Programs within the Faculty of Arts provide students with an appreciation of, and perspective on, the world and the extraordinary richness, complexity and connection between human culture, civilisation, and the earth’s environment, geography and natural resources.

The Faculty of Arts is proud to offer programs that are diverse, dynamic and distinct, and that enable students to follow their passions to many career paths. Students emerge from their studies with skills in communication, creative and critical thinking, decision-making and research that are sought after by employers. University of Adelaide graduates pursue fulfilling careers in today’s evolving job market. For students who have strong interests in more than one discipline, undertaking a double degree makes it possible to study additional topics. Most double degrees can be completed in four years and students graduate with two parchments.

There are many areas to investigate when studying the arts, humanities and social sciences.

**Anthropology**
Using new and challenging perspectives, Anthropology studies the diversity of humanity, culture, identity and the different ways communities live.

**Art History and Visual Culture**
Art History and Visual Culture offers a dynamic and inspiring concentration of courses that explore the making, meaning, reception, and consumption of historical and contemporary images and objects. Investigation of both high art and popular culture from global and multicultural perspectives enables the development of sophisticated levels of visual literacy in the areas of visual analysis, critical thinking, and persuasive communication skills.

**Asian Studies**
Asian Studies offers insight into the beliefs, ideas and social, political and economic structures that shape Asian countries and society. The discipline explores aspects of modern Asia’s history, culture, literature, economics, trade and business.

**Classics**
The cultures, societies, religions, literatures and political ideas of ancient Greece and Rome have left potent legacies. Classics students develop analytical research skills while learning about aspects of archaeology, history, art, thought, literature, society and politics from the birth of civilisation.

**Creative Writing**
Students gain a practical introduction to creative writing, and learn ways to begin and develop a sustained and reflective writing practice that includes revising and editing. Students can become more proficient and versatile writers.

**Criminology**
Criminology is the study of crime and deviance as a social phenomenon. It aims to understand why people commit crimes and the social responses to it, including attempts at control.

**Development Studies**
Development Studies explores issues related to poverty reduction and sustainable development with a focus on the developing world. Students debate the determinants of economic growth, the causes of civil war, the nature of ‘good governance’, the sources of environmental sustainability, the links between gender and development, and the effectiveness of aid.

**Economics**
Economics students learn how the economy works in the context of global economic forces and how governments deal with issues such as unemployment, international trade and taxation.

**English**
English students learn how to think and write critically about great literature and other communication forms, such as film, TV, books, plays, poetry, manuscripts, digital media and magazines. Students delve into past and present literary and filmic works and hone research, communicative and interpretive skills that will serve them in their future academic and professional lives.

**Gender Studies and Social Analysis**
Gender Studies and Social Analysis investigates the ways in which women and men understand gender. Students consider the different ways rewards and difficulties of work are experienced (in Australia and elsewhere in the world), and explore pop culture, such as fashion and television. In addition, the gendered experiences of health, sexuality, relationships and youth in the workforce are examined.

**Geography, Environment and Population**
Geography, Environment and Population students learn how to analyse environmental processes and the human interaction within them at local and global levels. Questions posed include how can, and should, the world cope with an ever expanding population? How will climate change impact the planet and its people over the coming decades? How will humanity respond to the challenges of food security, biodiversity loss and water management? What should future cities, towns and rural landscapes be like?
**History**
History students are able to immerse themselves in events from Australia and around the globe and study the impact of warfare, conflict, film, migration, slavery, colonialism and commodity production, political movements, religion and the law on the world.

**Indigenous Knowledges and Society**
Indigenous Knowledges and Society offers practical and theoretical appreciation of Indigenous worldviews. The discipline explores issues of concern to Indigenous peoples, including culture, language, the environment, history and politics. Students will understand and communicate the significance and value of first-nation knowledge systems in a changing world.

**International Business***
Students gain knowledge of, and a foundation in, business and can focus on specialised areas of international management and international marketing.

**Languages**
Language students gain language skills and understanding of the cultural heritage of the societies that communicate in their chosen language of study. Courses include Chinese Studies, French Studies, German Studies, Indonesian Studies, Italian Studies, Japanese Studies, Modern Greek Studies and Spanish Studies.

**Linguistics**
Students of linguistics examine the role of language in human communication, and analyse different forms of language and communication. They learn about the role of Australia’s linguistic heritage and the importance of preserving linguistic diversity.

**Management***
Management is the process of administering and coordinating an organisation’s resources efficiently and effectively in an effort to achieve goals. Management students develop the skills required to successfully manage changes in work structures, process and product technologies, employment relations and organisational culture.

**Marketing***
Marketing students investigate the role of marketing within and between organisations. They gain a grounding in marketing theory, learn how to prepare marketing reports and plans, undertake a diagnostic case study of an exporting firm, analyse advertisements in a variety of media, and apply market research as part of a group project that focuses on a real business problem.

**Media**
Media students explore the dynamic and creative role of media in contemporary society. Students can tailor the program to an area of interest in media research, analysis or production. Additionally, students develop skills in media writing, journalism, and media technology use, which see them well placed to pursue a range of career opportunities.

**Music Studies**
Develop an understanding of music from different genres around the world in its social and performative contexts. Learn about the history of music analysis with a focus on music research and skills.

**Philosophy**
What is the nature of reality? What is knowledge? Should euthanasia be permitted? Can society’s opinion about the value of morality and art – be objectively justified, and if so, how? Philosophy aims to resolve such questions using debate, reasoning and critical thinking. By choosing this discipline, students can join the great philosophers throughout the ages in the love of wisdom that is philosophy.

**Politics and International Studies**
Politics students explore the ins and outs of political decision-making, justice and democracy. They learn about Australian politics and public policy, the politics of other countries, and the relations between them. They have the chance to debate the burning issues in domestic and international governance as great powers rise and changing societies produce new political problems.

---

**Fit uni into life**
Attendance at university is less structured than time spent at high school. The hours spent on campus in lectures, tutorials, practicals or in the field—known as ‘contact hours’—depend on the program students enrol in, study mode selected (internal, external, online or flexible learning) and course choices.

This diary snapshot is only one example of how a student may choose to schedule their university study and life.

