

Altmetric Explorer: Export data

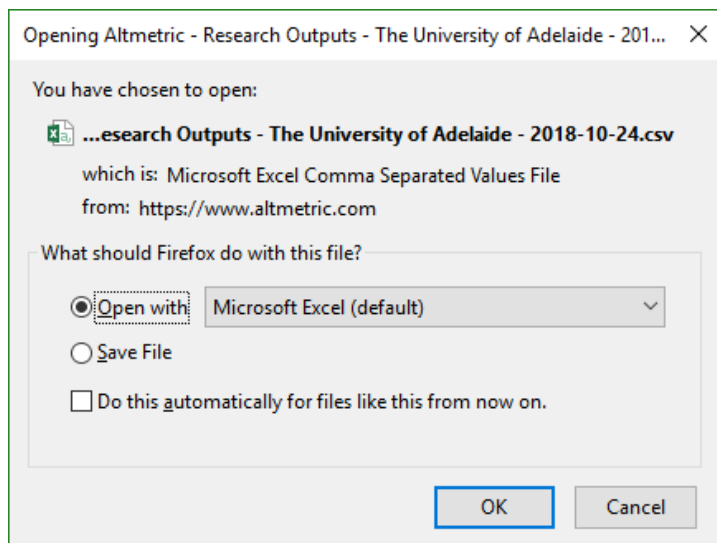

Procedure

1. From the **RESEARCH OUTPUTS** tab or any search results page, click on **EXPORT THIS TAB**.

The screenshot shows the Altmetric Explorer interface for The University of Adelaide. The 'RESEARCH OUTPUTS' tab is active. A search query has been performed, showing 127,543 research outputs, with 33,437 mentioned. The 'EXPORT THIS TAB' button is highlighted with a red box, and a dropdown menu is open showing options: 'Download results as CSV' and 'Open results in API'. The interface also shows a list of research outputs with their Altmetric Attention Scores and titles.

2. Select **Download results as CSV**.
3. From the pop-up window, click **OK** to open the data in Excel.

The screenshot shows a Firefox file dialog box titled 'Opening Altmetric - Research Outputs - The University of Adelaide - 201...'. The dialog displays the file path: '...research Outputs - The University of Adelaide - 2018-10-24.csv', which is a Microsoft Excel Comma Separated Values File from 'https://www.altmetric.com'. The 'Open with' dropdown menu is set to 'Microsoft Excel (default)'. The 'Open with' radio button is selected. The 'Save File' radio button is unselected. The 'Do this automatically for files like this from now on.' checkbox is unselected. The 'OK' and 'Cancel' buttons are visible at the bottom.

- Once the file opens in Excel, save it and/or make changes to the data as required.
