Produced 110 Rhodes Scholars

Ranked in top 1% of universities worldwide

Associated with 5 Nobel Laureates

Member of Group of Eight*
**WHY THE UNIVERSITY OF ADELAIDE?**

With a degree from one of the world’s top universities, students are prepared to be tomorrow’s leaders.

University of Adelaide graduates are highly regarded and internationally recognised. Students learn from academics who are global leaders in their field.

Adelaide has a proud tradition that instils confidence in our students. We are Australia’s third oldest university and have a history of excellence in education spanning more than 140 years.

We are distinguished by an emphasis on equality and by our focus on delivering outstanding research for the benefit of society. The University of Adelaide has played a role in many of the world’s important discoveries and advancements, with our alumni having contributed significantly to the educational, political and social arenas of their day.

University of Adelaide students are motivated to achieve their best and are supported by an inspiring educational community committed to helping them.

WHY HEALTH?

The University of Adelaide’s wide range of undergraduate health-related degrees can open doors to a successful, rewarding career that improves health and wellbeing around the globe.

Integrating innovative teaching, hands-on experience and cutting-edge research, the Faculty of Health and Medical Sciences is a world leader in health education. We are ranked at the top of the Group of Eight universities nationally for good teaching; and second across all Australian universities for overall satisfaction of the student experience (Australian Graduate Survey 2015). Our degrees are underpinned by a vibrant student culture. Our state-of-the-art facilities are among the best in Australasia. We have strong, well established links to research centres, institutes and the health care industry, providing students with the opportunity to immediately start building professional networks.

Our graduates are compassionate, high achieving professionals with the skills, knowledge, and leadership expertise to make a difference in all aspects of health care, research and policy. To learn more about the Faculty of Health and Medical Sciences, visit: health.adelaide.edu.au

Adelaide Health and Medical Sciences building

In 2017, the faculty entered an exciting new era in health education with the opening of the 14-floor, $246 million Adelaide Health and Medical Sciences (AHMS) building. Located in the heart of the Adelaide Biomed City alongside the new Royal Adelaide Hospital and South Australian Health and Medical Research Institute (SAHMRI), the AHMS building is home to the new Adelaide Dental Hospital, five major research themes and our flagship medical and nursing degrees.

The building brings together more than 1600 students and 700 health researchers in a vibrant, innovative environment where learning and discovery work hand-in-hand.
World-class simulation and clinical skills facilities

State-of-the-art facilities, new teaching styles, and the latest technologies are taking our degrees into the future and transforming health sciences education, research and patient care in South Australia.

Our world-class facilities include the: Dental Simulation Clinic; Ray Last laboratories, for bioskills, surgical skills and anatomy; and Adelaide Health Simulation. Located in the new AHMS building, Adelaide Health Simulation is the most high-tech health care teaching facility in Australasia. It includes 24 real-life simulation spaces, four critical-care operation theatres, eight acute-care ward suites, and four virtual home environments.
Integrating innovative teaching, hands-on experience and cutting-edge research, the Faculty of Health and Medical Sciences is a world leader in health education.

Global Learning experiences
The faculty provides students with the valuable opportunity to study overseas during their degree. Depending on the degree, Global Learning experiences can include short study tours, semester exchanges, clinical placements, or volunteer opportunities. This opportunity will give you a global perspective on major health challenges, and provide the chance to build confidence and intercultural skills.

Peer Mentoring Program
Our Peer Mentoring Program offers support for international and domestic students in their transition to university. Senior-year students provide guidance and assistance to commencing students to help them meet new people, establish friendships and develop an understanding of the expectations and requirements of university life.

Discover more, visit: health.adelaide.edu.au/current-students/peer-mentoring/

Yaitya Purruna Indigenous Health Unit
The words ‘yaitya purruna’ are from the Kaurna language of the Adelaide Plains People, and mean ‘our own health and wellbeing’. Yaitya Purruna Indigenous Health Unit provides support for all Aboriginal and Torres Strait Islander students studying in the Faculty of Health and Medical Sciences. For more information, visit: health.adelaide.edu.au/engage/facilities-and-services/yaitya-purruna

Aboriginal and Torres Strait Islander Access Entry Scheme
Wirrtu Yarlu: Aboriginal Education administers the Aboriginal and Torres Strait Islander (ATSI) Access Entry Scheme in partnership with the Faculty of Health and Medical Sciences’ Indigenous Student Support Officer and Admissions Team.

The scheme offers Aboriginal and Torres Strait Islander Australians an alternative entry pathway to studying the following degrees:
• Bachelor of Dental Surgery
• Bachelor of Health and Medical Sciences
• Bachelor of Health and Medical Sciences (Advanced)
• Bachelor of Medicine and Bachelor of Surgery
• Bachelor of Nursing
• Bachelor of Psychological Science.

This diary snapshot is an example of how a student may choose to schedule their university study and life. Attendance at university is less structured than at high school. Hours spent on campus in lectures, tutorials, practicals or in the field—known as ‘contact hours’—depend on the degree enrolled in, study mode selected (internal, external, online or flexible learning) and course choices.
LIFE EXPERIENCE THROUGH GLOBAL LEARNING

www.adelaide.edu.au/global-learning

All students will have the opportunity to study overseas through a range of programs, including student exchange, study tours and summer and winter schools. There are many exciting opportunities in Europe, Asia, the Americas and Africa.

ABORIGINAL AND TORRES STRAIT ISLANDERS

www.adelaide.edu.au/wirltu-yarlu

The University of Adelaide values diversity where the rich cultures of Aboriginal and Torres Strait Islanders are taught, supported and celebrated. Wirltu Yarlu provides a range of services, and preparation programs that are designed to support educational outcomes. Wirltu Yarlu is a place where students can soar to new heights.

ADVANCED BACHELORS

www.adelaide.edu.au/degree-finder

High achieving students who are inspired by the opportunity to contribute to the world’s important discoveries and research advancements should consider the Advanced Bachelors degrees. These degrees provide a unique close quarters learning experience with academics of international distinction.

