A WORLD-CLASS UNIVERSITY IN THE HEART OF ONE OF THE WORLD’S MOST LIVEABLE CITIES*

* Economist Intelligence Unit Global Liveability Index 2019
The University of Adelaide has achieved a five star rating in:

- Teaching
- Research
- Facilities
- Life Sciences and Medicine
- Inclusiveness
- Internationalisation
- Innovation
- Employability

STARS RATED FOR EXCELLENCE
2016
PLUS
The University of Adelaide is recognised as one of Australia’s most respected research intensive universities, committed to tackling the grand challenges of our time and with dedicated staff that are international leaders in their field.

Our undergraduate degrees are world-class, driven by cutting edge research and technology that encourages critical thinking, problem solving, teamwork and communication. The University is focused on preparing students for their careers through employability development activities and internships, while our Industry Engagement Priorities ensures close alignment with the needs of industry.

Located in the heart of Adelaide, and surrounded by the state’s art gallery, museum and library, the University’s beautiful North Terrace campus forms part of the city’s cultural promenade. We warmly welcome students from over 100 countries to our University each year creating a vibrant campus community amongst outstanding facilities. An international orientation program assists students towards a successful transition and provides an insight into local South Australian culture.

The academic environment of the University pursues excellence, values creativity, and gives graduates the opportunity to make a major contribution to the world.

Vice-Chancellor and President
Professor Peter Rathjen, AO
WHY CHOOSE THE UNIVERSITY OF ADELAIDE?

RANKED IN TOP 1% OF UNIVERSITIES WORLDWIDE*  
5 STARS PLUS QS RATING  
ASSOCIATED WITH 5 NOBEL LAUREATES  
MEMBER OF THE GROUP OF EIGHT^  
PRODUCED OVER 110 RHODES SCHOLARS
Founded in 1874, the University of Adelaide is Australia’s third-oldest university and consistently ranks in the top 1% globally and number one in South Australia for tertiary education. Our reputation for excellence and breaking new ground has been forged by a continuous stream of outstanding people. We proudly count among our distinguished alumni five Nobel Laureates and over 100 Rhodes Scholars. Australia’s first female prime minister and Supreme Court judge were also University of Adelaide alumni.

Today, our vibrant culture continues to attract some of the world’s best and brightest—academic leaders from all corners of the globe and students from more than 100 countries.

**Outstanding teaching**
University of Adelaide students learn with the guidance and support of exceptional academic staff. Operating at their disciplines’ cutting edge, they enthusiastically share their passion for new knowledge and encourage students’ own pursuits of world-changing discoveries.

The University also provides a wide range of student support services and opportunities, all of which are detailed in these pages. This nurturing environment—and unwavering commitment to the highest teaching standards—enables students to fulfill their potential and make significant contributions to the world.

**Global research impact**
The University of Adelaide is committed to conducting world-class research with global, real-world impact.

A member of Australia’s prestigious Group of Eight research-intensive universities, we enhance and sustain life for people and planet by addressing the world’s most significant challenges.

Our areas of particular strength include: food and wine; defence and security; health and medicine; engineering and technology; life sciences; mining and energy; and the environment.

**AREAS OF STUDY**
- Health and Medical Sciences
- Sciences
- Business, Law and Economics
- Education, Humanities, Music and Social Sciences
- Engineering, Architecture, Computer and Mathematical Sciences

**OVER 7000 INTERNATIONAL STUDENTS**

**OVER 100 COUNTRIES REPRESENTED IN STUDENT POPULATION**

**27000 STUDENTS**

* Times Higher Education and QS ranking
^ A coalition of Australia’s leading research intensive universities
Adelaide has a bustling, energetic city centre and is renowned for its festivals, cultural life and sporting events. With great shopping, beaches, a cafe culture, affordable student accommodation and friendly residents, Adelaide offers a relaxed lifestyle with all the convenience of city living.
A truly liveable city

Safe and relaxed, Adelaide is ranked as one of the world’s top 10 most liveable cities.

Source: Economist Intelligence Unit Global Liveability Index 2019.

Australia’s most affordable mainland city

Adelaide is one of the most affordable mainland Australian cities, with a cost of living up to 14% lower than Sydney and Melbourne.

Source: Study Adelaide studyadelaide.com

Culturally diverse

South Australians hail from over 120 different countries, creating a wonderful mix of cultures and influences. One in five South Australians were born overseas!
Adelaide is a coastal city, with pristine white sandy beaches that attract thousands for relaxation and recreation in the summer. It takes just 20 minutes on the tram to get from the city centre to the beach.

**HIT THE BEACH**

Adelaide is a coastal city, with pristine white sandy beaches that attract thousands for relaxation and recreation in the summer. It takes just 20 minutes on the tram to get from the city centre to the beach.
CAFÉ CULTURE

Adelaide is one of Australia’s most cosmopolitan cities, with an array of cafés, restaurants and shops reflecting the diversity of its ethnic communities. Adelaide is reputed to have more cafés and restaurants per head of population than any other city in Australia.

LIVE CENTRALLY

Student accommodation is more affordable in Adelaide than in many other Australian cities, and much of it is in the heart of the CBD. Many students can simply walk to their lectures.
Adelaide is a vibrant city that’s easy to navigate. Broad, spacious boulevards accommodate an efficient network of public buses, trains and trams, with international students receiving the same discounts as locals.

South Australia is known as the festival state of Australia because of the large number of national and international cultural and sporting festivals it hosts per year.
SHOPPING

Adelaide boasts a range of shopping experiences comparable to anywhere in Australia. Within the CBD, Rundle Mall has the biggest concentration of department and chain stores, while within walking distance are trendy boutiques, pubs and cafés.

CLIMATE

Warm, dry summers and short, mild winters. Over 300 days of sunshine per year.

The University of Adelaide has three campuses in South Australia: North Terrace, Roseworthy and Waite, and a new campus at Melbourne.
The University's main campus on North Terrace is renowned for its historic architecture and lively atmosphere. Located in the heart of Adelaide’s central business and shopping district, the campus is adjacent to the State Library, Festival Theatre, South Australian Museum, Art Gallery of South Australia, Adelaide Zoo, and Botanic Gardens. The University’s Adelaide Health and Medical Sciences building is also within walking distance, in the South Australian Health and Biomedical Precinct.
The Waite campus is home to the internationally renowned Waite Research Institute—the largest agricultural research institute in the southern hemisphere and third largest in the world. A number of research partners are also co-located there. Staff and students work closely with these organisations, providing a unique opportunity for collaboration on national and international research projects. Research areas include wine, plant biotechnology, plant breeding, sustainable agriculture and land management.

The campus is located eight kilometres south of the city centre and is easily accessible by public transport and a Waite-North Terrace campus shuttle bus service. Campus services include a childcare centre, library, cafe, gym and sporting facilities.
Roseworthy campus is an internationally renowned centre for excellence in dryland agriculture, natural resource management and animal production. Set on over 1,600 hectares of land, it is home to South Australia’s only veterinary school. It features an AUD $37 million veterinary clinic, where students can gain clinical experience while studying.

The campus is located 55 kilometres north of Adelaide and 10 kilometres from the town of Gawler (population 26,000). Access is available by a North Terrace-Roseworthy campus shuttle bus. Campus services include student accommodation, a swimming pool, library, cafe and fitness centre.

Our Melbourne campus is located on the western fringe of the city in Docklands. The free city circle tram stops at our front door, and there is high-end shopping, cinemas and hotels in the neighbourhood.

We offer a selection of degree programs at both the undergraduate and postgraduate levels. For information about the campus visit: www.adelaide.edu.au/melbourne
We'll support you on your journey
The University offers a range of support services to help international students succeed at university.

Friendly staff are available to help students manage their studies, assist with student visa-related queries, help with health or disability needs, support students as they fit into their new life in Adelaide, and help solve personal problems. In addition, doctors at the North Terrace campus’ Health Practice can provide students with year-round health support.

**International Student Support**
Ongoing, one-on-one support from international student advisors, orientation and social programs for all students, and assistance with Confirmation of Enrolment (CoE) and student visa-related queries.
[ua.edu.au/iss](http://ua.edu.au/iss)

**Careers Service**
Advice and workshops to help students develop employability skills, a Career Hub database of employment opportunities, and annual career-related events including the Careers Expo.

**Writing Centre**
Support with writing academic English through one-on-one advice from writing mentors, workshops, and comprehensive support resources.
[adelaide.edu.au/writingcentre](http://adelaide.edu.au/writingcentre)

**Maths Learning Centre**
Help for all students to develop mathematics skills at every level, with drop-in sessions, lectures, games, and resources.
[adelaide.edu.au/mathslearning](http://adelaide.edu.au/mathslearning)

**Childcare**
Full-time and part-time care for children of students and staff, located on the North Terrace and Waite campuses.
[adelaide.edu.au/childcare](http://adelaide.edu.au/childcare)

**Counselling Support**
Professional and confidential one-on-one support for students encountering issues that affect their study and life.
[adelaide.edu.au/counselling](http://adelaide.edu.au/counselling)

**Disability Support**
Support for all students who have an ongoing medical condition, to help them focus on their studies.

**Elite Athlete Support**
Support to help student athletes balance their academic and sporting commitments, by providing a flexible and responsive approach to study.

**Health Practice**
Comprehensive health care for all students and staff, including male and female doctors (GPs), health checks, immunisations, and mental health support.

**Library**
One of the state’s most extensive research collections, quiet study spaces, and support from specialist research librarians.
[adelaide.edu.au/library](http://adelaide.edu.au/library)

**Peer Assisted Study Sessions (PASS)**
Regular extracurricular sessions led by student mentors to help students improve their grades in specific courses.
[adelaide.edu.au/pass](http://adelaide.edu.au/pass)
The University of Adelaide offers a stimulating environment where students are encouraged to take part in a wide range of extracurricular activities.
Social programs
international.adelaide.edu.au/life-on-campus/social-programs-clubs-and-sports
The University offers a variety of social programs to help international students adjust to their studies and make new friends. These include ongoing English conversation practice (Talking with Aussies), regular culturally-themed social nights (Language and Cultural Engagement program), a chance to improve intercultural and employability skills (Global IQ Connect) and opportunities to develop leadership and employability skills (Peer Mentor program).

StudyAdelaide
studyadelaide.com
StudyAdelaide provides information and support to students both before they arrive in Adelaide and after they settle into life in their new home. It conducts a busy schedule of events and activities each year. These include everything from a welcome ceremony with the Lord Mayor, international student awards, career advancement workshops, wine education functions, regional trips and social events, such as sports days.

Accommodation plays an important part in building a solid foundation for academic success.

Students benefit from the advantages that come from choosing to study in a city where accommodation of all types, including our University-managed accommodation, is not only accessible but affordable.

The University recommends students adopt the RECAS approach to identifying an accommodation option to suit their individual needs and support a positive educational experience.

- Research all available accommodation options
- Establish a realistic budget
- Consider the value of managed student accommodation
- Avoid extended temporary accommodation
- Seek assistance from the University Accommodation Service

Students unfamiliar with Adelaide are encouraged to consider living in managed student accommodation during their first year of university.

Managed student accommodation provides new students with the opportunity to become better acquainted with the city, settle into their academic program and make new friends, without having to worry about the challenges of the private rental market.
Long-term student accommodation
adelaide.edu.au/accommodation

The University assists international students to obtain suitable longer-term housing. Students may choose any of the following options.

The University of Adelaide Village

The University of Adelaide Village is the largest of our accommodation properties. The Village is home to over 400 students, who experience the safety and security of having access to University staff on-site, 24 hours a day, seven days a week.

Students need only bring their personal belongings, as furniture, kitchen appliances, utilities (including electricity), phone and Internet are all included in the accommodation fees. The only additional costs are for meals (students must cook and clean for themselves) and the on-site, coin-operated laundry facilities.

Roseworthy Residential College

This accommodation is operated by the University and is only available to students of the University’s Roseworthy campus, offering them the opportunity to enjoy the benefits of on-campus residential living.

Independent residential colleges

There are five independent residential colleges situated in North Adelaide that offer accommodation to students. These independent residential colleges are privately owned and operated. They are not owned or operated by the University.

Students can contact the residential colleges directly to better understand what’s available. These residential colleges include: Aquinas, Lincoln, St Ann’s, St Mark’s and Kathleen Lumley College.

Commercial student accommodation

Commercial student accommodation refers to purpose-built off-campus student accommodation facilities, run by private management companies not affiliated with the University of Adelaide. These facilities offer fully-furnished, self-contained apartments that give students flexibility to live alone or share with others. There are also rooms for couples.

In addition to rent, students may need to budget for additional expenses, including:

- gas
- electricity
- telephone connection (optional)
- Internet connection (optional).

Places in commercial student accommodation facilities are offered on a 6 or 12-month fixed-term lease. It’s important to note that these facilities are not directly affiliated with the University of Adelaide and students are advised to inspect them before committing.

Private rental and share accommodation

Affordable share accommodation can also be found in the private rental market, so the University offers a rental database (adelaide.edu.au/accommodation) for our students’ exclusive use.

Our enrolled students can access the database from our Accommodation Service, Level 4, Hub Central, North Terrace campus, with a user name and password. The database is only promoted among the University community, and most accommodation listings are offered by people affiliated with us who would like to share their room/property with a University of Adelaide student.

Students wishing to find share or rental accommodation when they arrive in Adelaide are encouraged to book temporary accommodation in the first instance. Once in Adelaide, students should visit the University’s Accommodation Service for information on all available options and support in identifying and securing quality long-term living arrangements. Students are discouraged from sending money from offshore to secure share or rental accommodation prior to inspecting it.

### LONG-TERM STUDENT ACCOMMODATION OPTIONS

This table matches long-term student accommodation options to individual needs.

<table>
<thead>
<tr>
<th>Type</th>

<td>Students looking for an environment that provides a residential lifestyle with other peers who are living away from home.</td>
</tr>
<tr>
<td>Independent living</td>
<td>Share/rental accommodation</td>
<td>Students with the skills and experience to enter into tenancy arrangements and pursue an independent lifestyle.</td>
</tr>
</tbody>
</table>
Accommodation for families
Students accompanied by family members will find private rental accommodation in houses or apartments the most suitable accommodation option.
It’s easier for an individual student to initially travel to Adelaide on their own to arrange suitable permanent family accommodation. Spouses and children who arrive later can then move straight in.

Arrival reception and temporary accommodation
Temporary accommodation and arrival reception services are available to commencing international students. Eligible students can book an arrival reception service and be met by a University representative at Adelaide Airport, via a domestic or international flight. Students will then be transported to their accommodation. Eligible students who choose not to secure long-term managed student accommodation for their arrival in Adelaide may also be eligible for seven nights of temporary accommodation booked through the University. It is important to note that temporary accommodation options arranged through the University are unlikely to be extended further than a period of seven nights due to high demand for short-term accommodation during the traditional student intake periods.
For more information on eligibility criteria, arrival reception and temporary accommodation services, contact Accommodation Services (see below).

For more information, visit: adelaide.edu.au/accommodation
Incidental costs
Prospective students should allow at least AUD $500 per year for textbooks and basic study materials. Depending on the degree, other costs may include: specialist equipment (e.g. laboratory coats, microscopes, stethoscopes); optional supplementary reading and academic program materials; field trips; and expenses such as thesis preparation, printing and binding.

Accommodation
Although living in Adelaide is more affordable than many other major cities, accommodation remains students’ largest variable expense. It can cost anywhere from around AUD $135 per week for share accommodation outside the city centre to AUD $259 per week (including electricity, water, gas and unlimited Wi-Fi) for University-managed accommodation within the city centre. The average rent for a private studio apartment in the CBD is approximately AUD $400 per week.

Application fee
An application fee of AUD $110 must be paid with the University of Adelaide undergraduate online application. An exemption may apply for some government or externally-sponsored students.

Tuition fees
International students are required to pay international student tuition fees, which cover the cost of teaching and many student support services. The indicative annual tuition fee quoted in this prospectus is based on the standard full-time enrolment load of 24 units per year, or 12 units per semester. The quoted fee is reviewed annually and may increase in future years. Fees may also vary depending on enrolment load.

New international students are required to pay a tuition fee deposit when accepting an offer of admission. After enrolment, students are then invoiced for the balance of their fees in that enrolment period. The University invoices students (or their sponsor) each enrolment period according to students’ enrolment load.

Student Services and Amenities Fee
International students commencing in 2021 will be required to pay an annual Student Services and Amenities Fee. This covers activities such as clubs, sporting and recreational activities, and many other services. The fee was AUD $308 for 2020 and is indexed annually.

For more information, visit: adelaide.edu.au/student/finance/ssaf

Student Fees Refund Policy
All applicants must read the University’s policy on refunds and adjustments before accepting an offer of admission. The policy complies with all requirements for tuition fee refunds stipulated in the Education Services for Overseas Students Act 2000 (ESOS), associated Australian Government regulations, and the ESOS National Code of Practice (2018).

For policy details, visit: adelaide.edu.au/policies/4343

For information about refund administration and refund amounts, visit: adelaide.edu.au/student/finance/refunds

Health and medical
Student visa holders and their dependants are required to have health insurance for the duration of their student visa through the Overseas Student Health Cover (OSHC) scheme. The University’s preferred OSHC provider is Allianz Global Assistance. Visit: allianzassistancehealth.com.au/en/student-visa-oshc

For additional information, please refer to: international.adelaide.edu.au/student-support/support-services

As part of planning, applicants need to consider the financial requirements before applying at the University, and are advised to set a realistic budget.
Students with families

International students who bring their families to Australia will need to take into account additional costs associated with health cover, housing, food, transport, childcare and education. For information and advice, visit: internationalstudents.sa.edu.au/en/students/dependants

Part-time work

Many international students and their dependants hope to obtain part-time work to supplement funds for living costs. While this may be possible, we recommend that students do not rely on it for essential expenses.

Obtaining a job is not guaranteed and can take time. Students should also be aware that the workload for many degrees is intense, so they may not have time to undertake employment.

International students who do find part-time work should be aware that they have the same workplace rights as all other workers in Australia. For more information on working while studying, visit: homeaffairs.gov.au/trav/stud

Additional information and advice about your workplace rights and obligations is available at: fairwork.gov.au/find-help-for/visa-holders-and-migrants

Change to permanent resident status

Different quota restrictions (imposed by the University and the Australian Government) apply to admissions for international students than for Australian residents.

International students whose immigration status changes to Australian Permanent Resident will be required to transfer to a domestic fee-paying place. They may subsequently apply to transfer into a Commonwealth-supported place, depending on their degree.

Scholarships

A number of scholarships will be available for international students who wish to study at the University of Adelaide commencing in 2021. For information on the application process, minimum eligibility criteria and important deadlines, visit international.adelaide.edu.au/admissions/scholarships

A selection of scholarships are also available from the Australian Government. For information on these, visit: australiaawards.gov.au

All scholarship details are subject to change, so interested students are encouraged to check these websites regularly.

STUDY-RELATED COSTS

This should be viewed as a guide only, as costs can vary significantly from one student to another. These are basic living costs at the time of publication and do not include program tuition fees, costs for textbooks, other study-related needs, running a car, medical expenses, or any luxuries.

** The Department of Home Affairs requires all students to have health insurance for the duration of their visa. Visa length varies and is slightly longer than the length of a student’s degree. The fee quoted here is for 12 month’s cover.

# Approximate cost for standard examination only. Additional costs may be incurred if more comprehensive medical exams are required.

^ Surcharge may apply to some subsequent student visa applications.
English is the language of instruction at the University of Adelaide, therefore proficiency in speaking, reading, writing and listening to English is essential.

The University accepts the following English language tests (except where otherwise specified):

- IELTS (International English Language Testing System) Academic Test
- TOEFL (Test of English as a Foreign Language)
- Pearson Test of English (Academic)
- C1 Advanced formerly known as Cambridge Certificate in English: Advanced (CAE)
- Occupational English Test (Health Sciences only)

Other evidence of English proficiency may be accepted in individual cases.

Students whose English test score levels do not satisfy the University’s minimum requirements will need to satisfactorily complete an intensive English language program before being admitted to the University of Adelaide.

The University can arrange an appropriate Academic English Pre-enrolment English Program (PEP) in Adelaide at the English Language Centre (refer to page 28). An offer will be included for eligible students.

These programs provide an alternative entry pathway for prospective students who have received offers to the University conditional upon English proficiency. Upon successful completion of the PEP at the required level, students can be granted entry into the majority of degrees at the University.

For more information, visit: international.adelaide.edu.au/admissions/how-to-apply/admission-requirements#english-language-requirements

These entry requirements are correct at the time of printing. For up-to-date information visit international.adelaide.edu.au/admissions/how-to-apply/admission-requirements

The University of Adelaide reserves the right to make the final decision regarding admission to the University.

* Applicants seeking entry to these degrees must present the required IELTS/TOEFL/Pearson/CAE/OET scores to meet the English language proficiency requirements and are not permitted to undertake an Academic English PEP pathway.
The University’s English Language Centre (ELC) provides outstanding academic English, general English programs and English teacher training services for international students and groups.

**Academic English PEP Pathway**

The University of Adelaide offers an academic English pathway for students who have not met their undergraduate degree’s minimum English language entry requirements.

This is a direct entry pathway into further studies at the University of Adelaide. The length of the program depends on the applicant’s English proficiency test score.

Students who successfully complete the Pre-enrolment English Program (PEP) at the required level do not need to sit another English test before entering their University degree.

The PEP is offered in lengths of 10, 15, 20 and 25 weeks. For more information on the PEP visit: adelaide.edu.au/elc/courses/pep

**Academic English PEP Pathway – Extended**

The PEP Extended 30 and 35 week courses combine General English for Academic Purposes (GEAP) classes (see below), and Pre-enrolment English Program (PEP) classes.

Commencing in the GEAP allows students to develop the fundamental linguistic building blocks of grammar and vocabulary for academic level study, before progressing to English classes specifically tailored for students entering an award program.

- PEP Extended 30 week students will complete 5 weeks of GEAP before commencing 25 weeks of PEP classes.
- PEP Extended 35 week students will complete 10 weeks of GEAP before commencing 25 weeks of PEP classes.

**Eligibility**

To find out which PEP they are eligible for, students should refer to the diagram opposite.

**Other programs**

**Academic English (GEAP)**

Our General English for Academic Purposes (GEAP) program is for students wishing to develop effective oral and written communication skills—and boost their learning confidence—at one of the most prestigious universities in Australia.

Delivered in the University of Adelaide’s academic environment and attracting students from all around the world, GEAP is offered in five levels of language proficiency—from elementary through to advanced.

Delivered in the University of Adelaide’s academic environment and attracting students from all around the world, GEAP is offered in five levels of language proficiency—from elementary through to advanced.

All levels focus on developing speaking, listening, reading and writing skills, with academic tasks added as the student’s proficiency increases. Students can choose to enrol for anywhere from five to 45 weeks.

**Group Study Tour programs**

Group Study Tour programs offer an ideal mix of academic excellence and cultural experience for groups of international students or professionals looking for a rewarding Australian experience.

Programs are tailored to each group’s specific needs and can be for any length of time, but are usually between two and eight weeks. Homestay accommodation can also be included. Academic sessions can focus on general English tuition or a specific discipline or interest, while cultural activities include excursions to destinations of cultural, historical, geographical and social interest.