---

**Notes:**
* Must be taken in addition to a first Faculty of Arts major chosen from those listed.
**Not available as a major. Visit arts.adelaide.edu.au and use the menu to browse via Current Students to the Undergraduate page and select Courses and Discipline Areas.
All students will have the opportunity to study overseas through a range of programs, including student exchange, study tours and summer and winter schools. There are many exciting opportunities in Europe, Asia, the Americas and Africa. For information visit: www.adelaide.edu.au/global-learning

Life experience through Global Learning

The University of Adelaide values diversity where the rich cultures of Aboriginal and Torres Strait Islanders are taught, supported and celebrated. Wirltu Yarlu provide a range of services, schemes and preparation programs that are designed to support your desire to gain educational outcomes. Wirltu Yarlu is a place where students can soar to new heights. For information visit: www.adelaide.edu.au/wirltu-yarlu

Aboriginal and Torres Strait Islanders

There is a commitment to give all students the opportunity to learn in small groups, peer-to-peer and under the guidance of leading academics and researchers. This experience will enhance students initiative and creativity maximising studying in a research intensive university. For information visit: www.adelaide.edu.au/VCO/beacon/small-group

Small group discovery

High achieving students who are inspired by the opportunity to contribute to the world’s important discoveries and research advancements should consider the Advanced Bachelors degrees. These programs provide a unique close quarters learning experience with academics of international distinction. For information visit: www.adelaide.edu.au/degree-finder

Why study the Bachelor of Arts?
The Bachelor of Arts (BA) is internationally recognised as a flexible degree that offers a wide choice of fascinating fields to study. It attracts students interested in understanding the human condition in all its diversity, finding answers to important questions about human behaviour, cultures and history, and understanding the major social and political problems of our time.
The BA provides you with specialised and transferable skills that are highly sought after by employers, as the skills you will develop include those in effective communication, critical and creative thinking, problem solving and analysis, teamwork, research and professional and ethical conduct. The degree is designed to build a student’s capacity for lifelong learning beyond graduation. Equipped with these skills, BA graduates consistently achieve positions of significance and influence in business, the community, government and industry, and are ready to deal with different challenges and opportunities throughout their future careers in a range of exciting workplaces.

Study abroad and exchange opportunities
The University has student exchange links with over 100 overseas institutions around the world. You can study overseas for one or two semesters which count as credit towards your degree program at the University of Adelaide. There are no extra tuition fees for this study. This provides a way to enhance your intercultural competencies or use your newly developed language skills as you learn.

Program structure
During your degree you can specialise in at least one major and one minor from a great and varied list of discipline areas. Students are also able to take elective courses in other areas of study from within the Faculty of Arts or from other faculty areas within the University such as health or commerce. The Bachelor of Arts also offers the chance to learn one (or more) of eight languages, irrespective of a student’s previous language study experience.

Please note: a maximum of 24 units of electives may be taken from faculties other than the Faculty of Arts. Courses listed on the Bachelor of Arts major or minor lists (including those from other faculties) are exempt from this limit.

For further information on majors, minors and electives or Faculty of Arts courses visit arts.adelaide.edu.au and use the menu to browse to the Undergraduate page.

Areas of specialisation
Students can specialise their studies by taking majors and minors in the following areas:
- Anthropology
- Art History and Visual Culture (minor only)
- Asian Studies
- Chinese Studies
- Classics
- Creative Writing
- Criminology
- Development Studies
- Economics*
- English
- French Studies
- Gender Studies and Social Analysis
- Geography, Environment and Population
- German Studies
- History
- Indigenous Knowledges and Society
- Indonesian Studies
- International Business*
- Italian Studies
- Japanese Studies
- Linguistics
- Management*
- Marketing*
- Modern Greek Studies
- Music Studies
- Philosophy
- Politics and International Studies
- Psychology (minor only)
- Spanish Studies

Please note: All majors and minors are subject to Faculty confirmation in November. Please visit the Faculty website for a full list of courses that comprise each area of specialisation.

*These majors must be taken in addition to a first Arts major chosen from those listed above.

Potential careers
Our graduates have great versatility in shaping their careers and follow highly successful paths in different areas: advertising, administration, business, community engagement, corporate communication, defence, diplomatic service, environmental management and planning, foreign affairs, humanitarian work, human resources, industry liaison, management, marketing, media, policy development, project management, psychology, public relations, publishing, research, social planning, youth work, academia and teaching.

To see where our latest graduates have gone in their careers, visit www.arts.adelaide.edu.au/profiles

In addition to renowned excellence in teaching and research, the Faculty of Humanities and Social Sciences provides mentoring support and careers advice with employment forums and talks by key industry partners and organisations each year.

Your degree may inspire you to achieve far more than you currently imagine and the knowledge and skills gained will open up a number of possibilities for your future.
Work placement

An opportunity for your third year is to take part in an internship with an organisation from within the arts, media, parliament or environment. These include state parliament and a range of public and business sector agencies, where you can use the knowledge from your university study in a practical work environment, building valuable networks and gaining experience that counts towards your degree program and prepares you for your future career.

Honours

Graduates are encouraged to further their studies by doing an honours year or a Master of Philosophy. This involves undertaking advanced coursework and completing a research component (thesis) on a chosen topic in consultation with an academic supervisor.

Honours programs provide a pathway to professional employment or research and further learning.

For further information visit www.adelaide.edu.au/study and select Honours Students from the menu.

Combined and double degrees

Combined and double degree programs provide students with the flexibility to combine two areas of study concurrently.

Bachelor of Arts (Advanced)

SATAC Code: 324671
Duration: 3 years full-time (or part-time equivalent)
Location: North Terrace campus
2015 local cut-offs: ATAR: 95.1 IB: 35
2016 International cut offs: ATAR: 95 IB: 34
Please Note: Year 12 applicants must obtain an Australian Tertiary Admissions Rank (ATAR) of 95 or higher (or equivalent).
Additional entry requirements: Due to the rigour and specialisation of the Bachelor of Arts (Advanced), this program is not suitable to be studied concurrently or as part of a double degree. Double counting of units between the B Arts (Advanced) and other programs will not be permitted.
STAT entry: yes
Tertiary/Internal transfer: yes

Why study the Bachelor of Arts (Advanced)?
The Bachelor of Arts (Advanced) is a program for high-achieving students. The program is specialised with a research focus and concentrates on the liberal arts.
Students complete two majors chosen from the following list: English, History, Politics and International Studies, Anthropology, Philosophy, Classics, Linguistics, European Studies, Gender Studies and Social Analysis, Asian Studies, Chinese Studies, Creative Writing, Criminology, Development Studies, French Studies, Geography, Environment and Population, German Studies, Indigenous Knowledges and Society, Japanese Studies, Spanish Studies.
The BA (Advanced) is an excellent pathway to research study, as well as providing a springboard into careers involving policy making and consultancy.
Transfer into the Bachelor of Arts (Advanced) is possible after successful completion of 12 units of study based on academic merit.