• ATSI Access Entry Scheme applicants are assessed on several factors, including: educational history; employment experience; understanding of the chosen program of study; an interview and other factors that demonstrate their skills and study.
The interview panel will include an Indigenous Student Support Officer, a representative from the academic area in which the applicant seeks enrolment, and a student representative.
For more information about the ATSI Scheme, eligibility criteria and the admissions process, visit: adelaide.edu.au/wirltu-yarlu/future-students

Yaitya Purruna Health and Medical Scholarship

The Yaitya Purruna Health and Medical Scholarship has been established by the Faculty of Health and Medical Sciences to support Aboriginal and Torres Strait Islander students undertaking any undergraduate program in the faculty.
The scholarship is valued at $10,000 per year for the duration of the degree and is awarded based on academic merit.
For more information, visit: scholarships.adelaide.edu.au/scholarship/ug/health/yaitya-purruna-health-and-medical-scholarship

Incidental fees

Most students in the faculty will have additional costs, over and above their tuition fees.
Depending on the degree, this can include things like textbooks, equipment, required immunisations, clearance renewals, first aid certificates, travel and accommodation for placements, and student amenities fees.
For each degree’s specific fees, visit: adelaide.edu.au/student/finance/other-fees

THURSDAY

8am -12pm Medicine lectures
1-2.30pm Ethics/Medical Personal and Professional Development (MPPD) tutorial
4-5pm MPPD lecture
5.30pm Rowing practice
7pm Private study

FRIDAY

8am Bioscience lecture
9-11am Anatomy practical session
1-3pm CBL tutorial
5.30pm Friday drinks on Rundle Street
The Careers Service is available to assist all students to maximise their employability, develop connections with industry, and develop their competitive advantage for employment by delivering a suite of industry informed, student focused career development services.

The award winning Careers Service team works closely with a wide range of employers to ensure our industry knowledge is second to none. Our partnerships with local, national and international employers informs our staff about current opportunities available for students looking for work experience or graduate work and provides an in-depth knowledge about what employers are looking for.

To increase the awareness of employment opportunities after graduation, the Careers Service organise an annual Careers Expo and host events where employers work on campus to network with students and promote career pathways within their organisations. Our industry mentoring program provides opportunities for students to meet and gain insight from graduates, managers and leaders at various stages in their career lifecycle. Getting to know people in your industry is a very useful way to source career opportunities and make yourself more competitive.

All employers value industry related work experience, and being able to draw on these experiences is one way of providing evidence of skills, knowledge and abilities developed. From the Careers Service, students can access advice on how to source industry related work experience, how to create an outstanding application, how to make the most of opportunities, and how to articulate those experiences on their resume.

The Careers Service also has an online CareerHub available 24/7 listing opportunities for work experience and graduate jobs, as well as industry related part-time and volunteer work. CareerHub also hosts a large number of resources to help students connect with industry and apply for work. In addition to individual careers advice appointments, small group workshops offer topics such as writing resumes, preparing for interviews and looking for work experience.

MCKEELY MANEY

Qualification Bachelor of Health Sciences (Public Health) in 2014.

Role Child Injury Prevention Project Officer at Kidsafe SA.

Why Health Sciences? I had always wanted to help people so my Careers Counsellor at High School recommended a career in health. I looked at all the typical allied health professions but couldn’t see myself doing any of those jobs, so I applied for Health Sciences in the hope that it would keep my options open.

Any advice? Definitely get involved with the internship program with the University and seek out those opportunities. Consider attending conferences on topics that interest you. Many not-for-profits need volunteers which provides an opportunity for you to get a feel for an organisation and know when jobs are becoming available.

DENTISTRY

*Academic Ranking of World Universities of Academic Subjects 2017*
A centre of excellence since 1920, Adelaide Dental School is the highest ranked dental school in Australia and offers students the chance to learn in one of the country’s most advanced dental facilities.

In 2017, the school relocated to the new $246 million Adelaide Health and Medical Sciences (AHMS) building, which is also home to the new, state-of-the-art Adelaide Dental Hospital. As a dentistry or oral health student at the University of Adelaide, students learn from staff who have won national awards for their outstanding teaching, knowledge and practical skills. Together with real-world clinical placements and hands-on simulation learning, this gives students the knowledge, skills and confidence to excel in their chosen career.

**What is dentistry?**

Dentistry is the profession concerned with preventing, diagnosing and treating problems of the teeth, jaws and mouth. Good dental health is important for everyone, making dentistry a primary health care profession. Choosing a career in dentistry will make a difference to the lives of many.

**What is oral health?**

Oral health includes dental hygiene, prevention and treatment of oral disease, professional cleaning, and health promotion through education. Good oral health is essential throughout life. Choosing to work in oral health will lead to a rewarding career helping people of all ages maintain healthy teeth and gums.

**Adelaide Dental Hospital**

Featuring 89 dental chairs, the new Adelaide Dental Hospital in the AHMS building is one of the advanced clinical training grounds for dentistry and oral health students. Run in partnership with the South Australian Dental Service, the hospital offers students the chance to work alongside professional dentists to deliver year-round oral health services for disadvantaged members of the community.

**Community Outreach Dental Program**

Improving the lives of homeless people, the Community Outreach Dental Program provides dental and other health services for people experiencing homelessness or having difficulty accessing conventional care. The centre is run by the Adelaide Dental School, with assistance from a group of dedicated volunteer private dentists and allied health professionals, and has provided care for over 860 disadvantaged South Australians since its establishment in 2011.

**The Dental Simulation Clinic**

Dentistry and oral health students at the University of Adelaide have the opportunity to perfect their skills in a clinical environment using the latest simulation technology. With 90 individual simulators available, dental students will spend more than 550 hours in the simulation clinic as part of their curriculum, and oral health students more than 330.

**Dentistry clinical placement requirements**

Students undertaking clinical placements in dentistry and oral health must satisfy a number of requirements. These include:

- Australian Health Practitioner Regulation Agency student registration
- criminal history clearances
- first aid certificate (including CPR)
- immunisations and prescribed communicable infections (PCI) screening
- tuberculosis screening
- clinical placement deed poll.

**Inherent requirements**

Inherent requirements are the fundamental parts of a degree that must be met by all students. They are the abilities, knowledge and skills needed to complete the degree. Students with a disability or chronic health condition may have adjustments made to enable them to meet these requirements. However, while reasonable adjustments can be made, they cannot compromise academic integrity.

For more details, visit: [health.adelaide.edu.au/admissions/dentistry/inherent-requirements](http://health.adelaide.edu.au/admissions/dentistry/inherent-requirements)

**Time dedicated to study**

Full-time students can expect to spend about 25-35 hours (Monday to Friday) on campus each week, engaged in: classes, simulated learning activities, clinical instruction, small-group discovery sessions, tutorials and learning laboratories. Clinical courses will require out-of-hours involvement, and some courses require off-campus placements.

**Global Learning experiences**

Dentistry students have the opportunity to undertake as part of their clinical placement, a two-week study tour to Vietnam, working as a clinical team in schools and private practices.
BACHELOR OF DENTAL SURGERY

SATAC CODE
SA1122

SELECTION RANK/IB
minimum academic threshold of 90 / minimum academic threshold of 33

DURATION
5 years
full-time

CAMPUS
North Terrace campus

PREREQUISITES
- SACE Stage 2: Two subjects: one from Chemistry, Mathematical Methods. If Stage 2 studies were prior to 2017, the equivalent subject was called Mathematical Studies, Specialist Mathematics or Physics and one from Biology, Chemistry, Geology or Physics.
- IB: two science subjects (3L grade 4/ HL grade 3), or one science subject plus Mathematics (3L grade 4/ HL grade 3). Note: subject prerequisites are applicable to all Bachelor of Dental Surgery entry pathways.