**TOEFL Test**

The Test of English as a Foreign Language Internet-based Test (TOEFL iBT) measures students’ proficiency in speaking, reading, writing and listening to ensure they can communicate their ideas and interact in real life, classroom and campus situations.

The TOEFL iBT is accepted at all Australian universities and can be taken at the University of Adelaide. Tests are held regularly throughout the year at our ELC.

For more information and dates, visit: adelaide.edu.au/elc/toefl

**Academic English PEP Pathway program timelines and costs**

In addition to the fees below, an enrolment fee of AUD $295 will apply to Academic English Pathway programs. For trimester dates and fees please visit: adelaide.edu.au/elc
This diagram shows: the IELTS scores required for entry into PEP programs of various lengths; and the amount of time it takes most students to become proficient enough to enter undergraduate degrees requiring an overall IELTS score of 6.5, with no band less than 6.0 (or equivalent). TOEFL, Pearson and C1 Advanced tests are also accepted.

**ACADEMIC ENGLISH (PEP) ENTRY REQUIREMENTS**

<table>
<thead>
<tr>
<th>IELTS overall 5.0 and no band less than 4.0</th>
<th>PEP EXTENDED - 35 weeks*</th>
</tr>
</thead>
<tbody>
<tr>
<td>IELTS overall 5.0 and no band less than 4.5</td>
<td>PEP EXTENDED - 30 weeks*</td>

<td>PEP - 10 weeks</td>
</tr>
<tr>
<td>IELTS overall 6.0 and no band less than 5.5</td>
<td></td>
</tr>
</tbody>
</table>

TOEFL, Pearson and C1 Advanced tests are also accepted.

**DIRECT ENTRY** to undergraduate program with IELTS 6.5 with all band scores at 6.0 or equivalent

* Students in PEP Extended 35 week and 30 week courses will first participate in General English for Academic Purposes (GEAP) classes until the 25 week PEP intake and then take classes with other PEP students.

**IMPORTANT INFORMATION**

For students applying for degrees with higher English language requirements, or with an English test score other than IELTS.

Some undergraduate degrees require a higher level of English ability. When studying a PEP in combination with a degree requiring an overall IELTS score greater than 6.5, PEP entry requirements are higher than those shown in the tables.

Please note that, as well as the IELTS test, the ELC accepts the TOEFL iBT, TOEFL PBT, Pearson and C1 Advanced for entry into the PEP.

For more information about scores required, visit: adelaide.edu.au/elc/courses/pep/entry-requirements

APPLICATION INFORMATION

Applicants should be aware of their specific degree’s admission and student visa requirements before applying to the University.

Undergraduate entry requirements
For general information on specific degree requirements, consult the relevant degree descriptions in this prospectus, or search Degree Finder: adelaide.edu.au/degree-finder
Qualifications recognised for undergraduate entry are shown on this page, and a table listing all degrees, prerequisites, and the minimum entry requirement for students completing these qualifications can be found on pages 108-115.
Students with qualifications obtained in the South Pacific islands, Japan, Korea, Philippines, Saudi Arabia or Taiwan are advised to complete a Foundation Studies program (see page 35) to prepare for entry into the University’s undergraduate degrees. International students must also meet English language requirements. See page 26.
For more information about deadlines, visit: international.adelaide.edu.au/admissions/how-to-apply

Additional selection criteria
For some University of Adelaide degrees, other selection criteria are considered in addition to academic qualifications. For example, our music programs require applicants to undertake an audition. Medicine, dentistry and oral health applicants are required to undertake a University Clinical Aptitude Test (UCAT) and—if successful—attend an interview. Information about additional selection criteria is included in the degree information section of this prospectus.

Students aged under 18 at commencement of studies
Special arrangements are required for students aged under 18. Any student who has not turned 18 before their studies commence must either:
- live with a parent
- live with an eligible relative in Adelaide, or
- have their parents agree to guardianship arrangements organised by the University (additional fees apply).
Guardianship arrangements include prescribed housing placements and compulsory welfare monitoring services up until the student’s eighteenth birthday. (Available only to students who will be 17 years of age upon commencement of studies.)
For more information, visit: international.adelaide.edu.au/admissions/students-under-the-age-of-18

Deferral of admission
Applicants who have been offered a place in a degree may apply to defer their enrolment for up to two years from their original date of admission.
Exceptions apply to some degrees, such as music degrees and some degrees in the Faculty of Health and Medical Sciences.

Credit for previous study
In some cases, international students may be credited with advanced standing (status/exemptions) on the basis of previous studies at another institution.
Applicants seeking advanced standing must submit detailed syllabuses (course outlines) of the subjects they’ve completed with their application.

Student personal information
Under Australia’s strict privacy laws there are very limited circumstances in which the University can release personal or academic information about a student. Such information will usually only be released to Australian government departments where legislatively required or in a health or safety emergency.
The University cannot release any information about a student’s results, attendance, application status or any other matters to their parents.
For more information on the University’s Privacy Policy and Management Plan, visit: adelaide.edu.au/policies/62

* Applicants are advised to apply at least six weeks prior to the commencement of their preferred intake, with the exception of those applying for the degrees listed above. Applicants who apply after that date will have their applications considered for the most suitable intake given their circumstances.

Dates given are a guide only and are subject to change. Please see the Application Deadlines website for up-to-date information: [international.adelaide.edu.au/admissions/how-to-apply/application-deadlines](http://international.adelaide.edu.au/admissions/how-to-apply/application-deadlines)
APPLICATION PATHWAY

STEP 1

APPLICATION

Apply through one of the University’s official international representatives or via our online application system at: international.adelaide.edu.au/admissions/how-to-apply/apply-now

Payment and documents required

• A non-refundable AUD $110 application fee.
• Original or certified copies of student academic qualifications, transcripts, English language test results (if applicable) and any other supporting documents.

Copies can be certified by an authorised staff member of the University of Adelaide, Justice of the Peace, Notary Public, consular official, commissioner for taking affidavits, registrar of the University from which the transcript or parchment is issued, police officer or examining authority.

Australian Year 12 applicants and International Baccalaureate applicants – special group procedure

International students currently completing an Australian Year 12 qualification (in Australia or in any other country) or International Baccalaureate in Australia apply through the South Australian Tertiary Admissions Centre (SATAC) via Uniweb, at: satac.edu.au

International Baccalaureate applicants who are studying overseas apply to: international.adelaide.edu.au/admissions/how-to-apply/apply-now

Medical Studies, Dental Surgery and Oral Health degree applicants

All applicants for these degrees must register and book in for the University Clinical Aptitude Test (UCAT ANZ) and lodge their applications via the online application system before 30 June 2020. The UCAT ANZ booking deadline is 11 May 2020. UCAT fees range from AUD $299 for tests undertaken in Australia or New Zealand to AUD $374 for tests taken overseas/outside Australia and New Zealand. Late fees apply for any bookings made between 12 May to 18 May 2020.

Further information and contact details

For SATAC codes and University of Adelaide cut-off scores, visit: adelaide.edu.au/degree-finder

To apply directly to the University, visit: international.adelaide.edu.au/admissions/how-to-apply/apply-now

International representatives

For a full listing of the University’s international representatives visit: international.adelaide.edu.au/admissions/find-a-university-of-adelaide-agent

STEP 2

APPLICATION ASSESSMENT

All applications will be assessed. Successful applicants will be emailed directly (if they applied directly), or via their official representative.

Successful applicants will receive the following:

• Offer Statement
• Acceptance Agreement
• Genuine Temporary Entrant (GTE) Questionnaire*
• Payment Form
• Declaration of Financial Capacity
• Acceptance Information Leaflet.

Unsuccessful applicants will be informed by email.

Students studying an Australian Year 12 qualification

Examination results will be sent directly to SATAC by all relevant examining boards. When results are available, SATAC will email offer details directly to the email address nominated on the student’s SATAC application.

* Where applicable.

STEP 3

ACCEPT OFFER

• Complete and sign all pages of the Offer Statement and Acceptance Agreement.
• Complete the Declaration of Financial Capacity.
• Arrange payment of tuition fee deposit as per instructions in Offer letter.
• Arrange for payment of Overseas Student Health Cover (OSHC) for duration of visa.
• Arrange for payment of English language program fees (if applicable).
• Provide a copy of the Personal Details section of the student’s passport.

Conditional offers

Students who receive a conditional offer must provide documentary evidence that they’ve met any outstanding conditions, and send the relevant documentation directly with their acceptance documentation. A new Offer Statement is not sent unless required for scholarship or sponsorship purposes.
STEP 4
CONFIRMATION OF ENROLMENT
After receiving the acceptance documentation listed, the University sends applicants a Confirmation of Enrolment (CoE). Students should use the CoE to apply for an Australian student visa.

STEP 5
OBTAIN INTERNATIONAL STUDENT VISA
Applicants should lodge their student visa application immediately. This can be done with the assistance of a recognised University of Adelaide agent or representative. Or, if applying directly, by visiting homeaffairs.gov.au/trav/visa/Immi to create an ImmiAccount.

STEP 6
PREPARE FOR DEPARTURE
After making travel arrangements, students should consider their accommodation options by visiting adelaide.edu.au/accommodation While there, they can also book an airport pickup and temporary accommodation if required (fees apply).

STEP 7
ENROLMENT
Prior to orientation, students will receive information about obtaining their University login and password. Then, when enrolments open, students will be able to login to the Access Adelaide section of the University website and enrol.

STEP 8
ARRIVE AND ATTEND ORIENTATION
Students should aim to arrive in Adelaide in time to attend the international student orientation program. Participation in this program will help familiarise students with the city and campus, and provide a chance to meet staff and other students and make friends before commencing studies.

For more information, visit: international.adelaide.edu.au/preparing-to-arrive/orientation

WELCOME TO THE UNIVERSITY OF ADELAIDE!
PREPARING FOR THE UNIVERSITY OF ADELAIDE
Foundation studies

Programs to help international students prepare for tertiary study in Australia by bridging the gap between where their schooling ends and their university degree begins.

Foundation studies programs are designed to meet the special needs of international students who do not meet the academic requirements for direct entry into University of Adelaide undergraduate degrees. They are recommended for students with secondary qualifications from regions including the South Pacific islands, Japan, Korea, Philippines, Saudi Arabia or Taiwan.

Foundation studies programs help students develop the required level of language and independent study skills needed for successful university study, and provide a supportive environment where friendships can be developed with both international and Australian students.

Students are enrolled by the University and upon successful completion are guaranteed admission to most University of Adelaide degrees (provided they meet the degree’s minimum entry requirements).

The University of Adelaide College

college.adelaide.edu.au

The University of Adelaide College is our preferred pathway partner and provides students with dedicated pathways to undergraduate studies at the University.

The College’s Adelaide Campus is located in the heart of the city of Adelaide, South Australia and enrols students from Australia and around the world.

The College’s Adelaide campus students are part of the University of Adelaide; they often study on campus, share the University’s resources and facilities, and—like all our other students—can make the most of the university experience with access to the student union, clubs and societies.

The University of Adelaide College is an ideal choice for students who:

• do not meet the high school (Year 12 or equivalent) standard to begin tertiary education at the University of Adelaide (Foundation Studies program)
• are seeking an alternative entry pathway to a bachelor degree at the University of Adelaide as a result of not achieving the required direct entry requirements (Degree Transfer program)
• require additional subjects, such as Specialist Mathematics, Maths Studies or a science discipline, to enter their bachelor degree (knowledge gap subjects).

Foundation Studies

college.adelaide.edu.au/foundation-studies

Students may access the College’s Foundation Studies program upon completing Year 11 or equivalent. The program is designed to provide students with the core subject knowledge, vital study skills and academic and pastoral support to seamlessly transition into the first year of undergraduate studies at the University of Adelaide.

The Foundation Studies program takes 8–10 months to complete, with intakes in February, July and October.

Degree Transfer

college.adelaide.edu.au/programs/degree-transfer

For students whose qualifications are just below the minimum academic requirements for admission into their chosen University of Adelaide undergraduate degree, the College offers a Degree Transfer program that enables entry into the second year of select programs.

The Degree Transfer program delivers the first-year syllabus and assessment of selected bachelor degrees at the University of Adelaide. The program includes additional learning support, especially for English language proficiency and difficult concepts in subjects such as mathematics.

In many cases, Degree Transfer students study on the University of Adelaide’s North Terrace campus, in classrooms with University of Adelaide students.

Upon successful completion of the program, students are offered direct entry into the second year of university, with full credit for first-year subjects successfully completed in the undergraduate program (provided adequate grades are achieved).

Flexibility is provided through several intakes throughout the year, and course entry points.

The University of Adelaide College is operated by Kaplan Higher Education Pty Ltd. They deliver pathway programs and services on behalf of the University as part of a third party agreement.

Foundation Studies and Degree Transfer programs (The University of Adelaide) CRICOS 00123M

English language programs (Kaplan) CRICOS 01127E

ENGLISH

Pre-sessional General Academic English program available if required.
Eynesbury College

Eynesbury College welcomes students from all over the world. Its education style is designed to give students the best opportunity to progress on to university. Eynesbury offers English Language, Senior High School (Years 10, 11 & 12), Foundation Studies and Diploma programs.

With small classes, flexible timetables and outstanding academic support, Eynesbury will ensure students develop the learning skills necessary to succeed at university and beyond.

Eynesbury is conveniently located in the centre of the city, close to the University of Adelaide, major retail shopping and the Adelaide Central Market.

Foundation Studies

Eynesbury’s Foundation Studies Program is specifically designed for international students. With a 96% student satisfaction rating for its teaching quality and student support, the program has provided an excellent pathway into first-year degrees at the University of Adelaide since 1992. Key to Eynesbury’s success is the personalised attention it can provide our students due to the small size of its classes.

The program takes 9-11 months to complete, with intakes in January, April and October. An extended option is also available in January and October for students who need 15 months to prepare for university entry.

Diploma

Eynesbury offers diplomas in Business, Engineering and Computing & IT. These programs provide a pathway into a corresponding degree at the University of Adelaide, with up to one full year of credit. The diplomas take 8-12 months to complete, with intakes in February, June and October.

Diploma Studies programs

Eynesbury also offer a Diploma of Business Studies and a Diploma of Computing & IT Studies. These programs take 16-24 months to complete and are eligible to students with equivalent Year 11 qualifications. On successful completion of the Diploma Studies programs, students are eligible to progress to a corresponding degree at the University of Adelaide with up to one full year of credit. Intakes are in February, June and October.

Other foundation studies programs

The University of Adelaide recognises all foundation programs taught by Australian universities (or their partnered providers). Other foundation programs will be considered on a case-by-case basis.

TAFE SA

tafesa.edu.au/international

The University of Adelaide offers formal pathways for many degrees in conjunction with TAFE SA. By studying a Certificate IV, Diploma, Advanced Diploma or Associate Degree, students can often meet the entry requirements for University of Adelaide degrees*. For some degrees, completed TAFE SA qualifications may also be counted as credit.

CRICOS Provider Number 00092B

* Students must also meet the English Language Entry Requirements.
University Senior College (USC) is a senior secondary independent school based on the University of Adelaide’s grounds. The College is dedicated to supporting students through an academic pathway leading to university. It offers English language-intensive courses for overseas students (ELICOS) and the South Australian Certificate of Education (SACE, Years 10, 11 and 12).

Students learn in a vibrant and stimulating environment that encourages collaboration, being located adjacent to numerous other research-oriented and otherwise significant organisations. These include the South Australian Museum, Adelaide Zoo, Adelaide Botanic Gardens, Art Gallery of South Australia, Migration Museum and Adelaide Magistrates Court.

USC is committed to developing exceptional graduate attributes in students, all of which are embedded in its curriculum, mentoring program, student-led activities and student governance. Its specialist staff, many of whom are leaders in their fields, help every student flourish through personalised learning and intellectual challenge.

Modelling the belief to succeed, they work purposefully to provide the best opportunities and outcomes for students in the senior years. All SACE subjects are taught in classes that include local and international students. USC is one of the biggest feeder schools to universities in South Australia (in particular the University of Adelaide), with over 90% of its graduates offered entry into their first preference degree.

International students will complete USC’s Intensive English Program before entering Year 11 classes. Additionally, students will develop their language skills in English, Mathematics, Science and Commerce subjects; as well as participate in intercultural learning opportunities.

CRICOS Provider Number 02375G
ARCHITECTURE
Architecture and the related built environment disciplines are not merely about providing efficient shelter or high-yielding investment opportunities. They are also about great design and a desire to make the world a better, more habitable place.

Based in a part of the world that experiences hot, sun-soaked summers and has always had to carefully manage water and energy resources, our University has attracted many world-leading experts in sustainability and eco design. Additionally, the city we call home has arguably the largest and most dynamic creative arts scene in Australia. This unique landscape provides an ideal environment in which to hone your technical and creative design skills for a complex, changing world.

Students of our School of Architecture and Built Environment benefit from opportunities to travel overseas and interstate as part of their degree, allowing them to learn valuable aspects of design from other cultures.

Upon graduation, they will also be well placed to pursue their careers far and wide, with our postgraduate degrees being recognised by all relevant Australian professional accreditation bodies. These include:

- Australian Institute of Architects
- Architectural Practice Board of South Australia
- Australian Institute of Landscape Architects
- Planning Institute of Australia
- Royal Institution of Chartered Surveyors

**Architecture points of difference**

- Learn from our Industry Professors—all practising architects with industry experience.
- Immerse yourself in other cultures and learn about their approach to design.
- Access our state-of-the-art model-making laboratory and computer-aided architectural design studios.

**BACHELOR OF ARCHITECTURAL DESIGN**

The blueprint for your future

Design goes far beyond the visual. It responds to possibilities and limits, to hopes and needs. It’s equal parts creative and calculated. Architectural design is about understanding landscapes and the way humans create places within them. Architecture, landscape architecture and urban design share the purpose of aiding society while creating structural works of art.

**What will you do?**

Our Bachelor of Architectural Design develops concrete skills and encourages big picture thinking. You will:

- visit notable building sites, landscapes, gardens and exhibitions
- gain high-level practical design and model-making skills
- practise computer and hand based drawing techniques
- explore relevant theory, history, tradition and innovation
- consider issues of ecology and environment
- learn how to formulate effective proposals.

**Where could it take you?**

Our graduates apply design skills in all sorts of rewarding careers, and take on specialised roles through postgraduate study. You might restore beautiful old buildings or be a micro-home master. You could create and preserve natural landscapes and life cycles. Perhaps you’ll design the next iconic skyscraper or opera house.

**Professional accreditation**

Please note that to practise as an architect or landscape architect, you must complete a professionally accredited combination of degrees in your chosen discipline.

We offer the following choices.

- Bachelor of Architectural Design followed by Master of Architecture recognised by the Australian Institute of Architects and accredited by the Architectural Practice Board of South Australia.
- Bachelor of Architectural Design followed by Master of Landscape Architecture recognised and accredited by the Australian Institute of Landscape Architects.
- Bachelor of Architectural Design followed by Master of Planning (Urban Design) recognised and accredited by the Planning Institute of Australia.
- Bachelor of Architectural Design followed by Master of Property recognised and accredited by the Royal Institution of Chartered Surveyors.
- Bachelor of Architectural Design followed by Master of Construction Management recognised and accredited by the Royal Institution of Chartered Surveyors.
Arts at the University of Adelaide gives you the skill set and qualification for a successful career well beyond your first job. With 34 majors and minors to choose from, your career options are as diverse as the study areas we offer.

You’ll gain deep discipline knowledge paired with transferable skills in communication, problem solving and research in a flexible degree tailored to your interests.

**Arts points of difference**
- Cultivate in depth subject matter expertise and superior research skills
- Gain professional experience through an Arts Internship
- Customise your degree with multiple study areas for enhanced career options.

**Jamie Ling**
Bachelor of Arts

“Studying at the University of Adelaide enables me to attain high quality of education while making meaningful connections. The friendliness of staff members and the comfortable environment of the university enable me to excel in my studies.”

**INTERNATIONAL 2021 SELECTION RANK** 70

**CAMPUS**  
North Terrace  
**DURATION** 3 years full-time

**INTAKES** February and July. Students commencing in July please note some core courses, electives and language part 1 courses may only be offered in semester 1. Please contact the Faculty of Arts for help with planning your degree.

**INDICATIVE ANNUAL TUITION FEE** $35,000

A Bachelor of Arts lets you dive into higher learning with flexibility and freedom. We support your interests in the broad and vital study of history, society, culture and creativity. The University of Adelaide is highest ranked for Arts in South Australia. From Classics to Criminology, Gender Studies to Geography—you can choose from the greatest number of study areas in the state.

**What will you do?**

Based on North Terrace, you’ll study in the centre of Adelaide’s cultural hub, surrounded by iconic establishments and festivals. You will:

- experience a modern learning program taught with a global perspective  
- learn from deeply passionate and knowledgeable academics  
- build a suite of skills in critical thinking, communication, and research  
- form strong networks with your peers and teachers  
- develop positive connections in government, business and the community sector through internships  
- gain international experience through optional exchanges or study tours.

You’ll focus your interests in any of the following areas:

- Anthropology  
- Art History and Visual Culture  
- Australian Studies  
- Chinese Studies  
- Classics  
- Creative Writing  
- Criminology  
- Cultural Studies  
- Digital Humanities  
- Economics  
- Education  
- English  
- French Studies  
- Gender Studies

- Geography, Environment and Population  
- German Studies  
- History  
- Indigenous Knowledges and Society  
- Indonesian Studies  
- International Business*  
- International Development  
- Italian Studies  
- Japanese Studies  
- Linguistics  
- Management*  
- Marketing*  
- Mathematical Sciences  
- Media  
- Modern Greek Studies  
- Music  
- Music Education (minor only)  
- Philosophy  
- Politics and International Relations  
- Psychology^  
- Sociology  
- Spanish Studies

**Where could it take you?**

You could become a leader in government, media or the thriving international arts community. You might be a voice for those who’ve been mistreated in the workforce. Perhaps you’ll conduct life-changing research into mental health and wellbeing. With your strong understanding of human society, you’ll be ready to shape your place within it.

* These majors cannot be taken as a first major  
^ Further study is required to become a registered psychologist

**BACHELOR OF ARTS (ADVANCED)**

**CRICOS CODE** 075802A  
**INTERNATIONAL 2021 SELECTION RANK** 95

**CAMPUS**  
North Terrace  
**DURATION** 3 years full-time

**INTAKES** February and July. Students commencing in July please note some core courses, electives and language part 1 courses may only be offered in semester 1. Please contact the Faculty of Arts for help with planning your degree.

**INDICATIVE ANNUAL TUITION FEE** $35,000

Curious about a wide range of ideas and issues? High-achieving? Articulate? The Bachelor of Arts (Advanced) is a distinctive degree for inquisitive students who want to excel.

**What will you do?**

As a member of a small but distinctive community within the wider University, you’ll work to take your knowledge and skills to a higher level. You will:

- enrol in Level 2 courses from first-year  
- partner with an academic mentor who will support and encourage your intellectual development  
- take a set of courses specifically designed for high-achieving students  
- research and write a major independent research project on a topic of your choice  
- attend exclusive events such as guest presentations, workshops, seminars, industry talks and social gatherings  
- have significant input into the design and running of the Arts’ advanced program.

You’ll also have the flexibility to tailor your degree to suit your career goals. You can choose to extend your abilities in two majors. Or, take just one and complement it with a set of elective courses focused on developing your leadership and citizenship.

