates-fees/
Important information for students applying for programs with higher English language requirements, or with English test score other than IELTS.

Some postgraduate programs require a higher level of English ability. When Academic English Pathway programs are studied in combination with postgraduate coursework programs that require a higher level of English ability than others, different entry requirements than those shown in the tables are required.

Please note that as well as the IELTS test, the English Language Centre accepts the TOEFL iBT, TOEFL PBT, Pearson and Cambridge Advanced test of English (CAE) for entry into Academic English Pathway programs. For more information on the scores required, visit: adelaide.edu.au/elc/courses/pathways/

Trimester programs

For students studying Trimester entry programs, there are various Academic English pathway options available. Please visit www.adelaide.edu.au/elc/courses/pathways/dates-fees/

For more information about the English Language Centre, visit: adelaide.edu.au/elc

Academic English Pathway entry requirements

For entry into postgraduate programs with IELTS (or equivalent) overall band score 6.5 requirement.

- IELTS overall 5.0 and no band less than 4.5
  - Academic English – GEAP Pathway 35 weeks

- IELTS overall 5.5 and no band less than 4.5
  - Academic English – GEAP Pathway 30 weeks
  - Academic English – GEAP Pathway 30 weeks

- IELTS overall 5.5 and no band less than 5.0
  - Academic English – PEP Pathway 20 weeks

- IELTS overall 5.5 and writing at 5.5 or above
  - Academic English – PEP Pathway 20 weeks

- IELTS overall 6.0 and no band less than 5.0
  - Academic English – PEP Pathway 15 weeks

- IELTS overall 6.0 and writing at 5.5 or above
  - Academic English – PEP Pathway 15 weeks

- IELTS overall 6.0 and no band less than 5.5
  - Academic English – PEP Pathway 10 weeks

The University also accepts TOEFL, Pearson and CAE tests. For information on entry scores please visit our website. This diagram shows the amount of time it takes most students to progress.

* A further English language test (IELTS, TOEFL, Pearson or CAE) is required during the course, either to allow transfer to PEP classes or to give direct entry to the student’s award program.

** Direct entry upon successful completion of the PEP program.
Application information

Applicants should be aware of their specific program admission and student visa requirements before applying to the University.

Postgraduate entry requirements
Entry is competitive—the minimum academic entry requirement for most postgraduate coursework programs is a bachelor’s degree or equivalent qualification from a recognised institution at a level of academic achievement specified by the relevant faculty or school.

Entry requirements vary between programs. Some of the graduate certificates and graduate diplomas offered may be accepted as a requirement for entry to a master’s program, or as professional qualifications in their own right.

For information on particular program requirements, please refer to the list of academic programs and minimum entry requirements on pages 116-121. More detailed information regarding postgraduate coursework programs is available in the University of Adelaide Calendar at: adelaide.edu.au/calendar

International students must also meet the University’s English language requirements—refer to page 28 for details.

Deferral of admission
Applicants who have been offered a place in a program may apply to defer to the following year.

Credit for previous study
In some cases, international students may be credited with advanced standing (status/exemptions) on the basis of work already completed at another institution. If seeking advanced standing, detailed syllabuses (curricula) of the subjects successfully completed must be submitted with your application.

Student personal information
Australia has strict privacy laws that mean there are very limited circumstances in which the University can release personal or academic information about a student. Such information will usually only be released to Australian Government departments where legislatively required or in a health or safety emergency. The University cannot release any information about a student’s results, attendance, application status or any other matters to their parents.

For more information on the University’s Privacy Policy and Management Plan, visit: adelaide.edu.au/policies/62

How to apply  8 steps to enrolment

1 Application

Apply through one of the University’s official international representatives or via the online application system at: international.adelaide.edu.au/apply

Payment and documents required
> A non-refundable AUD $100 application fee.
> Original or certified copies of your academic qualifications, transcripts, English language test results (if required) and any other supporting documents.
> Copies of original documents to be certified by a justice of the peace, notary public, University of Adelaide official representative/staff member, and police officer or examining authority.

Further information and contact details
> For information on international representatives, please visit: international.adelaide.edu.au/choosing/agents/
> To apply directly to the University, visit international.adelaide.edu.au/apply and select Step 4: Apply from the options.

2 Application assessment

All applications will be assessed. Successful applicants will be emailed, either directly or via their official representative. Applicants will receive the following:
> Offer Statement
> Acceptance Agreement
> Payment Form
> Declaration of Financial Capacity
> Acceptance Information Leaflet.
Unsuccessful applicants will be informed by email.

3 Accept offer

To accept their offer, students should:
> Complete and sign all pages of the Offer Statement and Acceptance Agreement.
> Complete the Payment Form and Declaration of Financial Capacity.
> Arrange for payment of the specified deposit and Overseas Student Health Cover (OSHC) for duration of visa.
> Arrange for payment of English language program fees (if applicable).
> Provide a copy of the personal details section of their passport.
> Applicants can pay online.

Conditional offers

Students who receive a conditional offer must provide evidence that they have met any outstanding conditions, and send the relevant documentation directly with their acceptance. A new offer letter will not be sent unless required for scholarship or sponsorship purposes.

4 Confirmation of Enrolment

After receiving the acceptance documentation listed above, the University sends applicants a Confirmation of Enrolment (CoE). Students should use the CoE to apply for an Australian student visa.

5 Obtain international student visa

For information about applying for an international student visa, students should visit the Department of Immigration and Border Protection (DIBP) website—border.gov.au—or that of their nearest Australian Diplomatic Mission at: dfat.gov.au
Applicants should lodge their student visa application immediately. This may be done with the assistance of a recognised University of Adelaide agent or representative, or if applying directly by visiting https://www.border.gov.au/immiaccount to create an ImmiAccount.
6 Prepare for departure

After making travel arrangements, students can inform the University of their arrival date online by visiting international.adelaide.edu.au/life and selecting Getting to Adelaide from the menu. While there, book a free airport pickup. Temporary accommodation is guaranteed upon request. It is at the student’s own expense and available for one week.

7 Enrolment

Prior to orientation, students will receive information about obtaining their University login and password. Students will then be able to login to Access Adelaide and add courses when enrolments open.

8 Arrive and attend orientation

Students should aim to arrive in Adelaide in time to attend the international student orientation program. Participation in the orientation program will help familiarise students with the city and campus, provide a chance to meet staff and other students and make friends before commencing studies. For more information, visit: international.adelaide.edu.au/life and select Orientation from the menu.
Online learning
The University of Adelaide provides students with the option to study some of its popular graduate certificate, graduate diploma and master’s level courses 100% online. This gives busy, working students the flexibility to study in their own time and from the comfort of their home. Students receive and submit all their assignments online.

Students are still required to complete the same volume and type of work as a traditional campus-based student and within a particular timeframe, but do not have the added complication of having to apply for a visa or finance the cost of living in Australia for the duration of their studies.

Many online courses also offer up to four term start dates throughout the year (January, April, July and October), allowing students greater enrolment flexibility.

External learning
Some postgraduate courses are offered externally, allowing students to complete their degree within their own country, sometimes without ever travelling to Australia.

Students receive course materials and resources through the post and complete their assignments at home, before mailing them back to Adelaide for assessment. Exams can be organised offshore for students and are attended by official invigilators.

For certain courses and electives, students may be required to participate in virtual lectures online, or attend workshops in their home country or even in Adelaide.

Students will be advised of these flexible learning options by individual faculties when submitting their course application.

External learning programs
> Master of Wine Business
> Master of Project Management

International students in Australia
External or online study is available to international students already based in Australia in certain circumstances. Some programs are delivered in a combination of study modes, i.e. internal and external, face-to-face and online.

International students on a Student Visa who enrol in such programs can study up to 25% of their total program externally. They must be enrolled in at least one internal or face-to-face course in each compulsory teaching period while studying in Australia.

Alternatively, students may apply for a specific type of temporary visa, which allows them to undertake study but does not require them to be enrolled internally or full-time at the University of Adelaide.

To make an enquiry, or for further information about online courses, visit the program websites listed.

* An undergraduate degree is not essential for entry to the Graduate Certificate in Project Management or Graduate Certificate in Innovation and Entrepreneurship, provided the applicant has sufficient relevant work experience. This will be assessed by the academic program director. Once a graduate certificate has been successfully completed, it is possible for students to progress to either the graduate diploma or the master’s course, within the relevant program.
Global Learning

The University of Adelaide is committed to providing its students with opportunities to study overseas. This includes our international students.

The University offers international students the possibility of a 'third country experience' through a range of programs including student exchange, study tours, summer and winter schools, internships and placements. With careful planning there is no need to extend a degree, as credit usually is awarded for the study undertaken overseas.

Students participating in an exchange program remain enrolled as full-time students at the University of Adelaide while overseas. Students in an exchange program continue to pay their usual tuition fees to the University of Adelaide and do not pay tuition fees at the host university.

International students are encouraged to apply to participate in Global Learning experiences to add a further dimension to their University of Adelaide education. There are many exciting opportunities in the Americas, Europe, Asia-Pacific region and Africa.

For more information on these programs, visit: adelaide.edu.au/global-learning

The world is facing growing challenges of explosive population growth. I chose an architectural degree, because architects are uniquely placed to meet these challenges head on.
We specialise in delivering internationally recognised degrees in Architecture, Landscape Architecture, Planning, Urban Design and Property.

By joining our school, students will benefit from our bigger-picture view of the world. Our curriculum focuses on the built environment as a whole, not just its individual components. We specialise in three particular streams of the discipline: architecture, landscape architecture, and urban design.

In order to become a practising architect, students will need to complete a minimum of five years study. Firstly, students must complete an undergraduate degree in architectural design (three years), then a master’s program (two years).

The University of Adelaide is the only institution in South Australia to offer a double degree pathway at master’s level in Architecture. Completing the double master’s requires only one extra year of study, and qualifies students in two disciplines, thereby enhancing their career prospects.

Features of our school

- The school has invested in three ‘industry professors’, each of whom is an award-winning professional in their own right. They bring a high degree of inspiration and reality to their teaching.
- The school’s internship program provides master’s students with professional work placements within Australian or overseas businesses and professional practices.
- We recently completed major additions to our facilities, investing over $1 million in new equipment to enhance our students’ experiences. We provide 24-hour access for students to use the CAAD Studio and state-of-the-art model-making laboratory, which is among the best equipped architectural design labs at any university in Australia.
### Master of Architecture by coursework

**CRICOS CODE** 059319A  
**DURATION** 2 years full-time

**INTAKE**  
- February  
- July  
* Applicants will be considered for the July intake on a case by case basis and may have a limited choice of electives.

**ENQUIRIES**  
international.adelaide.edu.au/enquiries

**adelaide.edu.au/degree-finder**

The Master of Architecture program is focused on appreciation of the significance of design, an understanding of the theoretical underpinnings of the discipline, and the vital importance of a close relationship with the landscape architecture profession. Additionally, the interdisciplinary nature of practice is emphasised through close contact and shared courses with landscape architecture and urban design students. This program will provide engagement with local and international issues, engaging students to learn about and participate in contemporary projects and debates about the environment, community, culture and society.

**Career readiness**
Graduates are well equipped to pursue careers as an architect, project administrator or project manager.

**Professional accreditation**
The Master of Architecture is accredited by the Architectural Practice Board of South Australia. The Master of Landscape Architecture is accredited by the Australian Institute of Landscape Architects (AILA).

**Indicative degree structure**
- Advanced Architecture Technologies (M)  
- Advanced Construction (M)  
- Advanced Landscape Architecture Technologies (M)  
- Advanced Ecology (M)  
- Critical Historical Practices (M)  
- Designing Research (M)

Urban planning is concerned with how we lay out, regulate and manage the cities, neighbourhoods and places in which we live our lives. As cities become larger and more complex an increasing proportion of the world’s population lives in cities so it is important that we manage their growth. We do this to provide a good quality of life for all residents, ensure employment opportunities, protect the natural and historic built heritage and ensure that cities are resilient in the face of natural disaster threats and climate change. Planners’ central concern is to ensure that our cities are attractive places to live and work now and that they are sustainable into the future.

The Master of Planning provides a broad based education in Planning covering urbanisation, policy, theory, practice and planning law. The urban development process is a central area for study. Emphasis is placed on professional planning skills at both the strategic and local level using real world cases and problems to enhance student learning.

A degree in urban planning opens the door to a wide range of employment in both the public and private sectors and is applicable in many countries around the world.

Career readiness

Graduates are well equipped to pursue careers in urban and regional planning, and environmental planning.

Professional accreditation

The Master of Planning is accredited by the Planning Institute of Australia (PIA).

Indicative degree structure

- Development Studio
- Engaging Communities: Techniques and Analysis
- Environmental Planning and Governance
- Planning Dissertation or Final Architecture Project (M)
- Planning Law
- Planning Policy and Regulation
- Planning Theory and Practice
- Introduction to Urbanisation
- Urban Design Principles

Electives

- Development and Construction
- Environmental Impact Assessment
- Environmental Economics and Policy
- Ethics in Environmental Policy and Planning
- People and Environment in the Asia Pacific Region
- Property Research and Marketing
- Regional Planning
- Studio: Urbanism
- Sustainable Cities: Climate Change and Planning
- Sustainable Cities: Planning for Climate Change
- Any other postgraduate course deemed appropriate by the program coordinator

Urban planning is concerned with how we lay out, regulate and manage the cities, neighbourhoods and places in which we live our lives. As cities become larger and more complex an increasing proportion of the world’s population lives in cities so it is important that we manage their growth. We do this to provide a good quality of life for all residents, ensure employment opportunities, protect the natural and historic built heritage and ensure that cities are resilient in the face of natural disaster threats and climate change. Planners’ central concern is to ensure that urban streets and spaces are attractive and safe places to live and work and that they are well adapted to change into the future.

The location of Planning within the School of Architecture and Built Environment means that the program emphasises the importance of the design of spaces and places. Design literacy is central to the Urban Design course as design literate planners are keenly sought after by many employers. The Urban Design program prepares students for work in government or the private sector both within Australia and elsewhere in the world.

Career readiness

Graduates are well equipped to pursue careers as an urban designer, planner, project administrator or project manager.

As the world becomes more urbanised, the role of property developers becomes increasingly critical. All countries are witnessing a huge amount of public and private investment in land, buildings, offices, housing, retail and recreation facilities, in rapidly expanding urban areas around the world.

The challenge of ensuring these developments are safe, productive and sustainable and provide a high quality of accommodation for their occupiers, as well as a return on investment for their sponsors is the task of property developers. Investors and businesses also need to be assured they have allocated resources in property in a wise and timely manner.

Property experts are qualified to provide advice in these circumstances.

The Master of Property draws on expertise across the Faculty of the Professions to provide a holistic approach to the study of property. The degree is hosted by the School of Architecture and Built Environment and places property development as its focus.

Graduates of the Master of Property will be attractive to a range of employers, including property development companies, property consultants, government agencies, lending institutions, and large companies with significant property portfolios in Australia and internationally.
Career readiness
Graduates are well equipped to pursue careers as a property analyst, property development adviser, property investment adviser or property manager.

Professional accreditation
The University is currently negotiating accreditation with the Royal Institution of Chartered Surveyors. If approved accreditation, will be available to all graduates of the Master of Property program.

One of the main reasons for choosing to study at the University of Adelaide was the fact that the University is a member of the Group of Eight and boasts good infrastructure, facilities and services which facilitate research.

Christina Yeo
PhD in Arts
Lifelong learning, regardless of the subject matter, nurtures the essential human trait of self-motivated, ongoing, natural curiosity and the desire to fulfil one’s personal and professional potential.

Specialised understanding combined with broad knowledge
The Faculty of Arts offers a range of diverse postgraduate qualifications to hone specific areas of interest, while helping students to develop highly advanced, transferable skills relevant to any workplace or research environment.

Students further develop the ability to think creatively, research deeply, analyse and solve problems, and communicate effectively and persuasively, to become not just a valued contributor, but a leader in a range of professional and academic settings.

Making a difference in a real way
With a range of choices in terms of the area of specialisation, all streams of postgraduate study in the arts will foster in students the ability to demonstrate and maintain the highest standards of professional and ethical endeavour in their field.

Students will develop a greater sensitivity to intercultural understanding, and an awareness of diverse economic and sociocultural issues globally and their implications in a variety of fields.

With enhanced awareness of social justice issues and interpretive skills, graduates will be in a position to influence planning and policy, with a thorough understanding of internationally recognised best-practice in their dedicated field of expertise.