Program structure
BA (Advanced) students are appointed an academic mentor for the duration of their degree and are able to focus on advanced level study from the first year of study. Students will study two majors, undertake a 3-unit course in advanced humanities and complete a 6-unit research project in their final year under the supervision of their academic mentor.
The remainder of the degree is made up of free choice electives from within the Faculty of Arts. Students studying this program will attend various discipline research seminars, career and industry talks.
BA (Advanced) students will also be assisted and encouraged to participate in the University’s study abroad program, the Arts Internship scheme, the Community Engagement project and Summer Research scholarships. Students need to maintain a GPA of 5.0 for the duration of the degree.

#### Why study the Bachelor of Development Studies?

This program investigates key global issues such as poverty, governance, debt reduction, inequality, human rights, HIV and AIDS, conflict, ecology, the environment, health and gender rights in developing countries. You will explore, question and analyse the impact of these issues on the social, economic and political structures of societies. You will also develop analytical and methodological skills that will be useful in a wide range of careers in sectors including government, aid and development, as well as private sector.

Your knowledge of global relations and international developmental processes will grow through studying an interdisciplinary program that includes both theoretical and practical elements.

After the first year, students will have the opportunity to participate in the in-country development studies professional practicums run by the Australian Consortium for ‘In-Country’ Indonesian Studies (ACICIS), as well as international internships in public health. Students who excel will also be able to apply for local internships through the Arts Internship scheme.

#### Study abroad and exchange opportunities

The University has student exchange links with over 100 overseas institutions. You can study overseas for one or two semesters which count as credit towards your degree program at the University of Adelaide. There are no extra tuition fees for this study. This provides a way to enhance your intercultural competencies or use your newly developed language skills as you learn.

#### Program structure

The program consists of compulsory courses in Development Studies, and electives with a development studies focus from disciplines such as Anthropology, Geography, Environment and Population, Economics, Politics and International Studies, Asian Studies, History and Gender Studies and Social Analysis. Students are encouraged to study a language as their minor, in particular Indonesian Studies, French Studies or Spanish Studies.

The remainder of the degree is made up of free choice electives from within the Faculty of Arts or another faculty.

#### Potential careers

The Bachelor of Development Studies will provide a critical entry point for gaining employment in:

- Government (such as the Department of Foreign Affairs and Trade)
- Private sector consultancy firms (Official Development Assistance management contractors)
- Non-government organisations
- Development research agencies
- United Nations agencies (UNESCO)
- Foreign aid agencies

#### Work placement

An opportunity for your third year is to take part in an internship with an organisation from within the arts, media, parliament or environment. These include state parliament and a range of public and business sector agencies, where you can use the knowledge from your university study in a practical work environment, building valuable networks and gaining experience that counts towards your degree program and prepares you for your future career.

#### Honours

Graduates are encouraged to further their studies by doing an honours year or a Master of Philosophy. This involves undertaking advanced coursework and completing a research component (thesis) on a chosen topic in consultation with an academic supervisor.

Honours programs provide a pathway to professional employment or research and further learning.

Why study the Bachelor of Environmental Policy and Management?

Environmental change is rapidly altering the world in which we live - its cities and suburbs, regional and rural landscapes, its natural heritage and biodiversity. This has significant political and economic implications. In this degree you will learn about the important causes of environmental change and develop strategies, policy, and planning skills to effectively manage environmental issues at local, national and global levels. Areas covered in this degree include climate change, environmental management, population and migration, urban processes, biodiversity, conservation and sustainable development. Graduates are well equipped for careers in environmental policy, planning and consultancy, administration at local and state government levels, media organisations, teaching and research.

Study abroad opportunities

The University has student exchange links with over 100 overseas institutions. You can study overseas for one or two semesters which count as credit towards your degree program at the University of Adelaide. There are no extra tuition fees for this study. This provides a way to enhance your intercultural competences or use your newly developed language skills as you learn.

Program structure

In the first year of the degree you will complete compulsory Environmental Policy and Management courses on globalisation, the impact of humans on the planet, population-environment relationships and economy-environment interactions. These courses introduce the linked concepts of social and environmental sustainability at local to global scales.

Advanced level courses are offered in coastal management, population and health, international migration, urban futures, housing policy and practice, biodiversity conservation, environment and development, food and agriculture, environmental change and climate change, resource scarcity, environmental impact assessment, geographical information systems, and social science research techniques.

Double degree

Combined and double degree programs provide students with the flexibility to combine two areas of study concurrently.

Bachelor of Laws with Bachelor of Environmental Policy and Management

Students also study a minor in another area from within the Faculty of Arts. The remainder of the degree is made up of free choice electives from within the Faculty of Arts or another faculty.

In your third year you may take part in an internship with an organisation from within the arts, media, parliament or environment. These include state parliament and a range of public and business sector agencies, where you can use the knowledge from your university study in a practical way, building valuable networks and gaining experience that counts towards your degree program and prepares you for your future career.

Potential careers

Graduates find successful careers in numerous roles.

Honours

Graduates are encouraged to further their studies by doing an honours year or a Master of Philosophy. This involves undertaking advanced coursework and completing a research component (thesis) on a chosen topic in consultation with an academic supervisor.

Honours programs provide a pathway to professional employment or research and further learning.

For further information visit www.adelaide.edu.au/study and select Honours Students from the menu.
Bachelor of International Studies

www.adelaide.edu.au/degree-finder

SACE Code: 314961
Duration: 3 years full-time (or part-time equivalent)
Location: North Terrace campus
Adelaide Approved score: 70
2015 local cut-offs: ATAR: 67 IB: 24
2016 International cut-offs: ATAR: 70 IB: 25
STAT entry: yes
Tertiary/International transfer: yes
VET/TAFE minimum entrance requirements: Completed Certificate IV

Why study the Bachelor of International Studies?