ADDITIONAL ENTRY REQUIREMENTS
To meet the minimum academic threshold for entry applicants must achieve a Selection rank of 90 or above, or an International Baccalaureate (IB) score of 33 or above (or the interstate/ overseas equivalent).
New applications/preferences for Dental Surgery will not be considered after the closing date of 29 August 2018.
Please note that strict quotas apply to the Bachelor of Dental Surgery degree. This degree does not contain elective courses — all courses are compulsory.

ASSUMED KNOWLEDGE
A necessary precursor for success in the Bachelor of Dental Surgery program is a high proficiency in the written and oral use of the English language.

adelaide.edu.au/degree-finder

Search dental

The Bachelor of Dental Surgery leads to a flexible and rewarding career that benefits people’s lives by improving their oral health. The only professional dental degree in South Australia, it prepares students to become highly skilled dentists who provide high-quality, patient-focused care.

The degree offers hands-on experience with an emphasis on preventive-based approaches to oral diseases. Clinical experience is embedded into the degree from first year, and students learn through a variety of innovative and flexible learning approaches, including case studies and simulation. The Dental Simulation Clinic is a high-tech environment where students develop their patient-care skills using equipment found in real clinical settings. Dentistry students also have the opportunity to learn in Australia’s newest dental teaching hospital, located in the state-of-the-art Adelaide Health and Medical Sciences (AHMS) building.

Extensive clinical placements across metropolitan and rural settings are built into the degree, along with a community outreach dental program. The program enables students to develop their skills while helping to improve the dental health of disadvantaged people across Adelaide and South Australia.

Career readiness
University of Adelaide dental graduates become advocates for their patients and for the community’s future oral health needs. They have the knowledge and skills required to register as a dental practitioner in Australia and pursue a variety of employment opportunities. These include in private and public practice, as well as the defence force, academia and other areas.

Professional accreditation
The Bachelor of Dental Surgery is accredited by the Australian Dental Council.

Graduate registration
To be eligible to work in Australia as a dentist, graduates are required to register with the Australian Health Practitioners Registration Authority (AHPRA) and the Dental Board of Australia on completion of the degree. In order to register, applicants must comply with the English language skills requirements as determined by AHPRA. For further details, visit: ahpra.gov.au/Registration.aspx

The Bachelor of Dental Surgery qualification is recognised by the:
- Dental Board of Australia (once registered, graduates are also eligible for membership of the Australian Dental Association)
- Dental Council of New Zealand (under the Trans-Tasman Mutual Recognition Agreement)
- Commission of Dental Accreditation of Canada (further examinations are necessary to work in Canada)
- Singapore Dental Council.

International applicants should note that successful completion of this degree may not qualify them to practise/register in their home country. Students will have to contact the relevant health registration bodies of their home country for further information.

Industry placement
From first year, students undertake compulsory clinical placements in a range of metropolitan and rural settings. These can extend beyond the academic year and may include after-hours and weekend work.

Application process
There are two distinct parts to the application process.

1. Undergraduate Medicine and Health Sciences Admission Test (UMAT) application.

Dentistry applicants must also apply to sit the UMAT. Applications open in early December and close on 1 June, with the test held on 25 July 2018 and results released in mid-September 2018. For more details, including practice tests, visit: umat.acer.edu.au

2. South Australian Tertiary Admissions Centre (SATAC) application.

Applicants who have registered with UMAT must lodge their SATAC application by the September 2018 closing date. They will be asked to enter their UMAT identification number when they lodge their application on the SATAC website: satac.edu.au

Merit selection criteria
Selection for the Bachelor of Dental Surgery is based on three components.

1. Performance in the Undergraduate Medicine and Health Sciences Admission Test (UMAT)*
2. Performance in a structured interview.
3. Achievement of Selection rank of 90 or above (or equivalent) for appropriate Year 12 studies, or a credit average (GPA 5.0) for tertiary studies, or STAT rank in the top decile. Please note: invitation to an interview will be based on performance in the UMAT only.

Dental Surgery Admissions Guide
All applicants are required to read the Dental Surgery Admissions Guide before applying for the Bachelor of Dental Surgery. The guide covers essential information regarding:
- admission entry requirements
- key dates and deadlines
- the merit ranking process
- inherent requirements
- subject prerequisites and more.

At the Faculty of Health and Medical Sciences we regularly review the admission criteria and application processes for our degrees, and reserve the right to change them without notice. Please note that failure to read the Dental Surgery Admissions Guide will not be grounds for special consideration.

Information for international students only

Bachelor of Dental Surgery admission overview

Applicants will be ranked in consideration for an offer based on their performance in the following three components:

- interview results—first ranking level
- Personal Qualities Assessment (PQA) results—second ranking level
- academic results—final ranking level (to separate applicants with equal-summed interview and PQA scores).

Application process

1. All international applicants must submit a formal application online via the University’s international website. Visit international.adelaide.edu.au/apply and select Step 4: Apply online.
2. The online application will also serve as the registration to sit the PQA, and students will be prompted to select the relevant PQA test venue on the application system.
3. Applicants must submit their application and payments prior to 30 June 2018. Applicants who have not yet completed their current qualification will still be required to apply by this date. Closing dates are strictly adhered to and late submissions will not be accepted.

Please note: testimonials, character/school references, awards, certificates and predicted results do not make up any of the selection components and will not be considered. Details of performance in individual components of the admissions process are not given to applicants. Information regarding an applicant or application is confidential and cannot be released to members of family or friends. For more information, visit: health.adelaide.edu.au/admissions/dentistry

“The best part of the Bachelor of Dental Surgery is indisputably the hands on component of the program. Students in every other program have to go through the daily grind of studying; however, dental students have the privilege of taking what they learn and applying it immediately.”

Christopher Kawalec  Bachelor of Dental Surgery
MEDICINE
The medical degree at the University of Adelaide is the third-oldest in Australia, with a rich and prestigious history dating back to 1885.

Over 130 years of teaching and research has led to an impressive list of groundbreaking discoveries and achievements at the University that continue to transform health care and make an impact on the world today. Among the University’s notable alumni are Nobel Prize winners, pioneering researchers and world-renowned doctors.

Students in the Adelaide Medical School are provided with state-of-the-art education, training and facilities to ensure they’re ready to face the challenges of medical practice in the twenty-first century.

**Rural placements**

Enrolment in the Bachelor of Medicine and Bachelor of Surgery requires students to undertake rural clinical placements. Commonwealth-supported students (in both bonded and unbonded places) need to complete four weeks of rural placements before graduation, with 25% of students required to complete one year of clinical training in a rural site.