You have no fewer than 32 majors to select from:

- Anthropology  
- Art History and Visual Cultures  
- Australian Studies  
- Chinese Studies  
- Classics  
- Creative Writing  
- Criminology  
- Cultural Studies  
- Digital Humanities  
- Economics  
- Education  
- English  
- French Studies  
- Gender Studies
**BACHELOR OF CREATIVE ARTS**

**CRICOS CODE** 097521F  
**INTERNATIONAL 2021 SELECTION RANK** 70

**CAMPUS** North Terrace  
**DURATION** 3 years full-time  
**INTAKES** February and July

**INDICATIVE ANNUAL TUITION FEE** $35,000

creativeartsfactsheet@adelaide.edu.au

Creative artists are performers, designers, writers, animators, curators and directors. They keep the world of art and culture spinning. They make people think, laugh and feel.

Studying creative arts means practising new ways of making while learning from those who’ve inspired and entertained throughout history.

**What will you do?**

Our Bachelor of Creative Arts develops individual creativity and knowledge. You will:

• choose from production courses like creative writing, music and media techniques  
• study theory in your areas of interest, from philosophy and ethics to art history and visual cultures  
• gain valuable work experience within the creative arts industry  
• attend masterclasses with visiting international academics  
• go behind the scenes of a major arts festival through our partnership with the Adelaide Festival  
• network with leaders and artists at the field’s cutting edge.

You can also pursue your creative interests overseas with optional exchanges and study tours.

**Where could it take you?**

Creative Arts graduates follow and fashion all sorts of exciting career pathways. You could work with arts organisations or spotlight new creative talent. You might publish fiction, biographies or reviews for film festivals. Perhaps you’ll nurture creativity in young people through music programs.

**BACHELOR OF CRIMINOLOGY**

**CRICOS CODE** 089645E  
**INTERNATIONAL 2021 SELECTION RANK** 75

**CAMPUS** North Terrace  
**DURATION** 3 years full-time

**INTAKES** February and July. Students commencing in July please note some core courses, electives and language part 1 courses may only be offered in semester 1. Please contact the Faculty of Arts for help with planning your degree.

**INDICATIVE ANNUAL TUITION FEE** $35,000

adelaide.edu.au/degree-finder

Criminology is the study of crime and deviance – seeking to understand the causes of crime, the extent and consequences of crime, as well as methods of crime prevention.

**What will you do?**

Our Bachelor of Criminology prepares you to think critically about crime and the criminal justice sector, as you:

• examine criminal and anti-social behaviour  
• debate the causes and consequences of crime  
• investigate policing and crime prevention techniques  
• question justice and corrections systems  
• learn how to conduct research on emerging threats, such as cybercrime, organised crime, and terrorism.

**Where could it take you?**

Criminology graduates are empowered to pursue a wide range of different employment opportunities. You may choose to work in an operational role in the criminal justice system, or within one of the critical external organisations supporting the sector. You may follow a path into other professional settings, such as policy-making, research, analysis or education. You could combine your degree in criminology with other degrees, majors or minors, to pursue a career in law, forensics or psychology, amongst others.
**BACHELOR OF ENVIRONMENTAL POLICY AND MANAGEMENT**

**CRICOS CODE** 06732C

**INTERNATIONAL 2021 SELECTION RANK** 70

**CAMPUS** North Terrace

**DURATION** 3 years full-time

**INTAKES** February and July. Students commencing in July please note some core courses, electives and language part 1 courses may only be offered in semester 1. Please contact the Faculty of Arts for help with planning your degree.

**INDICATIVE ANNUAL TUITION FEE** $41,000

Earth is home to 7 billion people—and we’re having an impact. Businesses dump waste into the oceans. Loggers cut down precious forests. Animals species die out. Environmental policy makers help us live with the planet rather than ruining it: from the protection of cultures and ecosystems, to helping us live sustainably within our cities. They are the decision makers who think about our impact and help prevent it. They stand between the environment and processes that exploit it.

**What will you do?**

Our Bachelor of Environmental Policy and Management challenges you to make a positive impact. You will:

- research how humans affect natural environments
- explore approaches to conservation and sustainability in cities and ecosystems
- create policy and plans for managing environmental problems
- learn about climate change, biodiversity, population growth and resource scarcity.

There are also travel opportunities. We offer exchanges and study tours where you’ll tackle real-life problems in vulnerable communities.

**Where could it take you?**

Environmental expertise is in demand – and a growing industry. You could spend your days outdoors as a park ranger or draw up plans for big business and all levels of government. You might set up programs to restore habitats for local wildlife. Perhaps you’ll work towards sustainability in remote communities, build policy around renewable energy, or get involved with ecotourism. You could be an advisor to Ministers, work for Indigenous groups or prepare environmental and social impact assessments. This degree offers extremely diverse and exciting work opportunities.

**BACHELOR OF INTERNATIONAL DEVELOPMENT**

**CRICOS CODE** 081343E

**INTERNATIONAL 2021 SELECTION RANK** 70

**CAMPUS** North Terrace

**DURATION** 3 years full-time

**INTAKES** February and July. Students commencing in July please note some core courses, electives and language part 1 courses may only be offered in semester 1. Please contact the Faculty of Arts for help with planning your degree.

**INDICATIVE ANNUAL TUITION FEE** $35,000

Why is there global inequality? Why are some countries poor, or struggling with conflict, while others forge ahead? Our Bachelor of International Development equips you to tackle these and other big questions surrounding the world’s greatest political, economic, cultural and ecological challenges.

**What will you do?**

We’ll support you in developing the skills, knowledge and attributes needed to make a real and positive difference in the lives of others. You will:

- examine how government, business, non-governmental organisations and individuals influence development
- learn how development groups function and make money
- explore the major contributing factors leading to issues such as extreme poverty, poor health, fragile governance, inequality and environmental vulnerability
- analyse possible solutions to issues in the developing world
- practise a range of skills required in the field.

You can also get in-country experience by studying abroad. The University partners with the Australian Consortium for ‘In-Country’ Indonesian Studies. We offer programs with Scope Global in Vietnam, Indonesia, Africa and Asia.

**Where could it take you?**

Graduates go on to all sorts of rewarding careers that focus on strengthening the wellbeing of communities in developing countries. You could be an international aid agency employee or humanitarian aid worker. You might provide hands-on support in disaster zones. Perhaps you’ll be a project officer or conduct research for a non-governmental organisation.

**BACHELOR OF INTERNATIONAL RELATIONS**

**CRICOS CODE** 022438C

**INTERNATIONAL 2021 SELECTION RANK** 70

**CAMPUS** North Terrace

**DURATION** 3 years full-time

**INTAKES** February and July. Students commencing in July please note some core courses, electives and language part 1 courses may only be offered in semester 1. Please contact the Faculty of Arts for help with planning your degree.

**INDICATIVE ANNUAL TUITION FEE** $35,000

In what ways is the world changing? What influence do we have? How can we reduce conflict?

International relations is about interactions across oceans and borders. It examines the political and societal forces of international change. To study it is to delve into history, politics, economics, anthropology and law.

**What will you do?**

In our Bachelor of International Relations you can specialise in international security, global justice, human rights, global governance, rising powers, or global citizenship. In core studies you’ll:

- get to know key actors in global politics and the challenges they face
- consider relationships that involve power, authority, influence, conflict, cooperation, selfishness and altruism
- analyse political institutions and business-government relations
- learn about the history of globalisation and foreign-policy formation.

You can also boost your employability and cross-cultural awareness by:

- studying a language
- going on study tours
- enrolling in overseas exchange programs.

**Where could it take you?**

Our graduates emerge ready for exciting roles across Australia and around the world. You might find yourself at the United Nations as a human rights officer. You could work as a policy advisor or an intelligence analyst in a government agency or a non-governmental organisation. You might be a public relations expert or marketing consultant for an international business. Perhaps you’ll write political news. Or you could work in foreign affairs, strengthening partnerships and providing aid to developing countries.
Do you have a passion for languages? Are you fascinated by their complexity and deep entwinement with culture? Do you want to travel and connect in richer ways? In a changing world, the study of languages has never been more relevant.

**What will you do?**

Our Bachelor of Languages is interactive and immersive. Whether you’ve studied a language to Year 12 level (or equivalent) or are just setting out on your language journey, we offer different streams to cater to your level of knowledge. You will:

- develop proficiency in one or more languages
- enhance your knowledge of the cultures they originate from
- heighten your awareness of language systems
- understand language’s role in society
- build a greater appreciation of cultural diversity.

Our majors are:

- Chinese Studies
- French Studies
- German Studies
- Indonesian Studies
- Italian Studies
- Japanese Studies
- Modern Greek Studies
- Spanish Studies.

You can also minor in Linguistics.

**Where could it take you?**

Language graduates have an upper hand in all sorts of exciting careers. You could find work as a foreign service officer in embassies, resolving international conflicts. You might translate for politicians or celebrities. You could become a professional linguist or help migrants access support.
Media is everywhere: TV, radio, movies, magazines, video games, social networks. It’s all the forms of mass communication we engage with every day.

Media professionals are analysers, creators and communicators. They understand people, technology and popular culture. They use words, images and sounds to tell stories and influence audiences.

What will you do?
Our Bachelor of Media offers eight different specialisations. Depending on your interests, you’ll get chances to:
• understand the media industry and issues shaping it
• gain real-world experience with major media networks and outlets
• read the news live on air to audiences of thousands
• record, mix, master and produce sonic projects
• design digital entertainment experiences
• explore Japanese media cultures through study tours in Kyoto.

Where could it take you?
Our graduates go on to all sorts of exciting media careers. In film alone you could write scripts, produce soundtracks or animate special effects. You might design posters, interview actors, promote on social media—even host the awards afterwards!

We offer unique specialisations in:
• Social Media and Digital Production
• Immersive Media
• Visual Design
• Story Production
• Journalism
• Marketing
• Photographic Imaging
• Film Studies
• Popular Music
• Sonic Arts

SILEETA KOR
Bachelor of Media (Marketing)

“ A Bachelor of Media, majoring in Marketing can lead me into communications, business, advertising, public relations or social media operations. I will have the skills and training to be highly employable in a variety of fields. ”
**BACHELOR OF PEACE AND CONFLICT STUDIES**

**CRICOS CODE** 09730G  
**INTERNATIONAL 2021 SELECTION RANK** 70  
**CAMPUS** North Terrace  
**DURATION** 3 years full-time  
**INTAKES** February and July. Students commencing in July please note some core courses electives and language part 1 courses may only be offered in semester 1. Please contact the Faculty of Arts for help with planning your degree.

**INDICATIVE ANNUAL TUITION FEE** $35,000

[adelaide.edu.au/degree-finder](adelaide.edu.au/degree-finder) Search peace

With widespread crisis and conflict around the globe, there is an urgent need for individuals who possess the knowledge, skills and creativity to help communities affected by conflict recover, reconcile, and rebuild through peacebuilding strategies and initiatives.

**What will you do?**

Our Bachelor of Peace and Conflict Studies is the first and only degree of its kind offered in South Australia. It is designed to equip you with the knowledge and skills needed to make positive contributions to conflict resolution and peacebuilding initiatives around the world. You will:

- explore the history of peace, conflict, justice and human rights from a global perspective
- learn to manage, resolve and transform conflict through contemporary practices
- hear from professionals working in the humanitarian sector
- major or minor in a complementary discipline of your choice
- go on optional study tours to see how peace has successfully been built in nations affected by conflict
- be able to study abroad at international universities.

**Where could it take you?**

There are many exciting employment opportunities in the humanitarian, international development and peacebuilding sector, such as policy advisor, project officer, or aid agency worker.

---

**BACHELOR OF PHILOSOPHY, POLITICS AND ECONOMICS**

**CRICOS CODE** 09750G  
**INTERNATIONAL 2021 SELECTION RANK** 70  
**CAMPUS** North Terrace  
**DURATION** 3 years full-time  
**INTAKES** February and July. Students commencing in July please note some core courses electives and language part 1 courses may only be offered in semester 1. Please contact the Faculty of Arts for help with planning your degree.

**INDICATIVE ANNUAL TUITION FEE** $35,000

[adelaide.edu.au/degree-finder](adelaide.edu.au/degree-finder) Search philosophy

Understanding social complexities requires looking through more than one lens. Students of philosophy, politics and economics are deeply acquainted with social and political institutions. They reason rigorously and reflect on moral and ethical values. They understand how resources must be managed and that economics influences everything.

**What will you do?**

Our Bachelor of Philosophy, Politics and Economics has a structure unique in South Australia, and is highly regarded internationally. You will:

- learn broadly across all three areas before focusing on your chosen discipline
- analyse complex political and economic scenarios
- critically debate morality, freedom and social justice
- understand and develop responses to pressing real-world problems
- gain practical insights from guest speakers with experts and researchers
- gain practical insights from guest speakers within political and business communities
- career plan from early on and undertake an internship aligned with your goals.

**Where could it take you?**

You’ll graduate career-ready and prepared to problem-solve at all levels of intricacy. You could advise on policy, write it or run for government yourself. You might end up working as an advocate for at-risk youth. You could push to connect vulnerable groups with health and support services. Perhaps you’ll advise on human rights policy or run for government yourself.

---

**BACHELOR OF SOCIOLOGY**

**CRICOS CODE** 09840G  
**INTERNATIONAL 2021 SELECTION RANK** 75  
**CAMPUS** North Terrace  
**DURATION** 3 years full-time  
**INTAKES** February and July. Students commencing in July please note some core courses electives and language part 1 courses may only be offered in semester 1. Please contact the Faculty of Arts for help with planning your degree.

**INDICATIVE ANNUAL TUITION FEE** $35,000

[adelaide.edu.au/degree-finder](adelaide.edu.au/degree-finder) Search sociology

What divides us? What causes inequalities? How does the media influence our lives? Sociology is the study of human activity in societies. It’s concerned with group interactions and their consequences. It’s about questioning the social world and how it fits together.

Sociologists research human experience and offer new perspectives. They explore diverse topics—from race, gender and class, to religion, love and war.

**What will you do?**

Our Bachelor of Sociology challenges you to think critically, promote positive social change and empower those in need. You will:

- identify societal trends and power structures
- debate and problem-solve around social issues
- study influential thinkers throughout history
- develop high-level research and analysis skills
- investigate areas of interest such as crime prevention, social control, globalisation, cultures and subcultures.

**Where could it take you?**

You’ll graduate ready to make an informed and constructive difference. You might end up working as an advocate for at-risk youth. You could push to connect vulnerable groups with health and support services. Perhaps you’ll advise on human rights policy or run for government yourself.
With a diverse suite of cutting-edge, industry-driven degrees—and an enviable network of teaching staff and alumni—we provide an ideal platform to launch your career in the business world.

Our degrees offer you flexible study options across a wide range of study areas. Among them: economics, accounting, finance, marketing, management, international management, entrepreneurship and project management.

**Study with one of the world’s best**

Adelaide Business School and its Entrepreneurship, Commercialisation and Innovation Centre (ECIC) are accredited by the international Association of Advanced Collegiate Schools of Business (AACSB). This is your guarantee that our staff, curriculum and learning outcomes are globally recognised as among the world’s elite.

Further hallmarks of our quality include: full membership in the European Foundation for Management Development; advanced signatory status in the United Nations Principles for Responsible Management Education initiative; and accreditation by CPA Australia and Chartered Accountants Australia and New Zealand.

**Benefit from outstanding opportunities**

The University of Adelaide is also the only South Australian university with a dedicated School of Economics, which delivers our highly competitive Bachelor of Economics (Advanced).

And through the ECIC you have the chance to participate in the e-Challenge New Venture accelerator program, a competition-based learning experience that develops strategic business thinking for early-stage entrepreneurial ventures. You will graduate, as have thousands before you, ready to take your place in the world as a business leader.

**Business points of difference**

**YAHDULLAH HAIDARI**

Bachelor of Economics (Honours)

“My degree significantly strengthened my analytical, research and problem solving skills, as well as being able to communicate effectively. These are exactly the types of skills highly sought after by employers.”
Our modern economy depends on good accounting. We need experts who understand and can explain the financial and social business environment to others. Accountants advise people through good times and bad. They dig for financial truth, consider consequences and work out the best path forward.

What will you do?
Our Bachelor of Accounting teaches fluency in the language of business and finance. You will:
- explore economic concepts, theories and analytical techniques
- learn the fundamentals of financial and management accounting
- understand auditing and taxation in depth
- study economics, business mathematics and business law
- consider technology’s role and ways to build positive client relationships
- work on industry projects and internships.

Where could it take you?
Accounting graduates are always in demand and enjoy both stability and variety. You might work with a charity, in education or for the government. Perhaps you’ll become chief financial officer at a company or manage budgets in the sporting world. You could even unmask financial deceptions as a forensic accountant.

Professional accreditation
Upon completion of the Bachelor of Accounting, you’ll be eligible to apply for associate membership to either Chartered Accountants Australia and New Zealand or CPA Australia. To achieve full membership, both bodies require an additional program of study and a stipulated length of work experience.

* Melbourne campus is currently seeking accounting accreditation.
Business leaders have vision. They take responsibility and tackle challenges. They devise solutions, drive progress and unite people to pursue common goals.

What will you do?
Our Bachelor of Business Management fast-tracks your self-confidence and initiative, priming you for leadership in today’s business world. You will:

- learn to effectively manage people, resources and projects
- explore business finance and commercial law
- study strategic planning and the science of decision-making
- consider client relations, ethics and the role of technology
- build real-world skills through internships, industry projects and entrepreneurial challenges.

We also encourage learning in a wide range of specialised areas, adding diverse skills to your resume.

Where could it take you?
You could plan sales strategies for a video gaming enterprise or negotiate cross-border trade deals. You might design, launch and lead your own space travel start-up. Perhaps you’ll keep a gourmet coffee franchise on track or protect company data in a cybersecurity role.

Want to strengthen your business skills with financial expertise? Relationships and vision are vital for business management. However, the ability to understand, analyse and use financial information is what makes a trusted business leader.

What will you do?
Our Bachelor of Business Management and Accounting gives you a significant advantage in today’s business world. You will:

- study strategic planning and the science of decision-making
- understand the fundamentals of financial and management accounting
- take core courses in commercial law, data analytics and marketing
- learn to effectively manage people, resources and projects
- build real-world skills through internships, industry projects and entrepreneurial challenges.

We also encourage learning in a wide range of specialised areas, adding diverse skills to your resume.

Where could it take you?
You could keep company money matters above board as an auditor. You might spend your time liaising with investors. Perhaps you’ll find creative ways to cut costs as a budget analyst, corporate treasurer, or financial controller.

Professional accreditation
Upon completion of the Bachelor of Business Management and Accounting, you’ll be eligible to apply for associate membership to either Chartered Accountants Australia and New Zealand or CPA Australia. To achieve full membership, both bodies require an additional program of study and a stipulated length of work experience.

The University of Adelaide is ranked highest in South Australia for Business and Management*. We’re ready and excited to support your unique pathway to high-level employability and a confident, business-savvy future.

What will you do?
Our Bachelor of Commerce is flexible and progressive. We place a strong emphasis on critical thinking, adaptability and communication skills.

In first-year you’ll complete a range of core business and management courses. In second and third-year you’ll choose up to two major areas of study—or a major and up to two minors—to accommodate different career interests. Areas include:

- Accounting
- Accounting and Corporate Finance (double major)
- Corporate Finance
- International Business
- Business Management
- Marketing
- Entrepreneurship (minor only)
- Project Management (minor only).

Where could it take you?
Studying commerce leads to a wealth of opportunities in business. If your strengths lie in understanding and working with people you might pursue marketing or project management. You could put your skills to use championing early-stage start-ups. Perhaps you’ve a knack for patterns and numbers that will see you move into accounting or market research.

* QS World University Rankings by Subject 2020
Economists study the world through the analysis of decision-making in households, businesses and broader society. They examine details and put pieces together, always striving to understand the ‘big picture’. Armed with these insights, economists can give expert advice on business strategy, understand the background behind the news, influence public policy for a better world, and make informed personal financial decisions.

What will you do?
Our Bachelor of Economics sets you up to understand and shape our economy’s future. You will:
• learn how to break down complex issues into resolvable questions
• discover advanced techniques for analysing and managing data
• study how maths and statistics are applied to economics
• explore matters relating to the growth and stability of the whole economic system
• investigate social issues such as inequality, housing affordability, environmental management and depleting natural resources.

There are also opportunities for professional internships in Adelaide, other Australian cities and overseas.

Where could it take you?
Economics graduates go on to all sorts of exciting careers. You might be a high-stakes stockbroker, banker, or financial planner, a data analyst in a government agency or health economist with a pharmaceutical group. You could be a demand planner in a big wine company. Perhaps you’ll end up working in journalism, foreign affairs or mobile game development.

Aspire to be a leader in business, policy or research?
The Bachelor of Economics (Advanced) is a uniquely structured and specialised degree for students who want to stand out in their field.

What will you do?
Our advanced degree emphasises research and high-level analytical skills. You will:
• interact with and learn from eminent researchers, notable economists from abroad, and high-ranking economists practising in the private and public sector
• have the opportunity to partner with an academic mentor who’ll support and encourage your intellectual development
• access three unique courses specifically designed for high-achieving students
• benefit from small-group work, special activities and events with distinguished visitors.

Note: You must maintain a GPA of 5.0 or you’ll be required to transfer to the Bachelor of Economics. Conversely, if you initially enrol in the Bachelor of Economics you may be eligible to transfer into the advanced degree after one, two or three semesters if you achieve a high enough GPA.

Where could it take you?
You might specialise in maths and statistics and become an econometrician, working in logistics and modelling transport infrastructure. You could write pioneering policy around education, taxation or mental health. Perhaps you’ll use behavioural economics to encourage people to recycle, or research the potential impacts of a universal basic income.
BACHELOR OF FINANCE

Studying finance means learning the art of money management. What are the ins and outs of the financial world? How can individuals and employers best reach their financial goals?

Finance professionals are pragmatic, quick-thinking and ambitious. They’re skilled problem-solvers who stay informed and get results.

What will you do?

Our Bachelor of Finance gives you the skills and knowledge to excel in finance. You will:

• understand wealth management and financial modelling in depth
• study valuation issues and financial markets
• explore international trade and finance
• learn about specialised financial institutions and their asset classes
• build critical thinking, problem-solving and communication skills.

If you’re interested in a more global perspective, we also offer the Bachelor of Finance (International), a specialised stream that emphasises adaptability and large scale insights.

Where could it take you?

You could work in commercial banking as a sales associate, trust officer or loan officer. You might become a financial adviser, helping people secure their dream homes and plan for retirement. Perhaps you’ll pursue data analysis or even manage a hedge fund.

Professional accreditation

Some Bachelor of Finance courses provide opportunities for gaining affiliate membership of the Financial Services Institute of Australia. They also cover material relevant for entry to the Chartered Financial Analysts and Financial Planning Association.

Additionally, completing certain courses will enable you to obtain partial compliance with the Australian Securities and Investments Commission RG146 (tier 1 Compliance) in the areas of generic knowledge derivatives and securities.
Entrepreneurs and investors see the world for what it could be. In an ever-changing landscape, they take the risks to start up new businesses and social ventures. Successful entrepreneurs are savvy, resilient and well-connected. At the University of Adelaide, we invest in your potential.