Growing personally and professionally
Further study in the arts will broaden the horizons of a recent graduate seeking a promotion and looking to enhance their career options, a mid-career professional extending or updating knowledge in a fast-paced industry, or someone branching out into a completely new field for any number of personal and professional reasons.
Master of Arts

DURATION
2 years full-time

INTAKE
• February
• July

INDICATIVE ANNUAL TUITION FEE
$32,500

ENQUIRIES
international.adelaide.edu.au/enquiries
adelaide.edu.au/degree-finder

The Master of Arts program consists of core research courses, including a thesis, and specialisations that work much as majors do in the Bachelor of Arts. The program currently offers specialisations in:

> International Studies
> Environmental Studies
> Creative Practice in Music
  (extension pathway only).

Students will be challenged to think, perform and grow to new levels, and will develop an enviable suite of transferable skills.

Areas of specialisation

Creative Practice in Music

Creative Practice in Music will equip students with practical, theoretical and conceptual tools to enter the world of music in the 21st century as a creative artist. This program focuses on the use of digital technology across the fields of sonic art, sound design and composition, including the application to contemporary media such as film and games. Students are encouraged to explore a variety of different approaches when compiling a portfolio of creative work. These should include: individual and collaborative and styles from popular to experimental.

Environmental Studies

Develop an understanding of the principles and practice of environmental policy, planning and governance. Students will address how global warming, water shortages, deforestation and the like are to be managed. Responding effectively to environmental problems involves far more than the application of scientific knowledge, or the ‘top-down’ regulation of people and their environments.

Government policies must be negotiated with, and implemented through, diverse private-sector agents and a differentiated civil society. Managing environmental problems therefore entails a new set of approaches, including government, public-private partnerships, economic tools and incentives, democratic decentralisation and risk management.

The program addresses how the signature environmental issues of our time are to be managed; now and into the future.

International Studies

The Master of Arts specialisation in International Studies provides an opportunity to explore the character of the contemporary world and gain an advanced understanding of the key issues and debates in international politics.

The program covers a wide range of teaching and research, including strategic and security studies; contemporary international thought; gender perspectives in international relations; international political economy; issues of equity and inequality in the international sphere; power, culture and communication; and Asian studies and European studies.

Career readiness

Applied Linguistics graduates are internationally recognised for professional work in the fields of media, journalism, advertising, language documentation, policy management and workplace communication.

Graduates from the Creative Practice in Music stream have various performance opportunities in public and private practice, and often undertake teaching in the private studio.

Environmental Studies graduates will be well equipped to take up senior policy roles in government and a variety of roles in environmental management for government agencies, industry and the not-for-profit sector.

International Studies graduates find successful careers in numerous roles such as civil servant, security adviser, political analyst, political reporter, foreign affairs reporter, intelligence analyst.

ENQUIRIES
international.adelaide.edu.au/enquiries
adelaide.edu.au/degree-finder

This highly innovative program is taught jointly by the director and curators of the Art Gallery of South Australia and the Art History staff of the University of Adelaide, in the Art Gallery around objects in the collection, and at the University.

Taught by practicing gallery and museum professionals, it focuses on: collection development and management, including databases and registration, and the display and interpretation of objects; and researching, designing, mounting and marketing exhibitions in a range of museums and galleries.

Career readiness

Graduates are equipped to work in the gallery and museum sector in curatorial work, public programs, education, registration and collection management.
Offered jointly by the University of Adelaide and the Art Gallery of South Australia, this program enables students to study the collections of the gallery with teaching provided by curatorial and academic staff at both institutions, as well as national experts. On-campus classes are held after hours, with lectures and tutorials held at the University, and ‘hands-on’ workshops at the gallery.

By exercising the eye as well as the mind, students are able to thoroughly explore in situ or virtually the rich collections and exhibitions of the Art Gallery of South Australia. Students are encouraged to seek answers to questions reflected in specific works of art relating to their: origins and fabrication; critical reception; material compositions; mixed fortunes in the history of taste; subject matter; place in the life’s work of the artist who made them, and so on.

Students become familiar with the issues involved in curating exhibitions and the principal questions associated with connoisseurship. They will develop the research skills necessary to investigate essential issues in art history, including skills in visual analysis.

**Career readiness**

Graduates have built careers in public and commercial galleries in curatorship, marketing and communications, public programs, education, the auction industry and arts journalism.

**Master of Arts (Translation and Transcultural Communication)**

The Master of Arts (Translation and Transcultural Communication) is an interdisciplinary program designed for students fluent in both Chinese and English, seeking a career as a professional translator. The program is approved by the National Accreditation Authority for Translators and Interpreters (NAATI). Students who successfully complete the Masters program and achieve the required level of performance in the relevant assessment will be recommended by the University of Adelaide for NAATI Translator accreditation at the professional level.

The program provides rigorous training in translation skills while fostering intercultural communicative competence, building strength in critical and analytical thinking, research capacity and problem-solving strategies.

**Career readiness**

There has been a significant increase in the demand for Chinese-speaking, transcultural and transnational professionals in the global market. The program complements this demand by providing students with the skills and knowledge to work and communicate effectively in an environment requiring translation and cross-cultural communication expertise. The program prepares students for a career as a professional translator working in a range of fields, such as government, business, commerce, law, international relations and other specialised areas.

The substantial research component in this program makes it possible for aspiring graduates without an honours qualification from an Australian university to undertake PhD study, thereby providing a career path for them to pursue research careers at a global level.

**Professional accreditation**

The program is approved by the National Accreditation Authority for Translators and Interpreters (NAATI). Students who successfully complete the Masters program and achieve the required level of performance in the relevant assessment will be recommended by the University of Adelaide for NAATI Translator accreditation at the professional level.

I wanted to gain experience from wine industry figures who had a different outlook and approach to the sales, marketing, branding and distribution of wine globally. The University of Adelaide offered a master degree heavily integrated with the Business School, but with its entire focus on the wine industry.
Through a combination of cutting edge research and real world experience, our business programs will test students’ initiative, encourage creativity and teach skills that can be applied to any profession.

Peer mentoring group

Postgraduate Career Readiness course

AACSBB accreditation

Our range of postgraduate degrees have been designed to fit the needs of anyone with an undergraduate degree looking to start, broaden or diversify a career in business.

The University of Adelaide’s, Business School programs have accreditation with the Association to Advance Collegiate Schools of Business (AACSB) International. AACSB accreditation represents the highest standard of achievement for business schools worldwide, and is only achieved by 5% of universities globally. We are the only university in this state to have earned this badge. Our accreditation is evidence of our commitment to offer a quality business education, today and into the future.

The Business School has close affiliations with professional bodies to ensure its programs are practical and relevant in the real world. The Centre for Global Food and Resources aims to advance research and knowledge in food, water and environmental policy, behavioural economics, food security, food value chain analysis, post-harvest horticultural science, and the role of agriculture in growth and development.

The Institute for International Trade is dedicated to supporting those who work in today’s global economy, whether they are in business, government or academia through providing graduates with a practical understanding of current international trade and investment issues, the political dynamics of the negotiating environment and the opportunities and challenges presented to businesses by the globalised economy.

The Adelaide Advantage is designed to ultimately enhance each student’s self-development and employment potential. The Postgraduate Career Readiness course is part of this initiative. This course will provide students with a professional assessment of their personal profile and career competencies.

Peer mentoring program

The Postgraduate Mentor Program is a social support network for students and provides a smooth transition into postgraduate tertiary study. It enhances the student experience by developing professional networks with peers, academics and potential employers.
Master of Accounting

CRICOS CODE 089704K

CRICOS CODE 053688B
DURATION 2 years full-time
INTAKE • February • July
INDICATIVE ANNUAL TUITION FEE $40,000
ENQUIRIES international.adelaide.edu.au/enquiries

The Master of Accounting and Finance offers a combination of accounting and finance studies in order to enhance career prospects and extend knowledge of both disciplines. The combined studies of accounting and finance have never been more in demand by employers, who value employees’ abilities to synthesise the disciplines.

The study of accounting and finance will strengthen graduates’ employability in the areas of financial management, while providing a professional accounting qualification. Many of the program’s courses have also met the for Chartered Accountants Australia and New Zealand.

Career readiness
On completion of this program graduates can advance careers in the accounting profession in a wide range of roles, including specialised fields such as taxation, auditing, management accounting and accounting systems. The finance area enables graduates to acquire skills to seek employment as an analyst, consultant or manager in the financial services sector; including in banks, investment institutions and financial planning consultancies.

Professional accreditation
The Master of Accounting and Finance program is designed to satisfy the academic requirements for associate membership of CPA Australia and the Chartered Accountants Australia and New Zealand. Appropriate courses must be undertaken to fulfil the associate membership requirements of both professional bodies.

The program is also recognised as a CFA Program Partner, and graduates will be eligible for listing on the ASIC registry as RG146-compliant for several specialised fields of finance.

52 Business
The Master of Accounting and Marketing provides comprehensive studies across the related fields of accounting and marketing. It is designed to meet the needs of entrants from either a relevant degree seeking in-depth advancement in their field and an associated field, or from a non-relevant degree seeking to comprehensively adapt to the new fields of accounting and marketing.

While the program includes study in both fields, students choose to specialise in one area. For students choosing the accounting specialisation as their primary discipline, the program aims to develop them for a professional accounting career, with accreditation to proceed to the professional programs of CPA Australia. For students choosing the advanced marketing specialisation, the program aims to develop them for a professional marketing career, by providing the educational grounding and partial credit towards the Certified Practising Marketer (CPM) status awarded by the Australian Marketing Institute (AMI).

Many of the program’s courses have also met the competency requirements for Chartered Accountants Australia and New Zealand.

Career readiness

The accounting specialisation, supplemented with marketing studies, strengthens graduates’ employability in corporations and government organisations. The advanced marketing pathway improves graduates’ employability in organisations operating in the areas of taxation, auditing and management accounting.

Professional accreditation

Depending on the student’s specialisation and courses chosen, the program satisfies the requirements for application into CPA and CA programs, or to the Australian Market and Social Research Society (AMRS) Certificate in Market Research.

- January
- May
- September

**INDICATIVE ANNUAL TUITION FEE**
$38,500

**ENQUIRIES**
international.adelaide.edu.au/enquiries

The agribusiness value chain is one of Australia’s largest and most important industry sectors. When considering the whole chain from production through to retailing, the industry has an estimated value of $436 billion and employs approximately 1.4 million people (source: Neil Clark and Associates).

The Master of Agribusiness provides students the opportunity to develop the conceptual and practical skills necessary for agribusiness leadership, management decision making, policy analysis and problem-solving in an ever-expanding and increasingly complex global food and agricultural marketplace.

The program will consist of a core set of courses necessary for the development of general agribusiness management skills and the understanding of the global agri-food sector.

The capstone research project enables students to utilise these skills to critically analyse real world agribusiness problems, issues or strategic opportunities.

Elective courses within the faculty and across the University allow students the flexibility to tailor their program to their individual background and career objectives, including a wide range of individuals whose undergraduate education is not in agricultural business.

The Master of Agribusiness is an AQF Level 9 qualification taught over four trimesters (36 units). The program is offered in trimester mode. There are three intakes in each academic year (January, May and September).

**Career readiness**
Students develop skills advanced skills and understanding in the following areas: leadership and strategy, business and financial management, global markets and food trends, innovation and global value chains and professional communication.
Such training equips students for careers in the increasingly complex and diverse local, national, and global value chain networks, including: food retailers, food processors, banks and financial agencies, agricultural consultancy services, research centres, input suppliers and both government and non-government organisations.

Indicative degree structure
- Global Food and Agricultural Markets
- Management and Performance of Global Food Chains
- Innovation Systems and Policy Transformation
- Cross Cultural Management and Negotiation
- People and Organisations
- Accounting Essentials for Decision Makers
- Economic Principles

Electives
Courses offered by the University that are available to the student to the maximum value of 6 units.

*A student who wishes to pursue higher degree by research studies in the future should complete the 9 unit research project and may only take courses to a value of 3 units as electives.

Research project
Students must complete the following courses to the value of 9 units:
- Research Project Part 1 - Research Principles and Methods
- Research Project
OR
Students wishing to pursue higher degree by research studies in future must complete courses to the value of 12 units from the following:
- Research Project Part 1 - Research Principles and Methods
- Research Project Part 2 - Theoretical Frameworks and Research Design
- Research Project Part 3 - Data Gathering and Analysis

The University of Adelaide’s Master of Business Administration (MBA) program is widely recognised for its high quality and rigour, equipping students with lifelong skills in leadership. Within an interactive face-to-face environment conducive to adult learning, courses provide learning experiences in a variety of teaching formats.

The Adelaide MBA program emphasises the development of the ability to:
- understand the functional interrelationships between different parts of an organisation and the broader interaction of the organisation with its environment
- recognise and act effectively on problems and opportunities confronting an organisation
- coordinate and apply an organisation’s financial, physical, technological and human resources in pursuit of important objectives
- understand and communicate effectively with people inside and outside an organisation
- evaluate current management policies and practices to develop new ways to improve organisational effectiveness
- provide strong leadership.

The Adelaide MBA has been designed with maximum flexibility to suit the needs of working professionals. Students can elect to study during the day, evening or on the weekend and can vary the number of courses they undertake in each trimester, but must complete their program within the time specified on their student visa. MBA summer school is offered over a two-week period each January. This gives students the option to speed up the progress of their studies.

The Adelaide MBA also offers multiple entry points, meaning applicants can apply at any time during the year to be considered for the next intake. There are three trimesters in each academic year commencing in January, May and September.

Career readiness
The Adelaide MBA aims to provide students with a solid grounding in academic disciplines relevant to management. Students will acquire the conceptual and analytical abilities they need to make and carry out decisions at a senior managerial level.

Professional accreditation
The Adelaide MBA is accredited by the Association to Advance Collegiate Schools of Business (AACSB) International—the highest standard of achievement for business schools worldwide.

Indicative degree structure
- Fundamentals of Leadership
- Accounting for Managers
- Marketing Management
- Economics for Management
- Managerial Finance
- Managing Contemporary Organisations
- Strategic Management
- Research for Decision Makers
- Enterprise Project (6 units) Plus 6 units of electives

The Global Food and Agricultural Business program enables students to develop the conceptual and practical skills necessary for careers in food businesses and agribusiness. The selection of courses enables students to gain fundamental competencies, while at the same time providing the flexibility to tailor their program to their individual background and career objectives. For example, students may focus on specific interests from value chain management or marketing, to natural resource issues or agricultural policy analysis.

The Master of Global Food and Agricultural Business is an AQF Level 9 qualification, with a standard full-time duration of 2 years (48 units). The program is offered in trimester mode. There are three intakes in each academic year (January, May and September).

Career readiness

Students are trained for careers in the increasingly complex and diverse local, national, and global value chain networks, including food retailers, food processors, banks and financial agencies, agricultural consultancy services, research centres, input suppliers and both government and non-government organisations.

Indicative degree structure

- Global Food and Agricultural Markets
- Global Food and Agricultural Policy Analysis
- Trends and Issues in the World Food System

Plus, three courses to the value of 9 units from the following:

- Globalisation and Agriculture in Emerging Economies
- Innovation Systems and Policy Transformation
- Management and Performance of Global Food Chains
- Experiences and Insights in Agri-food Systems
- Agriculture and Food in International Trade
- Water Security and Governance

Electives

Elective courses to the value of 9 units chosen from courses offered in the following postgraduate programs:

- Master of Global Food and Agricultural Business
- Master of Commerce
- Master of International Trade and Development
- Master of Applied Economics
- Exchange, Study Tours and Internships

Candidates may include within those courses presented to qualify for a coursework award other postgraduate-level courses, subject to the approval of the program director.

Research project (12 units)

Students must complete research projects, to a total of 12 units.
The Master of International Business is a comprehensive degree program that develops conceptual and practical skills necessary for effective operational and strategic responses to complex dynamic global forces at the organisational and interpersonal levels. These skills are in high demand from organisations that deal with the challenges and opportunities created by the increasing globalisation of the world economy.

With a combination of foundation and specialised courses, the program is designed to meet the needs of entrants from either a business degree, seeking to advance their skills and knowledge in the field of international business, or those from a non-business background who wish to develop a comprehensive set of skills and knowledge in a new field. There is also a specialised research stream for those interested in developing advanced research skills.

The program aims to give graduates a competitive edge by making them career-ready and by providing options such as internships with local or international organisations and a number of international study options, including a double master’s degree with partner European universities. A Global Learning experience is an integral component of students’ academic journey at the University of Adelaide. The Master of International Business offers numerous overseas opportunities that provide students with global perspectives and networks.

Students are able to spend one year studying at the University of Adelaide and one year in Europe and receive two degrees by completing the Scribe 21 program (France, Italy, Hungary).

Graduates are well equipped to enter any organisation that appreciates the impact of the global economy. This includes multinational corporations, government departments that deal with cross-border transactions, such as foreign trade and investment, international consulting small to medium sized organisations with an international scope to their operations.