If these places are not filled by students voluntarily, all students in Commonwealth-supported places will be included in a random ballot to be allocated to one of these year-long rural placements.

**Medicine clinical placement requirements**

Students undertaking clinical placements in medicine must satisfy a number of requirements.

- Australian Health Practitioner Regulation Agency student registration
- Criminal history clearances
- Immunisations and prescribed communicable infections (PCI) screening
- Tuberculosis screening
- Clinical placement deed poll
- Hand hygiene.

Students who don’t meet the above requirements will not be able to complete clinical placements, placing them at risk of not completing their degree. Please note that placements are compulsory, and information on the above will be provided when students commence.

**Inherent requirements**

The University of Adelaide medical degree places substantial demands on students. The learning style and assessment techniques used are likely to be different from those experienced elsewhere. The ability to learn and work in small groups, and undertake self-directed learning, are important medical-student attributes.

Clinical placements require significant time commitments from students, which may include periods normally regarded as after-hours. Students will need physical and mental stamina, as well as flexibility with hours of attendance.

For more details, visit: [health.adelaide.edu.au/admissions/medicine/inherent-requirements](http://health.adelaide.edu.au/admissions/medicine/inherent-requirements)

**Time dedicated to study**

Full-time students can expect to spend about 25-35 hours (Monday to Friday) on campus each week, engaged in: classes, simulated learning activities, clinical instruction, small-group discovery sessions, tutorials and learning laboratories.

Clinical courses will require out-of-hours involvement, and some courses require off-campus placements.

**Global Learning experiences**

Medical students can undertake a four-week work-based training/Dean’s elective in a local or overseas hospital or clinic of their choice prior to completing their degree.

Past students have worked and studied in countries including the UK, Nepal, Sri Lanka, South Africa and Canada.
## Bachelor of Medicine and Bachelor of Surgery

**SATAC Code**
- 314552 standard CSP (non-bonded)
- 314553 Bonded Medical Place (BMP)

**Selection Rank/IB**
- minimum academic threshold of 90 / minimum academic threshold of 33

**Duration**
- 6 years full-time

**Campus**
- North Terrace campus

**Prerequisites**
- SACE Stage 2: Biology or Chemistry or Mathematical Methods. (If Stage 2 studies were undertaken prior to 2017, the equivalent subject was called Mathematical Studies), or equivalent.
- IB: Biology (SL grade 4/HL grade 3) or Chemistry (SL grade 4/HL grade 3) or Mathematics (SL grade 4/HL grade 3), or equivalent. Note: Subject prerequisites are applicable to all Bachelor of Medicine and Bachelor of Surgery entry pathways.

**Additional Information**
To meet the minimum academic threshold for entry into the Bachelor of Medicine and Bachelor of Surgery degree at the University of Adelaide, students must achieve a Selection rank of 90 or above, or an International Baccalaureate score of 33 or above (or the interstate/overseas equivalent). However, a significantly higher Selection rank is usually required due to high levels of competition for places.

Medicine is an inspiring and challenging career choice that offers a unique ability to improve people’s health and wellbeing, and to alleviate pain and suffering around the world.

At the University of Adelaide, students are trained to become doctors from their first day on campus. The Bachelor of Medicine and Bachelor of Surgery provides hands-on, practical experience in simulated settings and the real world of clinical practice, creating highly skilled, confident graduates ready for the diverse range of careers available to them worldwide.

In the initial years of the degree, students learn from senior clinicians in the new state-of-the-art Adelaide Health and Medical Sciences building and work in small groups to solve patient-centred problems relating to health and disease. High-tech simulation facilities allow students to practise and develop their skills in a safe, and supported environment before they undertake clinical placements in hospitals and other health and medical organisations from third year onwards.

### Career Readiness
After successfully completing a 12-month internship in an approved hospital, and obtaining general registration to practise, graduates can choose to specialise in a variety of areas. This will require acceptance into a postgraduate degree involving further vocational study or training.

Adelaide Medical School graduates are well regarded in the industry for their knowledge and experience, and are in demand for positions in public hospitals, private practice, public health, teaching, clinical research, aid organisations, the defence forces and more.

### Professional Accreditation
The Bachelor of Medicine and Bachelor of Surgery is accredited by the Medical Board of Australia.

### Graduate Registration
To be eligible to work in Australia, Bachelor of Medicine and Bachelor of Surgery graduates are required to register with the Australian Health Practitioners Regulation Authority.

---

"**The degree provides not only knowledge, but develops critical thinking and skills to make me an effective graduate and an effective clinician. It provides the opportunity to be surrounded by world class research and a thriving community of like minded people.**"

Simon Cousins
Bachelor of Medicine and Bachelor of Surgery
The Bachelor of Medicine and Bachelor of Surgery intending to practise in Australia after graduation must be aware of criteria for obtaining a Medicare Provider Number. International applicants should note that successful completion of this degree may not qualify them to practise/register in their home country. Students will have to contact the relevant health registration bodies of their home country for further information.

Internships

Internships are separate from the medical degree, and the University of Adelaide does not facilitate internship placements. Further information regarding internship allocations can be found on the SA Health Careers and SA Medical Education and Training website: sahealthcareers.com.au

Admissions

Application process

There are two distinct parts to the application process.

1. Undergraduate Medicine and Health Sciences Admission Test (UMAT) application. Medical applicants must also apply to sit the UMAT. Applications open in early December and close on 1 June, with the test held on 25 July 2018 and results released in mid-September 2018. For more details, including practice tests, visit: umat.acer.edu.au
2. South Australian Tertiary Admissions Centre (SATAC) application. Applicants who have registered with SATAC must lodge their SATAC application by the September 2018 closing date. They will be asked to enter their UMAT identification number when they lodge their application on the SATAC website: satac.edu.au

Selection criteria

Entry to the Bachelor of Medicine and Bachelor of Surgery is based on four components:

1. Performance in the Undergraduate Medicine and Health Sciences Admission Test (UMAT)*.
2. Performance in an interview**.
3. Achievement of Selection rank of 90 or above for appropriate Year 12 studies, or a credit average for tertiary studies, or SATY rank in the top decile.
4. Prerequisite subjects.
   - Applicants must register to sit the UMAT. For information including the registration closing date and test, visit: umat.acer.edu.au
   ** There will be one round of interviews held for 2019 entry. Interviews invitations will be based on performance in the UMAT, with each of the three UMAT sections having equal weights. Please note the University reserves the right to run additional interview sessions if necessary.

Rural background entry pathway

Applicants who have lived at least five consecutive years, or 10 years cumulatively, in an area with an Australian Standard Geographic Classification of AGS-RA 2–5 from birth are eligible to apply under the rural background entry pathway.