What will you do?
Our Bachelor of Innovation and Entrepreneurship gives you knowledge, access to networks and a growth mindset for success. You will:
• hone your ability to identify, assess and develop opportunities
• understand financial planning and management
• learn the business modelling behind innovations’ commercialisation
• start your own venture in the University’s ThincLab incubators
• get hands-on help from experienced mentors and professionals.

There are also unique opportunities for study in linked ThincLab incubators in Singapore and France. In these locations you can:
• apply international perspectives and strategies to your ventures
• tap into supported international learning
• access different cultures, networks and opportunities.

Where could it take you?
You might shine a spotlight on an unexpected renewable energy source. You could explore ecotourism or virtual reality. Perhaps you’ll invest in a world-changing approach to everyday healthcare. This degree is also suitable if you want to be a corporate intrapreneur, driving innovative products and services for employers. You could even find alternative career pathways in government and not-for-profit sectors.

MARY KELLY
Bachelor of Innovation and Entrepreneurship

“ I’ve been able to explore my passions and learn from a variety of professionals with leadership opportunities that have prepared me for my career.”
Want to pursue a career in international business management? More and more business experts are learning to operate at the global level. This requires a greater grasp of the commercial world and the skills to adapt in foreign environments.

**What will you do?**

Our Bachelor of International Business is all about analytical thinking and international awareness. You will:

- take foundational courses in business statistics, commercial law, management, marketing, accounting and finance
- study international business environments, operations and law
- learn about managing and marketing across cultures
- consider corporate responsibility in a global context
- develop decision-making and leadership skills.

You can also head off on an overseas study tour during your degree.

**Where could it take you?**

You’ll emerge ready to use your global insights in a range of career roles. You might work across continents for a major multinational. You could be a trade analyst or developer. Perhaps you’ll help establish new international ventures and partnerships.

Marketing is an essential part of any organisation. It’s about attracting consumers, building great relationships and improving brands.

**What will you do?**

Our Bachelor of Marketing is highly future-oriented. You will:

- understand buyer mind-sets and behaviour
- learn modern marketing theories and research techniques
- develop business knowledge in accounting, finance, management, business statistics, and commercial law
- explore the role of customer insights, strategy, market offers and brand management
- build the advanced analytic, decision-making and people skills needed for leadership roles.

**Where could it take you?**

Our graduates go on to all sorts of exciting marketing careers. You could shape the future of global food, fashion or tech brands. You might analyse consumer data and suggest sales strategies based on your research. Perhaps you’ll innovate on social media, connect with partners in public relations or represent the athletic elite as a sports agent.

Project management is about delivering successful results for business, government and the community. It requires passion, resolve and vision.

**What will you do?**

Our Bachelor of Project Management gives you the skills and knowledge to excel in the professional realm. You will:

- research project management practices and concepts
- assess and manage risk in a wide variety of project scenarios
- build the soft skills needed to motivate and lead teams
- develop specific knowledge in an industry or field of your choice
- study ways of fostering creativity and innovation.

**Where could it take you?**

Opportunities for qualified project managers are increasing at pace. You could guide a defence project or manage sporting events. You might work on the global stage guiding community projects in less developed countries. Perhaps you’ll lead an IT team in Silicon Valley or oversee the development of a multi-storey tower in Dubai.
As a University of Adelaide computer science graduate you will effectively be equipped to program the future. Computer science, information technology and software engineering provide vital platforms for new discoveries in all aspects of modern life—from medicine and wireless communication, to defence and environmental protection.

**Computer science/IT points of difference**

- Our highly sought-after graduates gain internships and employment at top technology companies.
- Degrees designed in consultation with industry leaders and continually enhanced to meet growing demand for graduates.
- Ranked 43 in the Academic Ranking of World Universities for Computer Science and Engineering.

**WHY THE UNIVERSITY OF ADELAIDE?**

02 IN AUSTRALIA FOR COMPUTER SCIENCE AND ENGINEERING*

WORLD-LEADING AUSTRALIAN INSTITUTE FOR MACHINE LEARNING

75% FASTEST GROWING OCCUPATIONS REQUIRE STEM SUBJECTS*

*Academic Ranking of World Universities 2019
* ‘A Smart Move: Future-proofing Australia’s Workforce’ report, PwC 2015

**ROHIT KUMAR**

Bachelor of Computer Science

“When I first started here, I joined some clubs and went to some events. I met so many people interested in the same things so I guess it all started from there. I started enjoying life, making friends, meeting people, and working on projects together. I truly felt like this was now my home.”
BACHELOR OF COMPUTER SCIENCE

Where could it take you?
No matter how technology transforms the jobs market, computer science skills will be crucial. You could design robots or collective virtual reality spaces. You might work at Google as a software engineer. Perhaps you’ll legally break into systems as a white hat hacker to test their security.

Professional accreditation
The Bachelor of Computer Science is accredited by the Australian Computer Society (ACS). It also provides the necessary academic requirements for membership of the Institute of Electrical and Electronic Engineers (IEEE) and the American-based Association for Computing Machinery (ACM).

* Academic Ranking of World Universities 2019

Ready to take your place in the technology revolution?
Our Bachelor of Computer Science features artificial intelligence and machine learning courses not available anywhere else in South Australia. It’s taught by world-class researchers and teachers within a faculty ranked 43 in the world for computer science and engineering*.

What will you do?
Depending on your chosen major, you will:

• explore self-driving cars, robotic vision, machine learning and image recognition
• learn how to protect networks, data and software systems from attack and unlawful access
• apply cutting-edge data analysis techniques—such as machine and deep learning—to large sets of data
• design, make and study large-scale distributed software systems, including parallel, mobile and cloud-based environments.

Majors are available in:
• Artificial intelligence
• Computer science
• Cybersecurity
• Data science
• Distributed systems and networking.

Alternatively, you can choose a flexible program with a little bit of everything—from gaming and graphics to computer vision and software engineering.

BACHELOR OF COMPUTER SCIENCE (ADVANCED)

Decode grand challenges
Our Bachelor of Computer Science (Advanced) is a distinctive degree for highly capable students who want to tackle global questions in computer science and information technology. The program is taught by world-class researchers and teachers within a faculty ranked 43 in the world for computer science and engineering*. It features artificial intelligence and machine learning courses not available anywhere else in South Australia.

What will you do?
You will apply your skills to real-world challenges through self-directed learning and practical projects. Depending on your chosen major, you will:

• explore self-driving cars, robotic vision, machine learning and image recognition
• learn how to protect networks, data and software systems from attack and unlawful access
• apply cutting-edge data analysis techniques—such as machine and deep learning—to large sets of data
• design, make and study large-scale distributed software systems, including parallel, mobile and cloud-based environments.

Majors are available in:
• Artificial intelligence
• Computer science
• Cybersecurity
• Data science
• Distributed systems and networking.

We also set up opportunities within the program for displaying your talents to future employers.

Note: You must maintain a high grade point average to stay in this highly competitive degree.
Where could it take you?
With advanced technology skills, you’ll work on solving real problems in our society. You could come up with multi-cloud solutions to tackle future security issues. You might develop a revolutionary algorithm. Perhaps you’ll program nano- robots that reverse aging or design the first unquestionably true artificial intelligence.

Professional accreditation
The Bachelor of Computer Science (Advanced) is accredited by the Australian Computer Society (ACS). It also provides the necessary academic requirements for membership of the Institute of Electrical and Electronic Engineers (IEEE) and the American-based Association for Computing Machinery (ACM).

Connect your career with the future
IT makes and breaks organisations worldwide. Businesses with more intuitive, high-performing systems leave competitors in their wake. But even market leaders risk losing customers by the thousands if they can’t maintain service levels.
Demand for professionals with exceptional IT design and management skills is rising. And our new Bachelor of Information Technology puts you squarely in employers’ sights.

What will you do?
The degree is taught within a faculty ranked 43 in the world for computer science and engineering*. Leveraging the University’s strong industry links and world-class research, it features an emphasis on systems and business approaches, and design thinking.
Majors are offered in either Cyber Security or Artificial Intelligence and Machine Learning.
In addition to gaining a broad, application-based understanding of computer and information sciences, you’ll develop skills in:
• evaluating and using IT methods, tools and processes in real-world contexts, complemented by the ability to integrate new and emerging technology
• applying systems-thinking principles to manage and develop well-structured, maintainable and safe technological solutions
• designing, making and studying large-scale distributed software systems, including parallel, mobile and cloud-based
• advanced critical and independent thinking, and interpersonal communication.

Depending on your chosen major, you’ll also:
• learn how to develop highly secure, complex IT systems
• protect networks, data and software systems from attack and unlawful access
• explore self-driving cars, robotic vision, machine learning and image recognition
• understand how enterprise data and AI tools can be paired to improve productivity
• apply cutting-edge data analysis techniques to large sets of data.
And both majors include a significant industry-focused project or internship.

Where could it take you?
You could support organisations’ IT development and management in virtually any industry, anywhere in the world. From a premium European food producer to an Asian bank or Australian airline… From web computing and user experience in the US, to data science and information security in India… Countless paths will open.

* Academic Ranking of World Universities 2019
The University of Adelaide is a world leader in engineering and technology. Studying these disciplines with us, you will learn from globally recognised academics at the cutting edge of research and discovery. You’ll graduate equipped with the knowledge and skills industry needs. And you’ll enjoy strong earning potential in diverse, high-impact careers.

**Full accreditation and global recognition**

Every University of Adelaide engineering degree is accredited by Australia’s peak professional engineering body, Engineers Australia. Additionally, our chemical engineering degrees are accredited by the Institute of Chemical Engineers and software and computer science by the Australian Computer Society.

**Engineering points of difference**

- Connect with industry employers at our Ingenuity expo - the largest STEM showcase in South Australia.
- Take advantage of our state-of-the-art technology to test ideas in a supportive, collaborative environment.
- Ranked 43 among universities globally for computer science and engineering*—you’ll learn with some of the world’s foremost authorities in the field.

---

**ZIYING LI**

*Bachelor of Engineering (Honours) (Chemical)*

“"The University has provided me many opportunities to gain specialist knowledge as well as get involved in the local community by offering me volunteer works and industry engagement, which makes me better prepared for my future career.""
Want to be an engineer but not sure which engineering degree is right for you? At the University of Adelaide, we want to see all graduates in successful and fulfilling careers. This degree is designed to help you pursue the best option for you.

What will you do?
Our flexible entry option gives you a first-hand view of engineering at the University of Adelaide. You will:
- explore a variety of engineering disciplines
- attend presentations by practising engineers
- build communication skills essential to the field.

Where could it take you?
You will transfer into a named Bachelor of Engineering (Honours) single, double or combined degree at the completion of the academic year. We will support you in finding the area of engineering that drives you.

Interested in a creative career that explores elements of both architectural design and engineering? Architectural engineers visualise projects, plan, collaborate, test ideas and come up with high-tech building solutions. They design systems for some of the most innovative infrastructure in today’s society.

What will you do?
Our Bachelor of Engineering (Honours) (Architectural and Structural) brings the disciplines of architecture and engineering together in a unique program. You will:
- learn in state-of-the-art facilities
- undertake practical projects and work on real-world simulations
- build skills in geotechnical engineering, construction, and operation systems
- analyse material strengths, load and stress
- explore sustainability and architectural integrity
- pursue specialisations in your areas of interest
- complete an eight-week internship.

In your final year you will also collaborate with industry on a major design project.

Where could it take you?
As an accredited engineer, you’ll be in demand in both the architectural and building industries. You might plan underground infrastructure for renewable energy systems. Perhaps you’ll design blast-proof buildings in the defence sector, or sustainable housing systems. Want to become an architect as well? Graduates have the exclusive opportunity to continue on to further study with our Masters of Architecture.

Professional accreditation
Graduates qualify for professional membership of Engineers Australia.

Chemical engineers come up with the best ways to convert raw matter—like minerals or oils—into products we can use. They design renewable energy solutions, new and improved medicines, chemical plants, cosmetics and food factories. The University of Adelaide is the only South Australian university in the world’s top 50 for Computer Science and Engineering*.

What will you do?
Our Bachelor of Engineering (Honours) (Chemical) is interactive from the very first year. You’ll work with award-winning and industry-connected researchers and teachers as you:
- use knowledge and skills from engineering, chemistry, maths and biology to produce chemicals, fuel, drugs, and food
- learn how results in the lab scale up for commercial production
- undertake projects with external groups such as Engineers Without Borders
- benefit from tours, projects, and placements with companies like PepsiCo, Smiths Crisps, Jurlique, and BHP
- complete an eight-week internship.

Majors are available in:
- Minerals processing
- Pharmaceutical engineering
- Renewable energy.

Where could it take you?
You could come up with better ways to control air pollution or turn saltwater into fresh water. You might work alongside craft beer brewers. Perhaps you’ll mass-produce a biodegradable version of plastic or move into the exciting world of tissue engineering.

Professional accreditation
Graduates qualify for professional membership of Engineers Australia.

The degree programme is also accredited by IChemE.

* Academic Ranking of World Universities 2019
Civil engineers design, build and maintain the infrastructure that underpins modern life. They make sure bridges, roads, tunnels, railways, dams, airports and water channels meet the needs of our society in a sustainable way. The University of Adelaide is ranked 17 in the world for Civil Engineering.*

What will you do?
Our Bachelor of Engineering (Honours) (Civil) has a strong focus on design. You’ll learn from award-winning academics in state-of-the-art facilities as you:

- study structural design and mechanics in depth
- access new technologies forming the basis of future design practice
- work on real-life projects
- interact with professionals through an industry-led design practice course
- complete an eight-week internship.

Majors are available in:
- Construction management
- Defence systems
- Environmental engineering
- Geotechnical engineering
- Renewable energy
- Smart technologies
- Structural engineering
- Water systems engineering.

Where could it take you?
You will graduate as an accredited engineer. You might supervise major water projects or the building of sea-bridges. You could connect remote communities as a road and highway engineer. Perhaps you’ll design high-speed railways or help with the construction of an Australian hyperloop.

Professional accreditation
Graduates qualify for professional membership of Engineers Australia.

* Academic Ranking of World Universities 2019

Electrical and electronic engineers do so much more than keep the lights on! From smart devices to medical imagery and defence technologies, electrical and electronic engineering contributes to every aspect of modern life. The University of Adelaide is the only South Australian university in the world’s top 50 for electrical and electronic engineering*. We set you up for a range of global career options in a field that’s leading technological change.

What will you do?
Our Bachelor of Engineering (Honours) (Electrical and Electronic) is practical right from the first year. Working with our internationally renowned staff who are active in cutting-edge discoveries, you will:

- study in state-of-the-art facilities, including a 3D prototyping lab, autonomous vehicles lab, and electric machines lab
- work on practical and relevant projects with industry partners
- specialise in your chosen electrical and electronic engineering major after the first two years
- complete an eight-week internship.

Majors are available in:
- Communication systems
- Computer engineering
- Cybersecurity
- Defence systems
- Medical technologies
- Renewable energy
- Smart technologies.

Where could it take you?
As an accredited engineer, you could work in artificial intelligence, industrial automation, e-commerce or cybersecurity. You might manage multimillion-dollar energy projects. Perhaps you’ll help design the first purely electric aircrafts.

Want to design solutions to some of the planet’s most challenging problems? As populations expand and humanity demands more of our natural resources, environmental engineers work to combat negative impacts of human activities on the environment. They reduce waste, promote eco-design and strive to improve our environmental systems.

What will you do?
Our Bachelor of Engineering (Honours) (Environmental) will challenge and nurture you in a team environment. You will:

- learn about connections between infrastructure, environment, society, and economy in the developed and developing world
- build technical skills for tackling complex problems around water, energy, food, pollution, waste, and natural hazards
- work with award-winning academics who are global experts in their field
- apply your knowledge to real-world projects based on industry needs
- complete an eight-week internship.

Majors are available in:
- Defence systems
- Renewable energy
- Smart technologies.

BACHELOR OF ENGINEERING (HONOURS) (CIVIL)

CRIOS CODE 097237K
INTERNATIONAL 2021 SELECTION RANK 80
CAMPUS North Terrace
DURATION 4 years full-time
INTAKES February and July (students commencing in July may not have access to the full range of courses)
PREREQUISITES Mathematics and Physics

BACHELOR OF ENGINEERING (HONOURS) (MECHANICAL)

CRICOS CODE 08219G
INTERNATIONAL 2021 SELECTION RANK 80

CAMPUS North Terrace
DURATION 4 years full-time

INTAKES February and July (students commencing in July may not have access to the full range of courses)

PREREQUISITES Mathematics and Physics

INDICATIVE ANNUAL TUITION FEE $44,500

Mechanical engineers work with ‘things that move’, from prosthetic limbs and robots to motor vehicles, aircrafts and space stations.

When it comes to new technologies, mechanical engineers are key. They design and develop materials, processes and products to improve our lives and the world.

What will you do?

Our Bachelor of Engineering (Honours) (Mechanical) has strong links to industry and a focus on design and creativity. You will:

- explore core mechanical engineering disciplines
- complete design-build projects
- gain hands-on experience in state-of-the-art facilities
- benefit from internships, placements and projects with experts in the field
- complete an eight-week internship.

In your final year you’ll apply your advanced capabilities in an industry-focused research project.

Majors are available in:

- Aerospace engineering
- Defence systems
- Mechanical engineering
- Mechatronics and robotics
- Medical technologies
- Renewable energy
- Smart technologies
- Sports engineering.

Where could it take you?

Our mechanical engineering graduates are in high demand. As an accredited engineer, you could develop life-saving technology, or innovate in the sustainable energy field. You might be an aerospace or sports engineer. Perhaps you’ll plan, build and test robots and robotic systems with artificial intelligence.

BACHELOR OF ENGINEERING (HONOURS) (MINING)

CRICOS CODE 082114M
INTERNATIONAL 2021 SELECTION RANK 80

CAMPUS North Terrace
DURATION 4 years full-time

INTAKES February and July (students commencing in July may not have access to the full range of courses)

PREREQUISITES Mathematics and Physics

INDICATIVE ANNUAL TUITION FEE $44,500

Mining engineers work with all aspects of ore extraction and processing. They gather valuable minerals or metals and provide a backbone industry for our society.

The reinvigoration of traditional mining plus new advances—such as deep-sea mining and space mining—mean there’s an exciting future for mining engineers, with a wealth of job opportunities around Australia and overseas.

The University of Adelaide is ranked 13 in the world for Mining and Mineral Engineering*.

What will you do?

Being the only mining engineering course in South Australia, we cover everything from engineering design to management skills. You will:

- take part in field trips to mining locations in Australia and overseas
- gain exposure to industry practices in world-class laboratories
- work closely with experts to develop skills and networks for a successful career
- complete an eight-week internship
- undertake an optional semester at another mining university.

Majors are available in:

- Mine automation
- Learn about the connection between mining and artificial intelligence, machine learning and big data at the only university in Australia currently offering a major in mine automation.

Where could it take you?

You will graduate as an accredited engineer with mining as your speciality. You might drill and blast in local stone quarries or travel overseas to unearth rare metals. You could design plans for how to approach newly discovered sites. Perhaps you’ll work in exciting developing fields like deep-sea or space mining.

* Academic Ranking of World Universities 2019

BACHELOR OF ENGINEERING (HONOURS) (PETROLEUM)

CRICOS CODE 082117G
INTERNATIONAL 2021 SELECTION RANK 80

CAMPUS North Terrace
DURATION 4 years full-time

INTAKES February and July (students commencing in July may not have access to the full range of courses)

PREREQUISITES Mathematics and Physics

INDICATIVE ANNUAL TUITION FEE $44,500

Want to travel the world and face new challenges every day? Petroleum engineering is one of the highest paid engineering fields internationally, with exciting opportunities for qualified graduates.

Petroleum engineers help sustain society’s way of life by ensuring we can meet our energy demands. They provide oil and gas in efficient, safe, and environmentally responsible ways.

What will you do?

Our Bachelor of Engineering (Honours) (Petroleum) is developed and taught by industry-trained academics through the Australian School of Petroleum and Energy Resources. This is Australia and Southeast Asia’s academic centre for petroleum research and education, and the only school of its kind in Australia.

You will:

- learn about petroleum engineering, petroleum geoscience and the oil industry
- take courses in business and project management
- develop technical knowledge and network with potential employers
- undertake interactive projects and field trips
- complete an eight-week internship.

In your final year you’ll also carry out a major research project.

Where could it take you?

You’ll graduate as an accredited engineer. You could work for a range of oil, gas and energy companies, or find a role in a government agency. You might take up reservoir drilling and production. Perhaps you’ll be a geoscientist or take on managerial roles within the business.
### BACHELOR OF ENGINEERING (HONOURS) (PETROLEUM) WITH MAJOR

**CRIOS CODE** 097229K  
**INTERNATIONAL 2021 SELECTION RANK** 80  
**CAMPUS** North Terrace  
**DURATION** 5 years full-time  
**INTAKES** February  
**PREREQUISITES** Mathematics and Physics  
**INDICATIVE ANNUAL TUITION FEE** $44,500

Want to face new challenges every day? Petroleum engineering is one of the highest paid engineering fields internationally, with exciting opportunities for qualified graduates. Petroleum engineers help sustain society’s way of life by ensuring we can meet our energy demands. They provide oil and gas in efficient, safe, and environmentally responsible ways. This degree allows students to undertake a major as part of their study in a five-year program.

#### What will you do?

Our Bachelor of Engineering (Honours) (Petroleum) with major is developed and taught by industry-trained academics through the Australian School of Petroleum and Energy Resources. This is Australia and Southeast Asia’s academic centre for petroleum research and education, and the only school of its kind in Australia. You will:

- learn about petroleum engineering, petroleum geoscience and the oil industry
- take courses in business and project management
- develop technical knowledge and network with potential employers
- undertake interactive projects and field trips
- complete an eight-week internship.

**Majors are available in:**
- Chemical engineering
- Civil engineering
- Mechanical engineering
- Mining engineering.

#### Where could it take you?

You’ll graduate as an accredited engineer. You could work for a range of oil, gas and energy companies, or find a role in a government agency. You might refine crude petroleum into gasoline or plastics. You could optimise extraction techniques. Perhaps you’ll design new equipment, supervise drillings or take on managerial roles.

### BACHELOR OF ENGINEERING (HONOURS) (SOFTWARE)

**CRIOS CODE** 082124J  
**INTERNATIONAL 2021 SELECTION RANK** 80  
**CAMPUS** North Terrace  
**DURATION** 4 years full-time  
**INTAKES** February and July (students commencing in July may not have access to the full range of courses)  
**PREREQUISITES** Mathematics and Physics  
**INDICATIVE ANNUAL TUITION FEE** $44,500

From South Australia to Silicon Valley, software engineers are using a combination of problem solving and creativity to develop new technologies that change the world. They are involved in the whole life cycle of computer software. They strategise, design, build, test, code and collaborate. Studying software engineering will prepare you to drive software solutions to enhance our future for generations to come.

#### What will you do?

Our Bachelor of Engineering (Honours) (Software) combines the underlying principles of software engineering with strong technical and leadership skills. You will:

- tackle real-world, open-ended and complex programming problems
- take new and refreshed courses that emphasise divergent thinking, collaborative learning and teamwork
- work with industry mentors
- pursue work experience and internship opportunities with some of the world’s best-known companies
- complete an eight-week internship.