The International Studies program at the University of Adelaide offers you an opportunity to explore the interrelationships between nations and peoples, and to examine global politics, problems and actors from a variety of perspectives. Our program has three specialisations: Asia’s Rising Powers, International Security, and Global Governance and Justice. The Asia’s Rising Powers specialisation explores the political and economic implications of the shift of wealth and power to new and rising powers in Asia. Courses within the stream have a particular (though not exclusive) focus on India and China. Students analyse the domestic and global politics of these emerging powers, the social and political impact of rising powers, as well as their impact on global and regional governance. In addition, the stream includes courses that explore Australia’s engagement with the international order, and particularly examines the domestic political implications of Australia’s engagement with the Indo-Pacific region.

International Security explores the nature of security, conflict and intervention in global politics. It investigates contending theoretical perspectives on international conflict, violence and war on human populations. Courses within the stream focus on the role of strategic culture in defining interests, intelligence, the impact of globalisation on changing forms of security and violence, and the increasing level of human insecurity. Other areas of focus include non-military, cross-border issues that impact on human security including environmental degradation and change, migration and trade.

Global Governance and Justice explores the role of international institutions and regimes in the governance of complex issues. It pays particular attention to how governance is now increasingly complex, involving non-state actors such as credit rating agencies and/or private security firms. It also focuses on new forms of governance at the national, regional and global levels dealing with cross-border issues such as the environment, migration and finance.

The comprehensive array of electives on offer will reinforce these different streams of our program.

Study abroad and exchange opportunities

The University has student exchange links with over 100 overseas institutions. You can study overseas for one or two semesters which count as credit towards your degree program at the University of Adelaide. There are no extra tuition fees for this study. This provides a way to enhance your intercultural competencies or use your newly developed language skills as you learn.

Program structure

Students study core International Studies courses over the duration of their degree. They will also choose a discipline area from within the Faculty of Arts as their minor, for example French Studies or History. The remainder of the degree is made up of free choice electives from within the Faculty of Arts or another faculty.

Studies in a foreign language are highly recommended and students are encouraged to spend one or two semesters at an overseas university to gain valuable international experience and cultural perspective.

Potential careers

Graduates find successful careers in numerous roles.

Work placement

An opportunity for your third year is to take part in an internship with an organisation from within the arts, media, parliament or environment. These include state parliament and a range of public and business sector agencies, where you can use the knowledge from your university study in a practical work environment, building valuable networks and gaining experience that counts towards your degree program and prepares you for your future career.

Honours

Graduates are encouraged to further their studies by doing an honours year or a Master of Philosophy. This involves undertaking advanced coursework and completing a research component (thesis) on a chosen topic in consultation with an academic supervisor.

Honours programs provide a pathway to professional employment or research and further learning.

Why study the Bachelor of Languages?
The Bachelor of Languages is for committed language students and is designed to provide students with the opportunity to develop proficiency in one or more languages as well as an enhanced knowledge of the culture(s) in which the language they are studying is spoken.

Students who complete the program will therefore develop a heightened awareness of language as a system and of its role in society, as well as a greater appreciation of cultural diversity and of cultural difference.

Study abroad and exchange opportunities
The University has student exchange links with over 100 overseas institutions. You can study overseas for one or two semesters which count as credit towards your degree program at the University of Adelaide. In addition there are no extra tuition fees for this study. This provides a way to enhance your intercultural competencies or use your newly developed language skills as you learn.

Program structure
This degree offers a flexible mix of prescribed study and elective courses. The compulsory component comprises one major, supplemented by two courses in a cognate field, forming an "extended" major, and one minor in another language or in Linguistics. The minor is a minimum requirement - you are free to use two of your elective choices to compile a second major if you wish.

All languages offer different streams catering for students who have studied the language to Year 12 level (or equivalent), but also for anyone wanting to start learning a language from scratch.

As a student of the Bachelor of Languages you will have the opportunity to spend at least one semester studying in a country where the language chosen for your major is spoken. With partners in all the relevant countries, this opportunity will boost language proficiency and develop understanding of another culture.

Background speakers who wish to study their native language should consult the relevant background speaker courses where extra cognate courses are not prescribed by your language major.

Areas of specialisation
The languages available for study are:
> Chinese Studies
> French Studies
> German Studies
> Indonesian Studies
> Italian Studies
> Japanese Studies
> Modern Greek Studies
> Spanish Studies

You may also minor in Linguistics, or choose from a list of approved Asian Studies/European Studies courses where extra cognate courses are not prescribed by your language major.

Potential careers
The ability to communicate in another language is an asset in a range of occupations and industries such as interpreter/translator, linguist, public servant, foreign affairs, government officer, tutor, humanitarian/aid worker. It's a valuable addition to other professional interests, but it's also a great asset in its own right!

Concurrent degrees
The Bachelor of Languages may also be combined with most other degrees offered by the University of Adelaide. Students considering any concurrent combinations, are strongly encouraged to contact the Faculty of Arts office for more detailed information before lodging an application.

Honours
Graduates are encouraged to further their studies by doing an honours year or a Master of Philosophy. This involves undertaking advanced coursework and completing a research component (thesis) on a chosen topic in consultation with an academic supervisor.
Honours programs provide a pathway to professional employment or research and further learning.