Please refer to the Department of Health and Ageing ‘DoctorConnect’ website to search the classification of your location: health.gov.au/internet/otd/Publishing.nsf/Content/RA-intro

Conditions apply. To find out more, visit adelaide.edu.au/study and select Entry Pathways from the menu.

Commonwealth-supported places

There are two types of Commonwealth-supported places (CSP) in the Bachelor of Medicine and Bachelor of Surgery program: Standard CSP (non-bonded); and Bonded Medical Place (BMP). The BMP requires the student to enter into a contract with the Australian Government.

For more detailed information, visit: health.gov.au/bmpscheme

Medicine Admissions Guide

All applicants are required to read the Medicine Admissions Guide before applying for the Bachelor of Medicine and Bachelor of Surgery. The guide covers essential information regarding:

- admission entry requirements
- key dates and deadlines
- the merit ranking process
- inherent requirements
- subject prerequisites, and more.

At the Faculty of Health and Medical Sciences we regularly review the admission criteria and application processes for our degrees, and reserve the right to change them without notice. Please note that failure to read the Medicine Admissions Guide will not be grounds for special consideration.

For more information, visit: health.adelaide.edu.au/admissions/medicine

Information for international students only

Bachelor of Medicine and Bachelor of Surgery admission overview

Applicants will be ranked in consideration for an offer based on their performance in the following three components:

- interview results - first ranking level
- Personal Qualities Assessment (PQA) results - second ranking level
- academic results - meets threshold and final ranking level (to separate applicants with equal-summed interview and PQA scores).

Application process

1. All international applicants must submit a formal application online via the University’s International website. Visit international.adelaide.edu.au/apply and select Step 4: Apply online.
2. The online application will also serve as the registration to sit the PQA, and students will be prompted to select the relevant PQA test venue on the application system.
3. Applicants must submit their application and payments prior to 30 June 2018. Applicants who have not yet completed their current qualification will still be required to apply by this date. Closing dates are strictly adhered to and late submissions will not be accepted.

Please note: testimonials, character/ school references, awards, certificates and predicted results do not make up any of the selection components and will not be considered. Details of performance in individual components of the admissions process are not given to applicants.

Information regarding an applicant or application is confidential and cannot be released to members of family or friends.

For more information, visit: health.adelaide.edu.au/admissions/medicine
NURSING
Nursing is an exciting, diverse and rewarding career in which students can make a true difference in people’s lives.

Qualified nurses have a wide range of career options, from working in public or private hospitals, to community health care, aid organisations and regional health care. The University of Adelaide’s nursing degrees are highly regarded in the profession. Taught by practising clinicians with a wealth of nursing experience, our students gain practical experience from early in the degree.

Our students gain a solid foundation in both clinical experience and academic theory, and graduate more than ready to step into a successful career.

Inherent requirements
Our nursing degree places substantial demands on students. The learning style and assessment techniques used are likely to be different from those experienced elsewhere. Clinical placements, which are compulsory, require significant time commitments, and may include periods normally regarded as after-hours. Students will need physical and mental stamina, as well as flexibility with hours of attendance.

Students will be required to attend placement experiences that may take place outside the normal academic year and require attendance at metropolitan, rural and possibly remote locations. For more details, visit: health.adelaide.edu.au/nursing/future-students/requirements

Nursing clinical placement requirements
Students undertaking clinical placements in nursing must satisfy a number of requirements. These include:

- Australian Health Practitioner Regulation Agency student registration
- criminal history clearances
- immunisation and prescribed communicable infections screening
- tuberculosis screening
- basic life support
- manual handling
- clinical placement deed poll
- hand hygiene.

Students who don’t meet the above requirements are at risk of not completing the degree, as placements are compulsory. For further information, visit: health.adelaide.edu.au/study-with-us/student-support/clinical-placements

Time dedicated to study
A strong commitment to the degree is required. Full-time nursing students can expect to commit up to 40 hours per week on-campus in lectures, tutorials or simulation practicals. Students may be required to attend compulsory skills and simulation classes on occasional weekends during semesters. Students will also attend compulsory clinical placements from their first year, which require a significant time commitment and may include shifts across a 24-hour roster (including weekends).

Global learning experiences
Nursing students can travel to Germany, Austria, Singapore or Japan to take part in clinical placements/observation as part of their studies.

“THROUGH COMPLETING A LARGE NUMBER OF CLINICAL PLACEMENTS, I HAVE BEEN ABLE TO DEVELOP AND REFINE MY CLINICAL SKILLS AND AS A RESULT FEEL CONFIDENT IN TRANSITIONING INTO FULL-TIME WORK.”

Maddison Cuk  Bachelor of Nursing
Nurses are highly respected members of the community who make an important and meaningful contribution to society. A career in nursing is well suited to people with high levels of compassion and empathy who desire an exciting, rewarding and flexible profession that supports people and their families and saves lives.

The University of Adelaide’s Bachelor of Nursing is designed to produce registered nurses with a high level of hands-on practical experience—in both simulation and the real world. The degree also offers students the chance to explore contemporary issues in the areas of health promotion, maintenance, advocacy and care.

Adelaide Nursing School has a relatively small student intake each year, meaning students form strong relationships with their fellow students and have the opportunity to interact closely with teaching staff. Throughout the three years of the degree, students undertake compulsory placements in clinical and non-clinical settings across city and rural locations to gain the skills, attitudes and knowledge that will underpin their future careers.

**Career readiness**

This degree provides a professional qualification as a registered nurse and is recognised Australia-wide. It also supports application for registration in a number of countries around the world.

Qualified nurses have a wide range of career options, from working in public or private hospitals, to community health care, aid organisations and regional health care.

**Professional accreditation**

The Bachelor of Nursing is accredited by the Australian Nursing and Midwifery Accreditation Council. In Australia, all undergraduate programs leading to registration as a nurse must be accredited every five years. The curriculum at the University of Adelaide is subject to (re)accreditation with the Nursing and Midwifery Board of Australia from 2018.

**Graduate registration**

Just prior to completion of the degree, students apply to Australian Health Practitioners Regulation Agency (AHPRA) for registration with the Nursing and Midwifery Board of Australia. In order to be able to register as either an enrolled or registered nurse, all applicants must comply with the English language skills requirements as determined by AHPRA.

**Industry placement**

A significant strength of this degree is the substantial length of time students spend in clinical placements as part of a health care team, with additional clinical support from clinical lecturers.

Placements will vary across different practice settings, from acute care and tertiary to primary health care areas. Placements are compulsory and are not restricted to the University teaching semesters. They may include early, late, night and weekend shifts in both metropolitan and rural areas of South Australia. Therefore, it’s recommended students have access to a mode of transport for the duration of the degree.

All costs associated with the second-year rural placement are the responsibility of the student. Depending on the locations available, costs to attend rural placement can exceed $1,000 to cover accommodation, food and living-away-from-home expenses.