This program is designed to meet the needs of busy professionals and offers flexibility to minimise time on campus if required (subject to student visa conditions). Courses are available in various study modes. Some can be taken either face-to-face, online or in intensive mode.*

*Not all modes are available for all courses.

The Master of International Trade and Development aims to instil the ability to think and act strategically about international trade and development issues. The program aims to provide students with a practical understanding of current international trade and investment issues, the political dynamics of the negotiating environment and the opportunities and challenges presented to businesses by the globalised economy.

This program is designed to give graduates a competitive edge by providing them with an interactive case-study based background in how business and government interact in trade negotiations, leveraging commercial opportunities arising out of trade agreements, and practical legal and commercial aspects of export marketing. Students will leave the program equipped to put their newly gained knowledge into practice in their workplace with a practically-orientated understanding of global, regional and national trade, investment and development issues.

**Career readiness**

Careers in international trade, aid and development increasingly require knowledge and skills that transcend traditional academic disciplines. Government officials, business representatives, international aid agency employees and others working in today’s global environment need a broad background in economics, international law, trade policy, sustainable development and business.

The Master of International Trade and Development is a unique, practical and multidisciplinary degree that aims to instil its graduates with the understanding of global regional and national trade, investment and development issues, the ability to design and implement good policy to achieve good governance and to negotiate trade agreements.

**Indicative degree structure**

- International Trade Negotiations and Agreements
- International Trade: Strategies and Opportunities
- Research Methods in International Trade
- Principles of International Trade and Development
- Agriculture and Food in International Trade
- Economic Principles (M)
- International Trade Law

**Electives**

Choose three courses to the value of 9 units from the following:

- Trade Statistics
- MNCs, Trade and Sustainable Development
- Services, Trade and Developing World Labour Markets
- International Aid and Trade
- The Economics of Climate Change
- International Trade Transactions and the Law
- Global Food and Agricultural Policy Analysis
- Exchange, study tours and internships

**Please note** that students wishing to pursue higher degree-by-research studies in the future should complete the 12-unit research project, and may only take courses to a value of 3 units as electives.

**Research project**

- Research Project in International Trade A and B (6 units) or
- Research Project in International Trade 1 and 2 (12 units)

---

### Master of Marketing

**CRICOS CODE** 085719B  
**DURATION** 4 trimesters

**INTAKE**  
- February
- May
- September

**INDICATIVE ANNUAL TUITION FEE** $40,000

**ENQUIRIES** international.adelaide.edu.au/enquiries

The Master of Marketing is designed to provide a comprehensive, up-to-date understanding of concepts, techniques and professional applications in marketing for graduates of non-marketing disciplines. For candidates with a recognised marketing degree, advanced level marketing courses provide greater depth and breadth in strategic thinking and analytical tools in marketing and business. The study of marketing at an advanced level may enable candidates to move more rapidly into senior marketing positions in consumer, business, government, community service and not-for-profit organisations. The program is offered in trimester mode. There are three trimesters in each academic year, commencing in February, May and September.

**Career readiness**

Suitable for professionals who wish to embark on a marketing career in roles such as marketing planner, sales manager, brand marketer, product and advertising manager, retail manager, public relations officer, service manager or market researcher.

**Professional accreditation**

The Master of Marketing is accredited by the Association to Advance Collegiate Schools of Business (AACSB) International -the highest standard of achievement for business schools worldwide.

Graduates may gain partial credit towards the Certified Practising Marketer (CPM) awarded by the Australian Marketing Institute (AMI).

Completing the four prescribed courses allows students to apply for the Certificate in Market Research awarded by the Australian Market and Social Research Society (AMRS).

**Indicative degree structure**

- Marketing Management
- Economic Principles
- People and Organisations
- Accounting Essentials for Decision-Makers
- Business Research Methods
- Developing Global Markets
- Integrated Marketing Communications
- Strategic Marketing
- Understanding Consumers
- Research Project for Marketing
Master of Professional Accounting

**CRICOS CODE** 072988K  
**DURATION** 1.5 years full-time  
**INTAKE**  • February  
• July  
**INDICATIVE ANNUAL TUITION FEE** $40,000  
**ENQUIRIES** international.adelaide.edu.au/enquiries

The Master of Professional Accounting is designed to offer knowledge and skills in accounting and related fields. It will enable candidates possessing undergraduate degrees in non-accounting disciplines to move into careers in accounting, financial management, auditing and business advisory services in public practice, industry or government. Recent developments in reporting practices have presented increasing career opportunities in public and private sector entities. Many of the program’s courses have also met the competency requirements for Chartered Accountants Australia and New Zealand.

**Career readiness**

On completion of this program graduates will have the knowledge and skills to pursue a career in accounting, including specialised fields such as taxation, auditing, management accounting and accounting systems, financial management, and business advisory services, in private practice, industry or government.

**Professional accreditation**

The Master of Professional Accounting is accredited by the Association to Advance Collegiate Schools of Business (AACSB) International—the highest standard of achievement for business schools worldwide. The Master of Professional Accounting satisfies the academic requirements for associate membership to the Certified Practising Accountant (CPA) program of CPA Australia.

**Indicative degree structure**  
- Accounting Concepts and Methods (M)  
- Principles of Finance (M)  
- Quantitative Methods (M)  
- Economic Principles (M)  
- Auditing and Assurance Services (M)  
- Management Accounting (M)  
- Intermediate Financial Reporting (M)  
- Advanced Financial Accounting (M)  
- Accounting Systems and Processes (M)  
- Business and Corporations Law (M)  
- Income Taxation (M)  

**Electives**  
- Courses to the value of 3 units

---

Master of Wine Business

**CRICOS CODE** 081149G  
**DURATION** 2 years full-time  
**INTAKE**  • February  
• May  
• September  
**INDICATIVE ANNUAL TUITION FEE** $40,000  
**ENQUIRIES** international.adelaide.edu.au/enquiries

The Master of Wine Business is underpinned by a blended approach to learning, including involvement from industry experts, which provides a comprehensive wine business and market development education. The program is customised to the needs of the domestic and global wine trade, with a unique emphasis on the wine production and sales industry.

Students learn to combine cutting edge and best-practice wine marketing know-how with a working knowledge and skills in both winemaking and viticulture, thus incorporating the entire wine value chain. This is what wine industries worldwide expect wine business professionals to know and understand.

Graduates will attain professional skills that enable them to devise and implement wine business and global market development principles, theories and strategies in the domestic and international wine industry. The program is offered in trimester mode. There are three trimesters in each academic year, commencing in January, May and September.

The Master of Wine Business is an AQF Level 9 qualification, with a standard full-time duration of 2 years.

**Career readiness**

Well paid career opportunities exist in wine business, and marketing or management positions internationally.

**Indicative degree structure**  
- Foundations of Wine Science  
- Grape and Wine Production  
- Marketing Management  
- People and Organisations  
- Accounting Essentials for Decision-Makers  
- Economics for Managers  
- Legal Aspects of Wine Business  
- Learning Discoveries in Wine  
- Evaluating Domestic and International Wine Markets  
- Business Research Methods  
- Wine Business Research Project  

**Electives courses to the value of 12 units**  
- Cross Cultural Management and Negotiation (M)  
- Fundamentals of International Business (M)  
- Australian Wine in the Asian Century  
- Contemporary Issues in Wine Business  
- Direct Wine Marketing  
- Advanced Wine Marketing  
- Wine Retail, Cellar Door and Food Tourism  
- Sensory Studies  
- Introductory Winemaking  
- Small and Family Business Perspectives 3
One of the most enjoyable things about studying at the University of Adelaide is the broad networking experience it provides... from academic to social events, you get to meet amazing new people with rich history and culture.

Sohaib Irshad
Master of Computing and Innovation
Every day, computer scientists work on software that pushes the limits of human endeavour in areas such as disease treatment, weather prediction, Internet security, international finance and even space exploration.

The University of Adelaide offers innovative degrees in computer science that are at the forefront of the revolution in digital technologies. Students who enjoy solving problems and tackling real world challenges will find we have the experience, expertise, energy and enterprise to educate them for the future.

We have strong links with industry and are internationally renowned in the areas of computer vision, distributed and high-performance computing, evolutionary systems, formal methods, and software architectures.

Learn from award-winning educators and researchers
Internationally renowned academic staff provide guidance and mentorship based on years of experience in IT education and industry involvement. Our award-winning educators and world-leading researchers jointly provide an exciting, innovative and comprehensive education environment.

Global recognition
Our programs are accredited by the Australian Computer Society (ACS) and are designed to provide a professional qualification in computing and information technology. They also provide the necessary academic requirements for membership of the Institute of Electrical and Electronic Engineers (IEEE) and the Association for Computing Machinery (ACM).

Be career ready
The University of Adelaide produces highly skilled, adaptable graduates who are able to design computer-based solutions to address many of the problems facing society.

Our programs’ graduates possess a range of valuable skills sought after by employers, in areas as diverse as finance and commerce, defence, information technology, scientific research and logistics, and teaching.
Advanced technical studies in computer science provide an understanding of how software and hardware can be combined to overcome a range of complex challenges. The Master of Computer Science has a major research component and high-performing graduates may be able to proceed to further research study. The research project is conducted under the supervision of academics from research groups in fields including computer vision, evolutionary computation, distributed systems, computer networks, high-performance computing, formal verification and systems modelling. Graduates will gain a demonstrated ability to design and construct large software systems.

**Career readiness**

Employment opportunities exist in:

> software development
> software engineering
> defence sector
> entertainment and networking sectors.

---

IT professionals are employed broadly throughout different industry and government sectors. There is a great amount of diversity in their roles, encompassing management of IT contracts and projects, development of applications, identification and management of IT solutions and the marketing and selling of IT solutions. This diversity requires IT professionals to exhibit a high degree of technical knowledge, as well as good communication and project management skills. The Master of Computing and Innovation is designed to provide these skills.

Students with no prior experience in computer science undertake a specialised introductory program in their first semester, designed to address fundamental IT requirements and familiarisation with assessment and the University of Adelaide environment. After completion of the introductory program, students will be skilled in programming in the C++ language and have knowledge of fundamental data structures and computer systems.

**Career readiness**

Potential careers include:

> internet consultant
> internet – web programmer
> software engineer
> computer programmer
> systems engineer
> software specialist.

---

The Master of Software Engineering aims to provide graduates with the knowledge, tools and methods for defining software requirements, performing software design, construction, testing and maintenance tasks. Graduates gain a demonstrated ability to design and construct large software systems and are qualified to secure rewarding technical careers in the software engineering industry.

Students who wish to proceed to further research study must complete an individual year-long research project in an area of software engineering instead of the usual year-long group project.

**Career readiness**

Potential careers include:

> internet consultant
> internet – web programmer
> software engineer
> computer programmer
> systems engineer
> software specialist.
My studies have enhanced both my critical thinking and quantitative analysis skills. More importantly I am able to use my knowledge to analyse current economic issues.
Economics investigates human behaviour and its consequences in a world with scarce resources. Economists help make the world a better place through their impact on decision making.

The University of Adelaide's economics postgraduate programs allow students to build on their knowledge and explore economic theory and practice. Economics is a global language, recognised worldwide; wherever students travel, their knowledge and skills will be immediately relevant. Students can tailor their studies to suit their backgrounds, interests and career aspirations. They have many options available to them, such as alternative specialisations, opportunities to fast-track studies, and pathways to PhD studies. Students may also attend key events such as the Fisher Lecture in public policy, and regular seminars. Our presenters are a diverse mix of international and national experts who share their research and expertise.

The School of Economics makes a limited number of scholarships available to students who are seeking entry into the Master of Applied Economics. The Scholarships will be awarded on merit to students from anywhere in the world. Each Scholarship provides a partial tuition-fee scholarship of AUD 10,000 to be awarded in two equal parts: AUD 5,000 in a student's first year of study and AUD 5,000 in a student's second year of study. For further information and conditions see www.adelaide.edu.au/professions/scholarships/MAppEc/

The Master of Advanced Economics program is aimed at students with a strong background in economics and quantitative skills and offers a thorough preparation for cutting edge theoretical and applied research in economics.

The program includes a firm grounding in the core subjects of the field, offers electives in a number of economics subjects and introduces students to academic research through a master thesis under the supervision of an experienced academic. It also offers sound preparation for direct pathway into research-based programs such as the Doctor of Philosophy (PhD) or Master of Philosophy (M.Phil) in Economics.

Indicative degree structure

- Three core courses in advanced level Microeconomics, Macroeconomics and Econometrics
- Four electives
- Economics Minor Research Project
- Economics Dissertation

The Master of Applied Economics is a broad, two-year degree that provides a thorough understanding of core ideas and concepts in economics and how they are applied in the real world.

Economics analyses the decisions and choices of individuals, governments and businesses and the impact of their behaviour on our lives and welfare. Important ideas and concepts include incentives, opportunity costs, trade-offs, supply and demand, and efficiency. These are applied to a range of fields, from public policy to finance, international trade, economic growth and development, natural resources and the organisation and structure of markets.

Master of Applied Economics graduates are ready for a range of rewarding careers and can expect to find employment with leading business, government or not-for-profit organisations. Our graduates are working in roles such as managers, directors, business analysts and statisticians for organisations all over the world, including the World Bank Group, the United Nations Statistical Institute for Asia and the Pacific, Friedland Capital Inc, Deloitte, National Australia Bank and the Australian Trade Commission.

Areas of specialisation

There are three areas in which students may qualify for a single major if they wish: International Economics, Public Policy or Economic Theory.

Indicative degree structure

- Economics for Public Policy
- Intermediate Microeconomics IID
- Intermediate Macroeconomics IID
- Intermediate Econometrics IID
- Challenges in Economic Policy and Applied Research
- Econometrics PG

Electives

Students choose at least three electives from Economics electives ‘A’ and at least two from Economics electives ‘B’ (refer to Economics electives list below).

Students may choose to undertake the 6-unit Master of Applied Economics Dissertation as an elective course.

Economics electives ‘A’

- Resource and Environmental Economics PG
- Public Economics PG
- International Finance PG
- Development Economics PG
- Game Theory PG
- International Trade PG
- Money, Banking and Financial Markets PG
- The Economics of Climate Change
- Industrial Organisation PG

Economics electives ‘B’

- Economic Development IV
- International Finance IV
- International Trade IV
- Public Economics IV
- Microeconomic Theory IV
- Macroeconomics IV
- Econometrics IV
- Advanced Time Series Econometrics IV

Master of Applied Economics Scholarships

Each Scholarship provides a partial tuition-fee scholarship of AUD 10,000

www.adelaide.edu.au/professions/scholarships/MAppEc/
Studying at the University of Adelaide is a new page of my life, intertwined with thought-provoking subjects, knowledgeable lecturers and tutors, like-minded classmates, accomplished teaching, cutting edge learning, supportive staff, spacious learning centres and vibrant campus life.
Teaching is a rewarding and fulfilling career that can be started at any point in life. At present there are opportunities for permanent positions in rural and regional secondary schools in South Australia, and a strong demand for secondary teachers in other Australian states and overseas.

From teacher registration to professional development

The teaching qualifications offered by the University of Adelaide are recognised for teacher registration purposes by education departments in all states of Australia and by teacher-employing authorities overseas. Our degrees focus on secondary school teaching, in the disciplines of business, English, geography, history, languages, English as a second language, mathematics, information technology, science and technology. The suite of postgraduate programs also provides opportunities for a range of educators, including teachers, trainers, academics and educational consultants. The Master of Teaching is suitable for those who have completed an undergraduate degree and are looking for a career change into teaching, or graduates who wish to teach senior secondary schooling, or with adult learners.

We also provide programs with specialist training in any area of education for registered teachers, vocational educators, university lecturers and supervisors seeking to refresh and develop their professional skills.

A learning environment that delivers results

Informed by cutting edge research, students will deepen their knowledge of their area of specialisation through personal interaction with research active educators. Students will exercise and strengthen their critical thinking and problem-solving skills, based on evidence and the scientific approach to knowledge development. Teamwork and communication skills will be honed through assessment and practice throughout the program of studies. Work-based experiences will ensure students become technology savvy, with a strong capacity for self-reflection and an openness to objective and constructive feedback from their supervisors and peers. Students will emerge from their studies not just career-ready, but in a position to become a valued contributor and leader in their chosen field.

The Graduate Certificate in Education is designed for: teachers, trainers, educational consultants or any student who wishes to further specialise in curriculum areas or an area of education; those wishing to change their specialist teaching curriculum areas; or those looking to alter the direction of their career. The program presents the foundation concepts required for students who wish to continue into a master level degree.