**Majors are available in:**
- Defence systems
- Smart technologies.

#### Where could it take you?

Our software engineering graduates are highly sought after by top companies around the globe. As an accredited engineer, you could develop software for mobile robots and driverless cars. You might create and test video gaming experiences. Perhaps you’ll design apps or entirely new smart technologies. In the software engineering landscape, you can code your own adventure.

### Professional accreditation

Graduates qualify for professional membership of Engineers Australia. The Bachelor of Engineering (Honours) (Software) is also accredited by the Australian Computer Society (ACS). The program is designed to provide a professional qualification in computing and software engineering. It also provides the necessary academic requirements for membership of the Institute of Electrical and Electronic Engineers (IEEE) and the American-based Association for Computing Machinery (ACM).
HEALTH
With innovative teaching, hands-on experience and cutting edge research, a University of Adelaide undergraduate health-related degree will equip you for a rewarding career improving people’s health and wellbeing—and provide global opportunities.

Preparing career-ready graduates
The Faculty of Health and Medical Sciences is renowned for producing highly skilled graduates who are well regarded by industry. Our degrees will provide you with hands-on experience in real world environments, enabling you to develop the knowledge and confidence to become a future health leader.

World-class teaching, simulation and clinical skills facilities
State-of-the-art facilities, new teaching styles and the latest technologies are taking our degrees into the future and transforming health sciences education, research and patient care in South Australia. In 2017, the $246 million Adelaide Health and Medical Sciences (AHMS) building opened for teaching in the South Australian Biomedical Precinct. Our world-class facilities include the: Dental Simulation Clinic; Ray Last laboratories, for bioskills, surgical skills and anatomy; and Adelaide Health Simulation. Located in the new AHMS building, Adelaide Health Simulation is the most high-tech health care teaching facility in Australasia. It includes 24 real-life simulation spaces, four critical-care operation theatres, eight acute-care ward suites, and four virtual home environments.

Peer Mentoring Program
Our Peer Mentoring Program offers you support in your transition to university. Senior-year students will guide and assist you in meeting new people, establishing friendships and developing an understanding of the expectations and requirements of university life.

For more information, visit: health.adelaide.edu.au/current-students/peer-mentoring

Incidental fees
Most Faculty of Health and Medical Sciences students will have additional costs over and above tuition fees. Depending on your degree, this could include things like: textbooks, equipment, required immunisations, clearance renewals, first aid certificates, travel and accommodation for placements, and student amenities fees.

For each degree’s specific fees, visit: adelaide.edu.au/student/finance/other-fees

Clinical placement requirements
To undertake the compulsory clinical placements in our allied health, medicine, dentistry or nursing degrees you must satisfy the following requirements.

- Australian Health Practitioner Regulation Agency (AHPRA) student registration
- first aid certificate
  (Oral Health and Dentistry only)
- immunisation and prescribed communicable infections (PCI) screening
- tuberculosis screening
- clinical placement deed poll
- basic life support training (Nursing only)
- manual handling training (Nursing only)
- hand hygiene training
  (Medicine and Nursing only).

For further information, visit: health.adelaide.edu.au/study-with-us/student-support/clinical-placements

Health points of difference

- Outstanding, state-of-the-art facilities—among the most technologically advanced in Australasia.
- High-quality, innovative teaching, with comprehensive student support.
- Students learn from—and with—internationally recognised health researchers and professionals.

ADRIAN DURAN
Bachelor of Health and Medical Sciences (Honours)

“The University of Adelaide provided me so many opportunities to find my passion and drive for future endeavours. From the wide range of courses and topics to learn, studying at university has been a great life experience.”

Why the University of Adelaide?

MULTIPLE CAREER OPTIONS

$246M ADELAIDE HEALTH AND MEDICAL SCIENCES BUILDING

PRACTICAL EXPERIENCE BUILT INTO CLINICAL DEGREES
Where could it take you?
You could work in a local or community dental clinic or provide dental care for people in the developing world. You might become a defence force dentist. Perhaps you’ll be a researcher, making new discoveries to improve oral health care.

Professional accreditation
The Bachelor of Dental Surgery is accredited by the Australian Dental Council. To be eligible to work in Australia as a dentist, graduates are required to register with the Australian Health Practitioners Regulation Agency (AHPRA) and the Dental Board of Australia on the completion of the degree. In order to register, all applicants must comply with the English language skills requirements as determined by AHPRA. For further details, visit ahpra.gov.au/Registration.aspx

The Bachelor of Dental Surgery qualification is recognised by:
• The Dental Board of Australia. Once registered, graduates are also eligible for membership of the Australian Dental Association.
• The Dental Council of New Zealand under the Trans-Tasman Mutual Recognition Agreement.
• The Commission of Dental Accreditation of Canada. Further examinations are necessary to work in Canada.
• Singapore Dental Council

International applicants should note that successful completion of this degree may not qualify them to practise/register in their home country. Students will have to contact the relevant health registration bodies of their home country for further information.

Keep your community smiling
Dentists work to improve oral health in our communities. They’re lifelong learners who care about their patients and their work. Dentistry is a science and an art. It’s flexible and rewarding, and it changes lives.

What will you do?
Our Bachelor of Dental Surgery supports you in becoming a highly skilled and patient-focused dentist. You will:
• build clinical experience starting in your very first year
• learn in Australia’s newest dental teaching hospital, in the state-of-the-art Adelaide Health and Medical Sciences building
• explore the full range of dental therapies—from complex restorative to preventative-based treatments
• practise using equipment in our Dental Simulation Clinic
• tackle real-life case scenarios in teams
• benefit from extensive placements across metropolitan and rural settings
• improve lives through community outreach programs.

BACHELOR OF HEALTH AND MEDICAL SCIENCES

BACHELOR OF HEALTH AND MEDICAL SCIENCES

CROCOD CODE 090814E INTERNATIONAL 2021 SELECTION RANK. 80
CAMPUS North Terrace DURATION 3 years full-time INTAKES February and July
INDICATIVE ANNUAL TUITION FEE $39,000
adelaide.edu.au/degree-finder Search health

Improve the health of your community
Are you fascinated by the human body? Do you want to help tackle important health issues facing our world today? Studying health and medical sciences is mentally stimulating and hands-on. It’s about fighting disease through scientific research and actively promoting wellbeing. Our Bachelor of Health and Medical Sciences ranks first in South Australia for teaching quality, and third in Australia for overall education experience*.

What will you do?
Our degree supports you in developing relevant and transferable skills that are highly-sought-after in research and health industries. You will:
• explore human biology and public health in depth
• gain hands-on research experience in world-class facilities
• enjoy cutting-edge virtual reality learning
• work in small groups to solve problems relating to health and disease
• undertake a year-long research placement or internship
• increase your understanding of global health issues with opportunities to study overseas.

You’ll also pursue a specialisation in one of a diverse range of areas:
• Neurosciences
• Clinical Trials
• Nutritional Health
• Public Health
• Medical Sciences
• Reproductive and Childhood Health.

Where could it take you?
You could work in a medical laboratory or clinical setting, seeing modern medicine improve vulnerable patients’ health. You might be the first to witness ground-breaking medical research results. Perhaps you’ll help populations make healthy choices, or change the environments in which people live, grow, work, and play, so that everyone can lead healthy lives. Previous graduates have gone on to high-level, influential positions in a range of health organisations and government departments throughout Australia and abroad.

Search health + advanced

Be a health leader

Want to tackle humanity’s greatest health challenges? Aspire to be outstanding in your field? The Bachelor of Health and Medical Sciences (Advanced) is a distinctive degree for students who want to excel.

What will you do?

Our advanced degree emphasises innovation and entrepreneurship, as well as applied clinical and research skills. You will:

• explore health from cellular, system, individual and population perspectives
• study solutions to frontline healthcare problems in a unique “hacking health” course
• learn about health collaborations and get hands-on training in our state-of-the-art Adelaide Health Simulation
• develop strategies for getting health discoveries into practice with the University’s Entrepreneurship, Commercialisation and Innovation Centre
• learn from award-winning health researchers
• undertake a year-long research placement or internship.

You’ll also pursue a specialisation in one of a diverse range of areas:

• Neurosciences
• Clinical Trials
• Nutritional Health
• Public Health
• Medical Sciences
• Reproductive and Childhood Health.

Where could it take you?

You’ll emerge with enhanced skills for either higher studies or leadership roles in your chosen career. You could lead programs to improve the health of vulnerable populations, develop policies to prevent obesity or tackle antimicrobial resistance. You might win the Nobel Prize in Medicine through ground-breaking research. Perhaps you’ll outsmart cancer with an innovative approach to treatment.
BACHELOR OF MEDICAL STUDIES / DOCTOR OF MEDICINE

CRICOS CODES 0900331/0900332
INTERNATIONAL 2021 SELECTION RANK 90
DURATION 6 years full-time
CAMPUS North Terrace, Teaching Hospitals
ASSUMED KNOWLEDGE High proficiency in written and spoken English
INTAKES February
PREREQUISITES One of Biology, Chemistry or Mathematics
QUOTAS Strict entry quotas apply. Offers and selections are based on a merit ranking process.
INDICATIVE ANNUAL TUITION FEE $77,000

We empowers you to help others

Medicine is intellectually rewarding, challenging and inspiring. It requires critical problem-solving, teamwork and integrity. Medical practitioners have an interest in wellbeing and the causes of ill health, working to protect and promote the health of individuals and communities. They are dedicated to alleviating pain and suffering, working out of comfort zones to care for vulnerable people.

What will you do?

Our Bachelor of Medical Studies provides the foundation knowledge and skills needed to excel in health care. Learning in partnership with outstanding clinicians in our state-of-the-art Adelaide Health and Medical Sciences building, you will:

- work in small groups to address scenario-based problems relating to common and important individual, community, Indigenous and global health issues
- gain valuable exposure to real-world clinical practice and develop your own safe and effective clinical skills in cutting-edge simulation facilities
- investigate the social determinants of health and health behaviours
- learn to evaluate the health status of individuals and populations
- acquire a solid foundation in research skills and evidence-based care
- learn collaboratively in interprofessional teams with nursing students.

You will also gain a deep understanding of how our health care system works with exposure to the clinical environment from first year.

The second part of the medical program, the Doctor of Medicine has a dual emphasis on high-level clinical and research skills. You will undertake multiple placements in diverse settings, including primary care, rural hospitals, outreach clinics and more. And you will be encouraged to broaden your horizons by doing at least one placement interstate and/or overseas. You'll do internship rotations in medicine, emergency medicine, surgery and psychiatry, and have the opportunity to explore a discipline of particular interest in greater depth.

In the area of research, you'll conduct two key projects in consultation with world-class University of Adelaide researchers: a minor project in year one, and major in year three. You'll graduate with the knowledge, skills and insight to:

- formulate and implement patients’ health management plans in consultation with other health professionals, patients, carers and communities
- promote and optimise individuals’ and populations’ health and welfare
- deliver safe, effective, collaborative and evidence-based health care.

You will also have a solid grounding in the non-clinical aspects of a medical career, such as practice management, entrepreneurship and working with industry. And you'll have a firm grasp of medicine's future, including the exciting possibilities of AI, gene therapy and personalised medicine.

Where could it take you?

Adelaide Medical School graduates are respected in the industry for their knowledge and experience. They are in demand for positions in public hospitals, private practice, public health, teaching, clinical research, aid organisations, the defence forces and more. You might become a general practitioner in rural Australia, providing vital services for your community. You could be a specialist paediatrician who works with children and their families. Perhaps you’ll pursue research and develop new knowledge about health and treatments.

Professional accreditation

The Bachelor of Medical Studies and Doctor of Medicine have been conditionally accredited under the existing accreditation of the Bachelor of Medicine and Bachelor of Surgery by the Australian Medical Council (AMC). The Adelaide Medical School will be seeking recognition from the Singaporean and Malaysian Medical Councils for the Bachelor of Medical Studies/Doctor of Medicine. In the interim international applicants from Malaysia and Singapore can apply to the Bachelor of Medicine and Bachelor of Surgery (MBBS), which is recognised by both Medical Councils. Once recognition is granted International students will be supported to transition to the Bachelor of Medical Studies/Doctor of Medicine. For more information on the application process please go to the Medicine Admissions Guide.

The Medical program at the University of Adelaide has a six-year full-time duration which leads to the awards of Bachelor of Medical Studies and Doctor of Medicine. Entry into the Doctor of Medicine is based on completion of the Bachelor of Medical Studies at the University of Adelaide.

BACHELOR OF NURSING

CRICOS CODE 057078J
INTERNATIONAL 2021 SELECTION RANK 70
DURATION 3 years full-time
CAMPUS North Terrace, Teaching Hospitals
INTAKES February and July
ASSUMED KNOWLEDGE A high school level of human anatomy and human biology
QUOTAS Strict quotas apply. The standard cut-off is the minimum academic threshold, above which applicants will be ranked on merit.
INDICATIVE ANNUAL TUITION FEE $35,500

We empower you to help others

Nursing is flexible, exciting and challenging. It's a rewarding profession full of problem-solvers and pillars of strength. The Adelaide Nursing School is ranked first in South Australia for graduate employment and third in Australia for overall educational experience.

What will you do?

Our Bachelor of Nursing supports you in becoming a confident and responsible registered nurse. You will:

- develop hands-on skills in high-tech simulation settings
- benefit from clinical and non-clinical placements across metropolitan and rural locations
- explore contemporary issues around health promotion, maintenance, advocacy and care
- undertake interprofessional learning with other health care students.

Where could it take you?

You’ll emerge with a professional qualification recognised Australia-wide, ready to pursue rewarding roles in rural communities, operating theatres, emergency wards, and a multitude of other health care environments.

Professional accreditation

The Bachelor of Nursing is accredited by the Australian Nursing and Midwifery Accreditation Council. In Australia, all undergraduate programs leading to registration as a nurse must be accredited every five years.
BACHELOR OF OCCUPATIONAL THERAPY (HONOURS)

You’ll regularly access our purpose-built training facilities and state-of-the-art simulation suites—among Australasia’s most advanced. And you’ll benefit from collaborative learning with key complementary disciplines, speech pathology and physiotherapy. From late third year, you’ll choose one of two streams—research* or industry—and undertake a major project. Research will hone your skills in developing new knowledge; industry focuses on integrating research into practice.

Where could it take you?
You’ll graduate eligible to pursue a wide range of career opportunities. You could help children with sensory issues realise their full learning—and life—potential. You might help elderly people maintain their full learning—and life—potential. You could advise on public health policy for people managing chronic gum pain. Where could it take you?

Our Bachelor of Occupational Therapy (Honours) equips you to identify, prevent and manage the full range of challenges to everyday activity.

With many courses taught by registered practising occupational therapists, the degree places an emphasis on real-world experience. In over 1,000 hours of work-based training, you’ll work with children and adults of all ages in multiple settings: public and private health organisations; schools; rehabilitation centres; aged care; mental health and more.

You’ll gain high-level knowledge and skills in:

• human anatomy, physiology and the pathophysiology
• rehabilitation from short- and long-term injury, musculoskeletal and neurological conditions, chronic illness, disability and mental health issues
• specialised practice with children and families
• broad public health issues and population approaches to health and wellbeing
• cultural diversity, with a focus on Aboriginal and Torres Strait Islander people and communities, and rural or international health perspectives
• evidence-based, client-centred care.

Advocate for oral health

Oral health is an essential component of a healthy life. Complex dental work contributes to this, but proper care and prevention are just as important. While dentists perform specialised treatments, oral health therapists have broad expertise in general oral health care and education.

What will you do?
Our Bachelor of Oral Health is an evidence-based degree that prepares you for providing general oral health care and health promotion. You will:

• learn in Australia’s newest dental teaching hospital, in the state-of-the-art Adelaide Health and Medical Sciences building
• study within a close-knit oral health learning community
• benefit from early clinical exposure and extensive placements
• practise using equipment in our Dental Simulation Clinic
• tackle real-life case scenarios in teams
• improve lives through community outreach programs.

Where could it take you?
You will be part of providing high quality clinical care for all ages. You might develop hygiene maintenance programs for people managing chronic gum pain. You could advise on public health policy or design and implement educational campaigns. Perhaps you’ll open an oral health clinic with a team of oral health therapists and dentists you’re yet to meet at the University of Adelaide.

Professional accreditation
The Bachelor of Oral Health is accredited by the Dental Board of Australia.

**BACHELOR OF SPEECH PATHOLOGY (HONOURS)**

Speech pathologists help us make use of arguably our most precious capability—communication. By working with people to overcome physical and developmental challenges to verbal expression, they enable our deepest, most rewarding connections. Talented speech pathologists are already highly sought-after, and demand is growing fast.

**What will you do?**

Our Bachelor of Speech Pathology (Honours) equips you to diagnose and treat the full range of speech and language problems, including stuttering, voice and swallowing difficulties.

With many courses taught by registered practising speech pathologists, the degree places an emphasis on real-world experience. In over 840 hours of work-based training, you’ll work with children and adults of all ages in public and private health organisations; kindergartens and schools; rehabilitation centres; and aged care.

You’ll gain high-level knowledge and skills in:

- head and neck anatomy and neurophysiology
- speech and language development, linguistics and phonetics, motor speech and dysphagia
- current public health and justice system topics
- working with culturally and linguistically diverse populations, including Aboriginal and Torres Strait Islander people and communities
- evidence-based, client-centred care.

You’ll regularly access our purpose-built training facilities and state-of-the-art simulation suites—among Australasia’s most advanced. And you’ll benefit from collaborative learning with key complementary disciplines: dentistry, physiotherapy and occupational therapy. From late third year, you’ll choose one of two streams—research* or industry—and undertake a major project. Research will hone your skills in developing new knowledge; industry focuses on integrating research into practice.

**Where could it take you?**

You’ll graduate eligible to pursue a wide range of career opportunities. You could help children connect socially by overcoming stutters. You might help new arrivals to Australia settle in by being better understood. Perhaps you’ll enable people with brain injuries or intellectual disabilities to more fully express their creativity.

The University of Adelaide is currently working with Speech Pathology Australia to achieve accreditation for the Bachelor of Speech Pathology (Honours).

* Entry into the research stream will be based on academic merit.

---

**BACHELOR OF PSYCHOLOGICAL SCIENCE**

Are you fascinated by the human mind? Do you wonder what motivates our behaviour? Psychological science investigates the way people think, behave, feel and learn. It studies processes of the human mind—including personality, intelligence and memory—so that we can better understand ourselves.

**What will you do?**

Our Bachelor of Psychological Science nurtures creativity, analysis and communication skills. You will:

- learn about human development and the biological bases of behaviour
- investigate the mechanics of perception and learning
- explore the nature of motivation and emotion
- gain experience with psychological tests
- develop skills for counselling
- choose between over 35 majors and electives from related disciplines
- design and undertake meaningful research projects.

**Where could it take you?**

You could become a social psychologist, doing large-scale research to change the way we go about our lives. You might work in community services with people of all ages and backgrounds, or in market research and advertising. Perhaps you’ll go on to further study in the field and become a qualified psychologist.

**Professional accreditation**

This program has been accredited by the Australian Psychology Accreditation Council. Graduates who have completed this program will be eligible to apply for an honours year, followed by a two-year postgraduate qualification. This sequence of study will lead to professional registration as a psychologist.
Understand how people think, feel and behave

Psychology is a fascinating field of study concerned with minds and mental health. Psychology students develop important skills that enable them to understand their own and others’ behaviour, help people, solve social problems, and critically analyse information.

What will you do?

Our new Honours Degree of Bachelor of Psychology (Advanced) will give you the knowledge and qualities needed to kickstart your career in psychology. You will:

• solve high-level problems and analyse human behaviour
• develop listening, empathy and interviewing skills
• explore cyber-psychology, human ethics, social media and online safety
• address real-world global issues and learn how psychology can make a difference
• gain valuable experience with psychological tests and counselling
• design and undertake meaningful research projects.

Note: You must maintain a GPA of 6 to progress through this degree.

Where could it take you?

Your degree will equip you with skills and knowledge about human thinking and behaviour that many different employers value, including for working with children, the police, in education, health promotion, training and assessment in organisations, marketing, counselling, career guidance, research and more. You’ll also be eligible to apply for Masters-level courses in Psychology that will enable you to become a registered psychologist.

Professional accreditation

This degree is conditionally accredited with the Australian Psychology Accreditation Council.
LAW
As an Adelaide Law School graduate you will be well equipped to excel anywhere in the world. International legal aspects will be embedded early in your degree. You’ll have the opportunity to build international networks, through overseas study tours and exchange opportunities at leading universities around the globe. And you’ll be made practise-ready through real work in the community—both in the school’s free legal clinics, and via internships with leading national and international organisations.

**Graduate Diploma in Legal Practice**
If you want to practise law in Australia, you need to complete recognised practical legal training.

The University of Adelaide’s Graduate Diploma in Legal Practice (GDLP) satisfies that need. Whether you’re a local, interstate or international law graduate wanting to train for the legal profession, the Adelaide Law School’s GDLP program will give you the practical skills required to become a competent legal practitioner.

- **Flexible.** Study modes include intensive, weekend and after hours to help you balance work and family commitments
- **Connected with the profession.** Our networks provide a significant opportunity to connect with the legal profession in South Australia and build ongoing relationships
  - **Accelerated.** The program can be completed in 20 weeks
  - **Advocacy Clinic.** Undertake an exercise at the courts and train with skilled practitioners
  - **Placement.** We will organise work experience for you should you not be able to find your own placement. Many firms we deal with use our students exclusively.

To read more about our GDLP visit: law.adelaide.edu.au/postgraduate/graduate-diploma-in-legal-practice

**For more information**
The Law Society of South Australia,
Level 10, 178 North Terrace,
Adelaide, SA 5000 Australia
Phone: +61 8 8229 0200
Email: email@lawsociety.sa.asn.au

**Law points of difference**
- International leaders in cutting edge areas of law, including space law.
- Over 135 years’ experience developing tomorrow’s leaders, successful in diverse careers.
- Access to an impressive global network, opening doors to international opportunities.
- Access to the University’s Lex Salus, Next Steps and Law Students’ Society events.
- Build ethical reasoning, policy-based analysis and oratory skills
- Gain rigorous knowledge of the areas of law necessary to undertake legal practice
- Go deeper by choosing from our broad list of electives
- Learn from legal professionals, former judges and international academics
- Undertake internships in areas such as Public Law, Native Title Law and Human Rights Law
- Form connections through the University’s Lex Salus, Next Steps and Law Students’ Society events.

**Professional accreditation**
Our Bachelor of Laws is accredited by the Legal Practitioners’ Education and Admission Council in South Australia; and provides the academic foundation for admission to legal practice throughout Australia. To be admitted to practise in Australia, however, you must complete further practical legal training.

In South Australia, we—the University of Adelaide—together with the Law Society of South Australia, provide this additional training through our Graduate Diploma in Legal Practice. But if you intend to seek admission to practise elsewhere, you should seek advice from the admitting authority in the relevant jurisdiction.

Upon graduation from the Bachelor of Laws and completion of the Graduate Diploma in Legal Practice, you’ll be eligible to be admitted to the Supreme Court of South Australia (with a restricted practising certificate). Once admitted, you can then apply for admission in any other Australian jurisdiction.
MATHEMATICAL SCIENCES
A degree in mathematical sciences from the University of Adelaide is your pathway to an exciting and rewarding future. Our graduates are highly regarded by employers for their creativity, problem-solving abilities and research skills, honed through learning from our passionate and world-leading academic staff. You will emerge ready to choose your own path—from communications, defence and engineering to finance, health and manufacturing.

