

Connecting to Eduroam Apple iOS

Introduction

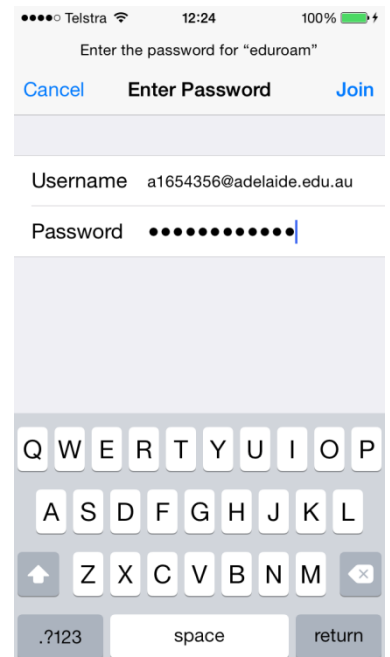

This guide will assist you in connecting to the eduroam network, which allows you to connect to over more than half of Australian universities with your UofA credentials. **It is important to note that the username for this network is slightly different than your normal UofA wireless credentials.**

It is strongly recommended that you connect to the eduroam network while on a UofA campus before attempting the connection elsewhere.

Procedure

1. After unlocking your phone, select the 'Settings' button 
2. Select 'WiFi' from the Settings menu
3. Make sure Wi-Fi is turned on, and then select 'Eduroam' from the list
4. After selecting 'Eduroam', enter your 'a' number for the username followed by @adelaide.edu.au (eg a1234567@adelaide.edu.au)
5. Then enter in your password and click 'Join'
6. You will then need to accept the Certificate pop-up
7. You will now see Eduroam show as 'Connected'

Please note that if you do not accept the certificate, you will not be able to connect the wireless network.