### Career readiness

Successful completion of the Graduate Certificate in Education provides advanced career options for trainers across various industries (e.g. police, nursing or business) to teach in higher education, including in the TAFE and university sectors, or take on roles as education consultants. It also enables teachers to enhance their existing qualifications.

### Professional accreditation

This program does not satisfy the requirements for a recognised teaching qualification. Students looking to become teachers will need to complete the Master of Teaching prior to pursuing a postgraduate qualification.

## Graduate Diploma in Education Studies

adelaide.edu.au/degree-finder

The Master of Education is designed for educators who wish to strengthen their curriculum development, teaching areas, discipline study areas, or develop areas of education such as educational leadership or policy management. It is also suitable for trainers, educational consultants or any domestic or international student wishing to study education to teach in a higher education environment or develop their research capacity to transition into educational research.

Study pathways will be determined according to specialisations, entry points and desired exit points. Pathways will consist of suites of courses valued at 12 units (normally exiting with a graduate certificate); and 48 units or 24 units (dependent on degree of advanced standing) exiting with a Master of Education.

Those seeking to develop their knowledge of Teaching English to Speakers of Other Languages (TESOL) will be particularly interested in the elective courses TESOL in Practice – Lesson Planning and Teaching Practice; TESOL Methodology; Intro to English Language Studies for Teachers; and Language and Culture.

### Career readiness

This degree provides advanced career options for trainers across various industries (e.g. police, nursing or business) to teach in higher education, including in the TAFE and university sectors, or take on roles as education consultants. It also enables teachers to enhance their existing qualifications.

### Professional accreditation

This program does not constitute the requirements for a recognised teaching qualification. Students looking to become teachers will need to complete the Master of Teaching.
The Master of Teaching is a two-year program for students who have completed an undergraduate degree and wish to become secondary school teachers. Successful completion of this degree satisfies the academic requirements to apply for registration with the Teachers Registration Board of South Australia. This degree also caters for those entering post-secondary educational institutions and those professions that may benefit from a study of the theory and practice of education.

The Master of Teaching is equivalent to a standard two years of full-time study. The accelerated program can be completed by students in 1.5 years. The Master of Teaching is taught in quadmesters, and classes commence in January.

Areas of specialisation
To complete the Master of Teaching program, students must enrol in two teaching areas. Study in the curriculum and methodology courses will take place in terms 1 and 2, in year 1.

The range of teaching specialisations that can be chosen includes:

> Business
  - Accounting
  - Business Studies
  - Economics
> Mathematics
  - Mathematics
  - Senior Mathematics
> English
  - English
  - Senior English
> Information Technology
> Humanities
  - Geography
  - History
  - Senior History
> Psychology
> Languages
  - Chinese
  - French
  - German
  - Indonesian
  - Italian
  - Japanese
  - Spanish
  - Modern Greek
  - Vietnamese
  - Other Languages
> Science
  - Biology
  - Chemistry
  - Physics
  - Agricultural Science
  - Science
> ESL
  - English as a Second Language
> Music
  - Classroom Music
  - Instrumental Music.

Note: not all courses will be offered each year.

Professional accreditation
The Master of Teaching provides a professional qualification that is recognised for teacher registration purposes in South Australia. In most cases the qualification is portable to other states and countries.
Studying at the University of Adelaide has been a fantastic experience. Three things that have made it really rewarding have been the multicultural environment, quality teaching and facilities, and the campus experience.

Erik Lopez
Master of Petroleum Engineering
The highly ranked postgraduate engineering degrees from the University of Adelaide offers students the chance to specialise in cutting edge technologies aligned to enhance their career pathways. Our degrees are suitable for engineering graduates who wish to pursue further studies, as well as engineers with relevant work experience.

An engineering degree from the University of Adelaide is the passport to high technology careers nationally and internationally. Graduates have broad, adaptable skill sets and work in diverse roles across a wide variety of industries. Graduates receive a solid technical foundation so that they have opportunities to work in many specialist areas across chemical engineering, civil, environmental and mining engineering, electrical and electronic engineering, mechanical engineering, petroleum engineering and software engineering.

Learn from South Australia’s best engineering faculty
Our engineering degrees were recently ranked in the top 150 Academic Ranking of World Universities in Engineering/Technology and Computer Science (Shanghai Jiao Tong, 2016). We were the only university in South Australia to achieve this ranking.

Be career ready
With an outstanding reputation for teaching, research and the quality of our graduates, a postgraduate qualification in engineering from the University of Adelaide can open doors to a successful and rewarding career. Professionals wishing to strengthen their knowledge in a specialised area also benefit from our industry knowledge and links.

Global recognition
Our engineering graduates enjoy lucrative national and international job prospects, as well as challenging, creative and rewarding long-term careers involving imagination, innovation and teamwork. Graduates are equipped to make a difference in the lives of others, with an internationally recognised qualification from a university ranked in the top 1% in the world.

Professional accreditation
Australia’s peak professional engineering body, Engineers Australia, provides provisional accreditation to the Master of Engineering degrees at the University of Adelaide. It is part of Engineers Australia’s practice to only afford provisional accreditation before the first cohort of students graduates.
Master of Engineering (Aerospace)

CRICOS CODE 071199C
DURATION 2 years full-time
INTAKE • February • July

Aerospace engineering is focused on the development and use of new technologies and materials that are relevant to any high-technology industry, including the aeronautical, space and defence industries. The Master of Engineering (Aerospace) comprises a foundation year and an advanced studies year. The foundation year consists of a set of courses designed to ensure students acquire a high level of expertise in the relevant specialisation. The program gives students the opportunity to study technical courses at an advanced level and the opportunity to engage in a research project.

Career readiness
Potential careers include:
> manufacturing engineer
> noise control engineer
> robotics engineer
> aerospace engineer
> aircraft engineer.

Professional accreditation
The Master of Engineering (Aerospace) degree is provisionally accredited by Engineers Australia.

Master of Engineering (Chemical)

Civil and environmental engineers are key to developing a sustainable future for our natural and built environments. They ensure the provision and management of essential infrastructure and natural resources for our current society, while establishing a sustainable future for generations to come. This program has been designed to meet the ongoing needs of society for infrastructure that is innovative and technologically advanced, while still being socially and environmentally acceptable in the short-term, and sustainable in the long-term. The program includes a core suite of courses in civil engineering analysis and design, along with detailed studies in environmental science and engineering.

Career readiness
Potential careers include:
> water resources engineer
> coastal engineer
> geotechnical engineer
> natural resource manager
> seismologist
> transportation and highways engineer.

Professional accreditation
The Master of Engineering (Civil and Environmental) degree is provisionally accredited by Engineers Australia.

Civil engineers design, construct and maintain the infrastructure that underpins modern standards of living, including: all types of structures, bridges, roads, tunnels, railways, dams and water distribution networks. The important role of a civil engineer is to ensure infrastructure meets the needs of society in a sustainable manner, and to enhance our quality of life. Design is central to the program and students encounter real world projects throughout their degree. These include the design of steel and concrete structures, foundations and water distribution networks. The program has an emphasis on engineering problem-solving and design and analysis using modern, computer-based methods.

Career readiness
Potential careers include:
> structural engineer
> water resources engineer
> coastal engineer
> geotechnical engineer
> transportation and highways engineer
> materials and testing engineer.

Professional accreditation
The Master of Engineering (Civil and Environmental) degree is provisionally accredited by Engineers Australia.
Master of Engineering (Electrical)

The Master of Engineering (Electrical) is intended for graduates with a Bachelor of Engineering (Electrical or Electronic), or similar qualification, who wish to undertake more advanced studies in electrical power engineering. The program provides students an opportunity to study specialist topics such as power quality and fault diagnostics, power systems monitoring and protection, and distributed generation technologies, as well as an opportunity to develop advanced levels of understanding of related topics in mathematics, project management and systems engineering.

The Master of Engineering (Electrical) comprises a foundation year and an advanced studies year. The foundation year consists of a set of courses designed to ensure students acquire a high level of expertise in the relevant specialisation. The program gives students the opportunity to study technical courses at an advanced level and the opportunity to engage in a research project.

Career readiness
Potential careers exist in:
> industrial automation
> renewable energy development
> biomedical devices and systems development
> defence technologies
> radar and remote sensing information security

Professional accreditation
The Master of Engineering (Electrical) degree is provisionally accredited by Engineers Australia.

Master of Engineering (Electronic)

The Master of Engineering (Electronic) is intended for graduates with a Bachelor of Engineering (Electrical and Electronic), or similar qualification, who wish to undertake more advanced studies in selected specialist topics in electronic engineering. It provides an opportunity to study specialist topics such as telecommunications, microelectronics, image sensors and processing, and power electronic systems, as well as an opportunity to develop advanced levels of understanding of related topics in mathematics, project management and systems engineering.

The Master of Engineering (Electronic) comprises a foundation year and an advanced studies year. The foundation year consists of a set of courses designed to ensure students acquire a high level of expertise in the relevant specialisation. The program gives students the opportunity to study technical courses at an advanced level and the opportunity to engage in a research project.

Career readiness
Potential careers exist in:
> biomedical devices and systems development
> renewable energy development
> power systems
> defence technologies
> radar and remote sensing information security
> telecommunications

Professional accreditation
The Master of Engineering (Electronic) degree is provisionally accredited by Engineers Australia.

Master of Engineering (Mechanical)

Mechanical engineering is concerned with the management of people and resources, the creation and use of new technologies, and the design and development of new materials, processes and products. This mostly involves ‘things that move’, such as motor vehicles, aircraft systems, engines, pumps, gas turbines, industrial plants, air-conditioning/refrigeration systems, manufacturing processes, building services and even space stations.

With a strong focus on design and hands-on experience, graduates can obtain the knowledge of design and engineering sciences through courses such as heat transfer and thermodynamics, dynamics and control, aerodynamics, structural design and solid mechanics, as well as a range of advanced technical coursework in specialist topics.

Career readiness
Potential careers exist in:
> materials engineering
> combustion
> energy technology
> water supply
> mining
> maintenance planning
> bioengineering

Professional accreditation
The Master of Engineering (Mechanical) degree is provisionally accredited by Engineers Australia.
Mechatronic engineering is a discipline that combines mechanics, electronics and computing. Mechatronic engineers may design, construct and maintain intelligent machines, micro-machines, smart structures, intelligent systems, control systems and consumer products, such as cameras and washing machines. Alternatively, they may apply these skills to a fully automated robotic assembly line, or they may be involved with defence technology and automated systems.

The Master of Engineering (Mechatronic) comprises a foundation year and an advanced studies year. The foundation year consists of a set of courses designed to ensure students acquire a high level of expertise in the relevant specialisation. The program gives students the opportunity to study technical courses at an advanced level and the opportunity to engage in a research project.

**Career readiness**

Potential careers exist in:
- vibration control
- robotics
- manufacturing
- production planning
- consumer product design
- pollution control and new materials

**Professional accreditation**

The Master of Engineering (Mechatronic) degree is provisionally accredited by Engineers Australia.

---

Mining engineers are concerned with the extraction and processing of ores from the earth that contain valuable minerals or metals. They are involved in mine design, mining systems, geology, resource estimation, geotechnical engineering, geomechanics, mine ventilation, mine management, mining economics and finance.

The Master of Engineering (Mining) has an emphasis on technical analysis and evaluation of mining systems, including mine design and planning, geomechanics, geotechnical engineering, modelling and simulation, risk and uncertainty, mining geostatistics, mine management and sustainable mining practices.

**Career readiness**

Potential careers include:
- geotechnical engineer
- environmental engineer
- drilling and blast engineer
- ventilation engineer
- mine planning engineer
- geostatistician

**Professional accreditation**

The Master of Engineering (Mining) degree is provisionally accredited by Engineers Australia.

---

The Master of Geostatistics provides theoretical background and intensive practical training in geostatistics, with particular emphasis on its relevance to mineral resource evaluation, geological modelling, geophysical modelling, hydrocarbon reservoir characterisation, and the modelling and prediction of environmental variables.

It is based on practical applications and a major aim is to equip graduates with the techniques necessary for immediate application to problem-solving in industry and applied science.

**Career readiness**

Potential careers include:
- geostatistician
- geotechnical engineer
- geotechnical manager
- petroleum manager
- resource manager
## Master of Marine Engineering

The Master of Marine Engineering offers students the opportunity to further develop and enhance their skills and expertise in this field. The variety of specialised coursework electives and study options enables students to meet their individual career goals, as well as meeting industry-defined objectives. Industry-sponsored students can undertake workplace projects to enhance their practical experience.

The University of Adelaide delivers most of the courses, though courses from a number of other leading universities throughout Australia are also included.

### Career readiness

Potential careers include:

- defence engineer
- marine engineer
- maritime engineer
- naval ship engineer
- systems engineer.

The Master of Petroleum Engineering is designed for graduates of a Bachelor of Engineering (Honours) or equivalent in a discipline other than petroleum engineering. The program is suited to students who wish to gain a petroleum engineering qualification and enter the upstream (exploration and production) part of the petroleum industry. It is also aimed at petro-technical professionals already working in the upstream petroleum industry who wish to advance their technical careers in petroleum engineering by achieving a formal qualification.

A key feature of the petroleum engineering programs at the University of Adelaide is the modern curriculum, integrating core petroleum engineering with geosciences and management, leading to a skill set that meets the needs of industry and complements the way it operates.

### Career readiness

Potential careers include:

- drilling engineer
- reservoir engineer
- production engineer
- oil and gas analyst
- mining engineer
- petroleum engineer.

The Australian School of Petroleum is Australia’s distinguished centre of excellence for petroleum geoscience and engineering research, education and training. The school has strong links with industry in relation to both research and teaching. The Master of Science (Petroleum Geoscience) is comprised of a comprehensive coursework program and research training. The program increases student knowledge in the essential areas of petroleum geoscience and trains students to use industry-standard techniques and software. Students receive a thorough grounding in the principles of exploration and development geoscience, while being exposed to the practical aspects of the oil and gas industry through internationally experienced staff.

### Career readiness

Potential careers include:

- geoscientist
- geophysicist
- geologist
- natural resource manager
- oil and gas analyst
- petroleum engineer.

### Related programs

- Graduate Certificate in Petroleum Geology and Geophysics
- Bachelor of Science (Honours) (Petroleum Geology and Geophysics)
The exposure gained from being part of the University of Adelaide has enabled me to step out of my comfort zone, take risks and network with people from diverse backgrounds.

Dilukshi Inosha Maitribaladasa

Master of Project Management
We teach the skills needed to incubate, grow and execute ideas. In applying these skills, our graduates become proactive and innovative leaders who make a real difference to their organisations, companies and communities.

The Entrepreneurship, Commercialisation and Innovation Centre’s (ECIC) mission is to stimulate innovation through its research, teaching, and community engagement activities, including the Australian eChallenge, ThIncLab and Experts In. Through these extracurricular activities students will have the opportunity to network with business and industry people who are leaders in the entrepreneurial space.

There are additional opportunities for students to enhance their educational journey. For example:

- international study tours, which can be counted towards their degree
- students will be eligible to participate in the Adelaide Advantage, which can give them an edge over other graduates via participation in the Career Readiness Course
- a highly flexible learning environment is provided, with classes taught intensively in a seminar style over two or three-day blocks rather than traditional weekly lectures and tutorials, along with fully online and blended learning available in some programs (online study is subject to the usual student visa requirements).

Professions Internship Program:
The purpose of the Professions Internship Program is to give students the opportunity to gain an insight into the operation of their field of study and develop an understanding of the issues central to their profession. By enabling students to participate in the day-to-day operations of an organisation, and to assess and analyse their experiences with the guidance of a workplace supervisor, the students will develop a critical perspective regarding the issues experienced in their profession and the role of their profession in society.

It has become well accepted within business-related tertiary education and the business and government communities, that practical experience, derived through industry based learning forms such as internships add significant value to a student's education. Industry based learning enables students to gain an insight into their potential profession, to apply the theoretical knowledge they have derived in their degree to the real world and to gain critical work experience which will help them build a career.

For more information, please visit our website: [www.adelaide.edu.au/professions/internships/](http://www.adelaide.edu.au/professions/internships/)
### Master of Applied Innovation and Entrepreneurship

**CRICOS CODE**
086318M

**DURATION**
4 trimesters

**INTAKE**
- February
- September

**INDICATIVE ANNUAL TUITION FEE**
$38,500

**ENQUIRIES**
international.adelaide.edu.au/enquiries
adelaide.edu.au/degree-finder

Innovation and entrepreneurship are at the heart of economic growth and development. An entrepreneurial mindset and the ability to innovate sets individuals and organisations apart – they are more likely to succeed, build sustainable organisations and grow wealth for their stakeholders and the community.