During placement, students will be required to wear uniforms and comply with policies and procedures (e.g. correct use of theatre attire) as prescribed by the health care site. The cost of uniforms is also the responsibility of the student.

**Enrolled nurse pathway**

This pathway is designed for enrolled nurses who wish to study to become registered nurses. Applicants must be registered as an enrolled nurse with the Nursing and Midwifery Board of Australia (or be eligible for enrolment).

Successful applicants will be granted one year’s (full-time) credit towards the Bachelor of Nursing.

**Graduate entry pathway**

Students who've completed a three-year degree in another discipline and wish to become a registered nurse can apply for a graduate-entry pathway with the Master of Clinical Nursing. For details, visit adelaide.edu.au/degree-finder and search clinical nursing.
“CLINICAL PLACEMENT HAS BEEN THE HIGHLIGHT OF THE BACHELOR OF NURSING PROGRAM, AS IT HAS ALLOWED ME TO INCORPORATE BOTH THEORY AND PRACTICAL SKILLS STUDIED, AND PUT THEM INTO PRACTICE.”

Dearbhla Grant  Bachelor of Nursing
Health and Medical Sciences
Health and Medical Sciences graduates have the broad range of knowledge and skills to improve human health, and succeed in a wide variety of careers.

The Bachelor of Health and Medical Sciences is a three-year degree. In the first year, students learn the fundamentals of human anatomy and public health, and there is a focus on the development of communication and learning skills.

In the second year, students gain in-depth knowledge in selected subject areas—including pathology, physiology, pharmacology, health promotion and epidemiology—and develop problem-solving and group-work skills by investigating global health challenges.

In the third year, students gain extensive hands-on and workplace experience by completing a major in their chosen field.

The degree draws on all disciplines within health sciences, including medicine, dentistry, nursing, psychology and public health. This gives students the flexibility to select one of seven different majors spread across two different streams: Medical Health and Lifespan Health.

**Research experience**

All third-year students undertake a year-long research project/internship. This provides students with an opportunity to:

- participate firsthand in research within state-of-the-art research facilities
- use skills acquired in the classroom in a real-world setting, and learn what classroom time can’t teach
- experience a prospective career path, and network with professionals and potential employers
- gain new skills and the confidence to be work-ready.

**Global learning experiences**

Study Abroad and Student Exchange opportunities in second and third year offer students a global perspective on major health challenges, improve career paths and enable students to develop intercultural and personal skills and confidence. Study tours are available in some majors.
The Bachelor of Health and Medical Sciences is a diverse and flexible degree that prepares students to tackle the major health issues facing the world today. With a unique selection of courses that draw from all health sciences disciplines, the degree is ideal for students who are fascinated by the human body and wish to develop a broad range of relevant, transferable and highly sought-after skills suited to a variety of careers in health. Developed in consultation with industry partners, this innovative degree offers flexible online and part-time study options. Students can choose to focus their studies on their interests, with majors available in Clinical Trials, Medical Sciences, Neurosciences, Addiction and Mental Health, Nutritional Health, Public Health, and Reproductive and Childhood Health. A year-long research placement provides practical hands-on experience, and overseas study opportunities are available to increase understanding of global health issues.

**Areas of specialisation**

Students have the flexibility to select one of seven different majors spread across two different streams: Medical Health or Lifespan Health.

**Medical Health majors**

**Clinical Trials**

Clinical research is the process by which new therapies (medications, biological agents, and devices) are tested with patients prior to approval and marketing. The Clinical Trials major allows students to acquire the necessary expertise to design, develop, lead and conduct clinical trials in hospitals, research organisations/institutes and pharmaceutical companies.

**Medical Sciences**

Our bodies are complex and amazing biological machines. The Medical Sciences major enables students to understand how the human body functions in health and disease, and how treatments for disease are developed. It also provides an understanding of the fundamental medical science disciplines of anatomy, physiology, and pathology.

**Neurosciences**

Neuroscience is a rapidly growing, interdisciplinary field that explores how our 100 billion plus nerve cells grow, connect and function. The Neurosciences major equips students with an understanding of how the nervous system regulates the body and behaviour, with a view to finding ways to prevent or cure neurological disorders.

**Lifespan Health majors**

**Addiction and Mental Health**

Drug addiction changes the brain in fundamental ways. The Addiction and Mental Health major gives students an understanding of the scientific basis of substance abuse and mental health, and reviews interventions (pharmacological, psychosocial, and public health) used in addiction and mental health fields.

**Nutritional Health**

Consuming the right food can promote good health and impact the development of diseases such as obesity, diabetes, heart disease and cancer. The Nutritional Health major explores our body’s mechanical and physiological responses to food, including how we use energy and nutrients from the food we eat.

**Public Health**

Through the Public Health major, students: learn how to measure the health of populations; understand how social, cultural and economic factors influence contemporary health problems in Australia and internationally; and develop practical skills in health promotion and health educational strategies.

**Reproductive and Childhood Health**

Reproduction is a fundamental process of life. But reproductive success—the birth of a baby who will enjoy a long and healthy life—is a multi-step process that begins well before fertilisation. The Reproductive and Childhood Health major equips students with knowledge about fertility, conception, pregnancy and birth. They also learn about key health issues affecting children and adolescents.

**Career readiness**

Graduates of the Bachelor of Health and Medical Sciences have the capability to develop clinical skills in health promotion and health educational strategies. With a choice of seven majors in Clinical Trials, Medical Sciences, Neurosciences, Addiction and Mental Health, Nutritional Health, Public Health, and Reproductive and Childhood Health—as well as flexible online and part-time learning options—students can shape their studies to match their interests, career aspirations and lifestyle.

A year-long research placement provides the opportunity to gain practical experience and build professional networks, and overseas study is available to help students gain a global perspective of health issues.

**Areas of specialisation**

Students are required to undertake a major in one of two streams: Medical Health or Lifespan Health. For further information, please see the descriptions on page 24.

**Career readiness**

Graduates of the Bachelor of Health and Medical Sciences (Advanced) have the confidence, initiative and leadership skills to work in a wide range of health settings. Depending on their chosen major, students can pursue careers in research environments, government, industry, business, community organisations or academia. They may also choose to undertake further study at honours or postgraduate level.
“WITH A WIDE RANGE OF COURSES TO UNDERTAKE, I HAVE BEEN ABLE TO STUDY THINGS I NEVER THOUGHT I WOULD HAVE BEEN INTERESTED IN, FROM GENERAL FUNCTION OF THE HUMAN BODY TO NEUROSCIENCE.”

Fenella Hall
Bachelor of Health and Medical Sciences (Advanced)
PSYCHOLOGY
Psychology students at the University of Adelaide tackle real-world global issues and develop an understanding of how Psychology can make a difference. With more than 35 majors to choose from study can be tailored to your interests and career aspirations.