Why study the Bachelor of Media?
This degree provides a theoretical understanding of media practices while teaching practical media skills, with a focus on the latest developments in digital and interactive media. Creative media practices can include writing, research and reporting, digital story telling, radio production, and film/video production.
Graduates of the Bachelor of Media are prepared to enter cross-media roles and have potential to find careers as writers, editors, social media coordinators, digital content officers, producers, journalists and professional communicators in business, government and community organisations. Graduates may also choose careers as independent freelancers.
This degree appeals to students who are interested in working in the new fields and occupations created by digitisation and networking changes affecting mainstream media and society.
Bachelor of Media students can add majors to their degree including Journalism, Marketing, Graphic Design, Game Art, Digital Production, Photographic Imaging, and Computer Graphic Imaging and Visual Effects. Graphic Design*, Game Art*, Digital Production*, Photographic Imaging*, and Computer Graphic Imaging and Visual Effects* are studied in collaboration with TafeSA at the Design hub, that provides students with the latest technologies relevant to studying their media major.
Graduates of the Bachelor of Media are prepared for their host organisation. Work experience and contribute toward a project placement. The placement, which is highly recommended, allows students to gain valuable work experience and contribute toward a project for their host organisation.
The remainder of the degree is made up of free choice electives from within the Faculty of Arts or another faculty.
Study abroad and exchange opportunities
The University has student exchange links with over 100 overseas institutions. You can study overseas for one or two semesters which count as credit towards your degree program at the University of Adelaide. There are no extra tuition fees for this study. This provides a way to enhance your intercultural competencies or use your newly developed language skills as you learn.
Program structure
In first year, you will take core courses on media law, media research, global media, online democracy, professional practices, media and creative theory, and a range of options including a media industry placement. The placement, which is highly recommended, allows students to gain valuable work experience and contribute toward a project for their host organisation.
The remainder of the degree is made up of free choice electives from within the Faculty of Arts or another faculty.
If studying one of the available majors, including Journalism, Marketing, Game Art, Digital Production, Photographic Imaging, Graphic Design or Computer Graphic Imaging and Visual Effects, you will undertake courses in place of your upper level electives to allow for the major.
The specialist Journalism curriculum starts in the second year of study. This follows the level I core courses shared by all Bachelor of Media students in first year. From second year, students study Journalism core courses alongside Media core courses, and can choose from a wide range of Journalism-approved electives. The remainder of the degree is made up of free choice electives from within the Faculty of Arts or another faculty.
The specialist Marketing curriculum starts in the second half of the first year of study. Students will also undertake the level I core courses shared by all Bachelor of Media students in first year. From the second semester of first year, students study Marketing core courses alongside Media core courses, and have a choice of Marketing Communication, International Marketing, Services Marketing, Brand Management and International Trade and Investment Policy, International Business, Management and Organisational Behaviour. The remainder of the degree is made up of free choice electives from within the Faculty of Arts or another faculty.
Students studying the Bachelor of Media with a Media Production major will begin their major in the second semester of their first year of (full-time) study. Out of a total of 72 units within their degree, 36 will include core media courses which are required by all Bachelor of Media students, 24 units will be their chosen Media Production major and the remainder will be made up from a wide range of elective courses.
Areas of specialisation

Marketing
Marketing is a primary business function of any organisation and is the management process responsible for identifying customer needs and wants. The Bachelor of Media with a Marketing major allows students to understand the role of marketing within and between organisations. Students will gain a grounding in marketing theory, learn how to prepare marketing reports and plans, undertake a diagnostic case study, analyse advertisements in a variety of media, and apply market research as part of a group project that focuses on real world business problems.

Journalism
The Bachelor of Media with a Journalism specialisation has been developed in collaboration with media and journalism industry organisations to deliver a study experience that is unique in Australia. Students who study this program develop the practical skills required to work in a rapidly changing industry. Writing effective news stories remains the core skill required of every journalist. Students learn this craft and develop skills that will enable them to enter their journalistic career ready to work with a range of new media platforms used for the presentation of stories, including video, websites and social media. Graduates have found successful careers in the media and journalism industry organisations they have worked with, and this program prepares students for success in this field.

Photographic Imaging
In this major, students develop a thorough knowledge base of photographic and visual communication skills within an elected field of commercial photography. Students work within a world-class photographic studio that includes a full cyclorama. Students learn a range of photographic techniques for advertising, editorial, portraiture, still-life, architecture, fashion and illustration. The major has on-location and studio components and will cover: the principles of camera operation; the use of light meters (ambient and flash) on location and in the studio; the fundamentals of lighting, including an introduction to studio flash, lighting types, quality and styles; and the fundamentals of design and composition. Students enrolled in the photographic imaging specialisation are required to have access to an SLR camera with manual override capabilities. The Centre for Creative Industries has a large range of Canon lenses and a small number of Nikon lenses that students can borrow.

Game Art
This major delivers the art skills required to design and develop 3D models and textures for a variety of genres that use interactive digital technology, such as the simulation and serious games genres. Emphasis is placed on modelling, texturing, concept development and drawing. Students work with software such as Maya and Photoshop.

Digital Production
The digital production major introduces students to digital production environments such as the graphic design and print shop, finished art and web design studio, and magazine and digital publishing industry. Students initially gain skills in computer graphic design and print shop, finished art and web design studio, and magazine and digital publishing industry. Students initially gain skills in computer applications, design techniques for print and web, finished art processes and digital print. Further study includes planning, design and construction of web sites, digital publications for tablets and other media devices, magazines and books as well as personalised print campaigns.

Computer Graphic Imaging and Visual Effects
In this major students receive an introduction to the field of visual effects and 3D computer animation for television and cinema. Students are taught the practical and theoretical aspects of the movie and TV making process so they understand where computer generated imagery fits in to the workflow of a production.

Potential careers
Graduates have found successful careers in numerous roles.

Work placement
All Bachelor of Media students have the opportunity to take part in a Media Industry Placement as an elective toward their degree. It is highly recommended for those who wish to enter the industry directly after completion of their undergraduate degree.

Honours
Graduates are encouraged to further their studies by doing an honours year or a Master of Philosophy. This involves undertaking advanced coursework and completing a research component (thesis) on a chosen topic in consultation with an academic supervisor.

Bachelor of Social Sciences

Why study the Bachelor of Social Sciences?

Students in the Bachelor of Social Sciences are involved in investigating, analysing and interpreting the major social justice challenges we face in an increasingly globalised world. Challenges including homelessness and youth homelessness; closing the gap between Indigenous and non-Indigenous Australians with regard to health, education and employment; gender inequity in the workplace; children living in poverty; the impact on communities due to the decline of manufacturing; and uneven education provision.

This degree will appeal to high school applicants who are currently enjoying humanities subjects such as Society and Culture or Women’s Studies, as well as appealing to general applicants who are interested in taking a critical look at our world. From a social justice standpoint, students learn to assess the impact of social justice issues in Australian society and develop approaches to analyse findings and advocate change.

In the final year, students can apply for a merit-based internship that gives direct access to possible future employers with a social justice focus and the opportunity to work on a research project together. Or, students may choose to strengthen their knowledge in social sciences methodologies to build more expertise in this area.

Program structure

This program mixes core learning in a broad range of relevant areas with practical research investigation. Students are introduced to methods and tools to design and conduct social research and develop approaches to analyse findings and advocate change.