**Mathematical sciences points of difference**
- Graduates are sought after by a wide range of employers in diverse fields and for fundamental research.
- Study in a nurturing and empowering environment that has supported students to achieve outstanding results.
- Research in all mathematics disciplines recognised as ‘well above’ world standard by the Australian Research Council.

**LIAM STOLDT**

Bachelor of Mathematical Sciences (Advanced)

“In my experience at university and I thoroughly enjoy the content and the work I do. Each course leads very smoothly into the next and there is an overall linkage between many different mathematical courses and ideas in the degree.”

---

**Differentiate yourself**

Want to drive progress through mathematics? Our Bachelor of Mathematical Sciences (Advanced) is a degree for highly capable students who are passionate about maths and want to excel.

**What will you do?**

Alongside mathematical and statistical expertise, our advanced degree places a strong emphasis on research skills. You will:

- work with award-winning academics and researchers in state-of-the-art facilities
- access special programs designed for high-achieving students
- gain valuable exposure to mathematical sciences research culture
- take three Advanced Mathematical Perspectives courses.

**Areas of specialisation**

Majors are available in:

- Applied Mathematics
- Pure Mathematics
- Statistics

**Where could it take you?**

You will emerge with enhanced skills for either higher studies or expert roles in your chosen career. You could be a defence scientist or economic researcher. You might enter the growing field of gaming design and performance analysis. Perhaps you’ll figure out the mathematical model behind a scientific breakthrough or even win the Fields Medal.

---

**BACHELOR OF MATHEMATICAL AND COMPUTER SCIENCES**

**CRICOS CODE** 001516G

**INTERNATIONAL 2021 SELECTION RANK** 79

**CAMPUS** North Terrace

**DURATION** 3 years full-time

**a. adelaide.edu.au/degree-finder Search:** mathematics

---

**Multiply your expertise**

Enjoy mathematical challenges? Want to apply your skills to computer-based problems? Maths and computer science is a powerful combination. In an increasingly technological age, pairings like these are only becoming more valuable for a wide variety of careers.

**What will you do?**

Our Bachelor of Mathematical and Computer Sciences is a flexible degree. A program adviser will work with you to develop a study program tailored to your interests and career goals. You will:

- learn from world-class researchers and teachers in state-of-the-art facilities
- build fundamental statistical and mathematical knowledge
- explore complex computer systems and theories
- hone your creativity, rigour, logical thinking, professionalism and research skills
- pursue diverse electives—from business classes to social science programs.

**Areas of specialisation**

Majors are available in:

- Applied Mathematics*
- Artificial Intelligence
- Computer Science
- Cybersecurity
- Data and Decision Sciences
- Distributed Systems and Networking
- Data Science
- Pure Mathematics*
- Statistics*

A minor is also available in Public Health.

**Where could it take you?**

You could decode messages and breach security systems as a cryptanalyst. You might apply linear algebra in the design of virtual reality software. Perhaps you’ll develop theorems as an academic or land a job at a major firm in Silicon Valley.

* If you’re interested in broadening your mathematical expertise, you can also choose to study any two of: Applied Mathematics, Pure Mathematics, or Statistics in any combination (e.g. Applied Mathematics and Statistics) in lieu of a single major.
With a distinguished history dating back to 1883, the University of Adelaide’s Elder Conservatorium is internationally respected as one of Australia’s leading music institutions. The conservatorium offers innovative degrees covering all professional areas of the music industry to meet the needs and aspirations of a wide variety of emerging musicians, performers, and creatives. You’ll find no better environment in which to launch your musical career.

**Music points of difference**

- South Australia’s home of music theatre and music education
- Learn from academic staff of international distinction
- Join masterclasses and visiting international artists through the Sia Furler Institute of Contemporary Music and Media.

**LIN TONG**

*Bachelor of Music (Classical Performance)*

“*The Elder Conservatorium of Music has a long history and a good reputation for providing students with a wide range of learning subjects and practical opportunities. I can always get the support and help of teachers and peers when I encounter difficulties in my study. There is a friendly and positive learning environment and a strong academic atmosphere.*”

**Master a musical dialect**

The Bachelor of Music (Jazz Performance) welcomes you into one of Australia’s most vibrant and innovative jazz communities. Our staff and guest artists include some of the finest national and international jazz musicians and educators. Our graduates are performing, teaching, composing, arranging and recording throughout Australia, Europe, Asia, the U.S. and more.

**What will you do?**

Our curriculum covers traditional and contemporary theory and method and is committed to the highest standards of professional performance. You’ll receive one-on-one tuition and attend masterclasses within your specialisation. Options include:

- bass
- drums
- guitar
- keyboard
- trumpet

You’ll also:

- enjoy regular performances featuring Big Bands, Jazz Choirs, and Latin and Small Jazz Ensembles
- take classes in theory, improvisation, arranging and history
- explore career paths, music business and world music
- benefit from weekly performance opportunities with feedback from both staff and students.

**Where could it take you?**

Your skills might take you to the top jazz clubs of New York City and the summer Jazz Festival circuits of Europe. You might arrange music for international Big Bands and orchestras. The skills you develop as a jazz musician are a fantastic foundation for a career as a musician in styles from funk to pop, reggae to salsa and everything in between. Across the world today you will find that a high percentage of working musicians are jazz-trained!

**Enthrall audiences**

Do you want to do justice to great concertos and symphonies? To embody and share your passion?

Our Bachelor of Music (Classical Performance) challenges you to reach the highest standards of professional performance.

**What will you do?**

You’ll receive one-on-one instrumental training and attend masterclasses within your specialisation. We offer the following instruments:

- classical brass (trumpet, trombone, tuba, French horn, euphonium)
- classical keyboard (piano, organ, harpsichord)
- classical percussion
- classical strings (violin, viola, cello, double bass, guitar, harp)
- classical windwood (flute, clarinet, oboe, bassoon, saxophone, recorder).

You’ll also:

- take classes in technique and repertoire
- pursue aural, theoretical and historical studies
- immerse yourself in ensemble activities, including orchestral and chamber music studies
- benefit from weekly performance opportunities with feedback from both staff and students.

**Where could it take you?**

You could travel the globe as a performer and establish an international career in an ensemble. Perhaps you could curate concerts or work to support artists in management.

**Make music that lasts**

Composition is a craft. From the music of Bach or Mozart to the films scores of Hans Zimmer, musical creations are some of humanity’s greatest achievements. Composers move, enchant and entertain. They conceive works of timeless beauty and reach audiences in ways words cannot.

**What will you do?**

Our Bachelor of Music (Music Composition) has both a strong focus on classical traditions and an acute ear of the demands of the 21st century composer. You will:

- learn a broad range of stylistic approaches for composing music
- develop your compositional ‘voice’ through one-on-one tuition, lectures and tutorials
- study the principles of musical structure, notation and text setting, melodic writing, harmonic and rhythmic invention, counterpoint, and instrumental colour and texture
- consider the practical and work-related sides of creative music making
- explore music aesthetics, media and technology.

We also provide opportunities for ensemble performance and collaboration in film, dance and theatre.

**Where could it take you?**

You might fill concert halls and opera houses with live audiences or release albums recorded from home. You could compose award-winning film scores or TV series. Perhaps you’ll write for top-tier soloists or large-scale ballets.
BACHELOR OF MUSIC (MUSIC EDUCATION AND PEDAGOGY)

Inspire the next generation of music makers
Music’s creative and uplifting presence is essential in the lives of young people. Great music teachers help kids express themselves, take pride in what they do and appreciate new things. They give emerging musicians the skills and confidence they need to thrive.

What will you do?
Our Bachelor of Music (Music Education and Pedagogy) offers music-specific education courses and a personally tailored program that suits your own areas of interest and career aspirations. You will:
• build skills in your creative specialty
• learn methods for vocal and instrumental coaching
• explore key principles in 21st century music education
• develop lesson plans based on different approaches
• expand your creative abilities and musical skill set through practise teaching activities.

Where could it take you?
You will graduate as a confident teaching artist – you could tutor instrumental and/or voice students in school programs or set up your own private music studio. You might start a rock camp, direct an orchestra, coach chamber music groups or lead creative workshops. Perhaps you’ll be the next red Wiggle!

Note: further study is required to be eligible for South Australian classroom teacher registration.

BACHELOR OF MUSIC (MUSICOLGY)

Map new musical territories
Musicology is the study of music in its cultural, social, historical and stylistic contexts.
It’s about the way that music ‘works’. And not just notes on a page or sounds in a recording. Music also affects individual actions, social behaviour and expression in both Western and non-Western societies.

What will you do?
Our Bachelor of Music (Musicology) takes your contextual knowledge of music to the next level. You will:
• explore different approaches to music research
• gain keen music aural and analytical skills
• develop an understanding of the meaning and use of music in both the West and non-Western cultures.
• develop high-level skills in critical thinking
• build confidence in oral and written communication.
You can also pursue a wide range of studies in other areas. If you’re interested in performance you can take ensemble classes subject to audition.

Where could it take you?
You could continue on in academia or pursue work in music and arts journalism or administration. You might help organise a music organisation or festival. Perhaps you’ll work for the Rock ‘n’ Roll Hall of fame in Ohio or archive in the Australian Jazz Museum or publish a book about music and acculturation in First Nations communities.

BACHELOR OF MUSIC (POPULAR MUSIC)

Inspire as a contemporary recording artist
Are you passionate about creating contemporary music? Want to shake up the industry and lead rather follow? Studying popular music is about valuing your passion, pushing boundaries and reaching your potential.

What will you do?
Our Popular Music degree equips you with the knowledge and skills needed to excel as a creative professional. You will:
• Develop your own unique identity, presence and style as a song writer
• Learn cutting-edge technologies for music production
• have 24/7 access to rehearsal and recording studios to develop your work
• collaborate in song writing and performance classes
• receive mentorship and business coaching from industry professionals
• explore the place of contemporary music in society
• showcase your original music through regular performances at local venues.
You can also expand your skills by studying electives outside music. A range of options are available in Arts, Business, Science or Media.

Where could it take you?
Our graduates go on to all sorts of exciting music careers. You could take to the stage, or work behind the scenes at major festivals. You might be a producer, coaching other artists in the studio to realise their creative vision. Perhaps you’ll write songs for pop stars or spend your work hours at concerts as a music journalist.
Innovate in sound
The creation and distribution of music and sound has been transformed by digital technology. It’s accelerated the growth of the arts, entertainment, creative and media industries into huge global enterprises.

Our Bachelor of Music (Sonic Arts) prepares you to play a leading creative role in this exciting landscape.

What will you do?
Sonic Arts incorporates all applications of contemporary technology to sound and music. You will:
• take courses in composition, studio recording, live performance and digital media
• have 24/7 access to specialized facilities, including production studios, recording rooms and digital audio laboratories
• research sound theory and music history
• collaborate on group performance projects
• learn from international artists and industry professionals.

You’ll follow your interests across a range of specialised courses and electives in:
• sound engineering
• music production
• film sound
• software design
• computer music composition
• instrument building
• computer game audio
• interactivity
• sound design.

Where could it take you?
You might invent instruments, write video game soundtracks or develop music software. You could tour the world as a live electronic musician. Perhaps you’ll be a producer, creatively advising, coaching and recording other artists in the studio.
It’s an exciting time to embark on study in science. Already one of the world’s fastest growing sectors, science is predicted to bring more human progress in the next 50 years than the previous 400 combined—and today’s students will drive that change.

The University of Adelaide is leading the way in scientific research and education, equipping a new generation of future scientists with the skills to be at the leading edge of discovery and career success.

We actively partner with industry to ensure you will be equipped with the most up-to-date skills for your chosen career, and our cutting-edge facilities enable us to deliver specialised education with a focus on hands-on learning.

You will develop a range of transferrable skills that employers want in industries beyond just traditional science, including business, finance, education and communications.

As a student with us, you will join a community of world-class scientific researchers and learn from experts in the field who are actively involved in internationally recognised projects. You’ll even have the chance to work with, and alongside of them.

In fact, the University of Adelaide is one of only three universities in the world to be involved with finding the Higgs boson, high-energy neutrinos from an active galaxy, as well as the Nobel Prize-winning discovery of gravitational waves. And University of Adelaide students were part of all three projects.

Science points of difference

- 100% of Science research rated at or above world standard*
- Industry partners and research institutes of international significance co-located on campuses.
- Number 1 graduate satisfaction in South Australia*  

*QILT 2019 Science and Mathematics

RANKED IN TOP 150 WORLDWIDE* FOR SCIENCE

STEM GRADUATE SALARIES ALMOST 30% MORE THAN OTHER FIELDS**

STEM GRADUATE SALARIES ALMOST 30% MORE THAN OTHER FIELDS**

DANIELA GAGGL

Bachelor of Viticulture and Oenology

Technical Officer, Yalumba Nursery

"The time I spent at University was challenging, but thoroughly rewarding. It was where I found my passion and formed lifelong friendships. I gained invaluable skills and knowledge which enabled me to find my first job as soon as I graduated."
BACHELOR OF AGRICULTURAL SCIENCES

Where could it take you?
Within just a few months of finishing, almost 90% of our graduates find full-time employment**. In fact, on average there are five jobs available for every graduate^.

You’ll be set to improve primary production outputs in both rural and city locations. You could work as a consultant, conduct sustainability research, advise on government policy or innovate in urban and vertical farming. You might get a job in ag media, connecting farmers to their customers. Perhaps you’ll come up with ways to increase farming efficiency using modern drone technology.

* Academic Ranking of World Universities by Subject 2019
** Bachelor of Agricultural Sciences (QILT Graduate Outcome Survey Results by Program 2018)
^ farminstitute.org.au/newsletter/2016/May/feature

Be part of the boom
Agriculture is about understanding the land, animals, crops and community.

For those seeking a career in the industry, our Bachelor of Agricultural Sciences is the degree of choice. It is ranked 40th in the world and is the only Agricultural Science degree in South Australia*.

What will you do?
Our hands-on approach to teaching will set you up to join this booming industry. You will:

• learn how to respond to global food shortages and a changing climate with sustainable practices, environmental stewardship, modern agribusiness and new technology
• master the latest methods, from adapting genes and cells for new crops to the business of livestock, and explore emerging trends, like vertical farming
• build practical skills through at least 450 hours of internships and real-world learning at our working farm at Roseworthy
• work with industry-transforming technology, like drones, GPS and crop sensors
• go on field trips across Australia, exploring everything from dryland farming to glasshouse systems
• develop skills in agribusiness that will allow you to work in the business of farming
• access the latest research, innovation and technology through government and industry partners.

BACHELOR OF APPLIED DATA ANALYTICS

Drive evidence-based decision-making
For decision-makers, data is gold. But only if it can be interpreted accurately. All around the world, in every industry, employers are seeking professionals with not only statistical expertise, but the ability to ‘see’ new solutions in oceans of numbers.

Our new Bachelor of Applied Data Analytics will help you step into this critical role in one of seven specialist areas:

• agriculture
• bioinformatics
• economics
• environment
• geosciences
• physics
• public health.

What will you do?
The degree is unique in Australia, in combining big-data analytics training with decision science. You will:

• learn to use big-data analytics within your chosen discipline, giving you the skills employers are looking for
• gain valuable industry experience through internship opportunities
• develop skills in statistical inference, including using machine learning
• design new models to address complex problems
• apply data analysis to develop organisational strategies for success in your chosen discipline
• undertake a significant research project in your final year.

Where could it take you?
You’ll be well equipped to help organisations in your chosen area of specialisation identify opportunities for improvement and growth. You could work in government, consultancies or large corporations, at home or abroad. Or perhaps you’ll apply your knowledge to drive decision-making in a venture of your own.
BACHELOR OF FOOD AND NUTRITION SCIENCE

CRICOS CODE 098797G
INTERNATIONAL 2021 SELECTION RANK 70
DURATION 3 years full-time
INTAKES February and July
CAMPUS North Terrace, Waite, Regency Park
ASSUMED KNOWLEDGE Chemistry and Mathematics

INDICATIVE ANNUAL TUITION FEE $41,500

adelaide.edu.au/degree-finder
Search nutrition

Feed our future
Food is fundamental to our wellbeing as a society. New approaches to production and processing of food, as well as to our diet, are key for health and sustainability. The Australian food and beverage industry exports $40 billion a year and is growing rapidly. There is a high demand for food and nutrition scientists able to tackle today’s challenges and meet tomorrow’s global needs.

What will you do?
Our Bachelor of Food and Nutrition Science prepares you to educate and innovate with food. You will:
• tackle global issues like food security and population health to help feed the world into the future
• learn about food systems and production from ‘farm-gate to fork’
• gain hands-on experience through 120 hours of placement in a food, nutrition or health organisation
• learn how to design, formulate, produce, package and market foods under industry conditions
• develop the skills to use and alter food to combat diet-related health issues
• experiment with chemical composition and flavour combinations in the lab
• explore ways of developing sustainable, nutritious, safe and healthy food supplies.

Where could it take you?
You could work in public health advertising, developing food and nutrition policy, regulations and resources. You might pursue microbiology and increase the nutrient density of plant-based protein products. Perhaps you’ll take on a role in food quality assurance, waste management or education. You’ll also be eligible to apply for registration as an associate nutritionist, or could use the program as a pathway into dietetics.

Professional accreditation
Graduates are eligible for registration as an Associate Nutritionist with the Nutrition Society of Australia and after three years of relevant experience, can apply to be a Registered Nutritionist. You are also eligible for Graduate Membership to the Australian Institute of Food Science Technology.

BACHELOR OF SCIENCE

Discover our world
Love science but not sure which path to take? The Bachelor of Science lets you design your own degree based on your strengths and emerging interests. From Chemistry to Palaeontology, Genetics to Geophysics — we support your scientific curiosity.
Our degree is ranked best for Science in South Australia, and among the top 150 in the world*. It also has the highest graduate satisfaction ranking for science in the state**.

What will you do?
Whether you want to use your critical thinking to help drive global change or join the cutting-edge of research, our Bachelor of Science will give you the skills you need. You will:
• become an adaptable scientist as you learn the skills to evolve with one of the fastest-growing sectors
• learn from world-class researchers who are experts in their field
• develop connections in the science world through internships
• engage with new ideas through discovery and experiential learning
• develop in-depth discipline knowledge through a major
• build highly sought-after skills in communication, critical thinking and creative problem solving
• access research facilities of international significance.

You can pursue any of the following major areas of study:
• Biochemistry
• Bioinformatics
• Chemistry
• Ecology
• Evolutionary Biology
• Geology
• Genetics
• Geophysics
• Microbiology and Immunology
• Palaeontology
• Plant Biology
• Physics
• Theoretical Physics
• Soil Science...
You can also undertake a double major in:
• Chemistry (double)
• Ecology and Spatial Science
• Experimental and Theoretical Physics
• Palaeontology - Evolution
• Palaeontology - Geology.

Where could it take you?
You could surround yourself with plants as a botanist, work in stem cell research, take up teaching or apply your skills in the business world. You might help the public engage with science through games and apps. Perhaps you’ll launch your abilities as a space entrepreneur, one of the many emerging science roles we’re only just beginning to imagine.

BACHELOR OF SCIENCE (HONOURS)

Discover more of our world
If you haven’t yet chosen an area of science to specialise in, but are sure that—once you have—you’ll want to follow that path as far as it can take you, this degree’s for you.

Our direct-entry Bachelor of Science (Honours) builds on South Australia’s highest-ranked undergraduate Science degree*. You’ll thoroughly explore your scientific curiosity before specialising, then go on to gain next-level capability and an employability edge.

What will you do?
Your first year is all about discovery. You’ll investigate a number of scientific fields, before choosing a major to focus on in years two and three (see Bachelor of Science for choices).

During this time you’ll enjoy the same fantastic opportunities offered to all Bachelor of Science students. That includes developing real-world connections through internships, and potentially gaining global experience with international study.

In your honours year, you’ll then advance along either a disciplinary research or professional skills pathway.

The disciplinary research path is the most research-intensive. Working with a specific researcher or research group, you’ll undertake a major research project, together with advanced coursework, in one of the following study areas:

- plant science
- soil science
- viticulture
- wine science.

The less research-intensive professional skills path will expand your scientific knowledge and skills more broadly. You’ll undertake a major industry or community-related project, along with advanced general coursework, in your choice of:

- science communication
- science education
- science innovation
- science policy
- project management.

Where could it take you?
Depending on your study choices, you could emerge well-prepared for a high-level career in a specific scientific discipline. You might provide society with critical big-picture insights as a science generalist. Or perhaps you’ll aim higher still and go on to master’s-level research. Wherever you want to go, you’ll be well placed.

* QILT 2019 Science and Mathematics.

INDICATIVE ANNUAL TUITION FEE $41,500

adelaide.edu.au/degree-finder

BACHELOR OF SCIENCE (ADVANCED) (HONOURS)

Be a visionary science leader
Like the Bachelor of Science (Honours), our direct-entry Bachelor of Science (Advanced)(Honours) is ideal if you haven’t yet chosen an area of science to specialise in, but—once you have—want to follow that path well beyond step one.

The program again builds on South Australia’s highest-ranked undergraduate Science degree*, and lets you explore your scientific curiosity before specialising. But at every stage you’ll be challenged by even greater academic demands. Ultimately, you’ll emerge as a clear future leader in your field.

What will you do?
Your first year is all about discovery. You’ll investigate a number of scientific fields, before choosing a major to focus on in years two and three (see Bachelor of Science (Advanced) for choices).

During this time you’ll enjoy the same fantastic opportunities offered to all Bachelor of Science (Advanced) students. That includes developing advanced research skills, making real-world connections through internships, and potentially gaining global experience with international study. In your honours year, you’ll then advance along either a disciplinary research or professional skills pathway. The disciplinary research path is the most research-intensive.

Working with a specific researcher or research group, you’ll undertake a major research project, together with advanced coursework, in one of the following study areas:

- plant science
- soil science
- viticulture
- wine science.

The less research-intensive professional skills path will expand your scientific knowledge and skills more broadly. You’ll undertake a major industry or community-related project, along with advanced general coursework, in your choice of:

- science communication
- science education
- science innovation
- science policy
- project management.

Where could it take you?
Depending on your study choices, you could emerge well-prepared for a high-level career in a specific scientific discipline. You might provide society with critical big-picture insights as a science generalist. Or perhaps you’ll aim higher still and go on to master’s-level research. Wherever you want to go, you’ll be well placed.

* QILT 2019 Science and Mathematics.
The less research-intensive professional skills path will expand your scientific knowledge and skills more broadly. You’ll undertake a major industry or community-related project, along with advanced general coursework, in your choice of:

- science communication
- science education
- science innovation
- science policy
- project management.

Where could it take you?
Depending on your study choices, you could emerge well-prepared for senior and leadership roles in a specific scientific discipline or as a science generalist, in the public or private sector. Or perhaps you’ll aim higher still and go on to master’s-level research. Wherever you want to go, you’ll be perfectly placed.

Note: You must maintain a GPA of 5.0 or you’ll be required to transfer to the Bachelor of Science (Honours).

