Application Instructions

Applicants must provide the following information and address the selection criteria:

Value Proposition in Support of Research Excellence and Research Productivity

Category of equipment to be supported and the expected outcomes:

- Ageing equipment needing replacement (as documented in the University's research infrastructure database); or
- New technology; or
- Access to external research facility; and
- Nature of the essential capacity to be maintained, or the increased and/or new capability that will result.

Value Proposition in Support of Research Excellence and Research Productivity (Continued)

Equipment details:

- Estimated cost (have formal quotes been obtained verifying the anticipated cost?);
- Estimated time from order to delivery of the equipment;
- Confirmation that technical staff with appropriate expertise are available to maintain the equipment;
- Any potential refurbishment impacts or other implications (air quality, quarantine, licenses, training, new staff, etc.) to be specified where these additional costs fall outside this application;
- Confirmation that no suitable equipment is available or accessible elsewhere within the University, or accessible locally within Adelaide or elsewhere under reasonable conditions;
- Any planned applications for external support, including LIEF;
- Any proposed co-investment by applicants, Schools or Faculties; and
- Confirmation that the School(s) has/have completed the University Research Infrastructure Survey.

Boosting Excellence in Research and Innovation -

Describe what capability the equipment currently supports and/or will support in future, e.g.:

- External competitive-funded research projects and/or contracts;
- External post-doctoral fellowship holders, HDR and Honours students;
- Existing or emerging areas of research strength and excellence;
- Interdisciplinary research (current or potential);
- Global collaboration (current or potential); and
- Expected outcomes, including increased research and innovation outputs, competitive research funding, numbers of ECRs supported and trained and other relevant measures.

Value Proposition in Support of Research Excellence and Research Productivity (Continued)

Describe current or planned arrangements that will ensure that the capability will support and grow partnerships, utilisation and synergies, e.g.:

- Current/future users (type: researchers and groups, including externally-funded centres, industry, business, global partners, other);
- Sharing of equipment, with or without co-location, including any arrangements for multi-user access, charges to contribute to service contracts, shared technical support and/or other operational costs; and
- Access by external users (researchers, industry, other), including charges to contribute to service contracts, shared technical support and/or other operational costs.