In the final year, students can apply for a merit-based internship that gives direct access to possible future employers with a social justice focus and the opportunity to work on a research project together. Or, students may choose to strengthen their knowledge in social sciences methodologies to build more expertise in this area.

Potential careers

Graduates work in careers in social planning, government policy making, market research, media and public relations, aid development organisations, environmental agencies and the health sector.

Work placement

A valuable option for third year is to take part in an internship with an organisation from within the arts, media, parliament or environment. These include state parliament and a range of public and business sector agencies, allowing students to use the knowledge from their university study in a practical work-environment, build valuable networks and gain experience that counts towards their degree program and prepares them for their future career.

Honours

Graduates are encouraged to further their studies by doing an honours year or a Master of Philosophy. This involves undertaking advanced coursework and completing a research component (thesis) on a chosen topic in consultation with an academic supervisor.

Honours programs provide a pathway to professional employment or research and further learning.

For further information visit www.adelaide.edu.au/study and select Honours Students from the menu.

Study abroad and exchange opportunities

The University has student exchange links with over 100 overseas institutions. You can study overseas for one or two semesters which count as credit towards your degree program at the University of Adelaide. There are no extra tuition fees for this study. This provides a way to enhance your intercultural competencies or use your newly developed language skills as you learn.

Teaching

The Bachelor of Teaching double degree prepares students for teaching in secondary schools. The double degree enables students to pursue other interests while studying education. Disciplines are available in many fields including: accounting, business studies, economics, English, geography, history, information technology, languages, science and English as a second language (ESL). Bachelor of Teaching students are also able to study a combination of science, maths and information technology (IT) subjects not offered at other local institutions. Teachers with a focus in these areas are currently in demand within the profession.

The University of Adelaide is an innovative, research intensive university. Consequently, there is a strong connection between research and discovery and the teaching curricula. Courses are informed by the latest research findings and knowledge, meaning degrees and the topics studied are at the cutting-edge and relevant.

Teaching placements

In the second semester of their first year, Teaching students participate in an observation placement in a local primary school. This provides professional experience working with school students, teachers and a school community. In the third year, students are placed in country secondary schools for one week to gain valuable experience and build on the theoretical knowledge they have acquired. In the fourth year of the degree, students participate in two professional placements in secondary schools in metropolitan and country South Australia. These placements provide hands-on experience in the subject area of a student’s degree. Students in fourth year may also elect to participate in the internship program that is held in association with a number of Adelaide schools.

Upon graduation, students can register to work as teachers in South Australia and in popular overseas locations such as Hong Kong, Singapore, the United Kingdom and the United States. University of Adelaide teaching graduates are highly sought after by local schools that are keen to employ new graduates each year. University of Adelaide teaching graduates have the potential to become leading educators in South Australia and beyond.

More about placements

Throughout the teaching degree, there are a number of professional experience opportunities. These include the country secondary school placement and internship placements with partner schools. The country secondary school placement is undertaken in year three of the degree. Students are asked to make a contribution towards the cost for this placement.

In the final year, students undertake two professional experience placements (in a participating school) as their internship placements. Opportunities exist with some of Adelaide’s best-known schools. These schools are dedicated to providing teaching students with mentoring, knowledge development and hands-on teaching practice. To participate in the internship program students are asked to apply to the partnering school via the University’s School of Education. Places are limited and highly sought after.

Working with minors

All students enrolled in teaching degrees will be required to obtain a child-related employment screening certificate. Without a current certificate, students cannot participate in professional experience placements at levels 1, 3 and 4, which are core components of the teaching degrees. Further information regarding the clearance certificate can be found by visiting the School of Education’s website.

Students will also be required to complete an approved Responding to Abuse and Neglect course. Details will be supplied upon enrolment.

Student study commitment

To successfully complete courses, students will need to allocate an appropriate time commitment to their study. In addition to the formal contact time required for each course (e.g. lectures, tutorials, teaching practicums) students will need to allocate non-contact time. Non-contact time will be required for a range of activities, which may include, but are not limited to: assessment tasks, reading, researching, note-taking, revising, writing, consulting with staff, and informal and formal discussion with other students.

While the relative proportion of contact and non-contact time may vary from course to course, as a guide, a full-time student would expect to spend, on average, a total of 48 hours per week on their studies during teaching periods. The workload for undergraduate programs is eight courses per year (full-time).

The workload for undergraduate programs is 24 units per year (full-time).
# Bachelor of Teaching with Bachelor of Arts

**www.adelaide.edu.au/degree-finder teaching + arts**

**SATA Code:** 324351  
**Duration:** 4 years full-time  
**Location:** North Terrace campus  
**2015 local cut-offs:** ATAR: 70.35 IB: 25  
**2016 International cut-offs:** ATAR: 70 IB: 25  
**STAT entry:** yes  
**Tertiary/Internal transfer:** yes  

**Entry requirements:** applicants must be enrolled in an undergraduate degree, postgraduate degree or combined degree program at the University of Adelaide, or be enrolled in an undergraduate degree or combined degree program at another recognised tertiary institution, or have been awarded an undergraduate degree from a recognised tertiary institution.

Why study the Bachelor of Teaching with Bachelor of Arts?

The Bachelor of Teaching program prepares students for teaching in secondary schools. The program is offered as a double degree only and is designed for students who are beginning tertiary study. The primary focus in the first three years of the degree is on completing a major and minor sequence in two different subject areas usually taught at senior secondary level. A major sequence consists of courses taken over three consecutive years of study (8 x 3 unit courses).

A minor sequence consists of courses taken over two consecutive years of study (6 x 3 unit courses). The major and minor subject sequences are taken as part of the Bachelor of Arts program in the subject areas of the student’s choice. Six semesters of study in a subject area is the general requirement for teaching a subject to Year 12 level. In each of these years students also take education courses designed to provide an ongoing orientation to educational issues and practice. The first and third year education courses include observation and experience in school contexts. The final year is taken up entirely with education studies which are organised around two five-week periods of teaching practice in secondary schools, one in the Adelaide metropolitan area, the other in country South Australia.

## Program structure

The Bachelor of Teaching is designed primarily for students who have not already commenced university study. Students who have commenced a degree should consider completing their degree and then applying for a postgraduate Education program.