Our innovation and entrepreneurship programs are designed to develop and inspire creative individuals with an interest in starting or developing innovative ventures that have the potential to make significant impact on markets, economies and communities. We offer students the advanced knowledge and practical skills required to assess and implement new ideas, create and manage ambitious new ventures, develop entrepreneurial management practices and create supportive environments that foster and enable innovation.

Innovation and entrepreneurship programs are available in two flexible delivery modes designed to meet the needs of busy professionals: internally via face-to-face intensive sessions, (suitable for those wishing to study on a student visa), and online.

**Areas of specialisation**

As entrepreneurship and innovation is a broad subject area that can be applied across many different industries and occupations, students can use their own chosen field of interest and apply this to their assignments and class discussions. Students can also select electives in their area of interest.

**Professional accreditation**

The Master of Applied Innovation and Entrepreneurship is accredited by the Association to Advance Collegiate Schools of Business (AACSB) International—the highest standard of achievement for business schools worldwide.

### Master of Applied Project Management

**CRICOS CODE**
086352J

**DURATION**
4 trimesters

**INTAKE**
- January
- May
- September

**INDICATIVE ANNUAL TUITION FEE**
$38,500

**ENQUIRIES**
international.adelaide.edu.au/enquiries
adelaide.edu.au/degree-finder

Project Management is a cross-disciplinary field that is vital for innovative activity in organisations and industries. Traditionally Project Management has played an important role in defence, aerospace, construction and engineering. Increasingly Project Management is being applied in areas such as IT, banking and finance, disaster relief recovery, climate change, telecommunications and mining.

Whether students are working on emergent projects, operating in dynamic project environments or collaborating across industry sectors, the Master of Applied Project Management gives them the project delivery expertise required to manage large, complex projects. Students will learn scalable project management concepts, methodologies and tools based on world’s best practice and confidently apply their skills and knowledge to meet their professional and organisational goals. (PMBOK® Guide is a trademark of Project Management Institute, Inc.)

By choosing to study Applied Project Management at the University of Adelaide, students will benefit from our international reputation and world-class education. With a strong emphasis on holistic and systems-based Project Management methods, combined with the practical application of concepts, techniques and tools, our postgraduate programs are tailored to provide students with the skills required to become an innovative leader.

Study is available in two flexible delivery modes designed to meet the needs of busy professionals: internally via face-to-face intensive sessions and www.adelaide.edu.au/degree-finder/mapm_mapmol.html
Career readiness
Applied project management programs provide the knowledge and advanced practical skills to enable graduates to move into higher management positions within their chosen fields. Our programs also greatly enhance the efficiency and output of existing management professionals.

Areas of specialisation
As project management is relevant across a broad range of industries and occupations, students can use their own chosen field of interest and apply this to their assignments, class discussions and research project. Students can also select electives in their area of interest.

Professional accreditation
The University of Adelaide is a Registered Education Provider for the Project Management Institute (PMI®) and is approved by PMI® to issue Professional Development Units for its approved training courses. PMI is a registered trademark of the Project Management Institute.

Indicative degree structure
The availability of all courses is conditional on availability of staff, facilities and sufficient enrolments.

Core courses
- Applied Project Management
- Business Research Methods
- Complex Project Management
- Leadership of Organisations
- Enterprise Transformations
- Managing Project and Systemic Risk
- Portfolio and Programs Management
- Project and Innovation Finance and Accounting
- Project Management Controls
- Project Management Research Project
- Systems Fundamentals

Electives
There is flexibility to select electives from innovation and entrepreneurship and commercialisation programs. Please refer to adelaide.edu.au/degree-finder for an indicative study plan.

*PMBOK® Guide is a trademark of Project Management Institute, Inc.
Master of Innovation and Entrepreneurship

Innovation and entrepreneurship are at the heart of economic growth and development. An entrepreneurial mindset and the ability to innovate sets individuals and organisations - they are more likely to identify sustainable opportunities that will succeed, create and grow wealth for their stakeholders and the community.

The Master of Innovation and Entrepreneurship is designed to develop and inspire creative individuals with an interest in starting or developing innovative ventures that have the potential to make significant impact on markets, economies and communities. We offer students the advanced knowledge and practical skills required to assess and implement new ideas, create and manage ambitious new ventures, develop entrepreneurial management practices and create supportive environments that foster and enable innovation.

Study is available in two flexible delivery modes designed to meet the needs of busy professionals; internally via face-to-face intensive sessions, (suitable for those wishing to study on a student visa), and online.

The Master of Innovation and Entrepreneurship has two streams to choose from, the Applied stream and the Research stream.

Areas of specialisation
As entrepreneurship and innovation is a broad subject area that can be applied across many different industries and occupations, students can use their own chosen field of interest and apply this to their assignments and class discussions. Students can also select electives in their area of interest.

Professional accreditation
The Master of Innovation and Entrepreneurship is accredited by the Association to Advance Collegiate Schools of Business (AACSB) International—the highest standard of achievement for business schools worldwide.

Indicative degree structure
The availability of all courses is conditional on availability of staff, facilities and sufficient enrolments.

Core courses
- Advanced Venture Planning and Communications
- Creativity and Innovation
- Entrepreneurship and Innovation
- Entrepreneurship Research in Practice
- Managing Strategy and Growth
- Marketing Technology and Innovation
- Opportunity Assessment
- Project and Innovation Finance and Accounting
- Research Design
- Business Research Methods
- Research Project in Entrepreneurship

Electives
Refer to [adelaide.edu.au/degree-finder](adelaide.edu.au/degree-finder) for an indicative study plan.

Career readiness
Innovation and entrepreneurship graduates are equipped with practical tools to successfully start and bring to maturity new ventures, or alternatively, grow new revenue streams for employers. Graduates can also work within the innovation and entrepreneurship service sector providing consultancy, advisory, financial, policy or other support services to the small-to-medium enterprises sector.

Graduate Certificate in Family Enterprise

Family Enterprises are unique in many ways and our Graduate Certificate reflects that people working in them are unique too. This program equips participants with the knowledge required to not only grow a family business, but to also make the most of what graduates have at present too.

Our program is taught by people that know family businesses the best. Students will also learn from their cohort who also work in the industry.

Whether students are a first or third generation, or if they happen to work alongside a founding family, this Graduate Certificate will ensure students get the most from the environment they are working in.

Career readiness
The GCFE’s courses ensure that students have the necessary knowledge and skills to pursue a career in the family enterprise sector, either as an adviser to, or a leader in, a family business. The GCFE provides a great opportunity for students to network and learn from each other’s experience in advising, or working in, family businesses.

This may result in new family business clients for advisers or new job opportunities for those currently working in a family business (e.g. a next generation family member having the opportunity to gain work experience outside their family business).

The University of Adelaide Careers Service prepares, inspires and equips students to achieve successful career transitions and connect with industry.
Areas of specialisation

As family enterprise is a broad subject area that can be applied across many different industries and occupations, students can use their own chosen field or interest and apply this to their assignments and class discussions. Through course selection, students also have the opportunity to specialise in one of two main areas in the family business field: (1) Advising business families and (2) leading the family enterprise.

Indicative study plan

Core courses

- Family Business Issues and Perspectives
- Governing the Family Enterprise
- Entrepreneurship and Innovation
- Entrepreneur’s Challenge

Electives

- Leadership of Organisations
- Tax, Estate and Wealth Planning
- Advising Family Enterprise
The Master of Nursing Science allowed me to advance my theoretical knowledge, which equipped me to keep up with the evolution of nursing practice.

Killiana Mafara
Master of Nursing Science
The Faculty of Health and Medical Sciences’ wide range of postgraduate coursework degrees provide the knowledge and leadership skills to ensure graduates are prepared to advance their careers in the health industry, and to make an impact.

In 2017, the Faculty of Health and Medical Sciences entered an exciting new era in health education with the opening of the 14-floor, $246 million Adelaide Health and Medical Sciences (AHMS) building. Located in the heart of the South Australian Health and Biomedical Precinct, alongside the new Royal Adelaide Hospital and the South Australian Health and Medical Research Institute (SAHMRI), the AHMS building will be home to the new Adelaide Dental Hospital, five major research themes and the faculty’s flagship medical and nursing degrees.

The AHMS building will bring together more than 1600 students and 600 health researchers in a vibrant and innovative environment where learning and discovery work hand-in-hand.

Well connected with industry
The Faculty of Health and Medical Sciences degrees are well informed by industry. Many degrees facilitate advisory groups who have key influence in the learning and teaching content to ensure it is meeting today’s needs. Throughout their study students are given the chance to learn from industry experts, providing the opportunity to further develop a range of professional networks.

Our global community
We value the contribution of our international students and the global outlook they bring to the faculty. Our relatively small number of international postgraduate students means that we will get to know you while you study in Adelaide.

Learn from experts
The faculty takes pride in attracting leading academics and researchers to ensure students learn from the best. Staff are experts in their fields, with many recognised as high-cite professors, and have well-regarded international reputations.

Career advancement
The faculty’s extensive selection of postgraduate degrees are designed to empower graduates to progress their career in the health area of their choice. In addition, students who undertake a postgraduate coursework degree often find the degree advantageous to not only their career development, but their current work practices.
Doctor of Clinical Dentistry

Areas of specialisation
Students must complete courses in their specialisation or major area of study. Specialisations are available in:

- Endodontics
- Oral Pathology
- Orthodontics
- Paediatric Dentistry
- Periodontics
- Prosthodontics
- Special Needs Dentistry.

Professional accreditation
All specialisations of the Doctor of Clinical Dentistry are accredited by the Australian Dental Council. Before applying, candidates should ensure the Doctor of Clinical Dentistry from the University of Adelaide is registrable in the country in which they intend to work.

Dentistry clinical placement requirements
Throughout the degree, students will work in the clinical area as members of a health care team. Clinical placements are compulsory for successful completion of the degree, and may be undertaken at a range of public and private health care settings. All costs associated are the responsibility of the student.

The Doctor of Clinical Dentistry is designed to provide specialist dental training through clinical training and research, and offers dentists the chance to consolidate and extend their skills in the specialisation area of their choice. This degree is a professional postgraduate training program, not a PhD degree. As such, throughout the three years of the degree, students work in a clinical area as members of a health care team.

Clinical placements may be undertaken in both metropolitan and rural public and private health care settings.

Graduate Certificate in Alcohol and Drug Studies

CRICOS CODE
Online only

DURATION
6 months full-time

INTAKE
- February

INDICATIVE TOTAL TUITION FEE
$11,000

MINIMUM ENTRY REQUIREMENTS
A relevant 4 year undergraduate degree with a high level of academic achievement.

ADDITIONAL NOTES
This degree is delivered online only. It is not available to international applicants who hold or require an Australian student visa. International applications will however be accepted from applicants who will undertake their studies offshore, or those who hold a valid Australian visa permitting online study.

ENQUIRIES
international.adelaide.edu.au/enquiries

The Graduate Certificate in Alcohol and Drug Studies presents students with the chance to develop a deeper understanding of drugs and alcohol, and the ways in which addiction can be treated. This flexible online degree is ideally suited to professionals who wish to gain a solid foundation in addiction studies while maintaining regular work commitments in Australia or overseas.

Offering a strong academic grounding with a unique, advanced biological focus, the degree teaches students to collect and appraise information and effectively communicate their knowledge and passion. The degree will be beneficial to a range of professionals who interact with drug and alcohol addiction, including medical practitioners, nurses, psychologists, social workers, pharmacists, educators, law enforcement officers, counsellors, and project and policy officers.

The degree is coordinated by experts in addiction, and students are guided through rich online content that allows them to gain a global perspective of addiction issues.

Career readiness
Graduates are prepared to further their careers in a wide range of fields relating to addiction and drug and alcohol issues.
Graduate Diploma in Forensic Odontology

**CRICOS CODE**
002798G

**DURATION**
1 year full-time

**INTAKE**
- February

**INDICATIVE ANNUAL TUITION FEE**
$32,500

**MINIMUM ENTRY REQUIREMENTS**
A Bachelor of Dental Surgery or equivalent or higher, and eligibility to register in Australia.

**ADDITIONAL ENTRY REQUIREMENTS**
Applicants are required to provide a statement of interest for this field of study and a research project outline. Applicants are also required to supply a National Police clearance.

**CLOSING DATE**
30 June 2017

**ENQUIRIES**
international.adelaide.edu.au/enquiries
adelaide.edu.au/degree-finder

The Graduate Diploma in Forensic Odontology is designed to provide practising dentists with skills and experience in the field of forensic odontology. A forensic odontology qualification allows dentists to perform forensic examinations as required by law enforcement agencies, medical examiners or the coroner.

The degree offers an emphasis on practical aspects of forensic odontology and an in-depth understanding of the correct professional handling, examination, interpretation and presentation of dental and oral evidence that may come before the legal authorities.

Before applying, prospective students should consider that the nature of the concepts and casework required are often confronting and may be distressing to some people.

**Career readiness**
Graduates are able to provide an important service to the community in both civil and criminal jurisdictions.

---

Master of Counselling and Psychotherapy

**CRICOS CODE**
091225G

**DURATION**
2 years full-time

**INTAKE**
- February

**INDICATIVE ANNUAL TUITION FEE**
$34,500

**MINIMUM ENTRY REQUIREMENTS**
A bachelor’s degree or equivalent.

**ADDITIONAL ENTRY REQUIREMENTS**
All applicants must provide the following additional information:
- a written statement of up to 500 words outlining their motivation for studying the degree
- names of two referees
- a current CV
- attend an interview (by phone or Skype).

Within ten days of submitting a formal application, candidates must provide all required additional information online directly to the Faculty of Health and Medical Sciences at the following link: health.adelaide.edu.au/admissions/pgcandp/application.html

**ENQUIRIES**
international.adelaide.edu.au/enquiries
adelaide.edu.au/degree-finder

The Master of Counselling and Psychotherapy provides a professional qualification for those who wish to become ethically aware, research-informed and clinically effective counsellors. The degree offers students the chance to develop the personal and professional wisdom that will help them transform the lives of others and enjoy a rewarding career in counselling.

The degree delivers a current theoretical foundation and the opportunity to develop practical skills through hands-on experiential learning. Lecturers are accredited practitioners with experience in their fields, and students participate in small group workshops to practise and improve key skills through case-based learning.

Students gain a core understanding of cognitive behaviour therapy, grief, mindfulness, attachment theory and ethical practice in the first year, and in second year can tailor their studies to their interests via a range of electives and by choosing to undertake either a clinical or research pathway.

Students should be aware that the Master of Counselling and Psychotherapy extends beyond the usual university year, as there is a compulsory course in the second year that starts during the Summer School period (January - February).

Graduates of the clinical pathway can register as an intern with the Psychotherapy and Counselling Federation of Australia (PACFA) and after further clinical experience can apply for full registration. Graduates of the research pathway are prepared for PhD study.

**Career readiness**
Graduates will be prepared to help individuals, couples, families and communities find solutions for emotional, mental and lifestyle issues in a broad range of areas, including youth work, relationship counselling, group therapy, school counselling, return-to-work counselling and private practice.

**Professional accreditation**
The clinical pathway of the Master of Counselling and Psychotherapy has been designed to meet the training requirements for counselling practitioners as outlined by the Psychotherapy and Counselling Federation of Australia (PACFA). This enables graduates to apply for registration with the Counselling Association of South Australia and PACFA, and to be listed with the Australian Register of Counsellors and Psychotherapists (ARCAP).

**Clinical placement requirements**
In order to undertake the compulsory clinical placements in counselling and psychotherapy, students are required to demonstrate the following:
- Australian Health Practitioner Regulation Agency (AHPRA) student registration
- Department for Communities and Social Inclusion screening for Child Related, Aged Care and Vulnerable Persons
- National Police Check
- immunisation and prescribed communicable infections (PCI) screening
- tuberculosis screening
- clinical placement deed poll.

For further information, visit: health.adelaide.edu.au/current-students/clinical-placements/

**Related degrees**
- Graduate Certificate in Counselling and Psychotherapy
- Graduate Diploma in Counselling and Psychotherapy
Master of Clinical Nursing

The Master of Clinical Nursing is aimed at graduates who have completed a three-year undergraduate degree in another discipline and who wish to develop a rewarding career as a registered nurse.

Structured over two years of full-time study, this intensive degree offers students the chance to cultivate the professional knowledge, skills and attitudes that will underpin their future careers in nursing.

Classes are taught in small groups with a focus on clinical placements in hospital and community settings to demonstrate the following:

-Australian Health Practitioner Regulation Authority (AHPRA) student registration
-Department for Communities and Social Inclusion screening for Child Related, Aged Care and Vulnerable Persons
-National Police Check
-immunisation and prescribed communicable infections screening
-tuberculosis screening
-basic life support
-manual handling
-clinical placement deed poll
-hand hygiene.