**Accreditation**

All University psychology degrees are accredited by the Australian Psychology Accreditation Council.

**Time dedicated to study**

Full-time psychology students can expect to spend about 12-16 hours on campus each week in lectures or tutorials, between 8 am and 9 pm, Monday to Friday. For students enrolled in courses that incorporate practicals, some out-of-hours involvement may also be required.

**Guaranteed entry**

A wide range of University of Adelaide degrees now have a pre-set entry score, known as ‘guaranteed entry’, instead of a cut-off that varies each year. For guaranteed entry into a degree*, students must meet the degree prerequisites and achieve the nominated selection rank or above (including bonus points, if eligible). It’s that straightforward. Students who think they might score under the nominated selection rank, however, shouldn’t stress. There may be alternative entry pathways.

For more details, visit [www.adelaide.edu.au](http://www.adelaide.edu.au) and search guaranteed entry.

*There are some exceptions. Check the University website for full details.

**Global learning experiences**

Psychology students have the opportunity to study overseas and can select from a wide range of partner universities that offer semester exchange programs.

**Registration as a psychologist**

A minimum six-year sequence of education and training in psychology is required for an individual to become eligible for general registration as a psychologist in Australia. The six-year sequence at the University of Adelaide begins with the three-year Bachelor of Psychological Science. This is followed by the one-year Bachelor of Psychological Science (Honours), and then a two-year Master of Psychology or combined four-year PhD/Master of Psychology.

On successful completion of a Master of Psychology degree, graduates may apply to the Psychology Board of Australia and register as psychologist.

**Further study**

**Master of Psychology**

On successful completion of the Bachelor of Psychological Science (Honours) or equivalent, a graduate may apply for a Master of Psychology. Degree options (all of which lead to a professional qualification) include:

- Master of Psychology (Clinical) - two years full-time
- Master of Psychology (Health) - two years full-time
- Master of Psychology (Organisational and Human Factors) - two years full-time
- PhD/MPsych (Clinical) - four years full-time
- PhD/MPsych (Health) - four years full-time
- PhD/MPsych (Organisational and Human Factors) - four years full-time

“THE BALANCE BETWEEN ACADEMIC AND SOCIAL LIFE HAS BEEN WELL-EMPHASISED BY THE UNIVERSITY, AND THE ENGAGEMENT OF THE STAFF TOWARDS THE STUDENTS ARE INCREDIBLE. THIS UNIVERSITY IS PERFECT FOR ANYONE SEEKING TO ACHIEVE A HIGH ACADEMIC STANDING IN A FUN SUPPORTIVE ENVIRONMENT.”

Joel Keh Keat Ng

Bachelor of Psychological Science
Psychology is a fascinating area of study that offers unique insight into human behaviour and an understanding of why people think and behave in certain ways. The Bachelor of Psychological Science is ideal for students who are creative but enjoy facts and figures, and wish to develop superior problem solving, critical thinking and communication skills relevant to a wide range of careers.

The Bachelor of Psychological Science delivers a comprehensive foundation in psychology, as well as providing a choice of more than 35 majors and electives from various disciplines across the University. Innovative teaching methods and interactive classes provide ample opportunities for students to develop strong connections with their classmates and learn from lecturers who are leaders in their field.

Career readiness
Graduates of the Bachelor of Psychological Science are well suited to a range of exciting careers in a variety of jobs and sectors, and have the option of engaging in further study to become a qualified psychologist. Psychology graduates have highly-developed skills in data analysis, critical thinking, report writing, time management, communication and presentation. Potential areas of work include:

• human resource management
• advertising and marketing
• degree evaluation and other applied research
• mental health services
• youth work
• family and social services
• public and private sector management
• juvenile justice and corrective services
• relationship counselling
• residential care worker
• private sector administration and management
• correctional services.

Professional accreditation
The Bachelor of Psychological Science is accredited by the Australia Psychology Accreditation Council.

Graduate registration
Graduates of this degree will be eligible to apply for an honours year, followed by a two-year postgraduate qualification. This sequence of study will lead to professional registration as a psychologist.

The Bachelor of Psychological Science has two entry pathways:

UNDERGRADUATE ENTRY
(Pathway 1)

The three-year full-time Bachelor of Psychological Science is designed for school leavers and those who have not previously completed an undergraduate university degree.

SATAC CODE
394001
SELECTION RANK/IB
65.45 / 24
DURATION
3 years full-time
CAMPUS
North Terrace campus

Concurrent degrees
Students are able to study a second degree concurrently with their Bachelor of Psychological Science. This will take four years. Credit will be granted towards both degrees for Level 1 and 2 courses. Students will need to complete a full load at Level 3 for both the Bachelor of Psychological Science and for the concurrent degree.

Areas of specialisation
The three-year Bachelor of Psychological Science enables students to graduate not only with a psychology specialty, but a second specialty (second major) in a different area of study. The second major is optional, however, and not a compulsory requirement.

More than 35 possible second majors are available across a number of disciplines, including arts, business, computer science, health and medical sciences, and sciences. Specific second-major options include:

• Addiction Studies
• Anthropology
• Asian Studies
• Biochemistry
• Chinese Studies
• Classics
• Computer Science
• Creative Writing
• Criminology
• English
• European Studies
• French Studies
• Gender Studies
• Genetics
• Geography
• Environment and Population
• German Studies
• History
• Human Neuroscience
• Indigenous Knowledges and Society
• Indonesian Studies
• International Development
• Italian Studies
• Japanese Studies
• Linguistics
• Management
• Marketing
• Microbiology
• Modern Greek Studies
• Music
• Philosophy
• Politics and International Studies
• Population Health
• Sociology
• Spanish Studies.

GRADUATE ENTRY
(Pathway 2)

The Bachelor of Psychological Science graduate-entry pathway is designed for applicants who have completed a three-year undergraduate degree that did not include psychology, or for applicants who have completed a psychology degree more than five years ago. Applicants accepted as graduate-entry students will be eligible for up to 48 units of advanced standing.

SATAC CODE
38G003
DURATION
1 year full-time (or 2 consecutive years part-time)
CAMPUS
North Terrace campus
PREREQUISITES
An undergraduate degree from an approved university and Psychology IA and Psychology IB (or equivalent) completed within the past five years. Students who do not have the prerequisite psychology studies, or whose Level 1 Psychology is older than five years, can attend the University’s intensive summer bridging course, Introductory Psychology (only available to graduate-entry pathway students). It runs for six weeks commencing in the first week of January, and includes two-to-three contact hours each week, with the remainder of the time spent in directed study and self-directed computer learning. This graduate-entry pathway into the Bachelor of Psychological Science meets all Australian Psychology Accreditation Council (APAC) Level 2 and Level 3 undergraduate psychology course requirements for application for a psychology honours degree.

adelaide.edu.au/degree-finder
Search psychological
Are you interested in a career which focuses on understanding the mind and why people behave the way they do? Psychology is a captivating area of study that considers human behaviour. It looks into why people act the way they do, their motivations, interactions and what influences their behaviour. Studying the way the mind works qualifies graduates to work with individuals and organisations in order to understand and give global scope to complex behaviours in the context of mental health and social interactions.