### Areas of specialisation

The Bachelor of Teaching double degree program with the Bachelor of Arts is designed for students who wish to become secondary school teachers in the following teaching areas:

- English
- History
- Geography
- Languages (Indonesian Studies, Japanese Studies, Chinese Studies, French Studies, German Studies, Spanish Studies, Italian Studies, Modern Greek Studies, English as a Second Language).
- Psychology For further information about these specialisations, visit the Faculty of Arts website.

Bachelor of Teaching Graduates are required to have two teaching specialisations in which they are qualified to teach.

## Potential careers

The Teaching program is recognised by education departments in all states of Australia and by most teacher-employing authorities overseas. There are job opportunities for graduates in most subjects, particularly in country areas.

## Professional accreditation

The double degree program provides a professional qualification that is recognised for teacher registration purposes in South Australia. In most cases the qualification is portable to other states and countries.

## Indicative study plan

### Core courses:
- Schools and Policy
- Primary School Interaction
**Level 1**

**The Enquiring Mind: Arts of Engagement**

**Two courses** in first teachable specialisation: major

**Two courses** in second teachable specialisation: minor

**One level 1 course** from the Faculty of Arts

**Level 2**

**Issues in Contemporary Education**

**Professional Practice and Research**

**Three courses** in first teachable specialisation: major

**Two courses** in second teachable specialisation: minor

**One advanced level or level 2 course** from the Faculty of Arts

**Level 3**

**Secondary School Interaction**

**Reflective Practice or one level 3 or advanced level Faculty of Arts course**

**Three courses** in first teachable specialisation: major

**Two courses** in second teachable specialisation: minor

**One advanced level or level 3 course** from the Faculty of Arts

- Alternative Curricula
I’ve seen lectures so powerful that they’re rewarded with a standing ovation; I’ve walked out of a tutorial with my mind abuzz, in awe of the insightful observations made in class.

Julia McCarthy
Bachelor of Arts Diploma in Languages (French)
Diploma in Languages

www.adelaide.edu.au/degree-finder
language

SATAC Code: 316171
Duration: 1 year full-time
Location: North Terrace campus
Prerequisites: applicants must be enrolled in an undergraduate degree, postgraduate degree or combined degree program at the University of Adelaide

Why study the Diploma of Languages?
The Diploma in Languages consists of studies in a single language over three years and is available to all domestic students who are enrolled in any undergraduate Bachelor degree or postgraduate studies at the University of Adelaide. Students enrolled in an undergraduate degree or combined degree at another recognised tertiary institution; or students who have been awarded, or are eligible for the award of, an undergraduate degree from another recognised tertiary institution may also apply. All languages are available at either beginners or advanced level. Students who graduate with the Diploma in Languages and a Bachelor degree or postgraduate qualifications have a more rounded educational experience, and bring a valuable additional skill to their professional and personal life. The benefits to be gained from adding a language skill to your chosen field of study are substantial. Some of the practical and cultural benefits are:

➢ enhanced employment prospects
➢ the possibility of studying in your chosen field overseas (at postgraduate level or as part of an undergraduate exchange program)
➢ the possibility of competing for overseas study scholarships (most foreign embassies offer these, e.g. for science students)
➢ access to resources and materials published in a foreign language
➢ the possibility of interacting with students in other countries studying in the same area
➢ greater understanding of people of other cultures through insights into their ways of thinking and cultural and linguistic practices

Program structure
Students reduce the study load in their Bachelor degree each year to accommodate the three-year language sequence. Their studies toward their degree usually extend over an extra year to ensure it fits and they meet all criteria. This means, for example, that students may graduate with a Bachelor of Economics, Science or Arts, and a Diploma in Languages, in four years of full-time study. Students may graduate from the Diploma in Languages at the same time as, or after, graduating from their concurrent degree.
For a postgraduate study plan incorporating the Diploma in Languages please contact the Faculty of Humanities and Social Sciences for more information.

Areas of specialisation
Languages currently offered are:
➢ Chinese Studies
➢ French Studies
➢ German Studies
➢ Indonesian Studies
➢ Italian Studies
➢ Japanese Studies
➢ Modern Greek Studies
➢ Spanish Studies

Potential careers
The benefits to be gained from adding a language skill to your chosen field of study are substantial. Some of the practical and cultural benefits include enhanced employment prospects and the possibility of working or studying in your chosen field overseas (at post-graduate level or as part of an undergraduate exchange program).
Arts Internship

If you would like to work in an organisation as part of your degree and learn new skills to help you prepare for the world of work, then you should consider enrolling in an Arts Internship in the Faculty of Arts.

The Arts Internship places students in a host organisation for one day per week throughout the semester. Students undertake a research project on a topic of interest, and of relevance to the host organisation. Students are jointly supervised by an academic and a member of staff at the host organisation.

At the end of the internship, students give an oral presentation about their project and submit a report of approximately 7000 words. The Arts Internship counts towards 50 per cent of one semester’s workload (6 units).

Students are asked to apply for a place in the internship, indicating their area of interest, and selection is based on grade point average (GPA). The Arts Internship is available to both local and international students.

For more information visit: www.arts.adelaide.edu.au/current-students/internships

Examples of Arts Internship host organisations

> Australian Art Orchestra
> Australian Institute of International Affairs
> Australian Refugee Association
> Business SA
> Carpets for Communities
> Coffey International Development
> Conservation Council of SA
> History SA
> Indo-Pacific Governance Research Centre
> Legal Circles
> Locus of Social Analysis and Research
> Migrant Resource Centre SA
> Migration Museum Multicultural Communities Council of SA
> Oxfam Australia
> Pace Lawyers
> Projects Abroad
> SA Council of Social Service
> SA Government departments

> Tandanya National Aboriginal Cultural Institute
> The Adelaide Review/Rip It Up Publishing
> The Smith Family
> The Urrbrae House Historic Precinct
> United Nations Good Offices, Cyprus
> Wakefield Press
> World Vision
> YWCA Adelaide

The Parliamentary Internship Scheme

The internship provides a research placement with a member of the Parliament of South Australia MP. Students gain first-hand experience of how parliament works and have the opportunity to work with an MP on a research topic nominated by the member. Upon completion of the internship, students have an enhanced understanding of parliamentary and public policy processes.