Students who do not meet the above requirements are at risk of not completing the degree. For further information, visit: health.adelaide.edu.au/current-students/

Professional registration

The Australian Health Practitioner Regulation Authority (AHPRA) is responsible for student registration with the Nursing and Midwifery Board of Australia, which occurs upon enrolment in the degree at no cost to the student.

Upon completion of the degree, graduates are able to apply to AHPRA for registration. To be able to register as a registered nurse, all applicants must comply with the English language skills requirements determined by the NMBA. These requirements can be reviewed at: nursingmidwiferyboard.gov.au

Inherent requirements

Students in the Master of Clinical Nursing find the degree to be substantially demanding. The learning style and assessment techniques are likely to be different from those experienced elsewhere. Clinical placements are compulsory and require significant time commitments, which may include time periods normally regarded as after-hours. Students will need physical and mental stamina, as well as flexibility with hours of attendance.

Students will be required to attend placement experiences that may take place outside the normal academic year and require attendance at metropolitan, rural and possibly remote locations.

For details, visit: health.adelaide.edu.au/nursing/future-students/requirements/

Nursing clinical placement requirements

In order to undertake the compulsory clinical placements in nursing, students are required to demonstrate the following:

-Australian Health Practitioner Regulation Agency (AHPRA) student registration
-Department for Communities and Social Inclusion screening for Child Related, Aged Care and Vulnerable Persons
-National Police Check
-immunisation and prescribed communicable infections screening
-tuberculosis screening
-basic life support
-manual handling
-clinical placement deed poll
-hand hygiene.

Students of the Master of Clinical Nursing are expected to become members of the health care team caring for real patients in a wide range of clinical and non-clinical settings.

Career readiness

Successful completion of the degree allows graduates to gain a professional qualification that is recognised for registration as a nurse Australia-wide, and supports application for registration in a number of countries around the world.

Graduates are prepared for roles in a variety of hospital and community settings in acute care, aged care, mental health, community, rural and specialty areas; as well as in health promotion and aid organisations.

Professional accreditation

The Master of Clinical Nursing is accredited by the Nursing and Midwifery Board of Australia (NMBA).

MINIMUM ENTRY REQUIREMENTS

Successful completion of a bachelor's degree or equivalent with at least a pass average in a field other than nursing. Applicants must have completed a university level 1 Human Biology subject or equivalent.

ENQUIRIES

Master of Health Economics and Policy

The only degree of its type available in Australia, the Master of Health Economics and Policy is ideal for professionals looking to progress their careers in health policy, planning and management; and who wish to make a difference to people’s health around the world.

The degree offers an advanced understanding of how society can manage and improve the health of populations by providing hands-on experience in solving real world health economic issues. With a flexible teaching structure that includes online study options (subject to meeting student visa conditions), modern teaching methods, and a wide variety of elective courses, the degree delivers a strong foundation in economics and allows students to align their studies to their educational background or career aspirations. There is also the option to specialise in health technology assessment. Students learn in small groups with close supervision from leading researchers with international reputations.

Career readiness

Graduates have a high level of skill and knowledge across the fields of health economics, health policy, health care management and health systems, and are well prepared for rewarding careers in a range of sectors nationally and internationally.

MINIMUM ENTRY REQUIREMENTS

A completed Bachelor of Economics or equivalent; or a completed Graduate Certificate in Applied Economics or completed Graduate Diploma in Health Economics from the University of Adelaide. Successful applicants without a Bachelor of Economics degree will receive a packaged offer for the Graduate Certificate in Applied Economics plus Master of Health Economics and Policy (duration of 2 years full-time).

ADDITIONAL ENTRY REQUIREMENTS

Applicants need to provide a curriculum vitae (CV), two referee reports and a 500-word statement supporting their application.

$39,000

MINIMUM ENTRY REQUIREMENTS
Applicants must be experienced surgeons who have completed, or are within one year of completing, the Fellowship of Royal Australasian College of Surgeons (FRACS) or Fellowship of the Royal Australian and New Zealand College of Obstetricians and Gynaecologists (FRANZCOG) degrees, or equivalent. Applicants should have a surgical fellowship or consultan position with a major interest in minimally invasive surgery. A clinical position is not automatically offered with the Master of Minimally Invasive Surgery and applicants are responsible for obtaining a suitable position. Applicants also need to provide a curriculum vitae (CV), two letters of reference, and certified copies of all awards (accompanied by an official translation if not in English).

ADDITIONAL ENTRY REQUIREMENTS
International applicants must be residents in Australia, meet the requirements of the Temporary Business (Long Stay) 457 visa and must register with the Australian Health Practitioner Regulation Agency (AHPRA). This degree is not available to students in Australia on a student visa.

ENQUIRIES
international.adelaide.edu.au/enquiries
adelaide.edu.au/degree-finder

Surgeons who wish to have minimally invasive surgical techniques as an integral part of their career can gain the professional qualification required with the Master of Minimally Invasive Surgery. This degree enables surgeons to consolidate and improve their expertise, and combines an advanced theoretical understanding of minimally invasive surgical procedures with a thorough clinical grounding in laparoscopic surgery. The degree is comprised of online modules with weekly online tutorials, and four clinical immersion sessions throughout the year. These sessions provide surgeons with opportunities to improve clinical skills and gain exposure to robotic surgical techniques.

Areas of specialisation
Opportunities exist for specialisation within the degree. These include, but are not limited to, Colorectal, Renal, Upper GI (upper gastrointestinal), Vascular, Urology, Gynaecology and ENT (ear, nose, throat).

Career readiness
Successful completion of the degree enables surgeons to obtain senior appointments in surgical units where they will be able to perform laparoscopic surgery with a high level of success.

Professional accreditation
The Master of Minimally Invasive Surgery is accredited by the Royal Australasian College of Surgeons.
Master of Nursing Science

For experienced registered nurses with a solid foundation in an area of clinical practice, the Master of Nursing Science provides the opportunity to extend their career in leadership, research and management positions. The degree offers a comprehensive grounding in research methods and critical analysis, and allows students to develop advanced skills in clinical inquiry, practice and leadership required in professional nursing. Research projects are individually supervised by experts in the field of study, and students who wish to continue on with further study to PhD can elect to complete 12 units of research.

The Master of Nursing Science consists of 48 units, with the first 24 comprising the Graduate Diploma in Nursing Science. Students who undertake the graduate diploma component of the degree will develop the knowledge and skills to extend their scope of practice.

International students are required to study in Adelaide and complete courses on-campus in face-to-face learning environments.

Areas of specialisation

A wide range of specialisations are available in:
- Acute Care
- Anaesthesics and Recovery
- Cardiac
- Emergency
- Intensive Care
- Oncology
- Orthopaedic
- Perioperative
- Renal Nursing (not available for the Graduate Diploma Nursing Science).

Career readiness

Graduates of the Master of Nursing Science have the experience and knowledge to prepare them for advanced practice, management and leadership roles.

Related degrees:
- Graduate Certificate in Nursing Science (Infection Control Nursing)
- Graduate Diploma in Nursing Science

The Master of Psychology (Clinical) is designed to provide the knowledge and skills required to practise as a registered psychologist and work with clients with high and low prevalent mental health issues, including anxiety, depression, autism, disability, relationship issues and more.

With small class sizes, face-to-face teaching and three work placements built into the degree, students develop professional competence under the guidance of highly experienced supervisors and academics who are also registered psychologists. These clinical placements, totalling over 1000 hours, offer the chance to develop practical skills with clients across all age ranges, and provide networking opportunities with future employers in mental health and health care settings. This degree also has strong links to a professional community of clinical practitioners.

Prospective applicants should note that entry to this degree is competitive and strict quotas apply.

Career readiness
Clinical psychologists have specialist skills in the assessment, diagnosis and treatment of major mental illnesses and psychological problems. Graduates of the degree find work in a wide variety of public and private settings.

Please note, further postgraduate clinical supervision is required to become an endorsed clinical psychologist.

Professional accreditation
The Master of Psychology (Clinical) is accredited by the Psychology Board of Australia.

Graduate registration
The Master of Psychology (Clinical) prepares graduates for registration as a psychologist with the Psychology Board of Australia (PBA). With additional supervised work experience as prescribed by the PBA, graduates can become clinical psychologists.

The Master of Psychology (Health) is designed to provide the knowledge and skills required to practise as a registered psychologist. One of only two health psychology degrees currently available in Australia, the Master of Psychology (Health) allows students to develop the psychological skills and clinical expertise to work with physical health-related issues.

Learning from teachers who are leaders in the discipline, students gain insight into: the prevention and management of disease and illness; the promotion and maintenance of health; the psychological factors that contribute to illness; and the improvement of the health care system and health policy.

Along with coursework and research components, the degree also provides hands-on experience in health promotion and clinical health psychology, with three supervised industry placements totalling over 1000 hours in a variety of government and non-government organisations.

Prospective applicants should note that entry to this degree is competitive and strict quotas apply.

Career readiness
After graduation, students have the skills to assist people with mental health and chronic physical conditions and are highly sought after for roles in the public and private sector, or can choose to start their own practice. Health psychologists specialise in understanding the relationships between psychological factors and health and illness. Health psychologists practise in two main areas: health promotion and clinical health.

Professional accreditation
The Master of Psychology (Health) is accredited by the Psychology Board of Australia.

Graduate registration
Upon successful completion of the degree, graduates are eligible to apply for full registration with the Psychology Board of Australia and find work in a wide variety of public and private settings. Further postgraduate supervision is required to become an endorsed health psychologist.
Master of Psychology (Organisational and Human Factors)

- **CRICOS CODE**: 042771J
- **DURATION**: 2 years full-time
- **INTAKE**: February
- **INDICATIVE ANNUAL TUITION FEE**: $37,500

**MINIMUM ENTRY REQUIREMENTS**
Entry is available to graduates with an Australian honours degree in psychology or equivalent, comprising a minimum of Second Class, Division A Honours and an individually-conducted research project carrying 33% or more of the year's work.

Applicants who have an overseas honours qualification should supply a certified copy of the assessment of their qualifications by the Australian Psychological Society (APS), and information about the research component of their qualifications.

Students who have undertaken honours in psychology at an accredited Australian university do not need to have their qualifications assessed.

**MERIT SELECTION**
Successful selection is based on:
1. academic results
2. referee reports (applicants are required to name two referees)
3. structured panel interview.

**CLOSING DATE**: 19 October 2017

**ENQUIRIES**
international.adelaide.edu.au/enquiries
adelaide.edu.au/degree-finder

Organisational psychologists inspire change and improve people's experiences in the workplace. Studying the Master of Psychology (Organisational and Human Factors) can lead to a fulfilling career delivering professional psychological services to organisations and their people.

The degree offers a combination of coursework, research and industry placements to ensure students graduate with the skills and knowledge required to establish effective procedures and structures in organisations, and facilitate the development of productive and committed employees, teams and work units.

A unique subject in human factors provides an insight into human safety and ergonomics, and over 1000 hours of clinical placements offer the chance to develop practical skills with patients and build professional networks while studying.

Prospective applicants should note that entry to this degree is competitive and strict quotas apply.

**Career readiness**
Organisational psychologists have a range of career opportunities in change management, human resources, human factors, workplace advice and advocacy, consumer behaviour and marketing, and other areas.

**Professional accreditation**
The Master of Psychology (Organisational and Human Factors) is accredited by the Psychology Board of Australia.

**Graduate registration**
The Master of Psychology (Organisational and Human Factors) prepares graduates for registration as a psychologist with the Psychology Board of Australia (PBA). With additional supervised work experience as prescribed by the PBA, graduates can become organisational psychologists.

Master of Public Health

- **CRICOS CODE**: 081148J
- **DURATION**: 2 years full-time
- **INTAKE**: February, July
- **INDICATIVE ANNUAL TUITION FEE**: $34,500

**MINIMUM ENTRY REQUIREMENTS**
A completed bachelor degree or equivalent with a GPA of 5.0 or higher.

**ENQUIRIES**
international.adelaide.edu.au/enquiries

The Master of Public Health enables professionals to further their career in disease prevention and health promotion, and offers the chance to play a leading role in tackling the major health challenges of the 21st century.

Taught by leading academics, the degree empowers students to think creatively about the policies and practices that prevent disease, prolong life and make a difference to people’s health and the health of populations globally. The Master of Public Health offers a unique combination of innovative teaching, interdisciplinary training, work-integrated learning and the chance to develop strong research skills.

By connecting students with active researchers, practitioners and policymakers, the degree also provides the opportunity to build professional networks and gain hands-on experience in real-life settings while studying. Flexible learning options allow students to balance their studies with work and other commitments, and study plans can be customised to match their goals and aspirations.
Areas of specialisation

- Public Health
- Translational Health Sciences

The Public Health specialisation provides students with a strong grounding in public health and the opportunity to pursue either a research project, dissertation or thesis. The Translational Health Sciences specialisation equips students with the necessary skills to contribute professionally to evidence-based health care in public health and clinical settings. The Population Oral Health specialisation prepares graduates for careers in public health dentistry, or enables them to broaden the population oral health orientation of their current work. Students in all three areas of specialisation undertake a work-based placement as part of their coursework.

Career readiness

Graduates have the knowledge and skills to succeed in careers as public health officers, ministerial advisors, analysts, community development officers and project and research officers. With the advanced knowledge gained throughout the degree, graduates are also able to complement their current practise in areas such as general practice and nursing.

CRICOS CODE

Online only

DURATION

1 year full-time

INTAKE

Applications are accepted until 1 July and classes commence in August of each academic year. (Full information on this degree and its nested awards can be found on Degree Finder)

INDICATIVE ANNUAL TUITION FEE

For fee information, visit: ipas.vcu.edu

MINIMUM ENTRY REQUIREMENTS

A relevant 4 year undergraduate degree with a high level of academic achievement.

All applicants must meet the following requirements as set out by Virginia Commonwealth University (VCU) at www.ipas.vcu.edu/:

- United States (US) students should have completed a 4-year bachelor's degree in an appropriate field of study. Students from outside the US must have completed an honours degree (level 2A or 1) or professional bachelor degree in an appropriate field of study at a recognised tertiary institution.
- Students must have a high level of proficiency in English, demonstrated by completion of a university qualification study in the English language, or by meeting one of the following English language requirements: an IELTS score of 7.0, a TOEFL score of 600 (paper based) or 250 (computer based).
- Students must have good academic references.
- Students must have access to reliable internet and be computer literate.

ADDITIONAL NOTES:

This degree is delivered online only. It is not available to international applicants who hold or require an Australian student visa. International applications will however be accepted from applicants who will undertake their studies offshore, or those who hold a valid Australian visa permitting online study.

ENQUIRIES

international.adelaide.edu.au/enquiries

adelaide.edu.au/degree-finder

The degree is delivered entirely online by three of the world’s leading universities in addiction sciences: the University of Adelaide; Virginia Commonwealth University; and the Institute of Psychiatry, King’s College London. At completion of the degree, students are recognised as graduates from each of these universities.

All aspects of addiction, including pharmacological, psychosocial and public health and policy approaches, are taught by world experts in these subject areas.

As no campus attendance is required, the degree can be undertaken anywhere in the world and students have the opportunity to develop international networks with other students and leading academics.

Applications are accepted until 1 July and classes commence in August of each academic year. For additional information, including admissions criteria, application forms, curriculum outline and tuition fees, visit: www.ipas.vcu.edu

Career readiness

This degree aims to develop professionals who are fully prepared to assume leadership roles in the addictions field throughout the world. It offers students depth and overview of the addiction field and enables them to improve career prospects and move into higher positions in the workforce.

The Master of Science in Addiction Studies does not offer training in clinical and counselling skills.

Related degrees

- Graduate Certificate in International Addiction Studies (nested)
- Graduate Diploma in International Addiction Studies (nested)

Bachelor of Laws
The University of Adelaide’s Law School, Australia’s second oldest, is renowned for the quality of its graduates and research. It is home to a vibrant community of scholars and teachers, committed to furthering an understanding of the principles and operation of the law.

The Adelaide Law School offers a range of high quality postgraduate programs that allow graduates to extend their professional development. Our range of programs includes a strong commercial and international focus.

Postgraduate programs for law graduates
The master’s programs provide legal professionals and law graduates with competitive, high quality and flexible coursework programs for their extended development. Students further develop their scholarly skills in legal research and writing and can access a range of elective courses, including international and comparative commercial law.

> Master of Laws
> Master of Comparative Law (Adelaide/Mannheim)
> Graduate Diploma in Legal Practice (PLT).

The GDLP provides the compulsory practical legal training for Law graduates seeking admission to practice in South Australia.

Postgraduate programs for non-law graduates
High-quality postgraduate programs are also provided for non-law graduates to extend their knowledge in business studies, with a focus in the law.