The new four year Bachelor of Psychology (Advanced) (Honours) will give you the knowledge and skills to kick start your career in psychology. The degree will provide you with the experience required to develop listening, empathy and interviewing skills, as well as the ability to solve high level problems and analyse human behaviour. Studying in a distinct cohort, in small classes, you will address real-world global issues and learn how psychology can make a difference.

Career readiness

The Bachelor of Psychology (Advanced) (Honours) is the first step towards many careers including as a registered psychologist. Psychology prepares graduates for a range of exciting careers that require superior problem-solving, critical thinking and understanding of human behaviour, such as:

- human resource management
- government and policy
- public and private sector management
- evaluation and applied research
- private sector administration and management
- not-for-profit and aid services
- mental health services
- youth work
- family and social services
- juvenile justice and corrective services
- relationship counselling.

Professional accreditation

Accreditation for this program is being sought with the Australian Psychology Accreditation Council.
The Bachelor of Science degree is ideal for students who love science but aren’t sure which path to take. It provides the most flexibility of all the science degrees, as students can design their own degree by choosing from a diverse range of science courses according to their interests and strengths.

The Bachelor of Science (Advanced) is for high-achieving students who want to further develop their knowledge of science, with a strong emphasis on advanced research training. Science students learn a number of transferable skills that are highly sought-after in a wide range of careers not limited to scientific areas.

- SACE Stage 2: Sociology, and Psychology.

This program enables students to apply their passion for science to the health and medical industry, and enter an emerging global sector. Students gain real world practical insights from industry lecturers and placements, and learn from world-class biomedical researchers and educators—Adelaide ranks among the top 100 universities in the world for biological sciences and the best in South Australia.*

The degree focuses on the biomedical aspects of biology, including the normal and abnormal function of the human body. Students also undertake research projects as an introduction to modern biomedical research.

- Bachelor of Science (Space Science and Astrophysics)
- Bachelor of Science (Veterinary Bioscience)
- Bachelor of Science and Entrepreneurship
- Bachelor of Viticulture and Oenology

For a comprehensive list of available degrees, visit: [www.adelaide.edu.au/degree-finder](http://www.adelaide.edu.au/degree-finder)
How to apply

Applications to University of Adelaide undergraduate programs are made online via SATAC. www.satac.edu.au

The application early closing date for 2019 entry is 28 September 2018. Bachelor of Medicine and Bachelor of Dental Surgery applicants should refer to the UMAT website for information on the Undergraduate Medicine and Health Sciences Admission Test, including application and test dates: umat.adelaide.edu.au

International students should refer to: www.international.adelaide.edu.au/apply

Entry pathways

There are many pathways applicants can take to apply to the University of Adelaide, including SACE, International Baccalaureate (IB), STAT, TAFE, preparatory programs, foundation study and more. To find out more about the available pathways, visit www.adelaide.edu.au/study/undergraduate/entry-pathways

Fees and costs

In 2018, student contributions for Commonwealth-supported students studying an equivalent full-time study load were as follows.

Band 1: humanities, behavioural sciences, social studies, foreign languages, visual and performing arts, education, nursing, clinical psychology... $6,444

Band 2: computing, built environment, allied health, other health, engineering, surveying, agriculture, science, mathematics, statistics... $9,185

Band 3: law, dentistry, medicine, veterinary science, accounting, administration, economics, commerce.............................. $10,754

These annual fees are indicative only as actual charges are determined at the course level based on the area of study. Fees may increase in 2019.

HECS Higher Education Loan

This program, known as HECS-HELP, assists eligible students to pay their student contribution. Further information is available at: www.studyassist.gov.au

Scholarships

The University of Adelaide has a range of scholarships available to students from a variety of backgrounds and academic levels. Comprehensive information about scholarships, and how to apply, can be obtained by contacting us (refer below for details) or visiting the scholarships website: www.adelaide.edu.au/scholarships

Student services and amenities fee

Students are charged an annual student services and amenities fee (SSAF) to assist with the funding of student services and amenities at the University. In 2018, the SSAF amount for full-time students was $298, and for part-time students it was $223. Fees may increase in 2019. Eligible students may defer this fee to an SA-HELP loan. For further information about the SSAF and SA-HELP visit: www.adelaide.edu.au/student/finance and select ‘Other Fees and Charges’.

Additional costs

Students may be required to pay for specialist equipment, reading materials, etc. Students are advised not to purchase any equipment until they receive their faculty/school handbook, available during orientation. For more information on other program-related fees and charges, visit www.adelaide.edu.au/student/finance and select ‘Other Fees and Charges’.

Adjustment factors (also known as bonus points)

SATAC centrally administer a South Australian Universities Bonus Scheme. The two schemes are the SA Universities Equity Scheme and the SA Language, Literacy and Mathematics Bonus Scheme. For more details, please visit www.adelaide.edu.au/study/undergraduate/how-to-apply/bonus-points

Degree intake

Many undergraduate degrees will allow students to begin study in February or July. Please refer to individual degrees on Degree Finder www.adelaide.edu.au/degree-finder to check whether midyear entry is available. Where Degree Finder states ‘subject to availability’ applicants should contact www.adelaide.edu.au/student/enquiries to check whether midyear entry is available.

Deferring your studies

All undergraduate degrees can be deferred for up to two years. Please refer to specific degrees for exceptions.

English language requirements for international students

All international students undertaking an Australian Year 12 program are required to achieve a Pass grade or above in one of the approved English as a Second Language or English language subjects. If an applicant attempts, but does not pass, the English language subject then alternative options, such as an acceptable English language proficiency test result, may be arranged.

Details of recognised subjects, tests and requirements are available by visiting www.international.adelaide.edu.au/apply

Successful completion of the International Baccalaureate (IB) diploma meets the English language requirements of the University of Adelaide.

Permanent residency

International students who have studied an Australian Year 12 program or the IB and expect to be granted Australian permanent residency before the commencement of their university study must contact the International Admissions Service.

To contact the International Admissions Service for more information, visit www.international.adelaide.edu.au/enquire-now

Accommodation

The University understands that finding the right accommodation is important to successful study. For accommodation options and costs please visit: www.adelaide.edu.au/accommodation

Admissions Transparency

We believe in providing clear and relevant information to help students choose the best university and degree to study. Find out more, visit www.adelaide.edu.au/study/undergraduate/admission-transparency-data