For more information visit: www.arts.adelaide.edu.au/historypolitics/politics/intern.html

Environmental Policy and Management Internship Scheme

The internship provides the opportunity for students to work with an organisation engaged in environmental policy, environmental planning, environmental research or environment management. The internship is not available to study abroad or exchange students. For more information please email: arts@adelaide.edu.au

Media Industry Placement

The placements are a collaborative venture between the University and various media organisations in the community. The placement scheme is open to Bachelor of Media students only. For more information please email: arts@adelaide.edu.au

Scholarships for graduating students

DD Harris Geography Teaching Scholarship

Don Harris was a highly esteemed geography teacher and author whose contribution to the study and teaching of geography in South Australia extended over six decades. The Geography Teachers Association of South Australia offers up to three scholarships in his name annually. The DD Harris scholarships seek to encourage three newly graduated teachers, one from each of the South Australian universities—the University of Adelaide, Flinders University and the University of South Australia who possess strong academic backgrounds in geography at tertiary level, and who are likely in the future to significantly contribute to geography teaching in South Australia.

Further information
Awards and prizes

- The Smolicz Languages Education Travel Award
- Australian Veterans’ Children Assistance Trust (AVCAT) Scholarships

The Australian Veterans’ Children Assistance Trust (AVCAT) is a national independent charity administering tertiary scholarships to the children and grandchildren of ex-servicemen and women, helping them to a better future through higher education. This scholarship is kindly donated by anonymous donors. Each scholarship is worth $4000 per year for four years. For children and grandchildren of veterans of the Australian Defence Force (ADF), preference is given to those studying teaching, nursing, engineering and science. For more information on these scholarships visit www.avcat.org.au, select About us from the menu and then Our Scholarships. The AVCAT scholarships are just a small sample of the scholarships available to University of Adelaide students. Visit www.adelaide.edu.au/scholarships to read about others.

Awards for graduating students

- Australian Society of Music Education
- Geography Teacher Association
- History Teachers Association
- Mathematical Association of South Australia
- South Australian English Teachers Association
- South Australian Science Teachers Association

For further details visit education.adelaide.edu.au/about and select Scholarships from the menu.

Group of Eight

www.go8.edu.au

The University of Adelaide is a member of the Group of Eight (Go8), a coalition of Australia’s leading research intensive universities. Group of Eight universities provide opportunities for all students to benefit from a world-class education, while enhancing Australia’s wellbeing and prosperity, responding to local and global challenges, and contributing to the global knowledge economy through their teaching and research activities.

Open Day

Sunday 16 August 2015

Open Day offers important information for future students and parents, as well as entertainment, tours and exhibitions for the whole family. Everyone is invited to discuss study and career options with the University’s friendly staff and explore the University campus.

For more information visit the Open Day website or call Ask Adelaide.

www.adelaide.edu.au/openday

How to apply
Applications to University of Adelaide undergraduate programs are made online via SATAC: www.satac.edu.au
The application closing date for 2016 entry is 30 September 2015. Bachelor of Medicine and Bachelor of Surgery, and Bachelor of Dental Surgery applicants should refer to the UMAT website for information on the Undergraduate Medicine and Health Sciences Admission Test, including application and test dates: umat.acer.edu.au
International students should refer to: international.adelaide.edu.au/apply

Entry pathways
There are many pathways applicants can take to apply to the University of Adelaide, including SACE, IB, STAT, TAFE, preparatory programs, foundation study and more. To find out more about the available pathways, visit www.adelaide.edu.au/study and select ‘Entry Pathways’ from the menu.

Fees and costs
In 2015, student contributions for Commonwealth supported students studying an equivalent full-time study load were as follows.

These annual fees are indicative only as actual charges are determined at the course level based on the area of study. Fees may increase in 2016.

HECS Higher Education Loan
This program, known as HECS-HELP assists eligible students to pay their student contribution. Further information is available at: www.studyassist.gov.au

Scholarships
The University of Adelaide has a range of scholarships available to students from a variety of backgrounds and academic levels. Comprehensive information about scholarships, and how to apply, can be obtained by contacting us (refer below for details) or visiting the scholarships website: www.adelaide.edu.au/scholarships

Student Services and Amenities Fee
Students are charged an annual Student Services and Amenities Fee (SSAF) to assist with the funding of student services and amenities at the University. In 2015, the SSAF amount for full-time students was $281, and for part-time students it was $210. Eligible students may defer this fee to an SA-HELP loan. For further information about the SSAF and SA-HELP visit www.adelaide.edu.au/student/finance and select ‘Other Fees and Charges’.

Additional costs
Students may be required to pay for specialist equipment, reading materials, etc. Students are advised not to purchase any equipment until they receive their faculty/school handbook, available during orientation. For more information on other program-related fees and charges, visit www.adelaide.edu.au/student/finance, and select ‘Other Fees and Charges’.

Bonus points
For 2016 entry, SATAC will centrally administer a new South Australian Universities Bonus Scheme. The two new schemes are the SA Universities Equity Scheme and the SA Language, Literacy and Mathematics Bonus Scheme. For more details, please visit www.adelaide.edu.au and search ‘bonus points’.

Program intake
Many undergraduate programs will allow students to begin study in February or July. Please refer to individual programs on Degree Finder (www.adelaide.edu.au/degree-finder) to check whether midyear entry is available. Where Degree Finder states ‘subject to availability’, applicants should contact Ask Adelaide (refer below for details) to check whether midyear entry is available.

Deferring your studies
Most undergraduate programs can be deferred for up to two years. Please refer to specific programs for exceptions. Music programs may not be deferred.

English language requirements for international students
All international students undertaking an Australian year 12 program are required to achieve a Pass grade or above in one of the approved English as a Second Language or English language subjects. If an applicant attempts, but does not pass, the English language subject then alternative options, such as an acceptable English language proficiency test result, may be arranged. Details of recognised subjects and recognised tests and requirements are available by visiting international.adelaide.edu.au/apply, selecting ‘Admissions Information’ from the menu, then ‘English Language Requirements’. Successful completion of the International Baccalaureate (IB) diploma meets the English language requirements of the University of Adelaide.

Permanent residency
International students who have studied an Australian year 12 program or the IB and expect to be granted Australian permanent residency before the commencement of their university study must contact the International Office. To contact the International Office for more information, visit international.adelaide.edu.au.au, select ‘About Us’ from the menu, then ‘International Office’ and ‘Enquire Now’.

Accommodation
The University understands that finding the right accommodation is important to successful study. For accommodation options and costs please visit: www.adelaide.edu.au/accommodation