The Graduate Diploma in Legal Practice (GDLP) provides practical legal training for law graduates. This training is a compulsory requirement to be admitted as a barrister and solicitor in South Australia. Once admitted in South Australia graduates can apply for a Practising Certificate in other states and territories via mutual recognition.

**Career readiness**
Graduates will be qualified to practise law in Australia.
Professional accreditation
Grads can apply for direct admission to practice as a barrister and solicitor in South Australia. Once admitted in South Australia they can also apply for mutual recognition from the admitting authorities of any other Australian state or territory in which they wish to practise.

Indicative degree structure
- Foundations of GDLP
- Civil Litigation Practice
- Commercial and Corporate Practice
- Property Law Practice
- Professional Obligations

Electives
Courses to the value of 6 units from the following:
- Criminal Law Practice
- Family Law Practice
- Employment and Industrial Relations Practice
- Planning and Environmental Law Practice
- Wills and Estates Practice

Candidates must also complete work placements of six weeks (225 hours) as approved by the Law Society of South Australia, and complete 10 Continuing Professional Development hours.

Please note that the GDLP commences earlier than standard enrolments, and commencing students may need to attend classes in either the summer or winter semester as there is the option to commence the program in semester 1 or semester 2 with the range of Foundations courses on offer. For more information regarding these specific dates, please contact the University of Adelaide Law School.

This program is designed for those seeking a master’s degree in business studies with a focus in the law. The Master of Business Law will provide business professionals with a competitive, high quality, and flexible coursework master’s that expands their current horizon. Applicants must hold an undergraduate degree. Entry is competitive and selection will be on the basis of academic merit. Normally a successful applicant would have achieved a credit average or better in their undergraduate degree.

**Research component**

A candidate shall satisfactorily complete a substantial research piece of scholarship. To satisfy this requirement, candidates must complete one of two options.

1. A candidate must satisfactorily complete two research essays (7,000-8,000 word) chosen from any Adelaide law master’s 3 unit courses. These research essays are in addition to any other course assessment requirements. Where a research essay is part of the course assessment, the word limit can be extended to 7,000-8,000 words to satisfy this requirement.

2. A candidate must satisfactorily complete the 6 unit Dissertation course (12,000-15,000 words). Either of these two options will be undertaken once a minimum of 12 units towards the program have been successfully completed by the candidate.

**Career readiness**

The program provides advanced career options in business, management and other professional fields. Note this degree does not provide admission to practice. For admission to practice please see [Bachelor of Laws](adelaide.edu.au/degree-finder) in related programs above.

**Indicative degree structure**

- Core courses
- Advanced Comparative Law (Adelaide)

Please note that this degree does not provide admission to practise law. For admission to practise, please see [Bachelor of Laws](adelaide.edu.au/degree-finder) in the 2018 International Undergraduate Prospectus or visit the Degree Finder website [adelaide.edu.au/degree-finder](adelaide.edu.au/degree-finder) and search for Bachelor of Laws.

The Adelaide Law School at The University of Adelaide and the Faculty of Law at the University of Mannheim jointly offer a Master of Comparative Law. Students spend up to one semester at Adelaide and one semester at Mannheim and undertake a dissertation at their home institution.

The program enables students to study the different systems of law throughout the world, such as common law, civil law and Islamic law. It also enables Australian students to obtain a more detailed understanding of the legal framework in the European Union. It will be conducted entirely in English, but some Australian students proficient in German may choose to study in that language in Germany.

**Areas of specialisation**

- International Business Transactions and Insurance Law in Comparative Perspective
- International and European Law.

**Indicative degree structure**

- Core courses
- Introduction to Australian Law

While the Master of Laws has no official specialisations, students can choose to focus in a number of different study areas, such as the following:

- Commercial Law
- Comparative Law (International)
- Competition Law
- Criminal Law
- Human Rights Law
- Intellectual Property Law
- Industry Specific
- International Law
- Migration Law
- Military Law
- Property Law
- Technology / Internet Law
- Workplace and Regulation Law.

In today’s society, the law reaches into almost every aspect of our lives. Thus, the study of law today is more challenging and intellectually adventurous than it has ever been. Roles for law graduates are expanding significantly and rapidly.

This program will provide legal professionals with competitive, high quality and flexible coursework master’s for their extended development. In addition, the program will appeal to those wishing to further develop their scholarly skills in legal research and writing.

The Master of Laws provides access to a range of areas to suit both domestic and international students proceeding directly from undergraduate study, as well as experienced legal practitioners wishing to specialise. This program includes a range of elective courses suited to those with a particular interest in international and comparative commercial law.

**Career readiness**

This program provides advanced career options in business, management and other professional fields. Note this degree does not provide admission to practice. For admission to practice please see [Bachelor of Laws](adelaide.edu.au/degree-finder).

**Areas of specialisation**

While the Master of Laws has no official specialisations, students can choose to focus in a number of different study areas, such as the following:

- Commercial Law
- Comparative Law (International)
- Competition Law
- Criminal Law
- Human Rights Law
- Intellectual Property Law
- Industry Specific
- International Law
- Migration Law
- Military Law
- Property Law
- Technology / Internet Law
- Workplace and Regulation Law.
Louise Campbell
Bachelor of Mathematical and Computer Sciences

"It has been great to study with like-minded students and find the academic staff to be friendly and supportive. I am enjoying studying what I am passionate about and excited to see what career opportunities lie ahead for me."
In today’s highly technical environment, a degree in mathematical sciences teaches students the universal language required to describe, model and understand the world around them.

At the University of Adelaide, mathematical sciences courses provide valuable training in rigour, logical thinking and mathematical sciences knowledge. Our graduates are highly regarded for their creativity, problem-solving abilities and research skills, and pursue successful careers in their chosen specialisation in a wide range of industries.

Choose your specialisation

Students can specialise in applied mathematics, pure mathematics or statistics.

**Applied mathematics** aims to achieve a balance between mathematical theories and the practical application of mathematics in the world around us. It covers topics such as mathematical methods, fluid mechanics, computational mathematics, financial modelling, mathematical biology and applied probability.

**Pure mathematics** is fundamental to applied mathematics, statistics, computer science, mathematical physics and studies abstract theories built by logical deduction that underpin modern science and technology.

**Statistics** provides the training to enable graduates to solve real world problems by appropriately collecting, analysing and modelling data. Key data that is analysed comes from a range of sources, including surveys, experiments and other studies that generate numerical data.

Be career ready

A postgraduate degree in mathematical sciences from the highly ranked University of Adelaide equips graduates with the theoretical and practical framework to stand out in their chosen profession, spanning areas such as finance, commerce, information technology, scientific research and logistics, and teaching.

**2015 Rhodes Scholar for South Australia**

The University of Adelaide holds a strong tradition of research and teaching excellence across the disciplines of applied mathematics, pure mathematics and statistics. We are proud of our students’ achievements, including the 2015 Rhodes Scholar for South Australia.

**DURATION**

2 years full-time

**INTAKE**

• February
• July

**INDICATIVE ANNUAL TUITION FEE**

$38,500

**ENQUIRIES**

international.adelaide.edu.au/enquiries
adelaide.edu.au/degree-finder

The Master of Mathematical Sciences allows students with a background in a related field to expand their knowledge in mathematical sciences to an advanced level.

Students may specialise by choosing courses in the disciplines of applied mathematics, pure mathematics, and statistics. These courses provide valuable training in academic literacy and research skills, as well as discipline-specific knowledge.

---

Applied mathematics uses mathematical techniques to answer questions about the world around us; such answers may be in the form of insights, explanations, solutions or predictions.

Pure mathematics studies abstract theories built by logical deduction that underpin modern science and technology.

Statistics solves real world problems by appropriately collecting, analysing and modelling data.

**Career readiness**

Graduates have the flexibility and portability to work across a wide variety of industries in analytical and consulting positions. Career opportunities exist in areas such as:

> bioinformatics
> computational engineering
> data analytics
> economic research
> financial analytics
> statistics.
Melanie Walters
PhD in Music

“...My research has helped me to develop my communication skills through presentations to a wide range of different audiences, both in my field and to the general public. I have been able to collaborate with many different musicians and to broaden my musical skills.”
With a long and distinguished history dating back to 1883, the Elder Conservatorium is the oldest tertiary music school in Australia, and widely respected as one of the country’s leading music institutions.

The Elder Conservatorium recognises the significance of music to the cultural life of society. Through its postgraduate programs, covering all professional areas of the music industry, it encourages the development of new parameters of artistic and scholarly endeavour that contribute to the advancement of knowledge and practice in the art of music.

Over the years, the Elder Conservatorium has been a pioneer and a leader. It was one of the first tertiary music institutions to offer degrees in performance and music composition and more recently, installed the first electronic music studio.

The Elder Conservatorium also boasts one of Australia’s longest established and most vibrant jazz programs and has established innovative partnerships with major cultural organisations, including the State Opera, the Adelaide Symphony Orchestra, the Australian String Quartet and the Australian Ballet.

We offer programs for those wishing to become teachers in a variety of settings, or for musicians who wish to focus on performance and technical mastery of a specific area.

Graduate Diploma in Music (Performance and Pedagogy)

CRICOS CODE 056485M
DURATION 1 year full-time
INTAKE • February • July
INDICATIVE ANNUAL TUITION FEE $35,000
ENQUIRIES international.adelaide.edu.au/enquiries
adelaide.edu.au/degree-finder

This program develops students’ skills in pedagogy (learning, teaching and related processes) and performance while developing a thorough understanding of their relationship. The program provides performance courses and pedagogy courses in each year. Two minor recitals with pedagogy related content are undertaken. Performance is taught in weekly one-to-one lessons with performance staff. Pedagogy is taught in seminars and workshops with off-campus teaching practised in selected schools and colleges.

Additional entry requirements
Entry to all music programs is subject to satisfactory academic achievement and audition. Applicants need to provide the details of the specialisation for which they are auditioning when applying. Applicants are required to prepare a program of works containing at least four pieces of different musical styles and/or by different composers, with a total duration of 25 minutes. Classical voice applicants must present works in four languages: English, French, German and Italian. A recording (preferably in DVD format or via Dropbox) must be submitted to the Student Recruitment and Admissions Services. The recording must be clearly labelled with the applicant’s name and instrumental specialisation, and accompanied by a letter of verification (preferably from a teacher) stating that the recording is a true representation of the applicant's performance. A list of pieces studied over the past two years is also required. The audition will also be assessed for music achievement and potential for study at degree level.

Career readiness
Graduates commence dual careers as performers in one or more specialist branches, such as solo performance, chamber music or orchestral playing and secondly as teachers able to function successfully in a variety of settings and circumstances. Subject to local registration or accreditation requirements, graduates may consider primary or secondary level teaching in the private studio, the school and college campus, as well as various teaching modes, such as individual, or small-group.

Graduate Diploma in Music Performance

Students of this program will study performance (classical or jazz), enhancing their technical mastery and repertoire knowledge. Recitals allow students to prepare and present programs of major repertoire and may include solo works, chamber music, orchestral material, concerti or accompaniment. Further skills, complementary to the primary area of performance study, are developed through an individualised project with negotiated learning outcomes and modes of assessment. Teaching methodology includes weekly one-to-one lessons with performance staff.

Additional entry requirements
Entry to all music programs is subject to satisfactory academic achievement and audition. Applicants need to provide the details of the specialisation for which they are auditioning when applying. Applicants are required to prepare a program of works containing at least four pieces of different musical styles and/or by different composers, with a total duration of 25 minutes. Classical voice applicants must present works in four languages: English, French, German and Italian. A recording (preferably in DVD format or via Dropbox) must be submitted to the Student Recruitment and Admissions Services. The recording must be clearly labelled with the applicant’s name and instrumental specialisation, and accompanied by a letter of verification (preferably from a teacher) stating that the recording is a true representation of the applicant’s performance. A list of pieces studied over the past two years is also required. The audition will also be assessed for music achievement and potential for study at degree level.

Career readiness
Graduates from this program have various performance opportunities in public and private practice, and often undertake teaching in the private studio.

Master of Music (Performance Studies)

CRICOS CODE 064439F
DURATION 2 years full-time
INTAKE • February • July
INDICATIVE ANNUAL TUITION FEE $35,000
ENQUIRIES international.adelaide.edu.au/enquiries
adelaide.edu.au/degree-finder

The program provides students with the opportunity to concentrate on music performance and enhance technical mastery within an area of specialisation. Broad knowledge of the repertoire and advanced skills in the practice of the profession are developed. The program focuses on traditional approaches to classical and jazz performance in addition to studies of 20th century music.

Teaching methodology includes weekly one-to-one lessons with performance staff.

Additional entry requirements
Entry to all music programs is subject to satisfactory academic achievement and audition. Applicants need to provide the details of the specialisation for which they are auditioning when applying. Applicants are required to prepare a program of works containing at least four pieces of different musical styles and/or by different composers, with a total duration of 25 minutes. ENQUIRIES
international.adelaide.edu.au/enquiries
adelaide.edu.au/degree-finder

This program develops students’ skills to an advanced level in pedagogy (learning, teaching and related processes) and performance, while developing a thorough understanding of their relationship. The program provides performance courses and pedagogy courses in each year. Two minor recitals with pedagogy related content are undertaken in year 1 and a major recital and a pedagogy research project are undertaken in year 2. Performance is taught in weekly one-to-one lessons with performance staff. Pedagogy is taught in seminars and workshops with off-campus teaching practise in selected schools and colleges.

Additional entry requirements

Entry to all music programs is subject to satisfactory academic achievement and audition. Applicants need to provide the details of the specialisation for which they are auditioning when applying. Applicants are required to prepare a program of works containing at least four pieces of different musical styles and/or by different composers, with a total duration of 25 minutes. Classical voice applicants must present works in four languages: English, French, German and Italian. A recording (preferably in DVD format or via Dropbox) must be submitted to the Student Recruitment and Admissions Services. The recording must be clearly labelled with the applicant’s name and instrumental specialisation, and accompanied by a letter of verification (preferably from a teacher) stating that the recording is a true representation of the applicant’s performance. A list of pieces studied over the past two years is also required. The audition will also be assessed for music achievement and potential for study at degree level.

Career readiness

Graduates commence dual careers as performers in one or more specialist branches, such as solo performance, chamber music or orchestral playing and secondly as teachers able to function successfully in a wide variety of settings and circumstances. Subject to local registration or accreditation requirements, graduates may consider primary, secondary and tertiary level piano teaching in the private studio, the school and college campus, as well as various teaching modes such as individual or small-group.
Learning about cutting edge technologies and developments in the world was of paramount importance in my course selection and search for new knowledge.

Lu Geng
Master of Biotechnology
Underpinned by cutting edge research and industry involvement, our programs create career-ready graduates poised to make an impact on society.

Unlimited careers
Whatever students’ field of study, the University of Adelaide’s science programs enhance their ability to analyse complex problems and solve them creatively, and to actively learn from the world around them. Highly valued by employers, these transferable skills make our graduates desirable in many industries - both those traditionally associated with science and those that aren’t.

Our science graduates, in addition to being well placed to take up the diverse opportunities available in the job market today, will have the means and flexibility to adapt to the new careers and industries of tomorrow.

Teaching led by research and innovation
The Faculty of Sciences offers a range of postgraduate coursework programs that are informed by cutting edge research and underpinned by quality teaching. Students have access to state-of-the-art facilities and learn from expert staff who are leaders in their field. Professionals wishing to strengthen their knowledge in a specialised area can also benefit from our industry knowledge and links.
Doctor of Veterinary Medicine

Inherent requirements
Applicants are required to acknowledge their understanding of the University of Adelaide veterinary degree inherent requirements and vaccination guidelines. These documents can be found under ‘useful links’ by searching this degree on Degree Finder at: adelaide.edu.au/degree-finder

Indicative degree structure
> Clinical Research Project
> Companion Animal Practice
> DVM Professional Skills
> Equine Clinical Practice
> Intensive Production Medicine
> Ruminant Health and Production Practice
> General Pathology
> Systems Pathology
> Veterinary Practice Fundamentals
> Fundamentals of Veterinary Anaesthesia, Diagnostic Imaging and Surgery
> Veterinary Pharmacology and Toxicology
> Veterinary Public Health
> Wildlife and Conservation Practice
> Clinical rotations in:
  - Companion Animal
  - Production Animal
  - Equine Practice
  - Anaesthesia and Analgesia
  - Veterinary Public Health
  - Pathology and Diagnostic Services
  - DVM elective topic
  - Transition to the Veterinary Profession

Electives
Students are able to select an elective topic in the final year, which may include placements outside the University.

Research
A research project is embedded in the first year of the program. Other opportunities to pursue research projects will occur in third-year via the elective topic that can be completed in a research area. An honours year may be pursued between the Bachelor of Science (Veterinary Bioscience) and Doctor of Veterinary Medicine programs.