**BACHELOR OF SCIENCE (ANIMAL BEHAVIOUR)**

**CRICOS CODE** 09737K  
**INTERNATIONAL DURATION** 3 years full-time  
**INTAKES** February and July  
**ASSUMED KNOWLEDGE** Chemistry and mathematics  
**INDICATIVE ANNUAL TUITION FEE** $41,500

communicate across species  
Love interacting with animals? Fascinated by pets and their personalities? Animal behaviour is psychology for the animal kingdom. It’s about understanding the science behind why animals act in certain ways, how we should work with them, and how we can look after their futures. It even informs our understanding of human behaviour.

What will you do?
Exploring why cats’ meow, find out if parrots are smart, and play with the odd puppy or two as you build the skills to join this growing industry. You will:
- study the behaviour of animals big and small, including cats, dogs, birds, horses, livestock, wildlife and insects
- build practical skills through internship opportunities
- join a close-knit, animal-loving community at our Roseworthy campus
- learn about animal development and the biological drivers of behaviour
- explore your personal animal interests through research projects and case studies
- draw on the University’s internationally recognised expertise in animal science and veterinary bioscience.

Where could it take you?
You could consult with exotic pets, prepare puppies or two as you build the skills to join this growing industry. You will:
- even comforting children with autism and visually impaired, detecting in customs, or work in a wildlife park or zoo.
- might ready dogs for roles guiding the animal management for local government.
- might work in a wildlife park or zoo.
- might work in an industry. Perhaps you’ll work directly as a nutritionist developing diets for companion or production animals, or as a veterinarian working with companion animals.
- might work in an industry. Perhaps you’ll work directly as a nutritionist developing diets for companion or production animals, or as a veterinarian working with companion animals, or in veterinary bioscience.

**BACHELOR OF SCIENCE (ANIMAL SCIENCE)**

**CRICOS CODE** 047801A  
**INTERNATIONAL DURATION** 3 years full-time  
**INTAKES** February  
**ASSUMED KNOWLEDGE** Chemistry and mathematics  
**INDICATIVE ANNUAL TUITION FEE** $41,500

**BACHELOR OF SCIENCE (BIOMEDICAL SCIENCE)**

**CRICOS CODE** 023455A  
**INTERNATIONAL DURATION** 3 years full-time  
**INTAKES** February and July (students commencing in July may have a slightly limited selection of courses)  
**PREREQUISITES** Chemistry and one other subject chosen from Mathematics, Physics, Biology or Geology  
**INDICATIVE ANNUAL TUITION FEE** $41,500

**Advent outcomes for animals and industry**
We rely on animals for so much—labour, entertainment, companionship. Animal science is essential for keeping the animals under our charge housed, fed, healthy and safe. Animal scientists research new technologies and approaches to managing animal production and welfare, develop and run breeding programs, regulate animal feed and products, and work to decrease the environmental impact of agriculture.

What will you do?
Our Bachelor of Science (Animal Science) prepares you for success in the lab and the field. You will:
- learn how to positively influence the productivity and welfare of livestock, as well as the health of pets, zoo animals and wildlife
- build practical skills with internship opportunities
- work with a variety of species, including livestock, horses, wildlife, companion animals and laboratory animals
- join a close-knit, animal-focused community at our Roseworthy campus
- study the fundamentals of animal physiology, as you explore areas like wildlife management, nutrition and on-farm management
- draw on the University’s internationally recognised expertise in animal and veterinary sciences.

Where could it take you?
You could provide farmers with ways to improve the health and welfare of livestock. Perhaps you’ll get a job as a nutritionist developing diets for companion or production animals, or work in a wildlife park or zoo. You might research laboratory animal housing, or ways to detect or control diseases that affect our wildlife.

**Advance outcomes for animals and industry**

You might research laboratory animal housing, or ways to detect or control diseases that affect our wildlife.

**Drive progress at the molecular level**
Do you have an interest in medical biology and human health? Are you keen to discover more about human disease, from its cause and diagnosis through to novel treatments and cures? Biomedical scientists are vitally important. They advance world-changing discoveries to improve the health and quality of people’s lives.

The University of Adelaide is ranked in the top 150 in the world for biological sciences and best in South Australia, plus a five-star graduate satisfaction rating.*

What will you do?
Our Bachelor of Science (Biomedical Science) gives you the knowledge and skills to access an emerging global sector. You will:
- learn the skills to drive the future of healthcare, from vaccine discovery to disease prevention
- gain real-world practical insights from industry lecturers and placements
- study how the body works and what happens when it fails
- explore how to stop deadly outbreaks of disease and create life-saving vaccinations
- build a vast knowledge base from simple molecules to whole organisms
- learn directly from active world-class biomedical researchers and educators.

Areas of specialisation include:
- Biochemistry
- Genetics
- Microbiology and Immunology

Where could it take you?
You could be running a laboratory, performing cutting-edge cancer research or modifying genes for vaccines. You might design drugs for the pharmaceutical industry. Perhaps you’ll work directly with patients after completing a degree in postgraduate medicine or allied health.

* QS World University Ranking by Subject Biological Sciences 2019 and Graduate Outcomes Survey, 2018.
**BACHELOR OF SCIENCE (BIOTECHNOLOGY)**

CRICOS CODE 031007C  INTERNATIONAL 2021 SELECTION RANK 75

CAMPUS North Terrace  DURATION 3 years full-time

INTAKES February and July (students commencing in July may have a slightly limited selection of courses)

PREREQUISITES Mathematics and Chemistry

ASSUMED KNOWLEDGE Physics an advantage

INDICATIVE ANNUAL TUITION FEE $41,500

Harness nature’s potential

Biotechnology focuses on biology and technology, leading to the development of new products for feeding, fuelling and healing the world. This might include vaccine, antibiotic or hormone production and genetic modification. It’s a fast-evolving industry with huge potential for improving global health and wellbeing. When we modify living things, all sorts of marvels become possible.

What will you do?

Our Bachelor of Science (Biotechnology) combines traditional science with aspects of engineering and computer science and has a five-star graduate satisfaction rating*. You will:

- give your experimentation meaning as you learn how to take your discoveries from the lab to the market and wider community
- delve into areas like drug development, gene therapy or the identification of biomarkers for cancers
- learn how to produce food, drugs and other products
- study alongside research-active experts
- explore molecular, genetic, animal and plant biology
- discover microbial biotechnology and bioprocess engineering
- consider social and ethical issues, patents and waste management.

Where could it take you?

You could concoct world-changing pharmaceutical drugs in the lab. You might work to clone animals. Perhaps you’ll aid in the development and implementation of modern techniques for disease prediction and treatment.

* Graduate Outcome Survey, 2018

**BACHELOR OF SCIENCE (HIGH PERFORMANCE COMPUTATIONAL PHYSICS)(HONOURS)**

CRICOS CODE 047800B  INTERNATIONAL 2021 SELECTION RANK 80

CAMPUS North Terrace  DURATION 4 years full-time

INTAKES February

PREREQUISITES Mathematics and Physics

INDICATIVE ANNUAL TUITION FEE $41,500

Enter the world of supercomputers

Love calculations, formulas and data enabled science? Want to solve cutting-edge problems at the forefront of physics? Computational physics is a rapidly growing and highly interdisciplinary research area. High-performance computations are an essential part of modern research in particle physics, condensed-matter physics, astrophysics, fluid mechanics, quantum field theory, quantum chromodynamics, and plasma physics.

What will you do?

In our Bachelor of Science (High Performance Computational Physics) (Honours) you will:

- find answers to cutting-edge problems using high-performance computing
- learn to program parallel supercomputers using state-of-the-art computer languages
- access the University’s supercomputer, Phoenix; a 300 teraflop high-performance computer
- immerse yourself in small group discovery experiences with like-minded peers
- take core courses in physics, mathematics and computer science
- apply sophisticated computing skills to modern physics problems.

In your final year Honours Program, you’ll dive deep into theoretical or computational physics and physics applications. This includes specialist research projects and courses.

Where could it take you?

Your advanced computational and mathematical skills will enable you to pursue a wide range of careers, everywhere from the computer industry—including cybersecurity and defence—to physics research and investment banking.
Go below the surface

Marine biology is the study of our planet’s largest and most diverse ecosystem—the sea. Marine biologists observe, preserve and discover ocean life, from tiny shelled creatures and thriving underwater forests to flashing squids and roving sharks.

What will you do?

Our Bachelor of Science (Marine Biology) has a focus on contemporary marine biology practices on both a local and global scale, with a five-star student satisfaction ranking for teaching quality and overall experience*. You will:

• get hands-on in marine and freshwater environments
• master your expertise in the lab, then apply these techniques in the field

Where could it take you?

You could explore future life in a high-CO₂ world, dive on underwater volcanoes or lead oceanic ecotours. You might study the effects of climate change on our reefs or research the impact of microplastics in fish. Perhaps you’ll make documentaries to educate the wider public or discover totally new marine species.

* Student Experience Survey Teaching Quality Satisfaction Level 2018

BACHELOR OF SCIENCE (MINERAL GEOSCIENCE)

Go below the surface

Mineral geoscience is all about Earth’s mineral resources—their nature, origin, distribution, discovery and uses. Geoscientists explore for metallic and non-metallic deposits and find environmentally safe ways to dispose of waste materials from mining.

What will you do?

Our Bachelor of Science (Mineral Geoscience) prepares you for an interesting, well-paid and diverse career in the minerals and energy sector. You will:

• get hands-on with plenty of field work and exposure to industry in this high demand field
• learn about mining, engineering and mineral resources
• explore Earth’s mineral resources—their nature, origin, distribution, discovery and uses
• see rocks in their natural habitat, study the oceans and learn how to read history from the Earth
• take integrated and extended geology, tectonics and geophysics courses.

Where could it take you?

Mineral geoscience graduates are in high demand. You might work in exploration, making the calls on where next to drill for diamonds. You could journey below the surface as an underground mine geologist. Perhaps you’ll work on solutions for repairing the environmental impacts of mining.

JORDON DELLA-PIETRA

Bachelor of Science (Marine Biology) and Master of Teaching Science Teacher, Salisbury High School

“I began by learning about my main passion, Marine Biology and completed my undergraduate and honours degrees in this area. I’m now a Biology and Science trained teacher, and my experiences from these degrees has helped in my career.”
**BACHELOR OF SCIENCE**
( SPACE SCIENCE AND ASTROPHYSICS)

The final frontier

Want to delve into the depths of our solar system? Explore the universe’s most distant galaxies?

This is the number one degree in South Australia for Astronomical and Space Sciences research, and has a five-star student satisfaction ranking for our teaching quality*.

**What will you do?**

Our Bachelor of Science (Space Science and Astrophysics) places a strong emphasis on maths and physics. You will:

- work with, and learn from international researchers whose ground-breaking and award-winning discoveries are changing the way we understand our universe
- develop problem-solving skills critical to modern careers in physics, high-tech and space industries, and big data science
- have the opportunity to take part in project work with established scientists
- discover the fundamental processes which define our universe and our planet
- unravel the mysteries of space through core training in astronomy and space science
- supplement learning with other science, geoscience, and maths programs.

**Australian Space Agency**

Not only will the new agency be located right next door to The University of Adelaide campus, but there will also be exciting opportunities for you to explore with industry, start-ups and space technology enterprises.

**Where could it take you?**

You might research star formation with a national space agency or be a planetarium director. You could forecast geomagnetic storms at the Bureau of Meteorology. Perhaps you’ll work in an observatory, publish a book or host the next award-winning space documentary.

**Keep animals happy and healthy**

Veterinarians are dedicated to the wellbeing of animals. They are scientists, surgeons, carers, and lifelong learners.

Our Bachelor of Science (Veterinary Bioscience) is ranked 43rd in the world for veterinary sciences and has a Five Star Excellence in Research Australia ranking*.

**What will you do?**

You’ll enjoy the smallest class size of any veterinary program in Australia. This means more personalised attention from our highly experienced teachers and researchers as you:

- explore the anatomy, physiology and behaviour of normal animals and identify the pathogenic organisms that attack them
- learn about animal handling and husbandry
- experience real industry settings including farms and intensive production facilities
- undertake a significant amount of hands-on animal work, starting in semester one
- access our $37 million purpose-built veterinary teaching and research facilities.

**Where could it take you?**

This is the first part of the veterinary science program. Graduates gain direct entry into the Doctor of Veterinary Medicine program. Completing both degrees makes you eligible to register as a veterinarian, where you might own a practice or travel to farms around the country treating animals.

Veterinary bioscience could also lead to roles in research in equine, zoo animal or wildlife medicine. You might even work in biosecurity, managing programs to prevent disease and pollution.

**Professional accreditation**

The veterinary science program at the University of Adelaide has been granted accreditation by the Australasian Veterinary Boards Council (AVBC), the Veterinary Surgeons’ Board of Hong Kong and the Royal College of Veterinary Surgeons (UK).

This means when you graduate from your Masters, you’ll be eligible for registration as a veterinarian in Australia, New Zealand, South Africa, Singapore, the United Kingdom and Hong Kong.

BACHELOR OF SCIENCE (WILDLIFE CONSERVATION BIOLOGY)

**CRICOS CODE** 088769A

**INTERNATIONAL 2021 SELECTION RANK** 75

**CAMPUS** North Terrace

**DURATION** 3 years full-time

**INTAKES** February and July

**INDICATIVE ANNUAL TUITION FEE** $41,500

Make a real impact
Wildlife is vanishing throughout the world. Many species will disappear during your working life.

Do you want to buck this trend and reverse imminent species loss? Our Bachelor of Science (Wildlife Conservation Biology) gives you the knowledge and skills to safeguard our ecosystems and protect the future of wildlife in crisis, plus a five-star student satisfaction ranking for our teaching quality*.

What will you do?
Our Bachelor of Science (Wildlife Conservation Biology) is hands-on and prepares you to become a conservation advocate in both theory and practice. You will:
- split your time between the lab and the field as you learn to champion biodiversity conservation
- use new technology, like drones and satellites to collect data and monitor habitats
- conduct field research for real-life monitoring programs
- build valuable industry connections with organisations—from Arid Recovery and BioR in South Australia to Conservation International
- learn to identify plants and animals in natural settings
- consider the social, political and economic constraints of the field
- develop the skills to plan, execute and monitor habitat restoration programs for declining species.

Where could it take you?
Our conservation graduates go on to all sorts of exciting and rewarding careers. You might reconstruct local habitats or lead breeding programs in sanctuaries. You could monitor the movements of animals with satellite tracking and other remote techniques. Perhaps you’ll work in academia, researching your passion and inspiring the next generation of conservationists.

BACHELOR OF VETERINARY TECHNOLOGY

**CRICOS CODE** 100494

**INTERNATIONAL 2021 SELECTION RANK** 80

**CAMPUS** Roseworthy

**DURATION** 3 years full-time

**INTAKES** February

**ASSUMED KNOWLEDGE** Mathematics

**INDICATIVE ANNUAL TUITION FEE** $43,500

Lead transformative animal care
Also known as para-veterinary health care specialists, veterinary technologists play a vital role in modern animal welfare. As well as providing high-level, hands-on veterinary care, including the use of anaesthesia and analgesics, they oversee the application of cutting-edge new veterinary technology.

Data-driven apps, wearable devices, telemedicine—a steady stream of advanced new tools is reimagining what’s possible in the clinical environment. As a veterinary technologist, you can ensure it delivers maximum benefit to animals’ health and wellbeing.

What will you do?
Our Bachelor of Veterinary Technology is part of the University’s world-top-50 suite of veterinary science and veterinary-related degrees*. Studied over three years full-time, it will give you:
- high-level practical skills in caring for all kinds of animals—from cats, dogs and horses, to farm animals, wildlife and exotic pets
- training and experience in the use of anaesthetic and analgesic drugs
- deep knowledge of animal diseases, including those threatening humans
- extensive hands-on clinical experience
- regular access to our world-class, $37 million Veterinary Health Centre.

In third-year you’ll also have the opportunity to specialise in: small animals; anaesthesia; imaging; equine; farming; or practice management.

And you’ll collaborate with Veterinary Bioscience and Doctor of Veterinary Medicine students throughout the degree, reflecting real-world workplace interactions.

Where could it take you?
You’ll graduate ready to step straight into high-level animal-care roles in a wide range of industry settings. You could oversee imaging or anaesthesia services for a veterinary hospital or clinic.

You might care for big cats in an open-range zoo. Perhaps you’ll train biosecurity emergency-response personnel. You could even support important animal research, or—with further study—lead it yourself.

* QS World University Rankings by Subject Area, 2019.
Follow your palate

Great wine is central to South Australia’s identity. In fact, Adelaide is one of the great wine capitals of the world with over 200 cellar doors within an hour of the CBD. 70 percent of Australian wine research happens at the University of Adelaide’s Waite campus. Our winemakers are innovators and cultural leaders within a sector helping drive the nation’s economy.

What will you do?

Our Bachelor of Viticulture and Oenology teaches best-practice techniques for growing wine grapes and making wine. You will:

• get your hands dirty in our on-campus vineyard and learn to make wine at Australia’s largest teaching winery
• build practical skills through an industry placement in viticulture and/or oenology
• study at the largest agricultural teaching and research precinct in the Southern Hemisphere
• learn from more than 150 researchers and partners in wine and grape science
• access cutting-edge research at the Australian Research Council Training Centre for Innovative Wine Production.

There are also opportunities to study and gain experience overseas.

Where could it take you?

You’ll graduate as a fully trained winemaker or viticulturist. You could manage your own winery or vineyard. You might work with the latest technologies to develop innovations and efficiencies in related industries. Perhaps you’ll focus on sustainable and natural practices, building an organic, biodynamic or solar-powered future for the wine industry.
TEACHING
The University of Adelaide’s Bachelor of Teaching double degrees are the first step towards a rewarding career in which you can inspire, challenge and guide the young people who will become society’s leaders of tomorrow. Each degree provides you with a professional qualification that is recognised for teacher registration in South Australia, other states of Australia and, in most cases, overseas.

You will major in two subject areas to teach in the middle or secondary years of schooling (7-10 and 8-12 respectively). You’ll explore educational issues and practice, and undertake a professional experience placement in a school every year of the degree. You will also learn wellbeing strategies that help you consider the needs of the learners in your class as well as yourself.

Our unique e-learning program will help you develop skills to teach the next generation of citizens in a rapidly changing technological world.

Teaching points of difference

• Major in two subject areas to teach in the middle or secondary years of schooling
• Graduate with two degrees including one from Arts, Business Management, Music, Science, Mathematical and Computer Sciences or Economics
• Gain professional classroom experience from first year.

YUETING LI
Bachelor of Teaching (Middle) with Bachelor of Arts

“This degree is interesting because of the vast opportunities for employment in the education industry. The e-learning program is an opportunity that makes this degree unique compared to other courses. More advanced technology is entering school to improve the way of teaching. Most important of all, technology changes how we teach.”
BACHELOR OF TEACHING (MIDDLE) WITH BACHELOR OF ARTS

CRICOS CODE 097619G
INTERNATIONAL 2021 SELECTION RANK 80

CAMPUS North Terrace
DURATION 4 years full-time
INTAKES February

ADDITIONAL ENTRY REQUIREMENTS Applicants must complete a non-academic assessment task as part of their application to demonstrate their motivation to teach, strong interpersonal and communication skills, willingness to learn, resilience, self-efficacy, and strong organisational and planning skills like LANTITE, WWCC and RAN.

INDICATIVE ANNUAL TUITION FEE $39,000

adelaide.edu.au/degree-finder Search teaching

The middle school years (7-10) are an exciting time. Students are working out who they are, what's important to them and where the answers to these questions could take them.

The Bachelor of Teaching (Middle) with Bachelor of Arts gives you the skills to engage growing young people in the vital study of history, society, culture and creativity.

What will you do?
The Arts covers a broad range of learning areas, including Languages, History, Geography, Legal Studies, Psychology and English. Over the course of the degree you will:
• build expertise in the two subjects you intend to teach
• explore educational issues, curriculum and practice relevant to the middle years
• work with inspiring teachers and researchers
• gain professional experience and connections through extensive school placements.

Where could it take you?
You’ll graduate with the skills and knowledge to respond to the intellectual, social and emotional needs of students in the middle years. You will be fully qualified to register as a teacher Australia-wide. If you’d like to teach overseas, your degree will be valid in most other countries. An education background will also prove invaluable in a wide range of careers servicing communities outside the classroom.

BACHELOR OF TEACHING (MIDDLE) WITH BACHELOR OF BUSINESS MANAGEMENT

CRICOS CODE 100932
INTERNATIONAL 2021 SELECTION RANK 80

CAMPUS North Terrace
DURATION 4 years full-time
INTAKES February

ADDITIONAL ENTRY REQUIREMENTS Applicants must complete a non-academic assessment task as part of their application to demonstrate their motivation to teach, strong interpersonal and communication skills, willingness to learn, resilience, self-efficacy, and strong organisational and planning skills like LANTITE, WWCC and RAN.

INDICATIVE ANNUAL TUITION FEE $39,000

Increase students’ employability
As a business-studies teacher, with specific expertise teaching in the middle years, you’ll help your students understand how the commercial world works—and how they can make it work for them.

What will you do?
In the Bachelor of Teaching (Middle) with Bachelor of Business Management you’ll:
• build expertise in business management and an additional area you intend to teach
• explore educational issues, curriculum and practice in relation to teaching business studies, and particularly in the middle secondary years, an area of schooling attracting increasing attention in the Australian education system
• work with inspiring teachers and researchers in the discipline area of Business Management
• gain professional experience and connections through extensive school placements
You’ll also:
• learn to effectively manage people, resources and projects
• explore business finance and commercial law
• study strategic planning and the science of decision-making
• consider client relations, ethics and the role of technology
• build real-world business management skills through industry internships, projects and entrepreneurial challenges.

Where could it take you?
Upon accreditation of this degree with the Teachers Registration board of South Australia, you’ll graduate to register as a teacher in South Australia, across Australia and internationally (check local jurisdictions for specific criteria that may apply). You’ll also be well prepared for business and management roles in the public and private sectors, and particularly in educational settings. Plus, an education background will prove invaluable in a wide range of careers servicing communities beyond the classroom.

BACHELOR OF TEACHING (MIDDLE) WITH BACHELOR OF MATHEMATICAL AND COMPUTER SCIENCES

CRICOS CODE 097620C
INTERNATIONAL 2021 SELECTION RANK 80

CAMPUS North Terrace
DURATION 4 years full-time
INTAKES February

PREREQUISITES Mathematics

ADDITIONAL ENTRY REQUIREMENTS Applicants must complete a non-academic assessment task as part of their application to demonstrate their motivation to teach, strong interpersonal and communication skills, willingness to learn, resilience, self-efficacy, and strong organisational and planning skills like LANTITE, WWCC and RAN.

INDICATIVE ANNUAL TUITION FEE $39,000

With science, technology, engineering, and mathematics set to shape the future, we need great teachers to connect with the curious minds of young people in years 7-10. This degree offers specialisations in Mathematics and/or Digital Technologies and/or another approved area. Through these mediums you’ll build key skills and empower future generations.

What will you do?
In the Bachelor of Teaching (Middle) with Bachelor of Mathematical and Computer Science you’ll:
• build expertise in the areas you intend to teach
• explore educational issues, curriculum and practice relevant to the middle school years
• work with inspiring teachers and researchers
• gain professional experience and connections through extensive school placements.

