

Publish a figshare Project

Introduction

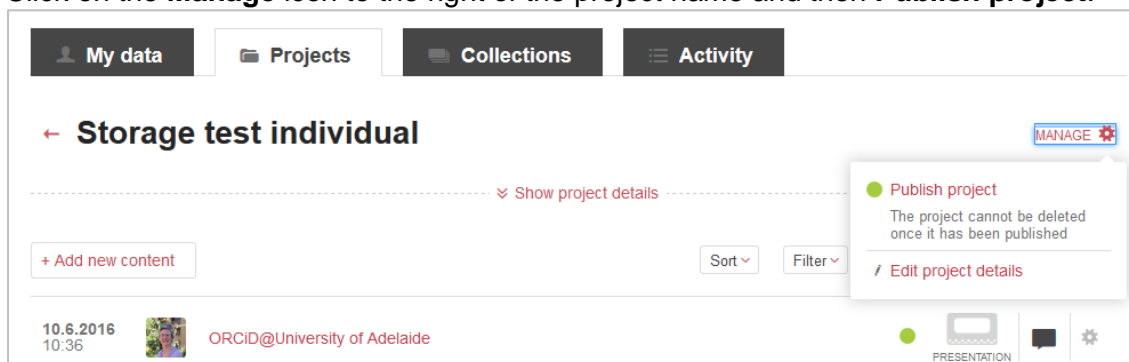

To publish a project, the project must contain at least one published item. Only the published items will be publically visible in a published project. Projects can only be published by the project manager.

Procedure

1. Click on the **Projects** tab.
2. Click on the title of your desired project, or search for it using the search bar at the top-right corner.

3. Click on the **Manage** icon to the right of the project name and then **Publish project**.

Note: once published, a project can't be deleted.