Master of Bioinformatics

The Master of Bioinformatics is an innovative postgraduate program combining coursework and a major research project. The curriculum is based on the fundamentally interdisciplinary nature of bioinformatics research, with a focus on translational applications of bioinformatic analyses to real world problems in research, human health and agriculture.

The program has a strong experimental and analytical foundation, with a focus on individual data generation technology platforms, as well as developing competitive analytical and research skills. Students will also be exposed to the many interlinked issues in translational bioinformatic research; translation and development, including analytical reproducibility for downstream compliance and regulatory issues; analysis of big data; and project management, team skill development and bioinformatics software development.

Career readiness
Bioinformatics offers rewarding and well-paid careers using advanced technologies that will transform the biomedical and agricultural industries. Career opportunities also exist in research and development, and advisory and consultancy positions in private companies, government departments and universities.
**Indicative degree structure**

The 48-unit master program is made up of 24 units of coursework and 24 units of laboratory-based research. The graduate diploma comprises 24 units of coursework. The master and graduate diploma include all listed core courses and electives.

**Core courses**
- Biology for Bioinformatics
- Frontiers of Biotechnology: Bioinformatics and Systems Modelling
- Bioinformatics Practice
- Research Methods in Bioinformatics
- Statistical Modelling and Inference

OR

- Statistical Modelling
- Specialised Programming

OR

- Mining Big Data
- Algorithm and Data Structure Analysis
- Statistics for Bioinformatics

**Electives**
Courses up to the value of 12 units from the following (if required):
- Advanced Research Platforms
- Drug Discovery and Development
- Stem Cells and Advanced Tissue Culture
- Molecular Microbiology and Vaccines
- Distributed Databases and Data Mining
- Advanced Algorithms
- Algorithm and Data Structure Analysis
- Introduction to Statistical Machine Learning

**Research dissertation**
Students must complete a research dissertation of not longer than 20,000 words:
- Research Project Part 1
- Research Project Part 2

**Master of Biotechnology (Biomedical)**

**ENQUIRIES**
international.adelaide.edu.au/enquiries
adelaide.edu.au/degree-finder

The Master of Biotechnology (Biomedical Science) is an innovative two-year postgraduate program of 48 units. The curriculum is based on the clear convergence and rapid development of technology platforms in biotechnology, and the maturing of the sector to span discovery, research and development activities.

The program has an experimental focus and exposes students to individual technology platforms, as well as developing competitive laboratory and research skills. Students will also be exposed to the many interlinked issues in contemporary biotechnology research; translation and development, including compliance and regulatory issues; high throughput screening; project management; team skill development and exploitation.

Specialist biotechnology course content will focus on biomedical research and applications.

**Career readiness**

Biotechnology is one of the fastest growing global industries, helping to develop better methods of diagnosis and treatment of a wide variety of diseases. There are very strong career opportunities for graduates, particularly those who possess strong laboratory skills combined with an understanding of research and product development.

**Areas of specialisation**

Each student will be expected to complete a research project under the direction of a scientific and industry mentor. The research project is designed to develop the practical and theoretical skills required for real life research projects.

**Indicative degree structure**

The 48-unit master degree comprises 30 units of coursework and 18 units of research. Students will report their research findings in thesis format. The graduate diploma comprises 24 units of coursework. The master and graduate diploma include all listed core courses. The graduate certificate comprises 12 units, and students take three of the core courses indicated below, plus one elective course.

**Core courses**
- Advanced Research Platforms
- Research Communication
- Entrepreneurship and Innovation
- Advanced Research Techniques
- Research Design

**Electives**

Biotechnology electives to the value of 9 units, selected from:
- Bioinformatics and Systems Modelling
- Biomarkers, Detection and Diagnostics
- Drug Discovery and Development
- Molecular Microbiology and Vaccines
- Stem Cells and Advanced Tissue Culture
- Applied Project Management 1
- Creating Wealth Through Internationalisation
- Managing Risk
- Research Processes
- Technology Management and Transfer

A student must complete a research project no longer than 20,000 words and enrol in the following courses:
- Research Project Part 1
- Research Project Part 2
Plant Biotechnology offers careers using advanced technologies and enables students to learn critical thinking, problem solving and bioinformatics into the curriculum.

Career readiness

Biotechnology offers careers using advanced technologies that will transform food production and environmental management. Career opportunities exist in government departments, universities and private companies in research and development, advisory and consultancy positions.

Indicative degree structure

- Foundations of Plant Biotechnology*
- Plant Genomics*
- Molecular Plant Breeding*
- Techniques in Plant Biotechnology**
- Applications of Plant Biotechnology in Production**
- Regulatory Approval for GM Plants**
- Research Concepts in Plant Biotechnology**

A student must complete a research project no longer than 20,000 words and enrol in the following course:
- Research Project (Plant Biotechnology) (24 units)

* Master and graduate diploma courses.
**Master and graduate diploma courses.

The viticulture and wine education programs have an international reputation for excellence. The Waite campus houses state-of-the-art facilities, including its own vineyard and the Hickinbotham Roseworthy Wine Science laboratory.

This program incorporates courses in both viticulture and oenology and qualifies graduates to work as either a viticulturalist, oenologist (winemaker) or in related professions (e.g. hospitality and tourism, and the food and beverage industry).

Viticulture is the study of grape vines and their cultivation, and includes site selection, vineyard establishment, management of pests and diseases and the informed application of irrigation and fertilizer to optimise vineyard yield and grape quality.

The viticulturalist typically works closely with the winemaker to achieve the desired winemaking outcome. The winemaker utilises their training in the science of winemaking (oenology), to process grapes for the production of white, red still and sparkling and fortified wines. The viticulturalist/winemaker often contributes to in-house research, sales and promotion of the finished product.

Throughout the program, there is an emphasis on the key technical methods and sensory (wine tasting) skills required for a career in viticulture and oenology. The Waite campus is co-located with a number of research partners, providing a stimulating and unique environment for training, exposing candidates to the latest technologies and enabling them to learn from leaders in their field.

Career readiness

Well paid career opportunities exist in the grape and wine industry within Australia and elsewhere. Graduates will be qualified to manage a vineyard, direct and carry out vineyard operations, direct wine-making operations and manage the winery.

Indicative degree structure

The master is a 48-unit degree of advanced coursework, including all core courses, a range of electives, and the option to undertake either a 12-unit research option or a 12-unit professional experience component, in either a viticulture or oenology discipline.

Students undertaking the graduate diploma will take the same courses as those undertaking the first year of the master program; satisfactory completion of which will enable a student to apply for the master degree. Graduate diploma students undertake all core courses (except Advances in Wine Science).

Core courses

- Stabilisation and Clarification*
- Sensory Studies*
- Cellar and Winery Waste Management*
- Introductory Winemaking*
- Winemaking at Vintage*
- Viticultural Science*
- Viticultural Methods and Procedures*
- Advances in Wine Science*

Electives

- Wine Packaging and Quality Management
- Research Methodology and Experimentation
- Distillation, Fortified and Sparkling Winemaking
- Fermentation Technology
- Engineering for Viticulture and Oenology
- Soil and Plant Nutrition
- Plant Health
- Communicating Science
- Topics in Soil and Land Systems
- GIS for Agriculture and Natural Resource Management
- Plus other electives from postgraduate programs offered by the faculty, subject to approval by the program coordinator.

Research project or professional experience placement

Students must complete either a research project no longer than 10,000 words or a professional experience placement of at least 10 weeks (375 hours).

Notes
1. Students satisfactorily completing all courses may expect to complete an academic program within the normal duration of that program. Students who have failed courses, or students needing to complete prerequisite courses will take longer.
2. The international student Indicative Annual Fee quoted above is for a standard full-time load of 24 units per year (or 12 units per semester). Tuition fees are reviewed and indexed on a yearly basis and may be subject to annual increases. Prospective students should be aware that their fees may be subject to an increase each year and that they are liable for these fees upon acceptance of their offer. The fees cover the cost of teaching and the cost of student support services. All fees listed are in Australian dollars (AUD). A total tuition fee for 12 units of study is provided for graduate certificates.
3. External program: to apply, please contact the relevant school/department as stated in the detailed program information in this prospectus.
4. Available online only.
5. Available in both internal and external modes; to study externally, please contact the relevant school/department as stated in the detailed program information in this prospectus.
6. All applicants must submit a portfolio and a curriculum vitae with their online application. The portfolio should be of the applicant's own work as a link, pdf, CD/DVD or hard copy, demonstrating manual graphic skills and ability through freehand drawing or sketches, skills in relevant design-related areas, as well as familiarity using a computer-aided design (CAD) software package.
7. Delivered on a trimester basis. Trimesters are compressed study periods which usually run from late January to May, May to August and September to November.
8. Trimester 2 delivery considered on a case-by-case basis.
9. GPA (Grade Point Average) is a numerical index that summarises academic performance on a scale of 0 to 7.0.

**Notes**

1. Students satisfactorily completing all courses may expect to complete an academic program within the normal duration of that program. Students who have failed courses, or students needing to complete prerequisite courses will take longer.

2. The International Student Indicative Annual Fee quoted above is for a standard full-time load of 24 units per year (or 12 units per semester). Tuition fees are reviewed and indexed on a yearly basis and may be subject to annual increases. Students who have failed courses, or students needing to complete prerequisite courses will take longer.

3. External program: to apply, please contact the relevant school/department as stated in the detailed program information in this prospectus.

4. Available online only.

5. Available in both internal and external modes; to study externally, please contact the relevant school/department as stated in the detailed program information in this prospectus.

6. All applicants must submit a portfolio and a curriculum vitae with their application. The portfolio should be of the applicant's own work as a link, pdf, CD/DVD or hard copy, demonstrating manual graphic skills and ability through freehand drawing or sketches, skills in relevant design-related areas, as well as familiarity using computer-aided design (CAD) software package.

7. Delivered on a trimester basis. Trimesters are compressed study periods which usually run from late January to May, May to August and September to November.

8. Trimester 2 delivery considered on a case-by-case basis.

9. GPA (Grade Point Average) is a numerical index that summarises academic performance on a scale of 0 to 7.0.

</table>

Notes

1. Students satisfactorily completing all courses may expect to complete an academic program within the normal duration of that program. Students who have failed courses, or students needing to complete prerequisite courses, will take longer.

2. The international student Indicative Annual Fee quoted above is for a standard full-time load of 24 units per year (or 12 units per semester). Tuition fees are reviewed and indexed on a yearly basis and may be subject to annual increases. Prospective students should be aware that their fees may be subject to an increase each year and that they are liable for these fees upon acceptance of their offer. The fees cover the cost of teaching and the cost of student support services. All fees listed are in Australian dollars (AUD). A total tuition fee for 12 units of study is provided for graduate certificates.

3. External programs: to apply, please contact the relevant school/department as stated in the detailed program information in this prospectus.

4. Available online only.

5. Available in both internal and external modes; to study externally, please contact the relevant school/department as stated in the detailed program information in this prospectus.

6. All applicants must submit a portfolio and a curriculum vitae with their online application. The portfolio should be of the applicant's own work as a link, pdf, CD/DVD or hard copy, demonstrating manual graphic skills and ability through freehand drawing or sketches, skills in relevant design-related areas, as well as familiarity using a computer-aided design (CAD) software package.

7. Delivered on a trimester basis. Trimesters are compressed study periods which usually run from late January to May, May to August and September to November.

8. Trimester 2 delivery considered on a case-by-case basis.

9. GPA (Grade Point Average) is a numerical index that summarises academic performance on a scale of 0 to 7.0.
Advanced standing Status/credit/exemptions granted on the basis of work already completed at another post-secondary institution.

Articulation agreement A formal agreement where study at selected institutions may be counted towards University of Adelaide qualifications.

Assumed knowledge Previously acquired knowledge that will enable understanding of a course or program.

Bachelor degree An undergraduate qualification gained after minimum of three years full-time study. A bachelor program is made up of a range of core (compulsory) courses and elective courses, usually delivered via lectures and tutorials.

Campus The grounds of a university or other institute of higher education.

Combined degree A combined degree program allows students to complete the requirements of two degrees in less time than if the degrees were completed separately. Successful completion results in the award of a single parchment listing the combined degrees. A student may not graduate until the requirements for both degrees have been met.

Confirmation of Enrolment The document sent by the University after receipt of the tuition fee deposit. May be used as proof of student status to apply for a visa.

Core course A compulsory subject taken as part of a program of study.

Course An individual subject taken as part of a program of study.

Coursework program A program of study structured around particular courses, usually delivered via lectures and tutorials.

CRICOS Commonwealth Register of Institutions and Courses for Overseas Students

DIBP Department of Immigration and Border Protection

Diploma Some schools in the University offer diplomas, which usually consist of 1-2 years of full-time coursework, delivered via lectures and tutorials.

Discipline A field or area of study, e.g. engineering, architecture, nursing.

Double degree A double degree program allows students to complete the requirements of two degrees in less time than if the degrees were completed separately. Successful completion results in the award of two degrees with separate parchments. A student may graduate from each degree as soon as the requirements for each degree have been met. For example: Bachelor of Engineering (Chemical) with Bachelor of Arts.

Elective course A non-compulsory subject that may be chosen as part of a program of study.

Exchange agreement An agreement between universities allowing students to undertake 1-2 semesters of their degree program at an overseas institution.

Extra admission requirements Requirements, in addition to the specified qualifications, needed for a student to be accepted into a particular program, e.g. audition, interview, portfolio submission, personal qualities assessment.

Full-time study A standard full-time study load consists of 24 units per academic year, and 12 units per semester. The University and the DIBP considers a 75% study load (9 units per semester or trimester) a full-time load. While international students can enrol in a 75% study load, it is not recommended as it may result in not completing their program within the standard duration. International students are required by DIBP to complete within the specified duration of the program.

Faculty An academic branch in the University, consisting of various schools, e.g. School of Health Sciences.

GEAP (General English for Academic Purposes) A course for students looking to improve their English for a variety of reasons, such as to assist with future academic study or their future career. GEAP by itself is not a direct entry pathway to undergraduate or postgraduate study at the University of Adelaide.

Honours Honours is a one-year full-time (or equivalent part-time) program that allows students to consolidate learning from their undergraduate studies by undertaking research and a thesis.

IELTS The International English Language Testing System, an internationally recognised UK-based test for English language assessment, essential for student visa requirements.

Indicative annual tuition fee The indicative annual tuition fee quoted in this prospectus is based on the standard full-time enrolment load of 24 units per year or 12 units per semester. The fees cover the cost of teaching and the cost of student support services. The quoted fee is reviewed on a yearly basis. Prospective students should be aware that their fees may increase each year and that they are liable for these fees upon acceptance of their offer. Each student will be advised of their fee schedule in their offer of admission to the University. Fees may vary depending on enrolment load, e.g. if students ‘overload’ or ‘underload’, fees may be increased or decreased accordingly. All fees listed are in Australian dollars (AUD$).

Lecture A class on a specific topic presented by a lecturer to a large group of students.

Level A stage or period (generally one year in duration) within a program of study, e.g. Level 1, 2, 3. The depth and complexity of courses increases through each level.

Major sequence A combination of approved courses leading to specialisation within a field of study, completed over one or more years of a degree program.

OSHC Overseas Student Health Cover is compulsory health insurance that provides basic and emergency health cover. It is an essential requirement for international students to obtain a student visa.

Part-time study Any study load that is less than 75%, or 18 units a year. Note that under current student visa regulations, part-time study is not recommended for international students as they are required by the DIBP to complete within the specified duration of the program.

PEP (Pre-enrolment English Program) A direct entry pathway English language program for students that have not met the entry requirements for their chosen award program.

Program A series of courses making up a particular qualification, e.g. Bachelor of Commerce.

Semester The standard length of an individual course. University courses are taught in two semesters: semester 1, from February/March until late June, and semester 2, from July/August until November.

Seminar A small class similar to a tutorial, involving presentations by students.

TOEFL Test of English as a Foreign Language, an internationally recognised US-based English language test.

Tutorial Small, weekly classes led by a tutor or lecturer, where students discuss issues relevant to a particular course.

Unit A value assigned to courses identifying the amount of work involved. Full-time students normally undertake 24 units of study a year.

Glossary

International representatives

The University appoints agents to act as its official international representatives. Agents are located within Australia and in more than 40 countries/regions around the world. These representatives are appointed to:

> provide accurate information about the University of Adelaide and its programs to prospective international students

> advise on admission requirements and choice of programs

> assist with verification of supporting documentation

> assist with the processing and forwarding of the application, and the acceptance and payment, to the University

> assist with visa application, travel, accommodation and pre-departure arrangements.