Where could it take you?
You’ll graduate with the skills and knowledge to respond to the intellectual, social and emotional needs of students in the middle years. You will be fully qualified to register as a teacher Australia-wide. If you’d like to teach overseas, your degree will be valid in most other countries. An education background will also prove invaluable in a wide range of careers servicing communities outside the classroom.
Music in the middle school years (7-10) provides a much-needed environment of acceptance, creativity and self-expression. Music specialist teachers encourage, test and inspire emerging musicians. The Bachelor of Teaching (Middle) with Bachelor of Music sets you up for a rewarding career focused around your passion.

What will you do?

- Build expertise in both music and an additional non-music teaching area
- Explore educational issues, curriculum and practice relevant to the middle school years
- Work with inspiring teachers and researchers
- Gain professional experience and connections through extensive school placements.

Where could it take you?

You’ll graduate with the skills and knowledge to respond to the intellectual, social and emotional needs of students in the middle years. You will be fully qualified to register as a teacher Australia-wide. If you’d like to teach overseas, your degree will be valid in most other countries. An education background will also prove invaluable in a wide range of careers servicing communities outside the classroom.

With an uncertain future ahead, a science savvy populace is more important than ever. Great middle school science teachers tap into the natural curiosity and imaginative thinking of young people in years 7–10. They build a strong foundation of knowledge and inspire a spirit of discovery.

What will you do?

The Bachelor of Teaching (Middle) with Bachelor of Science offers specialisations in Biology, Chemistry, Earth and Environmental Science, Physics and/or another approved area. You will:

- build expertise in the subjects you intend to teach
- explore educational issues, curriculum and practice relevant to the middle school years
- work with inspiring teachers and researchers
- gain professional experience and connections through extensive school placements.

Where could it take you?

You’ll graduate with the skills and knowledge to respond to the intellectual, social and emotional needs of students in the middle years. You will be fully qualified to register as a teacher Australia-wide. If you’d like to teach overseas, your degree will be valid in most other countries. An education background will also prove invaluable in a wide range of careers servicing communities outside the classroom.

Secondary school teachers can have a profound influence on young people’s lives. They challenge, encourage and inspire. They appreciate the arts as vital to a well-rounded education. Our Bachelor of Teaching (Secondary) with Bachelor of Arts provides a unique pathway to a rewarding career.

What will you do?

You’ll build deep understanding of the subjects you intend to teach, selecting from:

- Classroom music
- Economics
- English
- Geography
- History
- Languages (Chinese, French, German, Indonesian, Italian, Japanese, Modern Greek, Spanish)
- Linguistics (EAL/D or EAL*)
- Legal Studies (minor only)
- Media
- Psychology
- You’ll also:
  - explore educational issues, curriculum and practice relevant to the secondary years
  - work with inspiring teachers and researchers
  - gain professional experience and connections through extensive school placements.
BACHELOR OF TEACHING (SECONDARY) WITH BACHELOR OF ECONOMICS

*CROIC CODE 047796D
CAMPUS North Terrace
DURATION 4 years full-time
INTAKES February
ADDITIONAL ENTRY REQUIREMENTS Applicants must complete a non-academic assessment task as part of their application to demonstrate their motivation to teach, strong interpersonal and communication skills, willingness to learn, resilience, self-efficacy, and strong organisational and planning skills like LANTITE, WWCC and RAN.

INDICATIVE ANNUAL TUITION FEE $39,000

It’s important that young people leave high school able to make decisions and understand their place in a global economy. In the modern world, financial and economic literacy are key for living an empowered life. Economics teachers encourage an informed and questioning mindset. They help position students as citizens of the world, set to thrive, influence and lead.

What will you do?
In the Bachelor of Teaching with Bachelor of Economics you will:
• build expertise in economics and an additional area you intend to teach
• explore educational issues, curriculum and practice
• work with inspiring teachers and researchers
• gain professional experience and connections through extensive school placements.

Where could it take you?
You’ll graduate fully qualified to register as a secondary teacher Australia-wide. If you’d like to teach overseas, your degree will be valid in most other countries. An education background will also prove invaluable in a wide range of careers servicing communities outside the classroom.

BACHELOR OF TEACHING (SECONDARY) WITH BACHELOR OF MATHEMATICAL AND COMPUTER SCIENCES

*CROIC CODE 047797C
CAMPUS North Terrace
DURATION 4 years full-time
INTAKES February
PREREQUISITES Mathematics
ADDITIONAL ENTRY REQUIREMENTS Applicants must complete a non-academic assessment task as part of their application to demonstrate their motivation to teach, strong interpersonal and communication skills, willingness to learn, resilience, self-efficacy, and strong organisational and planning skills like LANTITE, WWCC and RAN.

INDICATIVE ANNUAL TUITION FEE $39,000

With many future jobs predicted to be in fields related to science, technology, engineering and mathematics (STEM), we need great teachers with expertise and enthusiasm for these areas. The Bachelor of Teaching (Secondary) with Bachelor of Mathematical and Computer Sciences prepares you to meet this demand and share vital skills with young people.

What will you do?
You’ll specialise in Mathematics and/or Information Technology and one of the following additional learning areas:
• Accounting
• Biology
• Business Studies
• Chemistry
• Digital Technologies
• Economics
• Geography
• History
• Languages (Indonesian, Japanese, Chinese, French, German, Spanish, Italian, Modern Greek, EAL/D or EAL*)
• Physics
• Mathematics

You’ll also:
• work with inspiring teachers and researchers
• explore educational issues, curriculum and practice relevant to the secondary years
• gain professional experience and connections through extensive school placements.

Where could it take you?
You’ll graduate fully qualified to register as a secondary teacher Australia-wide. If you’d like to teach overseas, your degree will be valid in many other countries. An education background will also prove invaluable in a wide range of careers servicing communities outside the classroom.

* English is an additional language or dialect or English as an Additional Language

ADMISSION REQUIREMENTS Audition—for details, visit: music.adelaide.edu.au/future/auditions/requirements
ADDITIONAL ENTRY REQUIREMENTS Applicants must complete a non-academic assessment task as part of their application to demonstrate their motivation to teach, strong interpersonal and communication skills, willingness to learn, resilience, self-efficacy, and strong organisational and planning skills like LANTITE, WWCC and RAN.

INDICATIVE ANNUAL TUITION FEE $39,000

Music in the secondary years is beneficial for young people’s intellectual, emotional and social wellbeing. For some students, it becomes a key source of pride, success and joy. As a music specialist teacher in the secondary years you’ll help your students hone musical skills, pursue their goals and build confidence.

What will you do?
The Bachelor of Teaching (Secondary) with Bachelor of Music is designed in collaboration with the Elder Conservatorium of Music. You will:
• work with experienced musicians, performers, teachers and researchers
• build expertise in music and an additional non-music teaching area
• explore educational issues, curriculum and practice relevant to the secondary years
• gain professional experience and connections through extensive school placements.

Where could it take you?
You’ll graduate fully qualified to register as a secondary teacher Australia-wide. If you’d like to teach overseas, your degree will be valid in many other countries. An education background will also prove invaluable in a wide range of careers servicing communities outside the classroom.

Great science teachers tap into young people’s natural curiosity and imaginative thinking. They build a strong foundation of knowledge and inspire a spirit of discovery. With a shortage of high school science teachers in Australia, there is high demand for educators capable of shaping the next generation of scientists. The Bachelor of Teaching (Secondary) with Bachelor of Science gives you the skills to take on this stimulating and vital role.

What will you do?
You’ll build deep understanding of the subjects you intend to teach, selecting from:
• Biology
• Chemistry
• Earth and Environmental Science
• Digital Technologies*
• Mathematics*
• Physics
• Psychology
You’ll also:
• explore educational issues, curriculum and practice relevant to the secondary years
• work with inspiring teachers and researchers
• gain professional experience and connections through extensive school placements.

Where could it take you?
You’ll graduate fully qualified to register as a secondary teacher Australia-wide. If you’d like to teach overseas, your degree will be valid in most other countries. An education background will also prove invaluable in a wide range of careers servicing communities outside the classroom.

* Students who wish to major in Mathematics or Digital Technologies must also complete a major from the Faculty of Science.
Tackling the major challenges facing our world requires teams of highly qualified professionals. Technologists play key roles in these teams by bringing specialist knowledge and management expertise to solve problems.

Technologists are expert problem solvers and communicators who are able to take an abstract concept or design and translate it into a real-world technological solution. Their strong understanding of general and specialist engineering knowledge enables them to innovatively implement, test and maintain engineered products, processes, systems and services.

Get career ready with up to 760 hours of work-based training

Developed and delivered in collaboration with industry, all our Technology qualifications have a strong emphasis on real-world experience. The curriculum is designed for rapid transition to industry after graduation. The modules are put together after extensive work between industry partners and University staff, offering an innovative blend of industry relevant knowledge and skills.

Depending on your chosen degree, you’ll undertake two internships, with up to 760 hours of work-based training. Internships are embedded into the degree, with a short placement in the second year, followed up by a long placement in the final semester.

Technology points of difference

• Number 1 in South Australia for Engineering and Technology*
• Gain practical, hands-on experience with a technology focused specialisation degree
• Graduate employment ready, with up to 760 hours of work-based training in industry built into your degree

* QS Top Universities ranking, 2019
Drive construction in the digital age

Advancing technology is creating exciting opportunities for the construction industry. Digital modelling, automation and innovative engineering techniques are changing what’s possible. Worldwide, demand is soaring for graduates with skills and understanding in these areas, together with a firm grasp of contemporary building, project management and sustainability practices. Our new Bachelor of Technology (Construction) will prepare you well for a future career in which you’ll frequently work alongside professionals in these areas.

What will you do?
Taught over three years full-time within a faculty ranked 43 in the world for computer science and engineering*, the degree leverages the University’s strong industry links and world-class research. It features an emphasis on real-world experience, with an internship providing 456 hours of work-based training.

In addition to gaining a broad understanding of the foundations of the construction industry and associated project management—you’ll develop skills in applying and using:
- new and emerging technology, including digital building-information modelling tools and automation technologies (Industry 4.0)
- civil engineering principles and technology, in real-world construction contexts
- construction project and people management, including legal requirements
- systems thinking, building science, economics and sustainability principles
- effective interpersonal communication, and critical thinking.

The degree is taught across two schools—Civil Engineering and Architecture—and wherever possible you’ll share classes with students of both. This will prepare you well for a future career in which you’ll frequently work alongside professionals in these areas.

Where could it take you?
You’ll be ideally placed to work on high-technology infrastructure and construction projects anywhere in the world. From managing the construction of transformational infrastructure projects, including bridges, tunnels and highways, to constructing the next generation of zero-energy buildings using the latest digital and Industry 4.0 technologies. You may also choose to continue your study with our Master of Construction Management.

* Academic Ranking of World Universities 2018

Reach higher in modern construction

Advancing technology is creating exciting opportunities for the construction industry. Digital modelling, automation and innovative engineering techniques are changing what’s possible. Worldwide, demand is soaring for graduates with high-level skills and understanding in these areas, together with a firm grasp of contemporary building, project management and sustainability practices. Our new Bachelor of Technology (Honours)/(Construction) will prepare you to take a leading role.

What will you do?

### NOTES

1. Additional note for international students undertaking an Australian Year 12 qualification: students will be required to meet specific prerequisites including passing a designated English subject. Refer to satac.edu.au for more information.

2. Students commencing in July may have a slightly limited selection of courses.

3. A Level results are calculated on the aggregate score from three A Level subjects where A=5, B=4, C=3, D=2, E=1 for A Level subjects. General Paper or language subject in the applicant’s first language are excluded from the calculation.

4. HKDSE results are calculated on the aggregate score of five subjects where $^{*^*}$=6, $^{*}$$^{*}$=5.5, 5=5, 4=4.5, 3=4, Category B and C subjects may not be used to calculate an entry score.

5. Best five subjects excluding language subjects. Students must achieve numerical score lower than that listed, UEC grades A1=1, A2=2, B3=3, B4=4, B5=5, B6=6, C7=7, C8=8.

6. Entry scores for 2021 will be finalised in August 2020, and are subject to change. In the meantime applicants can use the entry scores for 2020 as a guide to future requirements.

7. Average of best six subjects.

8. Indian School Certificate (ISC) and Central Board of Secondary Education (CBSE) – Senior Certificate Examination. Best three subjects, excluding language and non-academic subjects.

10. SAT undertaken after March 2016 - Aggregate of Evidence Based Reading and Writing and Mathematics scores in conjunction with American High School Diploma.
11. AP results are calculated on the aggregate numeric score of 3 AP subjects in conjunction with an American High School Diploma.
12. Indonesia SMA3 (Graduate Certificate of Completion)
13. Successful completion of Matayom 6 (Certificate of Secondary Education). GPA on a 4 point scale where A=4, B=3, C=2, D=1, F=0.
15. Specific selection criteria (audition) applies in addition to academic performance in Year 12.
16. Not all disciplines have July entry.
17. Mid-year entry students will be required to enrol in Summer School (Jan to Feb) in order to complete the program within the three year duration.
18. Other non-academic criteria may apply.
19. Strict quotas apply. The standard cut-off is the minimum academic threshold, above which applicants will be ranked on merit.
20. Students must undertake Maths 1B in Summer School
21. Other selection criteria (test/interview assessment) apply in addition to academic performance. Strict quotas apply. The standard cut-off is the minimum academic threshold, above which applications will be ranked on merit. In addition to academic performance, other selection criteria may affect merit ranking.
22. Applicants must also complete a written questionnaire and if successful, undergo an interview process.
23. Applicants must have South Australian Certificate of Education (SACE) or equivalent and Audition/Interview and Musicianship test.

10. SAT undertaken after March 2016 - Aggregate of Evidence Based Reading and Writing and Mathematics scores in conjunction with American High School Diploma.
11. AP results are calculated on the aggregate numeric score of 3 AP subjects in conjunction with an American High School Diploma.
12. Indonesian SMA3 (Graduate Certificate of Completion)
13. Successful completion of Matayom 6 (Certificate of Secondary Education), GPA on a 4 point scale where A=4, B=3, C=2, D=1, F=0.
15. General Studies excluded.
16. Specific selection criteria (audition) applies in addition to academic performance in Year 12.
17. Not all disciplines have July entry.
18. Mid-year entry students will be required to enrol in Summer School (Jan to Feb) in order to complete the program within the three year duration.
19. Other non-academic criteria may apply.
20. Students must undertake Maths IB in Summer School.
21. Other selection criteria (test/interview assessment) apply in addition to academic performance. Strict quotas apply. The standard cut-off is the minimum academic threshold, above which applications will be ranked on merit. In addition to academic performance, other selection criteria may affect merit ranking.
22. Applicants must also complete a written questionnaire and if successful, undergo an interview process.
23. Applicants must have South Australian Certificate of Education (SACE) or equivalent and Audition/ Interview and Musicianship test.

### NOTES

1. Additional note for international students undertaking an Australian Year 12 qualification: students will be required to meet specific prerequisites including passing a designated English subject. Refer to satac.edu.au for more information.
2. Students commencing in July may have a slightly limited selection of courses.
3. A Level results are calculated on the aggregate score from three A Level subjects where A=5, B=4, C=3, D=2, E=1 for A Level subjects. General Paper or language subject in the applicant’s first language are excluded from the calculation.
4. HKDSE results are calculated on the aggregate score of five subjects where 5**= 6, 5*=5.5, 5=5, 4*=4.5, 4=4, 3*=3, Category B and C subjects may not be used to calculate an entry score.
5. Best five subjects excluding language subjects. Students must achieve numerical score lower than that listed, UEC grades A1=1, A2=2, B3=3, B4=4, B5=5, B6=6, C7=7, C8=8.
6. Entry scores for 2021 will be finalised in August 2020, and are subject to change. In the meantime applicants can use the entry scores for 2020 as a guide to future requirements.
7. Average of best six subjects.
8. Indian School Certificate (ISC) and Central Board of Secondary Education (CBSE) – Senior School Certificate Examination. Best three subjects, excluding language and non-academic subjects.

**NOTES**

1. Additional note for international students undertaking an Australian Year 12 qualification: students will be required to meet specific prerequisites including passing a designated English subject. Refer to satac.edu.au for more information.

2. Students commencing in July may have a slightly limited selection of courses.

3. A Level results are calculated on the aggregate score from three A Level subjects where A=5, B=4, C=3, D=2, E=1 for A Level subjects. General Paper or language subject in the applicant's first language are excluded from the calculation.

4. HKDSE results are calculated on the aggregate score of five subjects where 5**=6, 5*=5.5, 5=5, 4*=4.5, 4=4, 3*=3, Category B and C subjects may not be used to calculate an entry score.

5. Best five subjects excluding language subjects. Students must achieve numerical score lower than that listed. UEC grades A1=1, A2=2, B3=3, B4=4, B5=5, B6=6, C7=7, C8=8.

6. Entry scores for 2021 will be finalised in August 2020, and are subject to change. In the meantime applicants can use the entry scores for 2020 as a guide to future requirements.

7. Average of best six subjects.

10. SAT undertaken after March 2016 - Aggregate of Evidence Based Reading and Writing and Mathematics scores in conjunction with American High School Diploma.
11. AP results are calculated on the aggregate numeric score of 3 AP subjects in conjunction with an American High School Diploma.
12. Indonesia SMA3 (Graduate Certificate of Completion) Successful completion of Matayom 6 (Certification of Secondary Education), GPA on a 4 point scale where A=4, B=3, C=2, D=1, F=0.
13. Average of best three subjects.
15. Specific selection criteria (audition) applies in addition to academic performance in Year 12.
16. Not all disciplines have July entry.
17. Mid-year entry students will be required to enrol in Summer School (Jan to Feb) in order to complete the program within the three year duration.
18. Other non-academic criteria may apply.
19. Strict quotas apply. The standard cut-off is the minimum academic threshold, above which applications will be ranked on merit. In addition to academic performance, other selection criteria may affect merit ranking.
20. Students must undertake Maths IB in Summer School.
21. Other selection criteria (test/interview assessment) apply in addition to academic performance. Strict quotas apply. The standard cut-off is the minimum academic threshold, above which applications will be ranked on merit.
Advanced standing  Status/credit/exemptions granted on the basis of work already completed at another post-secondary institution.

Articulation agreement  A formal agreement where study at selected institutions may be counted towards University of Adelaide qualifications.

Assumed knowledge  Previously acquired knowledge that will enable understanding of a course or degree.

Bachelor degree  An undergraduate qualification gained after a minimum of three years full-time study. A bachelor degree is made up of a range of core (compulsory) courses and elective courses, usually delivered via lectures and tutorials.

Campus  The grounds of a university or other institution of higher education.

Combined degree  A combined degree allows students to complete the requirements of two degrees in less than time when completed separately. Successful completion results in the award of a single parchment listing the combined degrees. A student may not graduate until the requirements for both degrees have been met.

Confirmation of Enrolment  The document sent by the University after receipt of the tuition fee deposit. May be used as proof of student status to apply for a student visa.

Core course  A compulsory subject taken as part of a program of study.

Course  An individual subject taken as part of a program of study.

Coursework program  A degree structured around particular courses, usually delivered via lectures and tutorials.

CRICOS  Commonwealth Register of Institutions and Courses for Overseas Students.

DHA  Department of Home Affairs.

Diploma  Some schools in the University offer diplomas, which usually consist of 1-2 years of full-time coursework, delivered via lectures and tutorials.

Discipline  A field or area of study, e.g. engineering, architecture, nursing.

Double degree  A double degree allows students to complete the requirements of two degrees in less than time when completed separately. Successful completion results in the award of two degrees with separate parchments. A student may graduate from each degree as soon as the requirements for each degree have been met. For example: Bachelor of Engineering (Chemical) with Bachelor of Arts.

Elective course  A non-compulsory subject that may be chosen as part of a program of study.

Exchange agreement  An agreement between universities allowing students to undertake 1-2 semesters of their degree at an overseas institution.

Extra admission requirements  Requirements, in addition to the specified qualifications, needed for a student to be accepted into a particular degree, e.g. audition, interview, portfolio submission, University Clinical Aptitude Test.

Full-time study  A standard full-time study load consists of 24 units per academic year, and 12 units per semester. The University and the DHA considers a 75% study load (9 units per semester or trimester) a full-time load. While international students can enrol in a 75% study load, this isn’t recommended as it may result in them not completing their degree within the standard duration. International students are required by DHA to complete within the specified duration of the degree.

Faculty  An academic branch in the University, consisting of various schools, e.g. the Faculty of Health and Medical Sciences.

GEAP (General English for Academic Purposes)  A course for students looking to improve their English for a variety of reasons, such as to assist with future study or their career. GEAP by itself is not a direct entry pathway to undergraduate or postgraduate study at the University of Adelaide.

Honours  Honours is a one-year full-time (or equivalent part-time) program that allows students to consolidate learning from their undergraduate studies by undertaking research and a thesis.

IELTS  The International English Language Testing System, an internationally recognised UK-based test for English language assessment, essential for student visa requirements.

Indicative annual tuition fee  The indicative annual tuition fee quoted in this prospectus is based on the standard full-time enrolment load of 24 units per year or 12 units per semester. These fees cover the cost of teaching and the cost of student support services. The quoted fee is reviewed on a yearly basis. Prospective students should be aware that their fees may increase each year and that they are liable for these fees upon acceptance of their offer. Each student will be advised of their fee schedule in their offer of admission to the University. Fees may vary depending on enrolment load, e.g. if students ‘overload’ or ‘underload’, fees may be increased or decreased accordingly. All fees listed are in Australian dollars (AUD$).

Lecture  A class on a specific topic presented by a lecturer to a large group of students.

Level  A stage or period of study (generally one year in duration) within a degree, e.g. Level 1, 2, 3. The depth and complexity of courses increases through each level.

Major sequence  A combination of approved courses leading to specialisation within a field of study, completed over one or more years of a degree.

OSHC  Overseas Student Health Cover is compulsory health insurance that provides basic and emergency health cover. It is an essential requirement for international students to obtain a student visa.

Part-time study  Any study load that is less than 75%, or 18 units a year. Note that under current student visa regulations, part-time study is not recommended for international students as they are required by the DHA to complete within the specified duration of their degree.

PEP (Pre-enrolment English Program)  A direct entry pathway English language program for students who have not met the entry requirements for their chosen award program.

Prerequisites  To be eligible for some degrees, particularly in the areas of Science, Engineering, Mathematics and Computer Science, applicants are required to have passed specific subjects called prerequisites.

Program  A series of courses making up a particular qualification, e.g. Bachelor of Commerce.

Selection Rank  A score that is given to a degree and used as part of the Admissions process.

Semester  The standard length of an individual course. University courses are taught in two semesters: semester 1, from February/March to May, May to August and September to November. (Note Melbourne Campus trimester run slightly different).

Seminar  A small class similar to a tutorial, involving presentations by students.

TOEFL  Test of English as a Foreign Language, an internationally recognised US-based English language test.

Trimester  Trimesters are compressed study periods which usually run from late January to May, May to August and September to November. (Note Melbourne Campus trimester run slightly different).

Tutorial  Small, weekly classes led by a tutor or lecturer, where students discuss issues relevant to a particular course.

Unit  A value assigned to courses identifying the amount of work involved. Full-time students normally undertake 24 units of study a year. Majority of courses are equivalent to 3 units.
